In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

This Draft Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 15 of this Draft Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Restated Financial Information.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. The COVID-19 pandemic has had, and is expected to have, a material adverse effect on the garments industry which had a negative impact on our business, financial condition, results of operations and cash flows.***

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the third wave of the virus and the likelihood of a fourth wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Further if in case due to any fourth or consequent wave of Coronavirus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

- 2. We require several approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of “Mafia Trends Limited” from “Mafia Trends Private Limited” pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.***

We require several approvals, licenses, registrations and permits in ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. Also, we were a private limited company in the name of “Mafia Trends Private Limited” which was carrying business. After complying with the relevant procedure of Companies Act, 2013, the said private limited company was converted into a public limited company in the year 2022. Upon conversion there was change of name of the company from “Mafia Trends Private Limited” to “Mafia Trends Limited”. We shall be taking necessary steps for transferring the approvals in new name of our Company. In case we fail to transfer/obtain the same in name of the Company the same may adversely affect our business or we may not be able to carry our business. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. Also, Company is in process for applying certain licenses and registrations, for further details, see chapter “Government and Other Statutory Approvals” on page 165 of this Draft Prospectus.

- 3. We are required to obtain licenses and approvals under several legislations. Our inability to obtain or renew such permits, approvals and licenses in the ordinary course of our business may adversely affect our business, financial condition and results of operations.***

We are required to obtain and renew various licenses and approvals under several legislations from time to time, such as, the Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019, the Employees’ Provident Funds and Miscellaneous Provisions Act, 1952 and the relevant rules and regulations. These approvals, licenses, registrations and permits are subject to several conditions and are primarily valid for a specific period. However, in some cases, these licenses could have been granted for shorter period as well. These licenses contain certain terms and conditions which are required to be complied with throughout the period of the license. In respect of the licenses which are applicable to us and have not been availed by our Company, we may not be able to comply with the terms listed therein, for instance, we have not availed a provident fund registration under the Employees’ Provident Funds and Miscellaneous Provisions Act, 1952 and therefore the relevant compliances relating to provident fund for our employees have not been complied with. We cannot assure you that we shall be able to obtain or renew such licenses or

be able to continuously meet such conditions specified in such licenses or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant consents/permits/licenses/approvals. With respect to some of our outlets, while we do not require to obtain any specific approval or license at this stage, we may, in the future, at future relevant stages require to apply for and obtain any such approvals or licenses that may be required to be obtained. We cannot assure you that we shall be able to obtain such licenses or approvals on a timely manner or at all which may affect the timelines or the operations of the outlet. We cannot assure you that the relevant authorities will not initiate penal actions against us, restrain our operations, impose fines/penalties or initiate legal proceedings for inability to obtain approvals or comply with the terms listed therein, in a timely manner or at all. Any such failure or delay in obtaining such consents, approvals, permits and licenses may affect our ability to continue our operations, which may in turn have an adverse effect on our business, financial condition and results of operations.

4. *We have committed defaults in repayment of the loans availed by our Company, in the past.*

Our Company had availed a loan from Kotak Mahindra Bank Limited (the “**Bank**”) of an amount of ₹ 17.87 lakhs and had issued a cheque bearing number 103802 dated March 03, 2021 for an amount of ₹ 16.27 lakhs towards its repayment, which got dishonoured. The Bank filed a criminal case against our Company and one of our Promoters, Rajendra Singh Rajpurohit before the Hon’ble Additional Chief Metropolitan Magistrate Court under Section 138 of the Negotiable Instruments Act, 1881. Subsequently, the Bank and our Company mutually agreed to settle the matter before a sole arbitrator and therefore filed a claim under the Arbitration and Conciliation Act, 1996 pursuant to which an award dated June 30, 2021 was passed by the arbitrator directing us to pay (i) a claim sum of ₹ 18.00 lakhs along with an interest at the rate of 18% on the awarded sum from the date of the award until the award is paid in full and (ii) an additional sum of ₹ 2,000 towards arbitration fee and expenses. Our Company is in the process of making payment towards the award and the criminal case is therefore pending. For further details, please see “*Outstanding Litigation and Material Developments*” at page 161.

We cannot assure you that a default under any of our existing financing agreements will not occur which may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

5. *Our entire business operations are based out of a single warehouse at Ahmedabad. The loss of, or shutdown of, our warehouse or any disruption in the operation of our warehouse will adversely affect our business, financial condition and results of operations.*

Our business operations are based out of a single warehouse located in Ahmedabad, Gujarat. Accordingly, we rely exclusively on our warehouse for our continued business operations to earn revenues, pay our operating expenses and service our debt obligations. Any significant disruption, including social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect operations. Any failure of our systems or any shutdown of warehouse for any reason could result in significant increase of costs and delays in execution of orders. We do not have a diversified base of operations, and local disturbances which would have a material adverse effect on our business, and consequently on our operations and financial condition.

Further, our warehouse is subject to operating risks, such as performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Any disruption of operations of our warehouse could result in delayed delivery of our product, which in turn may lead to disputes and legal proceedings with our customers on account of any losses suffered by them or any interruption of their business operations due to such delay or defect. While our strategic objectives include geographical expansion across India, in the event that we are unable to make available our products in a prompt manner and within the requisite timelines our business, financial condition and prospects may be adversely affected.

6. *If we are unable to maintain and enhance our brand, the sales of our products may suffer which would have a material adverse effect on our business operations.*

Over the years, our brand “Mafia Trends” has significantly contributed to the success of our business and

maintaining and enhancing our brand may require us to make substantial investments in areas such as research and development, outlet operations, marketing and employee training, and these investments may not be successful. In particular, as we expand into new geographical regions, consumers in these markets may initially resist accepting our brand. Given the kind of competition, we anticipate that maintaining and enhancing our brand may become increasingly difficult and expensive. Our success will depend largely on our ability to maintain, anticipate, gauge and respond in a timely manner to changing fashion trends and consumer demands and preferences, and to continue to provide high quality products and services. This will attract our prospective consumers and develop faith for our brand. Further, our business is also dependent on the trust that our customers have in our brand and products. If our Company is unable to maintain the quality of its products, it could lead to a negative publicity of our brand name and image in the market. Such negative publicity of our brand name could adversely affect our profitability and business operations.

7. *If our Company is unable to continue being creative in our designs or if we are unable to keep up to the changing fashion trends, our sales could be affected.*

Our results of operations depend upon the continued demand by consumers for our products. We operate in an industry that is highly competitive and where customers' purchases are highly subjective and sensitive to trends and fashion tastes. Creativity and being abreast with the latest fashion trends is one of the key attributes for success in this industry. For our Company to remain competitive in respect of appealing designs, our designers have to keep themselves abreast with the latest global trends, and fashion demands and more importantly understand the requirements of the customers. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. For instance, our typical design for a season begins well in advance of the season and we may not be able to incorporate trends that may be current to that season in the collection being released. A part of our production is for those products where we may not have an order in hand and the quantities are produced based on feedback received from merchandisers and management estimates. If we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

8. *There are outstanding litigations involving our Company, Promoters and Directors which, if determined adversely, may affect our business and financial condition. Further, in the past raids have been carried out at certain of our retail stores under the Copyright Act, 1957.*

As on the date of this Draft Prospectus, our Company, Promoters and Directors are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, Promoters and Directors or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

A summary of the pending litigations involving our Company is provided below:

Further, first information reports have been filed against our Promoters under Section 420 of the Indian Penal Code, 1860, pursuant to criminal raids carried out under the Copyright Act, 1957, for allegedly possessing, storing and selling counterfeit goods of brands such as Fossil, Diesel and Levi's. There can be no assurance that such raids shall not be carried out at the stores of our Company or that these legal proceedings will be decided in favour of our Promoters and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us or our Promoters, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

For further details, please refer to the section titled "Outstanding Litigation and Other Material Developments" on page 161 of this Draft Prospectus.

9. Our continued operations are critical to our business and any shutdown of our retail stores may have an adverse effect on our business, results of operations and financial condition.

We currently have 08 retail stores, all of which are located at Gujarat. As a result, any local social unrest, natural disaster or breakdown of services and utilities in that area could have material adverse effect on the business, financial position and results of our operations. Our retail stores are subject to operating risks, such as power supply or processes, reduction or stoppage of water supply, natural disasters, etc. and the need to comply with the directives of relevant government authorities. In the event that we are forced to shut down our retail stores for a significant period of time, it would have a material adverse effect on our earnings, our other results of operations and our financial condition as a whole. Further, continuous addition of stores in and around our current area of operation may put pressure on the existing infrastructure therein, which may affect our business. Further, spiralling cost of living around our manufacturing facility may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

10. Any delays and/or defaults in customer payments from our customers could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business model, if we receive any bulk orders from any customers, we may supply our products to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may

require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. For the the nine months period ended January 31, 2022 and Fiscals ending March 31, 2021, 2020 and 2019 our trade receivables were ₹ 33.71 lacs, ₹ 92.45 lacs, ₹ 105.65 lacs and ₹ 290.00 lacs, respectively, out of which, debts amounting to ₹ 33.70 lacs, ₹ 48.21 lacs, ₹ 44.57 lacs and ₹ 159.72 lacs were outstanding for a period exceeding six months from the due date, out of which our management believes that ₹ 0.00 lacs, ₹ 0.00 lacs, ₹ 0.00 lacs, and ₹ 0.00 lacs are doubtful trade receivables.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

11. Our Company faces seasonality in its business, due to concentration of business in western India and uneven billing cycle. As a result, our revenues are skewed towards the second half of each financial year.

