Net working capital requirements (A – B)	678.39	1,113.95

Our Company intends to continue growing by expanding our operation and geographical reach. All these factors require huge working capital requirements in a very effective manner. Our

inability to maintain sufficient cash flow and credit facility in timely manner could adversely affect our operation and profitability of the Company. For Further details regarding working capital requirement, please refer to the Chapter “Objects of the Issue” beginning on Page 82 of this Red Herring Prospectus.

10. We are subject to risks associated with potential acquisitions and our expansion strategy.

One of the Objects of the Issue is to utilize a part of the net proceeds towards acquisition of Dr. Smith Biotech Private Limited. This type of strategic acquisitions requires substantial capital expenditure. Cash generated from our existing operating activities, taken together with proceeds from the Offer and funds that are available under our existing credit facilities, may not be sufficient to fund our current expansion strategy and we may need other third-party financing to support our strategy. If such third-party financing is insufficient or not available on commercially acceptable terms, these additional expansion opportunities could be curtailed or stopped until sufficient funding is secured. Any business that we acquire may have unknown or contingent liabilities, including liabilities for failure to comply with healthcare laws and regulations, and we may become liable for the past actions of such businesses.

11. Our cost of production is exposed to fluctuations in the prices of materials. Our Company is dependent on third party suppliers for procuring the raw material.

We are exposed to fluctuations in the prices of these raw materials as well as their unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favorable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

12. If we cannot respond adequately to the increased competition we expect to face, we will lose market share and our profits will decline, which will adversely affect our business, results of operations and financial condition.

Our products face intense competition from products commercialized or under development by competitors in all of our product portfolios. We compete with local companies, multi-national corporations and companies from the rest of world. If our competitors gain significant market share at our expense, our business, results of operations and financial condition could be adversely affected. Many of our competitors may have greater financial, manufacturing, research and development, marketing and other resources, more experience in obtaining regulatory approvals, greater geographic reach, broader product ranges and stronger sales forces. Our competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Also, we face pressure on our margins due to pricing competition from several small and unorganized local players. Presence of more players in the unorganized sector compared to organized ones has resulted in increasingly competitive environment characterized by stiff price competition.

13. Any disruption in production at, or shutdown of, our sole manufacturing facility could adversely affect our business, results of operations and financial condition.

We own and operate only one manufacturing facility situated at Roorkee, Uttarakhand. All of our products are manufactured at this facility only. The locality of the facility is prone to natural calamities evidenced by the events happened in the recent past such as floods, heavy rains, etc. Therefore, in the event any natural calamity in the area, our ability to manufacture the products may be adversely affected. Apart from natural calamities, our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

14. Any manufacturing or quality control issues may damage our reputation for high quality products and expose us to litigation or other liabilities, which could adversely affect our financial results.

Being a manufacturer of Nutraceutical and Wellness Products, we are subject to significant regulatory scrutiny. Our manufacturing facility at Roorkee, Uttarakhand must manufacture products in accordance with Good Manufacturing Practices stipulated by WHO, State level food and drug administrations, and other regulatory agencies, as applicable. Further, we are liable for the quality of our products for the entire duration of the shelf life of the product manufactured by us. After our products reach the market, certain developments could adversely affect demand for our products, including any contamination of our products by intermediaries, re-review of products that are already marketed, new scientific information, greater scrutiny in advertising and promotion, the discovery of previously unknown side effects or the recall or loss of approval of products that we manufacture, market or sell. Disputes over non-conformity of our products with such quality standards or specifications are generally referred to independent government approved testing laboratories. If any such independent laboratory confirms that our products do not conform to the prescribed or agreed standards and specifications, we shall have to bear the expenses of replacing and testing such products, which could adversely affect our business, results of operations and financial condition. We also face the risk of loss resulting from, and the adverse publicity associated with, manufacturing or quality problems. Such adverse publicity harms the brand image of our Company and products. We may be subject to claims resulting from manufacturing defects or negligence in storage and handling of our products. Any loss of our reputation or brand image, for whatsoever reason may lead to a loss of existing business contracts and adversely affect our ability to enter into additional business contracts in the future. We currently carry no products liability insurance with respect to our manufactured products.

15. The Appraisal Report envisages certain threats and concerns, in respect of the setting up of additional manufacturing facility proposed to be set up by the company, which might affect our profitability and results of operation. The concerns and threats provided for in the appraisal report have been enumerated below.

