We may incur significant expenses and management time in such legal proceedings. Decision in any such aforesaid proceedings adverse to our interests may have adverse effect on our business, future financial performance and results of operations.

The detailed information on the outstanding litigations are set forth in the chapter “*Outstanding Litigation and Material Developments*” beginning on page 268 of this Draft Prospectus.

2. *We have a very limited operating history as a company, which may make it difficult for investors to evaluate our historical performance or future prospects.*

Our Company was incorporated on April 03rd, 2018. Subsequently, we have acquired the running businesses of M/s. GK Packaging, the erstwhile proprietorship concern of our Promoter Keval Harshad Goradia & M/s. Pratham Packaging, the erstwhile proprietorship concern of another Promoter Payal Keval Goradia vide Business Succession agreement dated April 14th, 2018. Given our Company's limited operating history, we may not have sufficient experience to address the risks frequently encountered by early stage companies, including our ability to successfully complete our orders or maintain adequate control of our costs and expenses. If we fail to address such risks, our business may be materially and adversely affected. Accordingly, the investors should consider our business and prospects in light of the risks, losses and challenges that we face as a nearly – stage company and should not rely on our results of operations for any prior periods as an indication of our future performance.

Further, prior to incorporation, the provisions of the Companies Act were not applicable to us. However, after incorporation, our Company will have to comply with the provisions of the Companies Act such as appointment of Key Management Personnel, Independent Directors, constitution of various management committees, preparation of financial statements as per the Schedule III, prior approval for entering into related party transactions, taking unsecured loans and giving unsecured loans, etc. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management's attention. Though our Company is taking all the possible measures to comply with the provisions of the Companies Act, but in case of our inability to do so or any delay, we may be subject to penal actions from the concerned authorities which may have an adverse effect on our financial position and reputation.

3. *Any significant decline in the demand for our products, introduction of alternative technology or consumer habits or slowdown of the industry in which we operate may adversely affect our profitability and business prospects.*

Our product Corrugated boxes is mainly used in the packaging industry. Our customers 'decision to seek alternative technology coupled with the development of more alternatives and our inability to respond to these changes may adversely affect our business and results of operations. Our products are mainly sold to customers operating in FMCG, Garments, Liquor, etc. thus any slowdown in this sector may adversely affect our business operations. Our ability to anticipate changes in technology and to supply new and enhanced products successfully and on a timely basis will be a significant factor in our ability to grow and to remain competitive. In addition, our business, operations and prospects may be affected by various policies and statutory and regulatory requirements and developments that affect our customer 's industry in India. In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

4. *An increase in the prices of our basic raw material i.e. Kraft Paper and Duplex Paper could raise our manufacturing costs and could adversely affect our profitability.*

We have no control on the prices of our basic raw material i.e. Kraft Paper and Duplex Paper. The prices of Kraft Paper and Duplex Paper could fluctuate due to availability and demand. In the recent past, there have been fluctuations in the prices of raw materials both at domestic and international

levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability.

We typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

5. *The company is not in compliance with sections 185 & 186 of the Companies Act, 2013 and the continued violation may lead to significant penalty on the company which may adversely affect its profitability.*

The company has complied with the provisions of section 185 & 186 of the Companies Act, 2013 in respect of loans, etc. except in case of two loans of Rs. 2,12,00,562/- in the name of K P Print & Packaging & Rs. 1,01,17,634/- in the name of Packwell Enterprise LLP, which has been taken over by the company as an effect of Business Succession Agreement dated 14th April, 2018. Although the provisions of Section 185 are applicable only at the time of granting the loan and any change in the circumstances thereafter would not attract the provision of the section as per the opinion of the Peer Review Auditor and hence it was concluded by them that there was no violation of section 185 by the company as the same loans were made before the acquisition of proprietorship concerns by the company. However, it can be questioned in the future and the company may incur substantial penalties in the future which can adversely affect the profitability of the company.