Our Company typically operates its business activities to match & predict fashion trends. So, we focus on having products both of recent & current trends, as well as products of trends which are slowly catching up with the masses and is driving demand. Moreover, our business usually has peak demand during festival seasons. This makes our purchases and revenue booking cyclical in nature. Further, majority of the festivals are concentrated in the second half of the financial year. That makes us accumulate inventory for diverse customer needs for the peak buying season. As our revenues are not evenly distributed in all four quarters of every financial year, our revenue and profits may vary significantly during different financial periods and certain periods may not be indicative of our financial position for a full financial year and may be significantly below the expectations of the market, analysts and investors.

Further, since majority of our revenues are generated during the second half of each financial year, any lower revenues generated during such period may result in a material adverse effect on the business operations of our Company.

12. Our Company procures our products from third party manufacturers.

For the products sold by our Company, we depend on third party manufacturers for manufacturing our products. Currently, our Company do not have any longterm agreements with such third party manufacturers and any delay or failure on our part to procure such products in a timely manner, or at all may affect our business operation and cause a negative effect on our brand value thereby affecting our business operations. In the absence of such agreements, we cannot assure that such manufacturers would fulfill their obligations or would not commit a breach of the understanding with us. Further, our third party manufacturers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations. The inability to expand our vendor network on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

13. Our Company may not be able to sell its inventory through its existing sales network and such inventory may be subject to mark downs which may impact our results of operations and financial conditions.

Since our products are based on seasons, our Company faces the risk of not being able to sell its inventory through the existing sales network of outlets and such unsold inventory, including return of stock from its trade partners may be subject to mark downs and inventory being sold by our Company at heavily discounted rates. Further we may offer discounts at the end of a season and run stock clearance sales. In case we sell any of our products at a lower price than the rates normally charged, it may impact our results of operations and financial conditions.

14. We do not own premises used by our Company. Disruption of our rights as licensee/ lessee or termination

of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business.

As on the date of this Draft Prospectus, our retail stores are located on properties taken on leave and license or lease basis by Mr. Rajendra Singh Rajpurohit (Managing Director of our Company) in his individual capacity for which the company has received No Objection Certificate from him to use such premises for operational activities. There can be no assurance that our Company will be able to successfully continue to operate on the said premises. Any such event or any disruption of our rights to use such property will adversely affect our business operations.

Further, we have not entered into a formal rent agreement for two of our stores located at Akhbarnagar and Baroda and have been using these premises on mutually agreed commercial terms. Due to lack of a formal agreement, we cannot assure you that we will continue to be able to access the premises or that our rights will not be eventually disrupted. Any loss of such premises could adversely affect our business operations and financial condition. For further details, please see “Our Business” on page 91.

15. Our Promoters and certain members of our Promoter Group have extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.

Our Promoters Rajendra Singh Rajpurohit, Mahendra Singh Rajpurohit and certain members of our Promoter Group, have extended personal guarantees in favour of certain banks with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If our lenders enforce these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled — “Financial Indebtedness” on page 158 of this Draft Prospectus.

16. We are dependent on third party transportation providers for delivery of our products to us from our suppliers and delivery of our products to our network of outlets. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

Our success depends on the smooth supply and transportation of finished products from third party manufacturers to us and from us to our customers, both of which are subject to various uncertainties and risks. We use third party transportation providers for the delivery of products. Transportation strikes have had in the past, and could again in the future, have an adverse effect on our supplies and our deliveries to and from our outlets and suppliers in a timely and cost-efficient manner. In addition, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and our results of operation negatively. A failure to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

17. We are subject to risks associated with rejection of our products consequential to defects, which could generate adverse publicity or adversely affect our business, results of operations or financial condition.

Defects, if any, in our products could lead to rejection of supplied products and consequential replacement liability. In the event our Company fails to replace the defective products in a timely manner or at all, the same could consequently lead to a negative publicity of our brand thereby affecting our brand value, our business, results of operations or financial condition. Such defective products, if capable of being refinished, are sold by our Company as fresh merchandise and the products that cannot be refinished, are sold at a discounted price.

We cannot assure you that no such claims will be brought against us in the future or that such claims will be settled in our favour. Any such successful claims against us could adversely affect our results of operations. Management resources could also be diverted away from our business towards defending such claims.

18. *There have been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.*

In the past, there have been certain instances wherein the disclosures made in the statutory filings done under Companies Act, 2013 are incomplete or erroneous in nature, for instance, in accordance with Companies (Prospectus and Allotment of Securities) Rules, 2014, our Company inadvertently failed to file a copy of the record of the further allotment undertaken on March 29, 2019 in Form PAS-5 along with the private placement offer letter in Form PAS-4 with the RoC, and revised filing for the same has not been done by our Company. Further, in relation to the bonus issuance undertaken on May 12, 2022, an incorrect date of allotment has been inadvertently mentioned in the list of allottees attached to Form PAS-3 filed for said issuance.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

19. *Our business operations have substantial dependency on our ERP system for sales, demand & inventory analysis.*

To take our day-to-day business decisions for procurements or understanding demand in our outlets scattered at multiple locations, we use our business experience. But with the advent of technology, and to stay ahead from our competition, we have been using an ERP system which helps us to visualize the real-time data driven business metrics, in turn, which helps the management to take decisions. To operate the ERP, we have skilled personnel who navigates the system to generate the necessary data points and visualizations needed by the management. With employee attrition, if our organization loses the personnel, we may face a short term hardship to replace the employee to operate the ERP or to train an existing employee. This may delay our data driven business decisions taking capability.

20. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market in which our Company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

21. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. In our business, working capital is often required to finance the purchase of garments. Further, we are also required to maintain adequate stocks which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such demand for our products or stock adequate quantities of the same, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for our products on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such

defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults.

All of these factors, including increase in business activities, may widen the absolute gap between trade receivables and trade payables putting strain on our Company's financial resources and may result in increase in the amount of short-term borrowings/ working capital loans. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

22. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically as well as internationally to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

23. Our agreements with various lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

We have entered into agreements for short term and long-term borrowings with certain lenders. These borrowings include secured fund based and non-fundbased facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, undertake guarantee obligations on behalf of any other bowered including group companies, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — "Financial Indebtedness" on page 158 of this Draft Prospectus.

Further, certain of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company's financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

We believe that our relationships with our lenders are good, and we have in the past obtained consents from them to undertake various actions and have informed them of our corporate activities from time to time. Compliance with the various terms of such financing arrangements, however, is subject to interpretation and there can be no assurance that we have requested or received all relevant consents from our lenders as contemplated under our financing arrangements. It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

24. *Our Company has availed certain unsecured loans which may be recalled at any time.*

Our Company has availed certain unsecured loans of which an amount of ₹ 53.45 lakhs is outstanding as on January 31, 2022, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “Financial Indebtedness” on page 158 of this Draft Prospectus.

25. *In addition to our existing indebtedness for our existing operations, we may require further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on January 31, 2022 our Company’s total indebtedness is ₹ 194.71 Lacs. In addition to the indebtedness for our existing operations, we may require further indebtedness during the course of business. There can be no guarantee that we will be able to obtain the new facilities at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Also, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget for our working capital requirements, in which case there may be delays in arranging the additional working capital requirements which may delays leading to loss of reputation, levy of liquidated damages and an adverse effect on the cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements which may be entered into with our lenders could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “Financial Indebtedness” on page 158 of this Draft Prospectus.

26. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

				(₹ in lacs)
Particulars	March 31, 2022	March 31, 2021	March 31, 2020	
Net Cash Flow from/(used in) Operating Activities	30.19	7.58	(49.37)	
Net cash generated from/(used in) Investing activities	-	-	(4.20)	
Net Cash Flow from/(used in) Financing Activities	(34.98)	(9.87)	53.38	

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

27. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our Company's success largely depends on our brand name and brand image and our trademark is important for differentiating our Company's products from that of our competitors. Our current trademark and logo

, is owned by our Company under the provisions of the Trademarks Act, 1999. Our trademark and logo may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapters titled "*Our Business*" and "*Government and other Statutory Approvals*" on pages 91 and 165, respectively of this Draft Prospectus.

28. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraph titled — "*Land and Property*" in the chapter titled — "*Our Business*", the paragraphs titled — "*Interest of our Directors*" in the chapter titled — "*Our Management*", the paragraphs titled — "*Interest of our Promoter and Other Interests and Disclosures*" in the chapter titled — "*Our Promoter and Promoter Group*", "*Financial Indebtedness*" and "*Restated Financial Information- Annexure – [●]: Significant Accounting Policies and Explanatory Notes to the Restated Financial Statements- Note [●]- Related Party Disclosures*" on pages 140, 158, [●], [●] and [●], respectively of this Draft Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

29. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 64.83% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

30. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue*

Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 53 of this Draft Prospectus.

31. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

32. We have in past entered into related party transactions and we may continue to do so in the future.

As of January 31, 2022, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled "*Restated Financial Information*" at page 147 of this Draft Prospectus.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

33. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "*Objects of the Issue*" beginning on page 63 of this Draft Prospectus.

34. Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.

The growth and success of our Company's future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial

Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 128 of this Draft Prospectus.

35. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we have availed a bharat sookshma udyam suraksha policy for five of our outlets, which insures *inter alia* building including plinth and foundation, contents and stocks from risks such as earthquake, *etc.* . While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all.

Furthermore, our Company has not availed appropriate insurance cover for all of our stores, and therefore could be exposed to a number of risks that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us. On the occurrence of any of the abovementioned events, we shall not be able to rely on any insurance cover which could adversely affect our results of operations and financial position. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

36. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 146 of this Draft Prospectus.

37. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

38. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lacs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a credit rating agency registered with the SEBI be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “*Objects of the Issue*” on page 63 of this Draft Prospectus.

39. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

40. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

41. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding our working capital requirements, primarily, as detailed in the chapter titled “Objects of the Issue” beginning on page 63 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

42. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

43. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited (BSE SME) in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited (BSE SME). Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

44. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

45. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

46. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the SME Platform of BSE Limited (BSE SME). Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to

commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

47. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

48. The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the garment sector;
- adverse media reports about us or the Indian garment sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

49. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

50. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

51. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

52. We have in the last 12 months issued Equity Shares at a price that may be at lower than the Issue Price.

In the last 12 months we may have issued fresh Equity Shares to the promoters and other shareholders of our Company which are as follows: -

Date of allotment	Number of Equity Shares allotted	Face value (₹)	Issue Price	Nature of allotment	Benefit accrued to our Company	Source out of which Bonus Shares Issued
March 30, 2022	75,500	10	40	Preferential Allotment ⁽¹⁾	General corporate purpose and working capital of the Company	N.A.

⁽¹⁾Preferential Allotment of a total of 75,500 Equity Shares to Yogesh Prajapati.

The Equity Shares allotted to investors pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled "Capital Structure" beginning on page 53 of the Draft Prospectus.

EXTERNAL RISK FACTORS

53. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2022 and the Ministry of Finance has notified the Finance Act, 2022 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“**Bill**”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

54. Our business is substantially affected by prevailing economic conditions in India.

We perform all of our real estate development activities in India, all of our projects are located in Ahmedabad, Gujarat, India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;
- prevailing national, regional or global economic conditions, including in India’s principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

55. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

56. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

57. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

58. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

59. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

60. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade

between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Current Assets	
Inventories	Our company is engaged in trading of readymade garments. Hence, there is high inventory holding period due to external factors like seasonal sale, prevailing fashion sense, customers etc.
Trade receivables	Our company has mostly B2C Sales in which majority of customers pay upfront for the sales. However, we have taken one month credit holding period considering wholesale customer who are very few in our case.
Current Liabilities	
Trade Payables	As mentioned above our company has high inventory holding period as total stock purchased from one vendor doesn't get sold fully over a period. Hence, the company generally pays to their vendors within a cycle of 2 months after considering returns as required to be done before payments.

Our Company proposes to utilize upto ₹ 340.00 lakhs of the Net Proceeds in Fiscal 2022 towards our working capital requirements. The balance portion of our working capital requirement for the Fiscal 2022 will be arranged from existing bank borrowings and internal accruals/net worth.

2) General corporate purposes

The Net Proceeds will be first utilized towards the Objects as mentioned above. The balance is proposed to be utilized for General corporate purposes, subject to such utilization not exceeding 25% of the Gross Proceeds, in compliance with the SEBI ICDR Regulations. Our Company intends to deploy the balance Net Proceeds, if any, for general corporate purposes, subject to above mentioned limit, as may be approved by our management, including but not restricted to, the following:

- strategic initiatives, partnerships, joint ventures and acquisitions;
- brand building and strengthening of promotional & marketing activities; and
- On-going general corporate exigencies or any other purposes as approved by the Board subject to compliance with the necessary regulatory provisions.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head "Utilization of Net proceeds" and the business requirements of our Company, from time to time. We, in accordance with the policies of our Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Global Economic Overview

The war in Ukraine has triggered a costly humanitarian crisis that, without a swift and peaceful resolution, could become overwhelming. Global growth is expected to slow significantly in 2022, largely as a consequence of the war. A severe double-digit drop in GDP is expected in Ukraine due to fighting. A deep contraction is projected for Russia due to sanctions and European countries' decisions to scale back energy imports. The economic costs of war are expected to spread farther afield through commodity markets, trade, and—to a lesser extent—financial interlinkages. Fuel and food price rises are already having a global impact, with vulnerable populations—particularly in low-income countries—most affected.

The war in Ukraine will amplify economic forces already shaping the global recovery from the pandemic.

The war has further increased commodity prices and intensified supply disruptions, adding to inflation. Even before Russia invaded Ukraine, broad price pressures had led central banks to tighten monetary policy and indicate increasingly hawkish future stances. As a result, interest rates had risen sharply and asset price volatility had increased since the start of 2022—hitting household and corporate balance sheets, consumption, and investment.

The prospect of higher borrowing costs has also increased the cost of extended fiscal support. These changes are occurring faster than previously expected even as many parts of the global economy—particularly countries with low vaccination rates—must contend with continued strain on health care systems because of the pandemic.

The war has also added to already high uncertainty about the global outlook. Although many countries appear to be moving past the acute phase of the pandemic, new variants could again lead to waves of infection and further disruption. Inflation pressure could strengthen more than anticipated and demand more aggressive policy responses. Tighter financial conditions will shine a harsh spotlight on debt vulnerabilities among sovereign and corporate borrowers, risking widespread debt distress. Moreover, with continued tight policies toward the real estate sector and the possibility of more widespread lockdowns as part of the strict zero-COVID strategy, China's economy could slow more than currently projected—with consequences for Asia and beyond. This could further set back the recovery, particularly in emerging market and developing economies. More limited policy space could compound scarring effects, particularly in emerging market and developing economies, where medium-term baseline output is expected to be close to 6 percent below pre-pandemic projections.

More fundamentally, geopolitical tensions threaten the rules-based frameworks that have governed international economic relations since World War II. Current sanctions imposed with the aim of pressing Russia to end the war are already cutting financial and trade linkages between Russia and other countries, with far-reaching repercussions. Increased global polarization also impedes the cooperation essential for long-term prosperity. This could include derailing the urgent climate change agenda and undermining multilateral efforts to improve debt resolution frameworks, trade integration, and initiatives to avoid future pandemics.

The following graph shows the changes in inflation drivers across the globe due to varying factors from December 2020-21.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2022/04/19/world-economic-outlook-april-2022>)

Global growth is projected to slow from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. This is 0.8 and 0.2 percentage points lower for 2022 and 2023 than projected in January.

Beyond 2023, global growth is forecast to decline to about 3.3 percent over the medium term. War-induced commodity price increases and broadening price pressures have led to 2022 inflation projections of 5.7 percent in advanced economies and 8.7 percent in emerging market and developing economies—1.8 and 2.8 percentage points higher than projected last January. Multilateral efforts to respond to the humanitarian crisis, prevent further economic fragmentation, maintain global liquidity, manage debt distress, tackle climate change, and end the pandemic are essential.

By 2025, India is expected to have 100 unicorns, which will create ~1.1 million direct jobs according to the Nasscom-Zinnov report 'Indian Tech Start-up'.

India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030's, for productivity and economic growth according to McKinsey Global Institute. Net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.

India's economy is poised for a rebound after enduring a second wave of COVID-19 infections this year that further constrained activity and took a heavy toll on its people.

India's broad range of fiscal, monetary and health responses to the crisis supported its recovery and, along with economic reforms, are helping to mitigate a longer-lasting adverse impact of the crisis.

India: Economic statistics

Following the deadly ‘second wave,’ growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labor reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India’s labor force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labor market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound.

In 2022-23, India's GDP is expected to rise by 8.0-8.5%, owing to broad vaccine coverage, gains from supply-side reforms and regulatory ease, healthy export growth, and the availability of fiscal space to ramp up capital spending. The trajectory set for India's economy by the previous year's budget has been reinforced in Budget 2022-23. A lot of private investments taking place and consumption levels are rising as a result of increased employment. Capex generated by the government will also encourage private investment. The Production Linked Incentive (PLI) schemes in 14 sectors will further encourage private investment in order to boost export growth and allow for feasible import substitution in the country. The growth forecast for 2022-23 is based on the premise that there will be no further devastating pandemic-related economic disruption, that the monsoon will be expected, and that major central banks will withdraw global money in a relatively orderly manner.

Despite the third wave of COVID-19, overall economic activity remained stable, indicating that India has learned to cope with virus-related restrictions. Several high frequency indicators, such as electricity consumption, PMI manufacturing, exports, and e-way bill creation, reflect this. The economy's confidence has been bolstered even more by the rapid pace of immunisation. In addition, the Union Budget commitment to asset creation (public infrastructure development) in 2022-23 will re-energize the virtuous cycle of investment and crowd in private investment with huge multiplier effects, boosting inclusive and sustainable growth. Consumption will rise up once the uncertainty and worry caused by the Covid-19 virus has passed, and the demand rebound will allow the private sector to step in with investments to boost production to satisfy the rising demand. This scenario should play out for the Indian economy in 2022-23, barring geopolitical and economic surprises.

The geo-political tension triggered by the conflict between Russia and Ukraine since 24th February, 2022 has not ceased. The economic fallout of the crisis is only gradually unfolding. It may be accentuating some of the trends already underway such as global food shortages. The dated Brent Crude oil price, which forms the bulk of Indian crude oil basket has hovered around USD 105-106 / bbl since 1st of April, after having risen above USD 135 in the first/second week of March from around USD 95 just before the crisis. The Government is exploring all viable options, including import diversification, to procure crude at an affordable price. Affordability is desired as even the present level of international crude price, should it persist for a long time, may come in the way of India achieving a real economic growth rate north of 8 per cent in FY23. Be that as it may, India's economy, having swiftly recovered in 2021-22, after the pandemic induced contraction, may prove resilient owing to government's thrust on capital expenditure and improved corporate sector's financial health.

Real GDP of India increased by 8.4% YoY in Q2 of FY 22, recovering more than 100% of pre-pandemic output in the equivalent quarter of FY 20. India is one of the few countries to have grown for four consecutive quarters in Covid-19 (Q3, Q4 of FY21 and Q1, Q2 of FY22), demonstrating the economy's resiliency.