The weakness and threats provided for setting up of additional manufacturing facility in the appraisal report of Mitcon Consultants & Engineering Services Limited dated March 21, 2018 have been enumerated below:

Strengths:	Opportunities:

<ul style="list-style-type: none"> • Rich experience in Marketing & Selling led by our Managing Director, Suraj Zanwar supported by skilled manpower • More than 2000 brand diversified portfolio catering to all the segments with presence PAN India • Experience of the Promoters in the related business for over 18 years • Access to the right vendors and materials to allow them to turn around orders quicker than other companies in their field • Have the type of purchasing power that gives them better prices on materials • Well-established distribution network extending to rural areas • Strong brands in the FMCG sector • Low cost operations 	<ul style="list-style-type: none"> • Entry in the market of Govt., Supply and Exports where own Mfg. Is a pre-requisite • Reduction in Inventory holding coupled with improved quality and timely delivery • Capitalization on the marketing setup by backward integration thereby reducing the dependency on contract manufacturers • Due to increased health awareness in India, the setting up of number of hospitals / clinics with laboratories are expected to increase every year, which is expected to gives boost to market company's products • Global market is lucrative • Can take help of expertise from technical persons to curb competition • Large domestic market • Export potential • Increasing income levels is estimated to result in faster revenue growth • Indian government's Swachh Bharat mission • GST lowered duty • Increasing purchasing power and premiumisation of soaps has created a growing need for premium, feature-rich products, such as herbal soaps
Weaknesses:	Threats:
<ul style="list-style-type: none"> • Stringent pricing regulations by Govt. may affect the profitability of the Company • Presence of more unorganized players versus the organized ones, resulting in increasingly competitive environment characterized by stiff price competition • More dependent on contract manufacturing • QA & QC need more pro-active roles • Low export levels 	<ul style="list-style-type: none"> • Changes in Government policies • Supply chain disruption • Excessive lead times in case of more contract work • Inventory float and the difficulty of tracking it • Imports and regulatory structure • Slowdown in rural demand • Presence of chemicals and other toxic elements in soaps can damage skin texture or trigger allergies, in some people

16. The availability of counterfeit products, such as products passed off by others as our products, could adversely affect our goodwill and results of operations.

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. We may have to invest in our products to prevent counterfeit versions of our products from being distributed in the markets. Such measures include, monitoring products in the market and initiating actions against counterfeiters, each of which may entail incurring significant costs at our end. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

17. Our lenders have imposed certain restrictive conditions on us under our financing arrangements.

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. Further certain agreements also impose financial and other restrictive covenants such as maintenance of financial ratios, submission of results, etc. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance. For further details in this regard, please refer chapter titled “*Financial Indebtedness*” beginning on page 235 of this Red Herring Prospectus.

18. We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.

We export our Products from India and payment for these sales is received in foreign currency. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company’s results of operations.

19. Our operations are subject to various risks inherent to our business activities and we do not maintain insurance coverage in accordance with applicable industry standards.

Our business operations involve significant risks and occupational hazards that are inherent to our business activities and may not be eliminated through the implementation of preventive measures. These risks and hazards could result in personal injury, grievous hurt or even death of our personnel, which could result in additional litigation costs, damage to or destruction of properties, environmental damage, business interruption, legal liability, damage to our business reputation and corporate image and, in severe cases, fatalities. The occurrence of natural disasters including severe weather, floods, power outages and the consequences, damages and disruptions resulting from them may adversely affect our business and operations. In addition, natural disasters or accidents can result in unexpected hazards, such as fires, explosions and discharge of toxic gases etc. We may become subject to liabilities, including liabilities for environmental or industrial accidents or pollution or other hazards, in addition to compensation payable to personnel affected by any such incidents. It may have a material adverse impact on our business, reputation, financial condition and results of operations.

20. The laws of various countries govern our Suppliers contracts and disputes arising from such contracts may be subject to the exclusive jurisdiction of courts situated in such countries.

Several of our sale orders executed with our suppliers are governed by the laws of the country in which either the supplier is incorporated or where the business of the supplier is situated and any disputes related to such contracts may be subject to the exclusive jurisdiction of courts situated in such countries. Lawsuits with respect to such disputes may be instituted in courts situated

outside India, and it may become unfeasible for our Company to manage such litigation or obtain enforcement of awards made in such suits. Further, we may also incur significant litigation costs as a result of pursuing dispute resolution mechanisms outside India.

21. Delays or defaults in client payments could result in a reduction of our profits. We may be subject to working capital shortages due to delays or defaults in payments by clients.

If client(s) default in their payments in due time to which we have devoted significant resources it could have a material adverse effect on our business, financial condition and results of operations and could cause the price of our Equity Shares to decline.

22. Our Company's failure to maintain the quality standards of the products or keep pace with the technological developments could adversely impact our business, results of operations and financial condition.