6. *Our company has not identified the MSME creditors as on the date of this Draft Prospectus. Failure to identify the MSME creditors may subject the company to penal provisions of the MSMED Act, 2006.*

With respect to the MSME creditors, our company has not maintained separate records for transactions with the MSME creditors as required under law and accordingly as of now no data in this regard is available with the company. Also, the same has been stated in the Peer Reviewed Auditor's Report as at September 30th, 2018. As per the provisions of the Micro, Small and Medium Enterprises Development Act, 2006 in case we are unable to identify the Micro and Small Enterprises (MSME) Creditors then a fine of minimum Rs. 10,000/- shall be leviable on the company under the said Act.

7. *The Domain Names of the website of the company are not owned by the promoters or the company. Any claim made by any person regarding the ownership of the domain names lead to restrict the use of website by the company. Consequently, it can adversely affect the business operations and reputation of the company.*

The Domain names with respect to the operational website of the company are not owned by the promoters, company and their related parties which can result in the restriction on the usage of website by the company in case of any claims made by any other person regarding the ownership of those domains. In such a scenario, the company may not be able to use its website which can adversely affect its operations and reputation.

- 8. Properties on which are registered office & Manufacturing Facilities are located are not owned by us. In the event we are unable to renew lease agreements with respect to our registered office and Manufacturing facilities on a timely basis or if such agreements are terminated, then it may lead to disruptions in our operations and may lead to operational losses.**

The properties where our registered office, manufacturing facilities and Godowns are situated in Maharashtra & Gujarat are not owned by our company and the same have been taken on lease. The agreements are renewable on mutually agreed terms. In the event of the said agreements are not being renewed or in case we have to vacate the said premises then our business operations may be disturbed till the time we are able to locate to any new premises for undertaking our administrative activities.

Further, the company has not renewed the said agreement till date; in case the said agreement is not been renewed then we have to vacate the said premises which may disrupt our operation.

Furthermore, the lease agreements executed between the company and the parties are being effective from back dates of lease agreement documents dates.

The rent agreements have a clause for the renewal of the same for a further period as may be mutually agreed among the parties after the expiry of the current period. As on the date of this Draft Prospectus, we have not yet obtained registration for our corporate

logo— and hence we do not enjoy the statutory protection accorded to a registered trademark. However, there can be no assurance that our either of our applications will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the corporate logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our corporate logo which may adversely affect our reputation and business and could require us to incur additional costs. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of

operations. For further details pertaining to our intellectual property, please refer to the chapter titled —*Our Business* beginning on page 129 of this Draft Prospectus.

- 10. *Our Company has not applied for Air (Prevention and Control of Pollution) Act, 1981 from Maharashtra Pollution Control Board & Gujarat Pollution Control Board which are mandatory as per the laws and regulation applicable on the industry, if any failure or delay in obtaining them in a timely manner may adversely affect our operations.***

Our Company is yet to apply for Pollution certificate for both the manufacturing units located in Maharashtra & Gujarat, under Air (Prevention and Control of Pollution) Act, 1981 from Maharashtra Pollution Control Board & Gujarat Pollution Control Board respectively. Any failure or delay in obtaining the required approvals may expose us to the penal clauses of the relevant law which can adversely affect our business, financial condition and results of operations. For more information, see the chapter titled – “*Government and other statutory approvals*” beginning on page 272 of this Draft Prospectus.

- 11. *Our Company has not obtained the factory license under Factories Act, 1948 for its manufacturing units located in Maharashtra and Gujarat. Any failure or delay in obtaining the license in a timely manner may adversely affect our operations.***

Our Company has not obtained the factory license required under The Factories Act, 1948 for both the manufacturing units located in Vasai, Maharashtra & Vapi, Gujarat. The factory license is mandatory as per law and any failure or delay in obtaining the license may expose us to the penal clauses of the relevant law which can adversely affect our business, financial condition and results of operations. For more information, see the chapter titled – “*Government and other statutory approvals*” beginning on page 272 of this Draft Prospectus.