The recovery was fuelled by a resurgence in the services sector, a complete recovery in manufacturing, and continued expansion in the agriculture sector. In addition to successful pandemic management and signalling impact of promised measures, recovery was aided by a quick increase in vaccine coverage from 32% of the adult population at the end of Q1 to 75% at the end of Q2 of FY 22. According to the latest GDP estimates issued by the NSO, the Indian economy increased by 8.4% YoY in Q2 of FY 22, after growing by 20.1% YoY the previous quarter.

Industry has also been showing robust growth, particularly in the second -half of 2021-22. The combined Index of Eight Core Industries registered a YoY growth of 5.8 per cent in February 2022, highest in the last four months following an increase in output of natural gas, coal, refinery products among others. PMI manufacturing has stayed in the expansionary zone continuously for nine months contributing much to the recovery in 2021-22. Credit to industry has also seen a boisterous growth with loan growth to large corporates finally turning positive towards end of 2021-22.

Action against Covid-19 – India

India has been successfully running world's second largest vaccination programme administering, as on 31st March 2022, more than 184 crore doses of vaccine. Around 91 crores of adults have received at least one dose, of which 79 crores are now fully vaccinated. The coverage of adolescents aged between 15-18 years stands at 76 per cent. In numbers, 5.7 crore adolescents have received at least one dose of which 3.8 crore are fully vaccinated, equivalent to 51 per cent of their population.

From 16th March 2022, vaccination drive has been extended to cover the adolescent population in the age group of 12-14 years as of 31st March 2022, 1.7 crore doses have been administered to this age group. Additionally, India has also expanded its booster dose programme by removing a restriction related to comorbidities. About 2.3 crore precautionary doses have been administered to healthcare, front line workers and people aged above 60 years.

Steady fall in new COVID-19 cases and the consequent withdrawal of restrictions across states continue to strengthen the economic activity. Daily cases further abated to less than 1400 in March, reaching about one-eighth of what it was in February. The daily recoveries continue to outnumber daily new cases pushing up the recovery rate to 98.7 per cent. As on 31st March, 2022 India had less than 26 thousand active cases – down from a peak of 22.0 lakh cases on 27th Jan 2022. Delhi and Maharashtra have now made masks optional to wear reflecting their belief that the pandemic is under control. The hope is that any new variant such as Omicron XE would not pose a serious threat to the economic recovery.

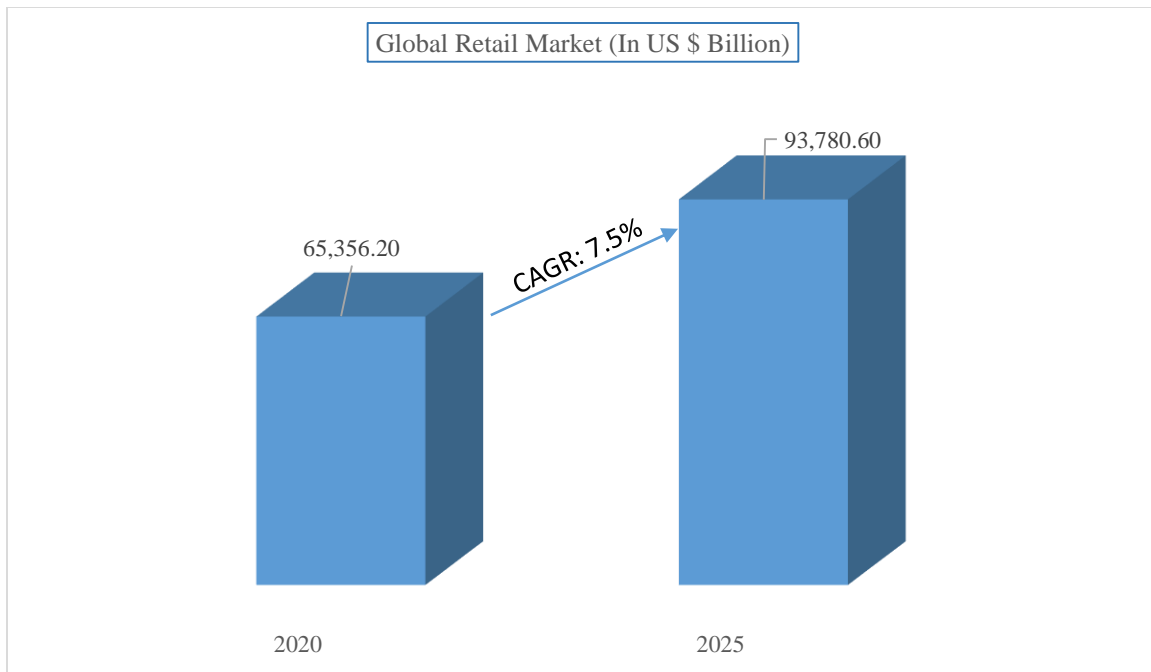

In view of the controlled pandemic situation, mobility continues to expand above prepandemic levels by 7.5 per cent in March compared to 3.3 per cent in February. Average daily E-toll count increased to 87.2 lakh in March 2022 registering a growth of 40 per cent on year on year (y-o-y) basis. While average E-toll collection expanded by 32.8 per cent on y-o-y basis to ₹132.0 crore in March 2022. During 2021-22, average daily E-toll collection increased by 64 per cent while average daily E-toll count higher by 81 per cent compared to previous year.

Key Market Trends

E-commerce is the Fastest-growing Segment in the Retail Industry.

Internet retailing is the modern way of shopping. With the growing penetration of smartphones and mobile devices and internet services, e-commerce has emerged as a major shopping platform in the world. The retail e-commerce market is driven by an increasing set of suppliers selling online and a change in consumers' buying behavior, among others. The rise of online fresh groceries sales along with growing numbers of prepared food delivery companies entering this space could propel category growth by several-fold times in the next five years. Mobile-first sites, dedicated apps, emerging payment methods, and other tools are making shopping on smartphones much easier. Many retailers operate an omnichannel model, which aims to integrate offline and online channels. Asia has some of the

biggest retail markets in the world in China, Japan, and India. E-commerce sales in Q2 2020 accounted for 16.1% of total sales in the US market.

Asia-Pacific is expected to Witness the Fastest Growth Rate in the Retail Industry

As rural and urban households witnessed a steady growth of disposable incomes, the spending power of the Chinese population has also increased dramatically, and the retail market has matured into one of the largest and still growing consumer markets worldwide. It is highly competitive and diversified, and the market shares of the leading Chinese retail chains were receding over the past few years. In India, government policies, like FDI up to 100% allowed in single-brand retail and FDI up to 51% in multi-brand retail, are further expected to fuel up the competition in the country's retail market. The growth of the tourism sector in Asia-Pacific countries, including Thailand and Indonesia, is expected to increase the demand for imported products, especially in the HORECA (hotel/restaurant/café) sector. The region's tourism sector is currently benefitting from an expanding luxury hotel sector and greater international air connectivity. Additionally, supporting growth in the tourism sector and widespread country-level government-led investments in transport infrastructure are driving the region's growth.

Competitive Landscape

The retail market is highly competitive, with few key players occupying the major market share. The organized retail market has been growing significantly with companies expanding stores and considering the business potential in new areas. Most of the unorganized retail outlets are increasingly being replaced with big retail hypermarkets, supermarkets, and other retail chains. This is expected to continue on a large scale during the forecast period, which will significantly lead to market growth

Major Players

- Walmart
- Amazon
- Costco
- Schwarz Group
- Kroger

Recent Developments

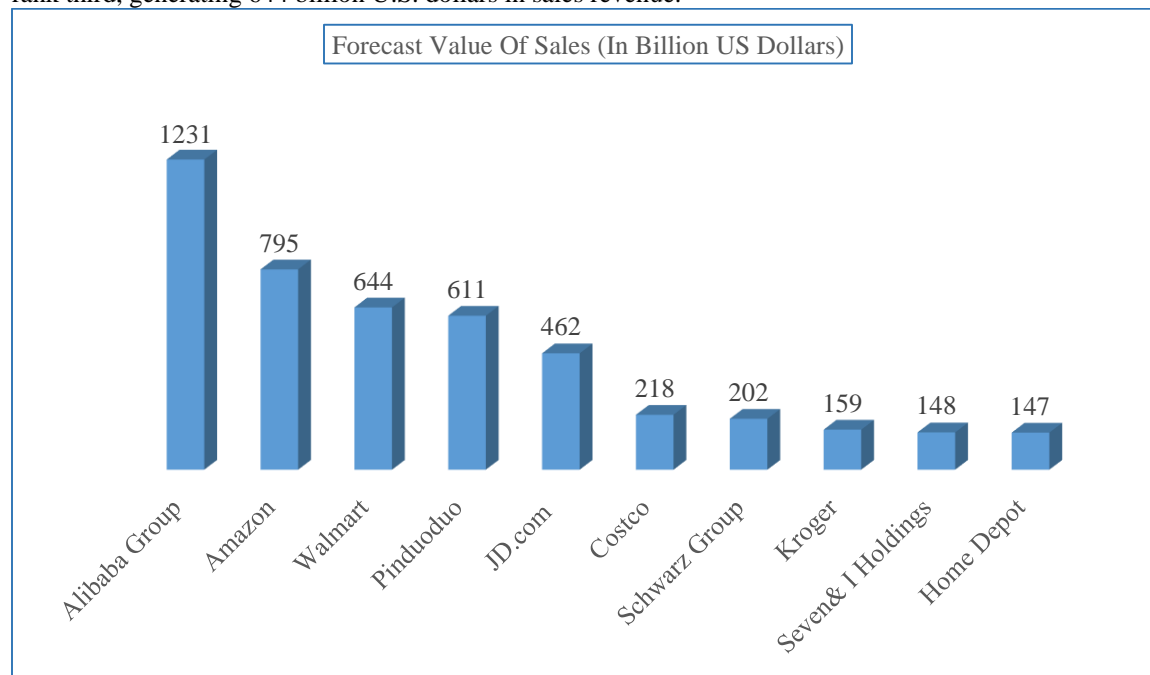

- March 2021, Walmart announced that it would be closing six locations in Canada. The company said that in addition to closing these stores, it plans to spend over USD 500 million upgrading its other stores.