Our products depend on recent inventions and developments as we manufacture and market the products as per the market trends. Any failure to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Also, rapid change in our customers' expectation on account of changes in technology or introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always introduced new products based on consumers need to cater to the growing demand of our customers and also endeavor regularly update our existing technology, our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

23. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

Our company has issued letter of intent along with offer letter to Suraj Zanwar and Kavita Zanwar holding 16,10,367 and 5,89,633 equity shares respectively aggregating to 73.20% and 26.80% respectively of the total paid-up share capital of Dr. Smiths for purchase of shares.

Any disruptions in meeting the object of the issue could materially and adversely affect our business, financial condition and results of operations.

25. We have indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

As of December 31, 2018, we have outstanding debt of 4337.05 lakhs. (Including Short term and Long-Term Borrowings) Such level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- Affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialize, our business and results of operations may be adversely affected. For further information, see section titled “*Financial Indebtedness*” on page 235 of this Red Herring Prospectus.

26. Our Company is dependent on third party transportation for the delivery of raw materials and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation for delivery of our raw materials and finished goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition, such goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure raw materials or delivery of goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

27. We rely extensively on our systems, including quality assurance systems, products processing systems and information technology systems, the failure of which could adversely affect our business, financial condition and results of operations.

We depend extensively on the capacity and reliability of the quality assurance systems, product processing systems and information technology systems, supporting our operations. Considering

the nature of our business and the industry in which we operate, it is imperative for us to have a robust information technology platform. If our data capturing, processing and sharing cannot be integrated and/ or we experience any defect or disruption in the use of, or damage to, our information technology systems, it may adversely affect our operations and thereby our business and financial condition. Our systems are also subject to damage or incapacitation by natural disasters, human error, power loss, sabotage, computer viruses, hacking, acts of terrorism and similar events or the loss of support services from third parties. Any disruption in the use of, or damage to, our systems may adversely affect our business, financial condition and results of operations.

28. Our Company has no formal supply agreement or contract with some of our vendors/suppliers for the uninterrupted supply of major raw materials. Our business may be adversely affected if there is any disruption in the raw material supply or due to non-availability of raw material.

We do not have any formal agreements with some of our vendors/suppliers as we operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all and delayed supplies which would materially affect our results of operations. In the event of any disruption in the raw materials supply or the non-availability of raw materials, the production and dispatch schedule may be adversely affected impacting the sales and profitability of the Company. In the event the prices of such raw materials were to rise substantially, we may find it difficult to make alternative arrangements for supplies of our raw materials, on the terms acceptable to us, which could materially affect our business, results of operations and financial condition.

29. Introduction of alternative products caused by changes in technology or consumer needs may affect demand for our existing products which may adversely affect our financial results and business prospects.

Our products are mainly used in the healthcare sector to cater to masses. Our business is affected by change in technology, consumer needs, market perception of brand, convenience, health and safety norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers' businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of our businesses and consumer needs may have an adverse effect on our business, profitability and growth prospects.

30. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition.

As on date of this Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for some of the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this offer or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "*Objects of the Issue*" beginning on page 82 of this Red Herring Prospectus.

31. Our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits and terrorism. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.

Our insurance policies consist of, among others, standard fire and special perils, earthquake, etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits, losses due to terrorism, etc. Further there can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

32. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” beginning on page 178 of this Red Herring Prospectus.

33. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

34. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into transactions with our certain related parties. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please see section titled “*Financial Statements*” beginning on page 179 of this Red Herring Prospectus.

35. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be

able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

36. Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoter and Promoter Group will collectively own [•] % of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

37. Our Company is dependent on third party transportation for the delivery of raw materials and finished goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation for delivery of our raw materials and finished goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition such goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure raw materials or delivery of goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

38. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or distributors will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

39. Third party industry and statistical data in this Red Herring Prospectus may be incomplete, incorrect or unreliable.

Neither the Lead Manager nor the Company have independently verified the data obtained from the official and industry publications and other sources referred in this Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information, please refer to section titled "*Industry Overview*" beginning on page no. 101 of this Red Herring Prospectus.

40. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

41. Our Company has not complied with certain statutory provisions under various acts. Such non-compliance/lapses may attract penalties.

Our Company is required to make filings under various rules and regulations as applicable under the Companies Act, 2013 and under the applicable provisions of the Companies Act, 1956 some of which have not been done within the stipulated time period as mentioned in the statutory act(s). Such delay/noncompliance may in the future render us liable to statutory penalties and disallowing the resolutions, which may have consequence of violation of statutory provisions concerned. While this could be attributed to technical lapses and human errors, our Company is in the process of setting up a system to ensure that requisite filings are done appropriately with the requisite timeline.