- 12. *Our Company has not obtained Shop and Establishments Registration under Gujarat Shops and Establishments Act, 1948 for its manufacturing unit located in Vapi. Any failure or delay in obtaining the registration in a timely manner may adversely affect our operations.***

Our Company has not obtained the registration required under The Gujarat Shops and Establishments Act, 1948 for the manufacturing unit located in Vapi, Gujarat. Any failure or delay in obtaining the license may expose us to the penal clauses of the relevant law which can adversely affect our business, financial condition and results of operations. For more information, see the chapter titled – “*Government and other statutory approvals*” beginning on page 272 of this Draft Prospectus.

- 13. *Our company has not obtained insurance policies for our Manufacturing facility located in Vapi, Gujarat. Therefore, there is a risk of possible loss in case any unforeseen event happens which would've otherwise been covered through Insurance policy.***

Usually we insure our properties, plants and equipment against losses which could possibly occur on account of natural and man – made causes. The events that can lead to possible losses include earthquake, terrorism, riot/ strike / malicious damages, theft, etc. We have not insured our Vapi Manufacturing plant and any such aforesaid events may affect the operations of the manufacturing facility and Vapi and can lead to possible losses.

14. Our Company has not obtained the required registrations under the Employees' State Insurance Act, 1948. Any failure or delay in obtaining the registrations in a timely manner may adversely affect our operations.

Our Company has not obtained the Employee State Insurance Registration under the Employees' State Insurance Act, 1948. The registration is mandatory as per law and any failure or delay in obtaining the registrations may expose us to the penal clauses of the relevant law which can adversely affect our business, financial condition and results of operations. For more information, see the chapter titled – "Government and other statutory approvals" beginning on page 272 of this Draft Prospectus.

15. Our company is into the business of manufacture and trading of corrugated boxes, kraft papers and LD Plastic rolls. There is risk of potential conflicts of interest between our company and promoters and directors of our company.

One of promoters and director of the company is a designated partner in M/s. Packwell Enterprise LLP who is also in the same line of business as our company. There is always risks of potential conflicts of interest between our company and promoter director of the company. This situation may lead to loss of business, profits and or customers to our company in ordinary course of business.

16. The operations of the company are substantially dependent on our promoter and Key Managerial Personnel Mr. Keval Harshad Goradia and non – availability of his services to the company can significantly affect the business operations, financial conditions and profitability of the company.

One of the objects of the issue is to meet the incremental working capital requirements of the company and it is to be noted that substantial business operations of our company are managed by Mr. Keval Harshad Goradia who is the promoter and key managerial personnel of the company. Majority of decisions with respect to the manufacturing operations are taken by him and non – availability of his services to the company can adversely affect the business operations, financial condition and results of operations of the company. Continuous services of Mr. Keval Harshad Goradia towards the operations of the company is essential towards the sustained growth of the company.

17. Our insurance policies do not cover all risks, specifically risks like loss of profits, workmen's compensation etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss for manufacturing unit located at Maharashtra.

We attempt to maintain insurance against losses which could occur on account of natural and man-made causes of accidents, damage to infrastructure facilities and the environment. There could be situations where our insurance policies may not be sufficient in covering all the losses which we may suffer. If we suffer an event for which we are not adequately insured, there is a risk that it could have a material adverse effect on our business, results of operations and financial condition.

Our Company has obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of standard fire and special perils, Burglary Standard Policy and Electronic Equipment policy. Our insurance policy also covers risks related to earthquake, terrorism, riot/ strike/ malicious damages and theft. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like loss of profits, workmen's compensation etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer

a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

18. *We are dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.*

For the six-month period ended September 30, 2018, our top 5 suppliers contributed around 54.14% of our purchases. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customers' requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

19. *Our revenues have been significantly dependent on few Industrial Customers and our inability to maintain such business may have an adverse effect on our results of operations.*

For the six-month period ended September 30, 2018, sales to our top 5 customers contributed around 81.19% of our revenues from operations. Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, there can be no such assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. If our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospectus, results of operations and financial conditions may be adversely affected. In the event that any of these customers discontinue purchase of products from us, our results of operations and financial condition may be adversely affected.

20. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology upgradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

21. *We generate our major portion of sales from our operations in certain geographical regions especially Maharashtra.*

We generate major sales from our customers situated at Maharashtra. For the year ended September 30, 2018, our Company generated Rs. 1327.56 lakhs of our net revenue from manufacturing operations. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices

and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Maharashtra market may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise to mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

22. Shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial conditions.

Our manufacturing process requires substantial amount of power facilities. We meet the power requirement at our Vasai manufacturing facility by procuring the same from Maharashtra State Electricity Distribution Company Limited. Power requirement at another manufacturing facility located in Vapi, Gujarat is met by procuring from Daxin Gujarat Vij Company Limited. The quantum and nature of power requirements of our industry and company is such that it cannot be augmented/supplemented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high.

23. Our Promoter / Director have provided personal guarantee for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoter / Directors and thereby, impact our business and operations.

Mr. Keval Harshad Goradia, our Promoter Director, and Mrs. Geeta Harshad Goradia relative of promoter have personally guaranteed the repayment of loan taken from Oriental Bank of Commerce. As at September 30th, 2018, outstanding amounts from credit facilities personally guaranteed was Rs. 2.49 Lacs. Any default or failure by us to repay its loans in a timely manner, or at all could trigger repayment obligations on the part of Mr. Keval Harshad Goradia and Mrs. Geeta Harshad Goradia in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoter / Director of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that such individual withdraws or terminate their guarantee and collateral security, our lenders for such facilities may ask for alternate guarantees and collateral security, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer to chapter titled “Financial Indebtness” beginning on page 267 of the Draft Prospectus.

24. We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect our reputation, and our sales could be diminished if we are associated with negative publicity.

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. However, our Company is well equipped with in-house testing laboratory to test the products. Our finished product has to undergo a strict quality check to ensure that they are of relevant quality as per the standards set. Our in-house testing laboratory regulates and monitors the quality, strength, stiffness and GSM measurement of boxes to ensure that the same can safely carry products for their end use. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect our reputation, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop-in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

25. Our operations may be adversely affected in case of industrial accidents at any of our production facilities.

Usage of heavy machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans, cranes, heating processes of the Boiler etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Occurrence of accidents could hamper our production and consequently affect our profitability.

26. Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour, workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- a. Environment (Protection) Act,1986
- b. Air (Prevention and Control of Pollution) Act,1981
- c. Water (Prevention and Control of Pollution) Act,1974
- d. Hazardous Waste Management & Handling Rules,2008
- e. Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Maharashtra & Gujarat.

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

27. Our lenders have charge over our movable properties in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 2.49 Lakhs as on September 30th, 2018. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer chapter titled “Financial Indebtness” beginning on page 267 of this Draft Prospectus.

28. Our lenders have imposed certain restrictive conditions on us under our financing arrangements regarding the end use of borrowed funds, submission of documents and meeting the margin requirements. Noncompliance with the restrictive conditions may lead to repayment of the borrowings in whole or in part and the company may incur other related costs.

There can be no assurance that we will be able to comply with these restrictive covenants in the future. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled—“ Financial Indebtness” on page 267 of the Draft Prospectus.

Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance.

29. The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.

The market for our products is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

30. Our Company has unsecured loans which are repayable on demand. Any demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

As on September 30, 2018, our Company has unsecured loans amounting to Rs. 107.90 lakhs from related and other parties that are repayable on demand to the relevant lender. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our

Company, please refer the chapter titled Financial Statements as Restated beginning on page 189 of this Draft Prospectus.

31. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into related party transactions with our Promoters and Directors. While we believe that all such transactions have been conducted on the arm's length basis, however it is difficult to ascertain whether more favorable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will enter into the related party transactions in the future also. For details of these transactions, please refer to section titled "Related Party Transactions" at page 187 of this Draft Prospectus.