- March 2021, Disney announced that it is going to close at least 60 stores in North America, amounting to about 35% of its locations in the region. Going forward, Disney is placing a larger emphasis on its e-commerce business rather than its brick-and-mortar footprint.

The top opportunities in the retail market segmented by type will arise in the ecommerce & other non-store retailers' segment, which will gain \$2,065.9 billion of global annual sales by 2025. The top opportunities in the retail market segmented by ownership will arise in the chained segment, which will gain \$8,624.7 billion of global annual sales by 2025. The retail market size will gain the most in The USA at \$1,858.5 billion.

Leading global retailers by forecast sales revenue in 2025

By 2025, the e-commerce retailer Alibaba is forecast to be the leading retailer worldwide, outdoing other online marketplaces and store-based retailers. Projections for 2025 show that the sales revenue of Alibaba is going to reach a value of 1,231 billion U.S. dollars. Amazon is forecast to follow with 795 billion U.S. dollars, while Walmart would rank third, generating 644 billion U.S. dollars in sales revenue.

Covid 19 Impact

The outbreak of Coronavirus disease (COVID-19) has acted as a massive restraint on the retail market in 2020 as supply chains were disrupted due to trade restrictions and consumption declined due to lockdowns imposed by governments globally. COVID 19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in Breathing. Steps by national governments to contain the transmission have resulted in decline in manufacture and trade of non-essential goods and an overall decline in economic activity with countries entering a state of lockdown and the outbreak is expected to continue to have a negative impact on businesses throughout 2020 and into 2021. However, it is expected that the retail market will recover from the shock across the forecast period as it is a `black swan` event and not related to ongoing or fundamental weaknesses in the market or the global economy.

Many retailers are adopting a robust and cohesive strategy for data analytics in management. This technology is being deployed to enhance supply chain efficiency, streamline operations to engage customers and building loyalty, data has become critical for most retail operations. With the rapid growth in retail data and the availability of technologies to analyse data it will become easier for retails to identify and meet the needs and expectations of their customers, thus it is expected to drive the market going forward.

Indian Retail Market

Growth of retail sector in India

Retail and real estate are the two booming sectors of India in the present times. And if industry experts are to be believed, the prospects of both the sectors are mutually dependent on each other. Retail, one of India's largest industries, has presently emerged as one of the most dynamic and fast paced industries of our times with several players entering the market. Accounting for over 10 per cent of the country's GDP and around eight per cent of the employment retailing in India is gradually inching its way toward becoming the next boom industry.

As the contemporary retail sector in India is reflected in sprawling shopping centres, multiplex- malls and huge complexes offer shopping, entertainment and food all under one roof, the concept of shopping has altered in terms of format and consumer buying behaviour, ushering in a revolution in shopping in India. This has also contributed to large-scale investments in the real estate sector with major national and global players investing in developing the infrastructure and construction of the retailing business.

Challenges & Opportunities

Retailing has seen such a transformation over the past decade that its very definition has undergone a sea change. No longer can a manufacturer rely on sales to take place by ensuring mere availability of his product. Today, retailing is

about so much more than mere merchandising. It's about casting customers in a story, reflecting their desires and aspirations, and forging long-lasting relationships. As the Indian consumer evolves they expect more and more at each and every time when they step into a store. Retail today has changed from selling a product or a service to selling a hope, an aspiration and above all an experience that a consumer would like to repeat.

For manufacturers and service providers the emerging opportunities in urban markets seem to lie in capturing and delivering better value to the customers through retail. For instance, in Chennai Cavin Kare's LimeLite, Marico's Kaya Skin Clinic and Apollo Hospital's Apollo Pharmacies are examples, to name a few, where manufacturers/service providers combine their own manufactured products and services with those of others to generate value hitherto unknown. The last mile connect seems to be increasingly lively and experiential. Also, manufacturers and service providers face an exploding rural market yet only marginally tapped due to difficulties in rural retailing. Only innovative concepts and models may survive the test of time and investments. However, manufacturers and service providers will also increasingly face a host of specialist retailers, who are characterized by use of modern management techniques, backed with seemingly unlimited financial resources. Organized retail appears inevitable.

Road Ahead

E-commerce is expanding steadily in the country. Customers have the ever-increasing choice of products at the lowest rates. E-commerce is probably creating the biggest revolution in retail industry, and this trend is likely to continue in the years to come. Retailers should leverage digital retail channels (E-commerce), which would enable them to spend less money on real estate while reaching out to more customers in tier II and tier III cities.

Online retail market in India is projected to reach US\$ 350 billion by 2030 from an estimated US\$ 55 billion in 2021, due to rising online shoppers in the country. In 2020, the most common payment methods online were digital wallets (40%), followed by credit cards (15%) and debit cards (15%). Online penetration of retail is expected to reach 10.7% by 2024 versus 4.7% in 2019.

Nevertheless, long-term outlook for the industry looks positive, supported by rising income, favourable demographics, entry of foreign players, and increasing urbanisation.

OUR COMPETITIVE STRENGTH

First mover advantage in Tier-II and Tier-III cities and to target the expanding, aspiring class and middle class customer group

We are the pioneers in opening stores in smaller Indian towns and Tier-II and Tier-III cities in Gujarat and hence we have enjoyed a first mover advantage. We believe our penetration into these Tier-II and Tier-III cities has resulted in a niche market for ourselves. Our focus of operating in Tier-II and Tier-III cities as well as towns is one of our key strengths. Our Company's core competency lies in understanding the aspirations and demands of our customers and meeting their demand with our concept of value retailing. We cater to the requirements of the aspiring class and the middle-class group of the population with an added focus on demands of the youth and Young generation, which forms the bulk of purchasing power of the Indian population. We believe that the spending habits and patterns of the aspiring class and middle-class segment of cities and towns is changing and we offer products at competitive prices to cater to such changed consumer spending patterns.

Competitive lease rentals

Most of our premises are owned by the promoter groups leaving behind very less lease rentals options.

We believe, identifying and determining the location and optimal size of a store is a critical factor in ensuring visibility among the target customers and sustainability of store operations. Our ability to find, manage and operate our stores, through optimal sizing, in suitable locations on high-street areas and main shopping hubs at the low lease rentals per Sq. Ft. has resulted in reduced operational costs. We have set internal parameters in relation to property identification including location, rental costs and proximity to the catchment area which has led to establishment of our brand identity amongst our customers.

Strong and diversified procurement network

We source our products and raw materials directly from the regions where such products are widely available or manufactured, to minimize our procurement costs and endeavor to offer the best product quality possible at such costs. Our procurement team conducts detailed research to locate the best sources for procurement of products at minimum costs and best possible quality. We source apparels from Ahmedabad, Delhi and Mumbai amongst other places

throughout India. We have a standardized procurement system that enables us to source quality products at attractive rates and avail the schemes of manufacturers and vendors.

Efficient supply chain management

Our comprehensive Enterprise Resource Planning ('ERP') backed supply chain management system comprises of collecting customer data, Invoicing, Products Management, Stocks Management, Store Expenses Management, Suppliers Data Management, Payments Management, Biller's Management, Returns Management, Store Tracking Analytics, Key Performance Indicators Analysis, Stock transfers, Re-marketing and Campaigns. We believe an efficient supply chain system is the backbone of retail operations and it is very essential to strike an optimum balance between the adequate level of inventory whilst ensuring availability of products at all stores as per customer needs, as well as reducing our operational costs.

Our Company adopts an integrated '*Proactive*' and '*Reactive*' approach to managing our supply chain in which we plan our supply schedule based on the forecasted demand. This also helps us in understanding as well as adapting to the changing patterns in customer behaviour. Our merchandise and procurement planning, supply chain management and distribution network enables us to have shorter business cycles, thereby resulting in efficient working capital management.

We centrally procure apparel and non-apparel products and then distribute the same to all locations through our transport fleet and third party transporters, which helps us in transporting and delivering products in a cost and time efficient manner to our stores.

Further, we believe we have established strong relationships with our vendors, suppliers and manufacturers to ensure a smooth, efficient and uninterrupted supply of products.

Value Addition to our products

After procuring our products from various locations domestically and internationally, we undergo some designing based on the tastes and preferences of our customer segment before delivering them to the retail stores for sales.

We believe our well defined systems and processes backed by our end to end Enterprise Resource Planning ('ERP') software forms a vital element of our business operations. Our ERP software addresses multiple aspects from procurement to sales based on our business model and requirements.

Our Company uses ERP software, from planning and setting up of new stores to managing day-to-day operations, formulation of replenishment plans, including analyzing information from all aspects of the business operations and tools for financial management and other management decisions.

Our Company, through a continuous review of processes at regular intervals and commitment towards introducing the use of strict monitoring processes alongside undertaking continuous inventory count cycle for each of our stores, has managed to reduce the shrinkage (being the loss in inventory through a combination of shoplifting by customer, pilferage by employee, damage, obsolescence, expiry and error in documents and transaction) at levels which are lower than usual industry standards.