42. The Company has not placed orders for Plant & Machinery for our proposed object, as specified in the Objects of the Offer.

Any delay in placing orders, procurement of plant & machinery and equipment's may delay our implementation schedule and may also lead to increase in price of these plant & machinery and equipment's, further affecting our revenue and profitability. As on date of the Red Herring Prospectus, we have not placed orders for plant & machinery required to be set up. Our Company has not made any advance payment towards the same. We have identified the type of plant and machinery required to be bought towards proposed object. However, we are yet to place orders for entire 100.00% of the Plant & Machinery as detailed in the "*Objects of the Issue*" beginning on Page 82 of this Red Herring Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management's views of the desirability of current plans, change in supplier of equipment's, among others, which may have an adverse effect on our business and results of operations.

Further, we cannot assure that we would be able to procure these plant and machinery, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the Project, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled *"Objects of the Issue"* beginning on page 82 of this Red Herring Prospectus.

43. Our Promoter and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration.

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives, and benefits deriving from their directorship and shareholding in our Company. Our Promoter are interested in the transactions entered into between our Company and themselves. For further details, please refer to the chapters titled *"Business Overview"* and *"Our Promoter and Promoter Group"*, beginning on page nos. 124 and 174 respectively and the chapter titled *"Financial Statements"* on page 179 of this Red Herring Prospectus.

44. Our manufacturing facility is currently underutilized.

Our Manufacture process is a manual or semi - automated processes to certain extent and limited capacity of certain ancillary machineries like packing machinery and also due to the wet & dry machine cleaning process we are unable to fully utilize the existing capacity of our manufacturing facility. We propose to upgrade our manufacturing facility by utilizing some portion of the Net Proceeds so as to enable us to enhance our capacity utilization and thereby expand our business operations and consequently results of operations. For further details, please refer chapter titled *"Objects of the Issue"* beginning on page 82 of the Red Herring Prospectus. However, if we are not able to upgrade our manufacturing facility in the planned manner, we may not be able to fully utilize our installed capacity and thereby absorb our fixed costs. Consequently, we may be unable to expand our business operations and take advantage of the business opportunities available.

45. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed fund requirement of working capital, as detailed in the chapter titled *"Objects of the Issue"* beginning on Page 82 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe.

46. Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them.

Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company. Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

We intend to use part of the net proceeds towards setting up of additional manufacturing facility. We intend to deploy the net issue proceeds in financial year 2018-19- and such deployment is based on certain assumptions and strategy which our company believes to implement in future. While the Company has obtained an appraisal report for setting up of its additional manufacturing facility and shall be following the schedule of implementation and deployment as per the appraisal report, however there can no assurance that the funds raised from the issue may not remain idle on account of change in assumptions, market conditions, strategy of our company, etc. For further details on the issue of net proceeds, please refer chapter titled "Objects of the Issue" beginning on page 82 of this Red Herring Prospectus.

48. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the offer price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer Price of our Equity Shares has been determined by book building method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

49. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS:

Industry Risks:

50. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur

increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

51. Malpractices by some players in the industry affect overall performance of emerging Companies.

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like our as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

52. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Please refer to "*Key Industry Regulations and Policies*" beginning on page 144 for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

54. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

55. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

56. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

59. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed NNM Securities Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

Illustration of Book Building and Price Discovery Process: *(Investors should note that this example is solely for illustrative purposes and is not specific to the Issue)*

Bidders can bid at any price within the price band. For instance, assume a price band of ₹20 to ₹24 per equity share, issue size of [●] equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors

Bid Quantity	Bid Amount	Cumulative Quantity	Subscription
500	24	500	16.67%
1000	23	1500	50.00%
1500	22	3000	100%
2000	21	5000	166.67%
2500	20	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The issuer, in consultation with the Book Running Book Running Lead Manager will finalize the issue price at or below such cutoff price, i.e., at or below ₹ 22.00. GLOBAL OUTLOOK