32. Our Company has negative cash flows from its operating and investing activities during the period from April 03rd, 2018 to September 30th, 2018, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating activities and investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Amount (Rs. In lakhs)

Particulars	For the period ended September 30 th , 2018
Cash Flow from / (used in) Operating Activities	(418.44)
Cash Flow from / (used in) Investing Activities	(37.42)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

33. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive and involves investment of significant amount in trade receivables and inventories of raw material. Summary of our working capital position based on the restated financials as at September 30th, 2018 is given below: -

Amount (Rs. In lakhs)

	As at September 30 th , 2018
A. Current Assets	
Inventories – Raw Material	102.12
Trade Receivables	753.97
Cash and Cash Equivalents	25.79
Short Term Loans and Advances	477.63
Total Current Assets (A)	1,359.51
B. Current Liabilities	
Trade Payables	628.14
Other Current Liabilities and Provisions	87.88
Total Current Liabilities (B)	716.02
Working Capital (A-B)	643.49

Inventories as % of total current assets	7.51%
Trade Receivables as % of total current assets	55.46%

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled — Objects of the Issue beginning on page 91 of this Draft Prospectus.

34. Our Company have manufacturing facilities located at Vasai, Maharashtra & Vapi, Gujarat. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in this facility may in turn adversely affect our business, financial condition and results of operations.

Our Company have manufacturing facilities located at Vasai, Maharashtra & Vapi, Gujarat. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facilities are susceptible to damage or interruption such as human error, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. Further, our manufacturing facilities are also subject to operational risk arising from compliance with the directives of relevant government authorities. Operational risks may result in personal injury and property damage and the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company’s operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

35. Our Company has internal transportation facility for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses its own transportation facility for delivery of our goods. Though our business has not experienced any disruptions due to transportation in the past, any future transportation issues may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

36. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our

management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

37. *We are significantly dependent on contractual labour for our manufacturing operations and non – availability of the contractual labour may affect our business operations, profitability and results of business.*

We are operating under labour intensive industry whereby we are dependent on the contractual labour for carrying out our manufacturing operations. We hire Skilled & Semi – Skilled labour including machine operators & technical staff on contract basis for our manufacturing facilities. The number of contracts labours employed by us varies from time to time based on the demand from our customers. Currently, our entire manufacturing operations workforce is on contract basis and if we are unable to maintain adequate supply of contractual labour for our operations then it may result in adverse effect on our business operations and consequently on the profitability of the company.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see —“ Dividend Policy” on page 188 of this Draft Prospectus.

39. Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

40. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters, Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Our Promoters, Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see — “Capital Structure” and — “Our Management” on pages 71 and 163, respectively, of this Draft Prospectus.

41. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs. 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

42. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

43. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own 53.50% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

44. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

45. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

46. Industry information included in this Draft Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third – party statistical, financial and other industry information is either complete or accurate.

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

48. There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

49. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

50. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by Fixed Price Method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 98 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;

- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

51. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the issue until the Issue receives appropriate trading permissions.

EXTERNAL RISK FACTORS

Industry Related Risks

53. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks

54. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and currently, such gains are not be subject to capital gains tax in India if Securities Transaction tax ("STT") has been paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. The Finance Act, 2018, has

withdrawn the exemption on long-term capital gains tax from 1st April 2018 and to impose 10%, tax on such long-term capital gains in excess of Rs. 1,00,000. Any long – term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

55. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus under chapter “Financial Statements as restated” beginning on page 189, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

56. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Goods and Service Tax (GST) on certain raw materials and components; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

57. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as

well. Any significant change in such liberalization and de-regulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

58. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which our company operates contained in the Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the industry in which our company operates has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled ‘*Our Industry*’ beginning on page 104 of the Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

59. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to “*Key Industry Regulations and Policies*” on page no. 147 for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge.

Currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

60. Financial instability in Indian financial markets could adversely affect Our Company’s results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

61. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE Limited could adversely affect the trading price of the Equity Shares.

62. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer

credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

63. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

64. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

65. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

66. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

67. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

DETAILS OF THE OBJECT OF THE ISSUE

1. Long Term Working Capital Requirement

Our company is engaged in the manufacturing of corrugated packaging products and trading of Kraft and duplex paper which are also the primary raw material used in the manufacturing of corrugated packaging. On account of paucity of funds, the company is taking an average credit period of 115 days from the suppliers and thus not getting favorable pricing terms on the purchase of raw material. We intend to reduce the credit period to 10 – 15 days in order to get better discount and pricing terms from our suppliers. Based on the restated financials of the company as at September 30th, 2018 the company expects to double its turnover by the end of financial year 2018 – 19. Increased turnover will lead to higher investments in inventories and receivables. Therefore, our company will require additional funds for meeting its incremental working capital requirements.

For the financial year ended on March 31st, 2017 and 2018 our Company’s net working capital consisted of Rs. 261.29 Lakhs and Rs. 143.45 Lakhs respectively based on the restated financial statements. The total net working capital requirement for the year ending as at March 31, 2019 is estimated to be Rs. 976.53 Lakhs. The incremental working capital requirement of Rs. 833.08 shall be met through the Public Issue and Private Placement of Equity Shares. The requirement has been estimated based on the Provisional financial statements for the period and restated financial statements as at September 30th, 2018. As on the date of this draft prospectus, we meet our working capital requirements in the ordinary course of its business from capital and long-term unsecured borrowings, etc.

CORRUGATED BOXES – GLOBAL INDUSTRY OVERVIEW

The global corrugated packaging market was valued at \$ 237.5 billion in 2017 and is projected to reach \$ 294.3 billion by 2023, witnessing a CAGR of 3.7% during the forecast period. Environmental sustainability as well as cost benefit associated with corrugated packaging and increasing preference for sustainable packaging solutions is the major market drivers.

GLOBAL CORRUGATED PACKAGING MARKET, BY APPLICATION, \$B (2013 – 2023)

Corrugated box is made from the combination of two sheets of paper called liners, which are glued to a corrugated inner medium called fluting. These three layers of paper are assembled in a way that gives overall structure a better strength. These boxes are designed to match the processing and end – use requirements.

On the basis of application, the corrugated packaging market is categorized into processed food, fresh food and produce, beverages, personal and household care, chemicals, paper products, electrical and electronics goods, glassware and ceramics, tobacco, wood & timber, textiles, direct mail & dispatch, transport, and others; ‘others’ include footwear, apparel, and furniture. Of these, processed food was the largest application area in the market, contributing more than 25% in 2017. The packaging of processed food demands secure and flexible packing material, to ensure product safety and

convenience to customers. Hence, corrugated packing solutions are being developed by manufacturers to tap the growing demand in the packaging market.

Globally, Asia – Pacific (APAC) was the largest corrugated packaging market, contributing more than 45% in 2017. The region is observed to be influenced largely by westernization, growing consumption of retail ready – to – eat food, thus, propelling the demand of corrugated packing. The busy lifestyle of consumers and surging urbanization in developing countries has increased the consumption of durable and non – durable goods. Furthermore, booming sales of processed foods, especially in developing countries including India, China, and Indonesia, are attributing to the highest share of the market in APAC.

Corrugated Packaging Market Dynamics

A shift toward internet shopping is the major trend witnessed in the corrugated packaging market. Rapid industrialization and growth of e – commerce and courier as well as delivery service industry are the major drivers identified in the market.

Trend

Corrugated packaging is one of the most convenient and affordable modes of packaging for the e – commerce industry, as it is light weight and available at low cost and helps in easy and convenient delivery of the product to consumer’s door – step. This is prompting manufacturers to increasingly use this packaging for internet or online shopping and giving impetus to the market.

Drivers

Corrugated packing is one of the most cost – effective packaging solutions for many industries, as it is made from natural materials, having the highest recycling rate, when compared to other packaging solutions. In recent years, both consumer and regulatory bodies have raised their concern towards environment and sustainability. The increasing landfill is becoming a major challenge for the government and hence, the demand for environment – friendly material for packaging is growing, especially for non – durable consumer goods. Hence, the governments of various countries are also encouraging the use of corrugated packing material for sustainable development, thus driving the corrugated packaging market growth.