The Company's ERP Software system uses real time data about the available stocks, purchases and sales which helps them to take timely effective decisions for the overall growth and success of the business.

We have appointed trained sales personnel at all our departmental stores to assist our customers in order to help them in making an informed decision. Further, in the untapped markets the concept of being able to handle and inspect the products themselves at their own will and leisure, provides a different experience to our customers. We have installed computerized billing points with an intention to reduce customer fatigue while shopping as we feel the last three feet at the store is the moment of buying decisions. This coupled with convenient payment options including, UPI, credit card, debit card, gift vouchers, coupon provides more convenience to the customers. We have noted that the shopping experience is of utmost importance to our consumers and it is considered as a family time. We believe, in a departmental store shopping is a complete family activity, wherein every member of the family is engaged and has an opportunity to purchase something for himself.

As a result, we have gained very useful experience in terms of selecting potential locations for our stores, training our existing staff along with hiring new people, undertaking the marketing and advertising required to establish and support our newly launched stores. We believe this experience will enable us to achieve our planned expansion of stores on time and within our budget.

Inverted hierarchy model

MILESTONES

OUR STRATEGY

Regional cluster-based expansion and penetration

We endeavour to capitalise and strengthen our presence in a particular region by opening new departmental stores within a radius of 100 – 150 kms between cities, and 7-10 kms within a city. This ensures our creation of a cluster of stores within a region and this strategy provides us the following benefits:

(a) Enhancing brand visibility

Our aim is to set up stores in close vicinity of our existing stores which provides better recognition amongst the population of those districts and therefore, creates a better visibility of the brand.

(b) Understanding customer preferences

We believe the demographics of the Indian population and the culture varies every 100 – 150 kms which leads to varied customer preferences, tastes and physical attributes of individuals. Such deep understanding of the regions helps us to provide the right product to the target customers.

(c) Cost efficient logistics and better SCM

It ensures a cost efficient logistics support availability to our stores, whereby with a limited fleet of transport vehicles we provide services to a large number of stores. Further, this cluster based approach will facilitate inter-store stock movements and allow us the flexibility of maximising benefits from capitalising on factors such as easy stock rotation from our stores, distribution of transportation cost and operational convenience of reporting and supervision.

(d) Better utilization of human resources

A common pool of employees can oversee the operations in the areas thereby improving the employee

productivity and reducing the overheads. This will enhance administrative control over multiple stores located in a region by our regional managers.

(e) Effective implementation of marketing activities

A common channel for marketing activity can be effectively used to cover a wider area with minimum cost. For example, a single edition of print media in a region caters to multiple districts where our stores are located thereby reducing the average advertising cost per store.

Dedicated focus towards increasing same store sales growth

In order to ensure sustained growth, we intend to focus on increasing sales from our existing stores. Though, new stores lead to overall growth of the Company and widen our reach across new geographies, it is also imperative to focus on the existing customer base. We will continue to provide attractive offers and promotions to increase the transaction size per customer. Separate 'Above The Line' (ATL) and 'Below The Line' (BTL) activities are conducted simultaneously to create a pull towards the brand and store. As part of our retention strategy, we target to create more occasions for consumers to shop for apparel like, organize events like annual days (men's day / father's day), drawing, dancing and painting competitions, treasure hunts and talent hunts to increase the number of footfalls and the footfall conversion rate.

Cross promotion through "Intelligent Marketing"

We also engage in "Intelligent Marketing" wherein we inform our registered customers of the new schemes or offers for specific products based on such customer's previous purchases. For customers who have a history of purchasing from our stores will receive an SMS in relation to promotional schemes. We also intend to promote cross promotional schemes across different verticals whereby a customer's buying behaviour leads us to anticipate the potential sale from another vertical. We also engage in regular SMS marketing to target our registered customers who are also a part of our loyalty program.

Increase in customer loyalty

We have various loyalty programs to retain and add more customers to our existing customer base. The loyalty programs help build relationships by giving the organization an understanding of the customer profile, important dates such as birthdays, anniversaries, buying habits and preferences. We intend to extend benefits like regular customized communications, advance intimation of events and promotions at stores. We have initiated various programs to encourage movement of customers across our formats and to retain and add more customers to the existing base by awarding points, discounts, exclusive schemes and benefits, extended shopping hours and promotional offers. Further, we plan to continue increasing our marketing and advertising activities and organize events and promotions to increase the number of footfalls and the footfall conversion rate. To retain customer loyalty, we intend to provide the right product mix to our existing customers based on their preferences and offer them the option to buy products online as well as from our stores. We believe that as we grow in size, retaining our existing customers and increasing the average spends per customer becomes an integral element.

Continue to invest in IT infrastructure

Our well defined systems and processes backed by our end to end Enterprise Resource Planning ("ERP") software forms a vital element of our business operations. We believe that our technology platform is highly scalable and has the potential for growth of our operations with limited incremental costs. Our strategy is to address multiple aspects like secured connectivity and infrastructure, real time information and tools for financial management and other management information systems. In view of the anticipated growth in our operations, stores and locations, we plan to upgrade our IT infrastructure to ensure adequate support to the growth in our operations. We believe further improvement in systems and processes would help us further analyze our customer taste and preferences which would enable us to understand the customer trends.

Further strengthening our procurement network and increasing our share of private labels

We intend to strengthen our sourcing capability by identifying new and more efficient suppliers to reduce costs, increase speed of delivery and reduce lead times, including by identifying large manufacturers both in India and overseas. We intend to develop new products and further strengthen our product offering under our private labels, as we have noted that our target customers normally do not shop for apparel with a pre decided brand in mind, but looks for good quality, trendy and affordable merchandise thereby providing us an opportunity to manufacture our private labels which we already have registered. We aim to achieve this by setting up an in-house design team and developing stronger relationships with our existing and new third party manufacturers. We believe our private label initiative will offer us a differentiating factor as compared to our competition and at the same time helps us improve margins and strengthen our merchandise mix.

Our Company intends to adopt an integrated 'Product-centric' and 'Customer-centric' approach in developing our business. Our customer centric strategy aims at acquiring in-depth customer preferences and securing customer loyalty. We intend to continuously improve the product mix offered to the customers as well as strive to understand and anticipate the future customer requirements, and cater to such needs.

Reduce shrinkage and pilferage and increasing security to improvise on the inventory management

We categorically intend to further strengthen our internal systems and controls regarding our inventory management to monitor and reduce shrinkage and pilferage. We have already setup an in-house 'Loss Prevention Management' team headed by Supervisor in our Procurement vertical, with the primary objective of continuously identifying and plugging, loops and gaps in the system. They are further aided by external consultants working on a regular basis. We aim to adopt systems and processes to further control and mitigate losses on account of shrinkage and pilferage at our stores and distribution centres. We intend to further supplement our current security system, consisting of manual checks and electronic surveillance, CCTVs by adding security tags to our products and improving our alarm systems to minimize our losses on account of pilferage.

Foray into e-commerce and start our online retail portal

We intend to complement our cluster based capabilities in retailing with retailing through e-channels like the internet. We aim to establish an online portal under our website to tap the growing online shopping market. We intend to develop the e-commerce and online retail business to provide us with additional channels of reaching out to the customers. We believe that the growing internet penetration in Indian cities, especially Tier-II and Tier-III cities has increased the potential of growth in the e-commerce and online shopping markets. We intend to adopt a brick and click model, by leveraging on our existing back-end logistics infrastructure and sourcing capabilities, for a quick start to our online venture without any additional substantial investment. We believe developing and expanding the online space may further attract the attention of our targeted customers which can be converted into footfalls in our stores. We believe that foraying into online retail business will assist us to increase and diversify our customer base.

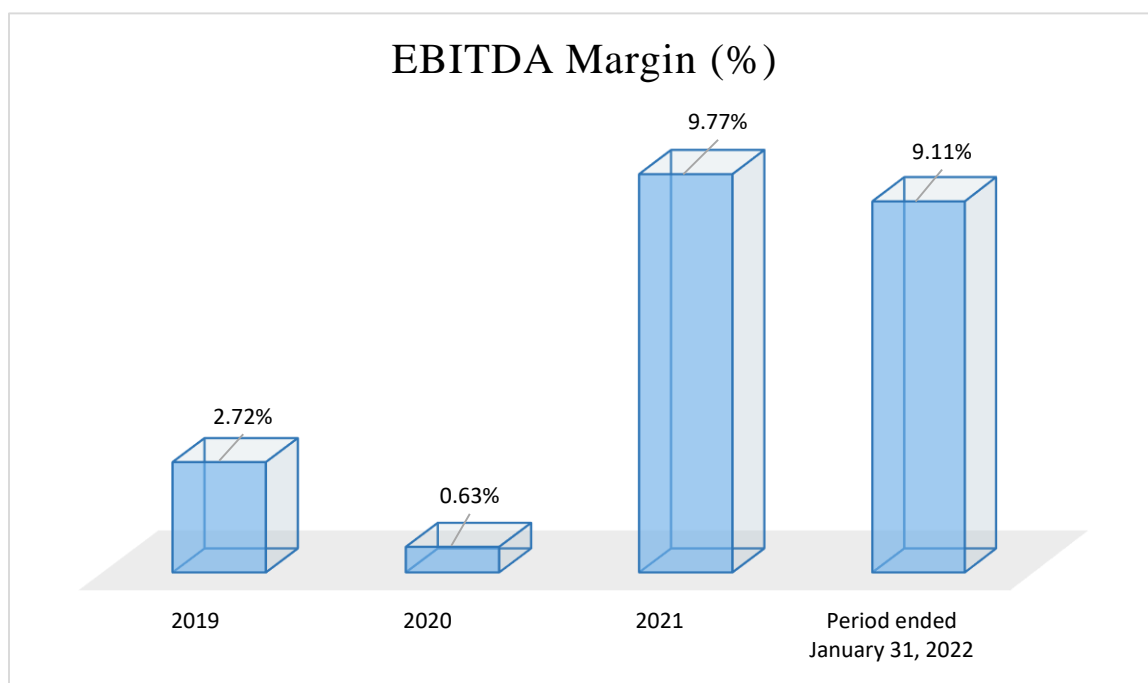

Continue to provide training to our employees and invest in human capital

We believe that our success in the future will depend on our ability to continue to maintain a pool of experienced professionals. We aim at identifying fresh talent, training, grooming them and providing opportunities for growth. We have been successful in building a team of talented professionals and intend to continue placing special emphasis on managing attrition and attracting and retaining our employees. We provide continuous behavioural and functional training to our employees, both at our stores and at the back-end via our radio and third party human resource consultants. We intend to further improve our training programmes to ensure that our employees have the skills to meet our customers' demands and provide quality customer service. We have also adopted an organization-wide human resource policy which lays emphasis on providing continuous training to our employees and establish definite career growth paths for them. We intend to continue to encourage our employees to be enterprising and help them to learn on the job and grow within our organization.