Global growth has eased but remains robust and is projected to reach 3.1 percent in 2018. It is expected to edge down over the next two years as global slack dissipates, trade and investment moderate, and financing conditions tighten. Growth in advanced economies is forecast to decelerate toward potential rates as monetary policy is normalized and the effects of U.S. fiscal stimulus wane. In emerging market and developing economies (EMDEs), growth in commodity importers will remain strong, while the rebound in commodity exporters is projected to mature over the next two years. For the first time since 2010, the long-term (10-year-ahead) consensus forecast for global growth appears to have stabilized. Although this development could signal that the legacies of the global financial crisis are fading, past experience cautions that long-term forecasts are often overly optimistic. While well below levels expected a decade ago, these forecasts also remain above potential growth estimates. Moreover, risks to the outlook are tilted to the downside. They include disorderly financial market movements, escalating trade protectionism, and heightened geopolitical tensions. EMDE policymakers should rebuild monetary and fiscal policy buffers and be prepared for rising global interest rates and possible episodes of financial market turbulence. In the longer run, adverse structural forces continue to overshadow long-term growth prospects implying that EMDEs need to boost potential growth by promoting competitiveness, adaptability to technological change, and trade openness. These steps will help mitigate an expected growth slowdown over the next decade, especially if long-term growth forecasts fall once again short of expectations.

Regional Perspectives: A cyclical recovery is underway in most EMDE regions that host a substantial number of commodity exporters. Over the next two years, the upturn in these regions is expected to mature, as commodity prices plateau. Robust economic activity in EMDE regions with large numbers of commodity importers is forecast to continue. However, risks to the growth outlook continue to tilt to the downside in many regions. This edition of Global Economic Prospects includes sections on the role of the largest emerging markets in global commodity markets and on the implications of high corporate debt for financial stability and investment.

The Role of Major Emerging Markets in Global Commodity Demand: Rapid growth among the major emerging markets over the past 20 years has boosted global demand for commodities. The seven largest emerging markets (EM7) accounted for almost all of the increase in global consumption of metals and two-thirds of the increase in energy consumption over this period. As these economies mature and shift towards less commodity-intensive activities, their demand for most commodities may level off. While global energy consumption growth may remain broadly steady, global metals and foods demand growth could slow by one-third over the next decade. This would dampen global commodity prices. For emerging market and developing economies that depend on raw materials for government and export revenues, these prospects reinforce the need for economic diversification and the strengthening of policy frameworks.

Indian Healthcare Industry Analysis:

The Indian healthcare sector is expected to reach US\$ 280 billion by 2020. Rising income level, greater health awareness, increased precedence of lifestyle diseases and improved access to insurance would be the key contributors to growth. The sector is expected to generate 40 million jobs in India by 2030. 100,000 jobs are expected to be created from Ayushman Bharat, the National Health Protection Scheme. As of November 14, 2018, number of sub-centres reached 167,961 and number of Primary Health Centres (PHCs) increased to 33,137. The hospital industry in India stood at ₹ 4 trillion (US\$ 61.79 billion) in FY17 and is expected to reach ₹ 8.6 trillion (US\$ 132.84 billion) by FY22.

The private sector has emerged as a vibrant force in India's healthcare industry, lending it both national and international repute. It accounts for almost 74 per cent of the country's total healthcare expenditure. Telemedicine is a fast-emerging trend in India; major hospitals (Apollo, AIIMS, and Narayana Hrudayalaya) have adopted telemedicine services and entered into a number of public-private partnerships (PPP). Further, presence of world-class hospitals and skilled medical professionals has strengthened India's position as a preferred destination for medical tourism.

The Government of India aims to develop India as a global healthcare hub. It has created the Intensified Mission Indradhanush for improving coverage of immunisation in the country and reaches every child under two years of age and all the pregnant women who have not been part of the routine immunisation programme. In March 2018, Union Cabinet approved budget support of ₹ 85,271 crore (US\$ 13.16 billion) for the period of April 2017- March 2020 under the National Health Mission to encourage medical infrastructure in India. In August 2018, the Ministry of Health and Family Welfare set up national Resource Centre for EHR Standards (NRCeS) to facilitate adaptation of notified EHR standards, at an estimated cost of ₹ 23.59 crore (US\$ 3.52 million).

Introduction to Fast-Moving Consumer Goods (FMCG) Sector in Indian

Fast-moving consumer goods (FMCG) sector is the 4th largest sector in the Indian economy with Household and Personal Care accounting for 50 per cent of FMCG sales in India. Growing awareness, easier access and changing lifestyles have been the key growth drivers for the sector. The urban segment (accounts for a revenue share of around 55 per cent) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared with urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50 per cent of total rural spending.

Market Size

The Retail market in India is estimated to reach US\$ 1.1 trillion by 2020 from US\$ 840 billion in 2017, with modern trade expected to grow at 20 per cent - 25 per cent per annum, which is likely to boost revenues of FMCG companies. Revenues of FMCG sector reached Rs 3.4 lakh crore (US\$ 52.75 billion) in FY18 and are estimated to reach US\$ 103.7 billion in 2020. The sector witnessed growth of 16.5 per cent in value terms between July-September 2018; supported by moderate inflation, increase in private consumption and rural income.