Rapid industrialization in developing nations has resulted in increased international trade activities, expansion of infrastructure facilities, upsurge in per capita income, and growth in several industries such as chemicals, oil and gas, and energy. All this has boosted the growth of the corrugated packing material market in recent years. The developing economies are witnessing rapid industrialization in the current scenario. As per Central Intelligence Agency’s (CIA) World Factbook, China’s industrial production was valued at \$3.7 trillion, as compared to that of the U.S. with \$2.9 trillion, in 2012. Thus, the demand for corrugated packaging market is expected to increase in the coming years.

Restraints

Corrugated packing is among the most cost – effective packaging solutions for various industries. However, certain limitation such as low strength and poor barrier properties of corrugated material is restricting its use in many applications. Corrugated packing is best suited for bulky solid industrial products. This packaging is not a preferred packing material for liquid products, as they carry a chance of product leak due to low absorption or containing properties. Moreover, moist and humid weather decreases the firmness and strength of corrugated boxes. Corrugated packing also has poor fire resistibility. Hence, low strength of corrugated materials and poor barrier properties are hindering the corrugated packaging market growth.

Corrugated Packaging Market Competitive Landscape

Some of the major players operating in the global corrugated packaging market are Nine Dragons Paper (Holdings) Limited, International Paper Company, WestRock Company, Smurfit Kappa Group, Georgia-Pacific Equity Holdings LLC, Lee & Man Paper Manufacturing Ltd., Oji Holdings Corporation, Mondi Group, Packaging Corporation of America, and DS Smith PLC.

World demand for corrugated boxes is expected to increase 3.7 percent per year through 2019, approaching 260 billion square meters. In developed countries, box demand tends to track overall economic growth and industrial production trends and, as a result, will continue to be relatively slow growing. In developing economies, especially those in Asia and the Africa / Middle East region, growth will be more robust as manufacturers in these areas use corrugated boxes more intensively for product packaging and transportation, in part because boxes are still gaining market share from wood crates.

In nearly all regions, strong growth in e – commerce will drive corrugated box usage, as will the growing popularity of retail – ready packaging. Retail – ready packaging has become increasingly popular in more affluent countries because of the time and labor cost savings it offers. Corrugated boxes will continue to benefit from their sustainability, good environmental image, and low cost compared to competitive products.

Asia / Pacific, Africa / Mideast regions to grow the fastest

The Asia/Pacific region accounted for half of global corrugated box demand in 2014, with China alone representing almost 30 percent. Growth in the Chinese market is expected to slow going forward as growth in manufacturing activity moderates. Despite this deceleration, China will still post one of the fastest growth rates for box demand. Other countries in Asia expected to see strong gains include India, Philippines, Thailand and Vietnam. The Africa / Mideast region will offer the fastest growth among the six world regions, but will continue to account for less than five percent of global corrugated box demand. While there are a few appreciable box markets in the region, such as South Africa and Turkey, most countries, including the wealthier nations such as Israel and some of the Gulf states, do not yet have manufacturing sectors large enough to support substantial corrugated box sales.

Box light weighting to limit containerboard demand

Demand for containerboard used in corrugated box production will continue to grow more slowly than global box output due to product light weighting. Western Europe has been at the forefront of these efforts due to the region's strong environmental focus and sophisticated manufacturing techniques, with box weights in Western Europe currently only about 80 percent of those seen in the US. However, the light weighting trend is growing more rapidly elsewhere in the world, leading to lagging growth for containerboard in some markets.

INDIAN CORRUGATED BOXES INDUSTRY

Indian corrugated box industry is an inevitable part of manufacturing sector which rely heavily on corrugated packaging for finished goods transportation and handling. Indian corrugated box industry grew from at a CAGR of 23.3% in terms of revenue. Factors such as increasing demand from fresh food and beverages, home & personal care goods, electronic goods industries, logistics application, increasing consumer awareness towards sustainable packaging and growth of the e – commerce industry have propelled the growth of Indian corrugated boxes market.

Market Segmentation:

By Type of Ply/Box

5 ply type of box has contributed a significant share in terms of sales volume in FY18. 5 Ply type of box has dominated the market as these boxes are now manufactured through fully automatic machines which increases the strength of the box and is used in place of 7 ply and 9 ply type of boxes.