BUSINESS PROCESS

Our Business Model

Our business model is based on the concept of 'value retailing'. We have a standardised procurement system that enables us to source quality products from the regions where such products are widely available or manufactured. Our business model is supported by an efficient logistics network and a strong IT infrastructure, systems and processes. The business process of our Company can be summarized and illustrated in the following diagram:

Apparel shopping behaviour across our customer segments

We believe that the factors which drive core fashion industry vertical are as follows:

The following is a brief description of our various business processes:

1. Strategy and Planning

A detailed assessment is conducted, of several internal and external factors that may have an effect specifically on our Company. Based on such assessments we determine our goals and objectives. Subsequently, a detailed annual business plan is prepared containing a road-map of the steps intended to be taken for achieving our goals and objectives.

2. Merchandising

Our merchandising and procurement plans are based on our sales projection which is prepared by taking into account the previous sales trends. We prepare a consolidated as well as a store-wise stock requirement estimation. Our merchandising team then prepares a merchandising procurement plan, taking into account existing inventory and forecasted demand. Our merchandising budget plan is prepared for catering to factors such as regional and seasonal customer tastes and preferences, number of stores (in operation as well as upcoming), likely fashion and trends, and price. Our procurement plan contains all the necessary details regarding the sourcing hub of a particular product, the quantity of the products to be procured and the supply schedule.

We have adopted the Collaborative Planning Forecasting Replenishment Model ('**CPFR Model**') which enables us to work closely with our vendors and suppliers to develop a synchronized forecast. We believe that the CPFR Model has enabled our Company to reduce the lead time for replenishment of goods and improve customer service through better forecasting. We have adopted a standardized pricing policy across our stores in respect of our private labels and non-branded products sold by us. We believe that following a standardized pricing policy has resulted in operational convenience, while enhancing brand loyalty and encouraging customer confidence in the products offered by us.

3. Identification & selection of Vendors

Once we have finalized our procurement plan, we identify various vendors across the manufacturing hubs for quality products at competitive prices in line with the latest fashion trends. Based on the shortlisted samples, we place purchase orders with them in accordance with our procurement plans. Details of our supply schedule are shared with our vendors to determine the quantity and intervals in which the vendor is required to make the supply of the desired goods.

Our procurement requirements for our apparels and general merchandise products are met by sourcing our products from third party suppliers and also engaging third party manufacturers to manufacture the products sold under our private labels. For identifying the vendors, we take into account several factors such as experience, capacity, quality of products offered and credibility. We undertake several steps to ensure the quality of the products supplied to us, such as by way of random sampling at the time of receipt of the products.

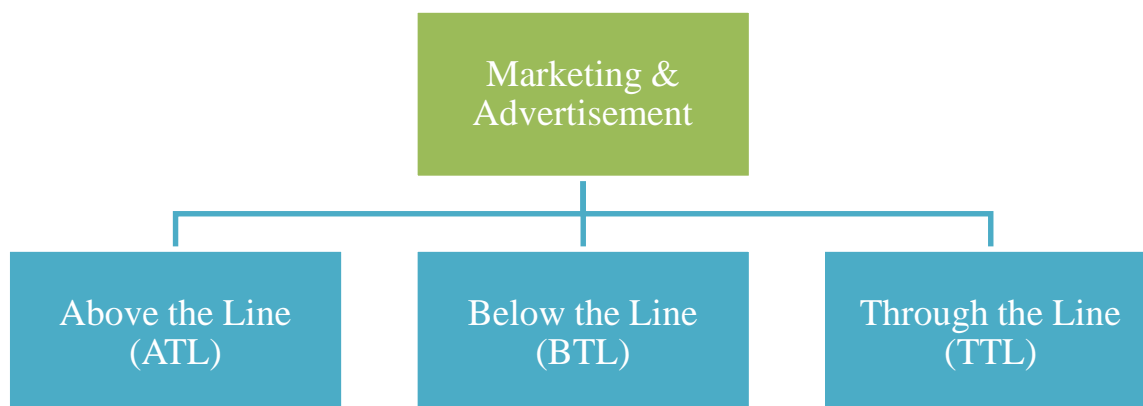

4. Supply Chain Management

We formulate a plan of dispatch and requirements after taking into account factors like average daily sales of all our stores, projected sales, festivals and seasons, lead-time for replenishment, buffer stock and re-order levels. All our products, which are to be transported to our stores, are packed and segregated location-wise and in accordance with our Concept Classification to ensure delivery of our products as per the requirements of our stores.

Our distribution centres and stores are connected through a company-wide network by using our ERP software, which we believe helps to efficiently manage our network of stores and distribution centres. Our merchandising team regularly co-ordinates with and receives updates from our stores to identify the slow-moving products and explore the options to expeditiously dispose them off. We also have an ad-hoc replenishment system which helps us in prevention of shortfall of certain products which we believe will generate substantial demand due to the change in trends.

In addition to our own transport fleet, we also engage third party logistic solution providers, who specialise in providing transportation services on certain specific routes, in order to deliver products on time to our stores and optimise the transportation costs of our products. We believe that using a combination of in-house and third party transport services helps us to transport and deliver our products in a cost and time efficient manner.

5. Marketing, Advertising and Sales Promotion

Our advertising strategy aims at promoting brand awareness, creating a bond with our customers and enhancing their trust in us. We engage third party advertising agencies to provide us advertising and communication services such as communication planning and development in all areas of press and point of sale advertising. We use services of models for advertising purposes and creating brand awareness amongst our target customers. We have entered into inter-promotional and cross-promotional advertising, influencer marketing activities with some of the film production houses for promoting our brand.

Our mode and media of advertisement is determined on the basis of the most widely accepted and used source of mass media by our target customers. As a part of our marketing strategy, we plan a calendar for the year's marketing activities, encompassing mega sales, schemes, discounts and events, annual days, festivals and new collections (summer collections, winter collections etc.). We engage in extensive below the line and above the line marketing activities to attract the attention of our target customers with a strong focus and attention to influencer marketing for the promotion of our products and brand.

Our sales strategy is focused on understanding the key drivers of customer behaviour and associating the product offering with such customer behaviour. We offer promotional schemes on a regional and store level during region specific festivals and store level and Company level milestones such as store opening anniversaries and upon the Company crossing number of stores respectively. We regularly greet our customers on all special occasions, festivals and regularly inform them about important events happening in the Company via e-mail, print advertisements, SMS, radio and cable. We also engage in cross-promotional arrangements with third parties, by providing additional discounts and special offers on the vouchers issued by such third parties. We arrange for lucky-draws at regular intervals where the winners are given special prizes by us.

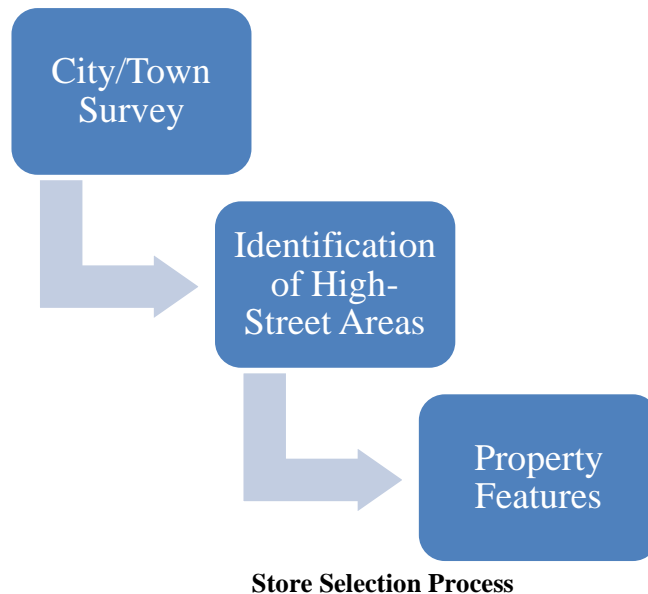

6. Modern Shopping Experience

We provide a pleasant shopping experience to our customers. Our endeavour is to locate our stores in high-street areas that are in proximity to residential areas, schools and colleges where most of our targeted customers are located. 8. City / Town Survey

In identifying the location for a new store, we start by identifying the city/town, which is preferably within 100 - 150 km between cities and 7-10 km within a city. We initiate the identification process by conducting a market survey to assess the competition level and an analysis of the demographic data on parameters such as age group, literacy levels, nature of occupation and income levels to determine the demand for products. Adopting the cluster-based expansion model helps us to ensure that proper logistics support is available to our new stores, while facilitating us in inter- store sharing of resources, thereby reducing our operational costs.