Investments / Developments

The government has allowed 100 per cent Foreign Direct Investment (FDI) in food processing and single-brand retail and 51 per cent in multi-brand retail. This would bolster employment and supply chains, and also provide high visibility for FMCG brands in organised retail markets, bolstering consumer spending and encouraging more product launches. The sector witnessed healthy FDI inflows of US\$ 13.63 billion, during April 2000 to June 2018. Some of the recent developments in the FMCG sector are as follows:

- Patanjali will spend US\$743.72 million in various food parks in Maharashtra, Madhya Pradesh, Assam, Andhra Pradesh and Uttar Pradesh.
- Dabur is planning to invest ₹ 250-300 crore (US\$ 38.79-46.55 million) in FY19 for capacity expansion and is also planning to make acquisitions in the domestic market.
- In May 2018, RP-Sanjiv Goenka Group created and ₹ 1 billion (US\$ 14.92 million) venture capital fund to invest in FMCG start-ups.
- In August 2018, Fonterra announced a joint venture with Future Consumer Ltd which will produce a range of consumer and foodservice dairy products.

Government Initiatives

Some of the major initiatives taken by the government to promote the FMCG sector in India are as follows:

- The Government of India has approved 100 per cent Foreign Direct Investment (FDI) in the cash and carry segment and in single-brand retail along with 51 per cent FDI in multi-brand retail.
- The Government of India has drafted a new Consumer Protection Bill with special emphasis on setting up an extensive mechanism to ensure simple, speedy, accessible, affordable and timely delivery of justice to consumers.
- The GST is beneficial for the FMCG industry as many of the FMCG products such as Soap, Toothpaste and Hair oil now come under 18 per cent tax bracket against the previous 23-24 per cent rate.
- The GST is expected to transform logistics in the FMCG sector into a modern and efficient model as all major corporations are remodeling their operations into larger logistics and warehousing.

Achievements:

Following are the achievements of the government in the past four years:

- Number of mega food parks ready increased from 2 between 2008-14 to 13 between 2014-18.
- Preservation and processing capacity increased from 308,000 during 2008-14 to 1.41 million during 2014-18.
- The number of food labs increased from 31 during 2008-14 to 42 during 2014-18.

Road Ahead

Rural consumption has increased, led by a combination of increasing incomes and higher aspiration levels; there is an increased demand for branded products in rural India. The rural FMCG market in India is expected to grow to US\$ 220 billion by 2025 from US\$ 23.6 billion in FY18. In FY18, FMCG's rural segment contributed an estimated 10 per cent of the total income and it is forecasted to contribute 15-16 per cent in FY 19. ^ FMCG sector is forecasted to grow at 12-13 per cent between September–December 2018. On the other hand, with the share of unorganized market in the FMCG sector falling, the organised sector growth is expected to rise with increased level of brand consciousness, also augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in the country's urban regions. India has a large base of young consumers who form the majority of the workforce and, due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient means to increase a company's reach. It is estimated that 40 per cent of all FMCG consumption in India will be online by 2020. The online FMCG market is forecasted to reach US\$ 45 billion in 2020 from US\$ 20 billion in 2017. It is estimated that India will gain US\$ 15 billion a year by implementing the GST. GST and demonetization are expected to drive demand, both in the rural and urban areas, and economic growth in a structured manner in the long term and improve performance of companies within the sector. (Exchange Rate Used: INR 1 = US\$ 0.0142 as on Q2 FY 18)

Our Strategy

1. Broaden and Deepen our presence at Global level:

A Company can broaden and deepen its presence at Global level by increasing its exports. The biggest source of upside potential will be exports. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 percent of global exports in terms of volume. Of late, consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented. Currently we undertake both direct and deemed exports. Our strategy to expand our export sales includes appointment of local distributors in different countries to market

our products, reach out to foreign consumers through e-commerce, form important relationships with companies with strong local presence, develop products as per international market standards and needs, etc.

2. Investment in R&D driving sustainable growth:

We intend to continue to drive our R&D initiatives towards the development of innovative formulations for our domestic as well as international market and develop on our brand value. Our primary focus is to research and innovate new formulations to increase the portfolio of our products, so that the Company can get a competitive edge over its peers. We also intend to improve our R&D capabilities, with a focus on capturing more high value first-to-market opportunities in key international markets, as well as leveraging our broad product basket to enhance our market position at global level.

3. Expansion Plans

Keeping in view of increasing demands from domestic, governments / institutional buyers and export markets Cian has envisaged expansion of manufacturing facilities. Expansion is being planned in existing Roorkee plant with additional building, plant and machinery.

The plant at Roorkee is developed, which is Roorkee-I site. The new construction at Roorkee is a part of the extension of original building as a Roorkee-II site.

Cian Healthcare has the requisite manpower at its plant at Roorkee. For this expansion project, skilled and unskilled labours and strengthening of our quality control is required.

Under Roorkee-II Expansion plan, we are doing expansions of manufacturing capacities of Tablets, Capsules, Ayurvedic tablet, Ayurvedic Capsules, Ayurvedic Syrup, Cosmetics – Creams & Lotions, Soaps, Protein Powder, and Effervescent Tablets.

With this our Tablet capacity will increase by 35 Cr Tablets, 5 Cr Capsules, Syrup by 15 Lacs bottles and Cosmetics by 40 Lacs tubes per month.

We are adding a building of 40,000 sq. feet *

I. **Industry Regulations**

The Micro, Small and Medium Enterprise Development Act, 2006 ("MSMED Act")

The MSMED Act seeks to provide for the promotion and development along with facilitating and enhancing competition among micro, small and medium enterprises. The MSMED Act inter-alia empowers the Central Government to classify by notification, any class of enterprises including a company, a partnership, firm or any other undertaking engaged in the manufacture or production as specified in the first schedule to the Industries (Development and Regulation) Act, 1951, as follows:

The Drugs and Cosmetics Act, 1940 ("The DCA, 1940") and the relevant rules

The DCA regulates the import, manufacture, distribution and sale of drugs and cosmetics. In view of the provisions of the DCA, no person can import, manufacture, distribute, stock and sell any drugs and cosmetics, except under the license granted for respective operations by the authority notified under the DCA. The DCA prescribes the standards for purity, identity and strength of drugs and cosmetics while also prohibiting the import of certain categories of drugs and cosmetics. The DCA mandates that every person holding a license must keep and maintain such records, registers and other documents as may be prescribed which may be subject to inspection by the relevant authority. The DCA provides for the Ayurvedic Siddha and Unani Drugs Technical Advisory Board to advise the Central and State Governments on technical matters. The legislation provides the procedure for testing and licensing of new drugs. These procedures involve obtaining a series of approvals for different stages at which the drugs are tested, before the Drug and Controller General of India ("**DCGI**") grants the final license to allow the drugs to be manufactured and marketed. At the first instance, an application is made to the DCGI, an authority established under the DCA. The DCGI issues a no objection certificate upon examining the medical data, the chemical data and the toxicity of the drug. This allows the drug to move on to the next stage of testing at the central drug laboratories. At the central drug laboratories, the drug is subjected to a series of tests for its

chemical integrity and analytical purity and if it meets the standards required by the authority, the authority issues a certificate in that respect.

The Drugs and Cosmetics Rules, 1945 ("**DC Rules**") have been enacted to give effect to the provisions of the DCA to regulate the manufacture, distribution and sale of drugs and cosmetics in India. The DC Rules prescribe the procedure for submission of report to the Central Drugs Laboratory, of samples of drugs for analysis or test, the forms of Central Drugs Laboratory's reports thereon and the fees payable in respect of such reports. The DC Rules also prescribe the drugs or classes of drugs or cosmetics or classes of cosmetics for the import of which a license is required, and prescribe the form and conditions of such licenses, the authority empowered to issue the same and the fees payable thereof. The DC Rules provide for the cancellation or suspension of such license in any case where any provisions or rule applicable to the import of drugs and cosmetic is contravened or any of the conditions subject to which the license is issued is not complied with. The DC Rules further prescribe the manner of labeling and packaging of drugs. The DC Rules lay down the process mechanics and guidelines for clinical trial, including procedure for approval for clinical trials. Clinical trials require obtaining of free, informed and written consent from each study subject. The DC Rules also provide for compensation in case of injury or death caused during clinical trials. The Central Drugs Standard Control Organization has issued the guidance for industry for submission of clinical trial application for evaluating safety and efficacy, for the purpose of submission of clinical trial application as required under the DC Rules. The Indian Council of Medical Research has issued the Ethical Guidelines for Biomedical Research on Human Participants, 2006 which envisages that medical and related research using human beings as research participants must, necessarily, *inter alia*, ensure that the research is conducted in a manner conducive to, and consistent with, their dignity, well-being and under conditions of professional fair treatment and transparency. Further such research is subjected to evaluation at all stages of the same.