9. Identification of location and site

We primarily target aspiring class and the middle income class group of the population with an added focus on demands of the youth and Young generation. We believe that the aspiring class and middle class group of the population, represents the bulk of the purchasing power of the Indian population. Accordingly, we plan our strategy to search for and identify locations in highly populated district preferably district headquarters where such customers are domiciled in large numbers and make efforts to establish our stores at high-street areas and main shopping hubs of cities and towns thereby targeting the populace of the entire district. We also take into account factors such as proximity to markets, shopping areas, schools and colleges to increase our visibility amongst our customers. We target locations with good infrastructural facilities such as easy accessibility, water, electricity and internet availability and other basic amenities. We aim to locate our stores in such areas where retail space is available at reasonable prices.

While selecting a property to establish our store, we aim to minimise our operational costs per Sq. Ft. and strive to obtain such properties at reasonable costs. While determining the suitability of a premise for the establishment of a store we also consider factors such as ceiling height of the property, power load availability and property elevation.

Store Planning, Layout and Operations

Our focus, while planning the establishment of a new store, in determining the optimal size of the store is based on the demographic analysis conducted by us, the product mix being offered by us, Concept Classification and operational costs. We try to ensure our store to be of an optimal size in order to minimize our operating costs per Sq. Ft. and increase our sales per Sq. Ft.

With an aim to have uniformity across stores, we have standardised formats and parameters for our stores and in doing so, we consider various factors such as ambience, internal and external décor based on the tastes and preferences of the local customers of the area, colour schemes, pricing, marketing schemes and promotions which, we believe, has

led to our brand establishment and identification amongst our customers. We have defined processes for all our day-to-day operations and to ensure consistency in customer experience across our stores. Non-core functions such as security and housekeeping, are generally outsourced, are also covered under our process manuals. Our processes are designed to ensure that each aspect of our store's functioning ensures a pleasant and complete shopping experience for our customers. Each of our stores is managed by a store manager, reporting to the regional manager who looks after a group of stores. In addition to our front-end employees, we have a back-office retail team, which is responsible for providing smooth support functions and coordination required at the storefront.

Visual Merchandising

We also focus on the visual appeal of our stores in a manner that would appeal to our customers. While planning the visual look of our store, we consider the layout planning, space allocation, product positioning, assortment display and the colour theme according to the local needs of our target customer segment. We also emphasise on the mannequin dressings and show window displays.

We draw up an annual visual merchandising calendar, based on the planned merchandise seasons. A detailed action plan is then drawn, which allows us to ensure a common visual merchandising theme across all our stores. Although we strive to ensure a common visual merchandising theme across all our stores, we also alter and modify the visual

appeal of our stores on account of regional festivals. Our in-house visual merchandising team has the responsibility of deciding the themes as well as the manner in which the merchandise is planned to be displayed across all our stores in India.

Internal Controls and Cost Reduction Measures

Pilferage Mitigation Measures

We follow a two-tier security system, one consisting of manual checks and the second consisting of electronic surveillance, to control and mitigate losses on account of pilferage at our stores. Manual checks are conducted by our employees by screening the goods being carried out of our stores by our customers or our employees. We also station trained security guards at our stores to oversee the screening process. The electronic surveillance at our stores is conducted by employing a closed circuit television monitoring system.

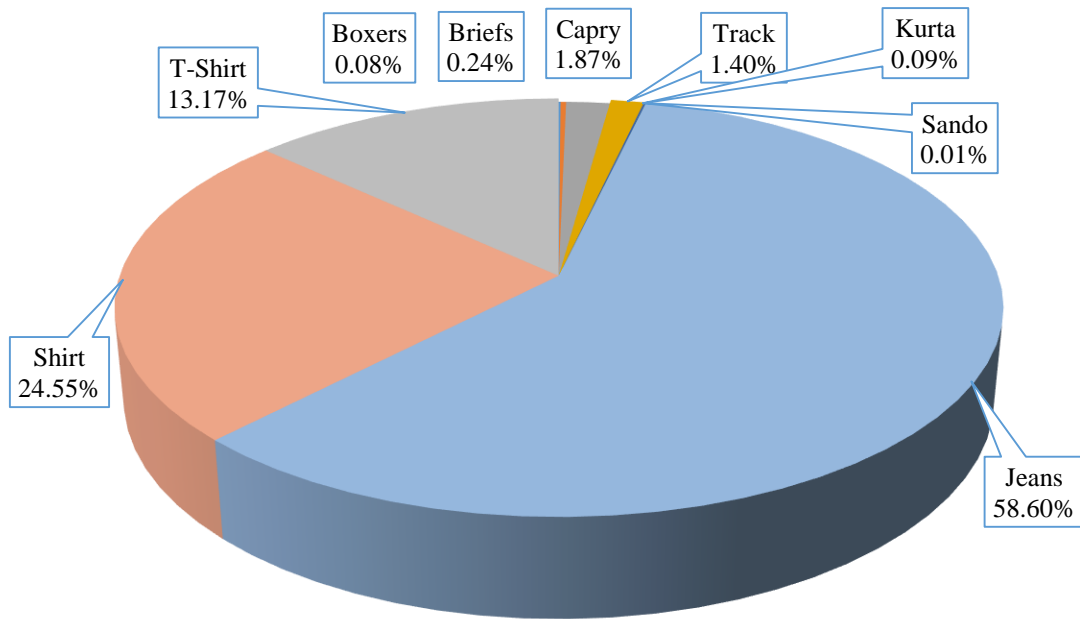

Our distribution centres also follow a two-two tier security system similar to our stores. All our employees are manually checked by security guards upon exit in order to control pilferage. In addition, all our distribution centres are also monitored by using closed circuit television systems.

While PDP Bill was focused on personal data with limited reference to sharing of NPD, the 2021 Bill has expanded the scope to cover NPD as well, because of which it is now proposed to be called the “Data Protection Bill”, rather than the “Personal Data Protection Bill”. The MoEIT is yet to submit the revised version of the data protection bill before the Parliament.

Environmental Legislations

We are subject to various environment regulations as the operation of our establishments might have an impact on the environment in which they are situated. The basic purpose of the statutes given below is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards (“PCBs”), which are vested with diverse powers to deal with water and air pollution, have been set up in each state and in the Centre. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that industries are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure and investigation. All industries are required to obtain consent orders from the PCBs, which are required to be periodically renewed. These consent orders are indicative of the fact that the industry in question is functioning in compliance with the pollution control norms.

Water (Prevention and Control of Pollution) Act, 1974 (“Water Act”)

The Water Act provides for one Central Pollution Control Board, as well as state pollution control boards, to be formed to implement its provisions, including enforcement of standards for factories discharging pollutants into water bodies. The Water Act prohibits the use of any stream or well for the disposal of polluting matter, in violation of the standards set down by the State Pollution Control Board (“**State PCB**”). The Water Act also provides that the consent of the State PCB must be obtained prior to opening of any new outlets or discharges, which are likely to discharge sewage or effluent. Further, pursuant to the Trademark (Amendment) Act, 2010 simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign trademarks. FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

At present, the segments in which we operate is unregulated. While we are not in a position to predict the likelihood, timing or content of any such regulation or legislation, if any such regulation or legislation is notified, we may be affected in various ways. Though we believe that we have obtained permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. For further details, please see “Risk Factors” beginning on page 22 of this Draft Prospectus.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

High dependency on Understanding of market trends

Our business has a major dependency on the procuring and making available to the customers the products as per latest trends, or trends that are starting to catch up in the market or in social media. Our management is competent and proactive enough to identify trends in the market but this is an art. There could obviously be a mismatch in our identification or the timing of identification. We could be very early to identify a trend or we could be very late. This mismatch may incur us losses because of having stocks of products that the market don't want.

Ability to manage logistics and transportation needs

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation our different outlets. Since the cost of our goods carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Currently, our business model is such that we have strong control over our product procurement because of our long standing relationship with vendors. But our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While quality, products in line with current trends, etc are key factors in client decisions among competitors, however, price is the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures & trades some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers & traders would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on most businesses. Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees as well as the customers faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our outlets operations. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. In view of the onslaught of the second wave of the virus and the likelihood of a third wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on Page No. 22. We are continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

The Restated Financial Statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014.

All assets and liabilities have been classified as current and non-current as per normal operating cycle of the Company and other criteria set out in the Schedule III of the Companies Act, 2013.

b) Use of Estimates:

The preparation of the Financial Statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the period/year. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. An impairment loss is charged to the Statement of Profit and Loss in the period/year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable value.

i) Earning per Share:

Basic earning per share is computed by dividing the profit/ (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity share outstanding during the period. Diluted earning per share is computed by dividing the profit/ (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

j) Taxation & Deferred Tax:

Income taxes are accounted for in accordance with Accounting Standard (AS-22) – “Accounting for taxes on income”, notified under Companies (Accounting Standard) Rules, 2014. Income tax comprises of both current and deferred tax.

Current tax is measured on the basis of estimated taxable income and tax credits computed in accordance with the provisions of the Income Tax Act, 1961.

The tax effect of the timing differences that result between taxable income and accounting income and are capable of reversal in one or more subsequent periods are recorded as a deferred tax asset or deferred tax liability. The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“**UPI Phase II**”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors (“**UPI Phase III**”), as may be prescribed by SEBI. Accordingly, the Offer has been undertaken under UPI Phase II, till any further notice issued by SEBI.

intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 and till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI Mechanism.

Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband’s name to determine if they are multiple applications

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.