The Essential Commodities Act, 1955 ("ECA")

The ECA provides for the control of the production, supply and distribution of, and trade and commerce in certain commodities. The ECA gives powers to the Government amongst others, to control production, supply and distribution of essential commodities for maintaining or increasing supplies and for securing their equitable distribution and availability at fair prices. Using the powers under it, various ministries/departments of the Government have issued control orders for regulating production, distribution, quality aspects, movement and prices pertaining to the commodities which are essential and administered by them. The State Governments have issued various control orders to regulate various aspects of trading in essential commodities such as food grains, edible oils, pulses kerosene, sugar and drugs. The Collector of the District or the concerned authority has the power to confiscate the commodity if it contravenes the order.

The Drugs Price Control Order, 2013 ("the DPCO, 2013")

The DPCO, 2013 was issued by the Central Government in exercise of its powers under the Essential Commodities Act, 1955. As per the provisions of the DPCO, 2013 the government may, in order to achieve adequate availability and to regulate the distribution of drugs, in cases of emergency or in the interest of the public, direct any manufacturer of any active pharmaceutical ingredient or bulk drug or formulation to increase the production and to sell such active pharmaceutical ingredient or bulk drug to such other manufacturer(s) of formulations and to direct formulators to sell the formulations to institutions, hospitals or any agency as the case may be. The DPCO, 2013 also lays down the formulae for calculation of ceiling prices and retail prices of drug formulation. Section 7 of the Essential Commodities Act, 1955 provides for the list of certain price-controlled drugs and the penalty for contravention

of the provisions of the DPCO, 2013. The DPCO, 2013 also provides that when an existing manufacturer of a drug with dosages and strengths as specified in National List of Essential Medicines launches a new drug, such existing manufacturer is required to apply for prior price approval of such new drug from the government. The DPCO, 2013 also prescribes certain instances in which case the provision of the DPCO, 2013 will not be applicable, for instances, in the event a manufacturer produces a new drug patented under the Indian Patent Act, 1970 through a product patent which has been developed through indigenous research and development, the DPCO, 2013 will not be applicable to such drug for a period of five years from the date of commencement of its commercial production in the country.

National Pharmaceutical" Pricing Policy, 2012 ("2012 Policy")

The 1994 Policy regulated the prices based on the economic criteria/market share principles. However, as per the 2012 Policy, the prices would be regulated based on the essential nature of the drugs. Further, the 2012 Policy will regulate the price of formulations only, through market based pricing which is different from the earlier principle of cost based pricing. Accordingly, the formulations will be priced by fixing a ceiling price and the manufacturers of such drugs will be free to fix any price equal to or below the ceiling price.

The National List of Essential Medicines, 2015

The National List of Essential Medicines, 2015 has been introduced to replace the National List of Essential Medicines, 2011. This new list has added a total number of 160 medicines and has deleted 70 medicines, which now contains a total of 376 medicines. The essentiality of a medicine has been considered in terms of its dosage form and strength.

The Transfer of Property Act, 1882

The Transfer of Property Act, 1882 as amended, establishes the general principles relating to transfer of property in India. It forms a basis for identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingencies and vested interest in the property. It also provides for the rights and liabilities of the vendor and purchaser in a transaction of sale of land.

The prima facie duty of the Competitive Commission of India ("CCI") is to eliminate practices having adverse effect on competition, promote and sustain competition, protect interest of consumer and ensure freedom of trade. The CCI shall issue notice to show cause to the parties to combination calling upon them to respond within 30 days in case it is of the opinion that there has been appreciable adverse effect on the competition of India. In case a person fails to comply with directions of CCI and the Director General, he shall be punishable with a fine which may exceed to ₹ 1 lakh for each day during such failure subject to maximum of ₹ 1Crore.

The Consumer Protection Act, 1986

The Consumer Protection Act aims at providing better protection to the interests of consumers and for that purpose makes provisions for the establishment of authorities for the settlement of consumer disputes. The Consumer Protection Act provides a mechanism for the consumer to file a complaint against a trader or service provider in cases of unfair trade practices, restrictive trade practices, defects in goods, deficiency in services; price charged being unlawful and goods being hazardous to life and safety when used. The Consumer

Protection Act provided for a three tier consumer grievance redressal mechanism at the national, state and district levels.

Section 17 of the Registration Act identifies documents for which registration is compulsory to bring the transaction to effect and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India has from time to time made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Foreign investment is allowed up to 100% under automatic route in our Company subject to certain conditions. The aggregate limit of 10% in case of NRIs and OCIs together may be raised to 24 % if a special resolution to that effect is passed by the Shareholders of the Indian company concerned.