By End User

In FY18, FMCG segment has dominated Indian corrugated box market. The automotive, textile and electronics & appliances industry also contributed a robust share and followed the FMCG sector. Other end user such as paints, pesticides, distillery products, E – Commerce, Home Merchandise & Garments has least revenue contribution in corrugated box revenue in FY18.

WHAT IS CORRUGATED?

Corrugated fiberboard or "combined board" has two main components: the liner and the medium. Both are made of a special kind of heavy paper called containerboard. Linerboard is the flat material, typically on the outer surfaces of the board but also on the inside for some structures, that adheres

to the medium. Medium is the paper that is formed into arches or flutes on the single facer and glued between the linerboard facings.

- [Flutes](#)
- [Combined Board](#)
- [Box Styles](#)

Flutes

Architects have known for thousands of years that an arch with the proper curve is the strongest way to span a given space. The inventors of corrugated fiberboard applied this same principle to paper when they put arches in the corrugated medium. These arches are known as flutes and, when anchored to the linerboard with an adhesive, they resist bending and pressure from all directions.

When a piece of combined board is placed on its end, the arches form rigid columns, capable of supporting a great deal of weight. The flutes act to keep the linerboard sheets separated, maximizing the bending rigidity of the board. When pressure is applied to the side of the board, the space in between the flutes acts as a cushion to protect the container's contents. The flutes also serve as an insulator, providing some product protection from sudden temperature changes. At the same time, the vertical linerboard provides additional strength and protects the flutes from damage. Flutes come in several basic designations. Flutes with the same designation have similar size, but may have various flute profiles and number of flutes per foot within a given designation:

- **A flute** was the original flute profile for corrugated board. It has about 33 flutes per foot.
- **B flute** was then developed for canned goods that were self-supporting, and so did not require boxes that supported much load. It has about 47 flutes per foot.
- **C flute** was next developed as an all-purpose flute, and it has about 38 flutes per foot.
- **E flute** was the next successful flute profile, and it has about 90 flutes per foot.
- **F flute** was developed for small folding carton type boxes. It has about 125 flutes per foot.

In recent years not only has there been a proliferation of flute profiles, but there has been increase in the variation in flute characteristic measurements for any given flute profile. Flute profiles will vary, sometimes significantly, because the corrugator rolls are manufactured to address a variety of aspects (such as speed, paperboard characteristics, economies, etc.).

Combined Board

The below illustration demonstrates four basic types of combined board that are most commonly created from linerboard and medium using the variety of flute structures:

- **Single Face:** One corrugated medium is glued to one flat sheet of linerboard.
- **Single Wall:** The corrugated medium is glued between two sheets of linerboard. Also known as Double Face.
- **Double Wall:** Three sheets of linerboard with two mediums in between.
- **Triple Wall:** Four sheets of linerboard with three mediums in between.

Generally, larger flute profiles deliver greater cushioning and vertical compression strength, while smaller flute profiles provide enhanced graphics capabilities. Smaller flutes such as E and F also provide enhanced structural capabilities for primary (retail) packaging compared to paperboard (folding cartons). There is a good deal of variance across the industry in the range of flute sizes based upon the container characteristics that are desired for each application, as well.

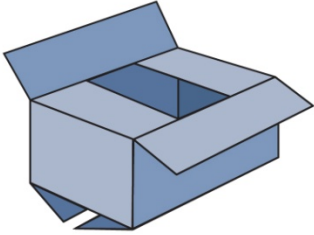

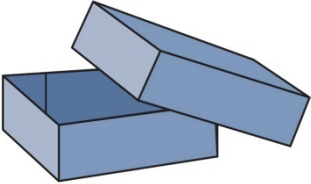

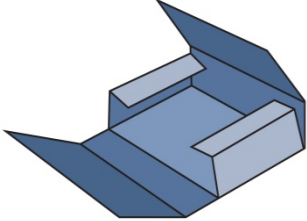

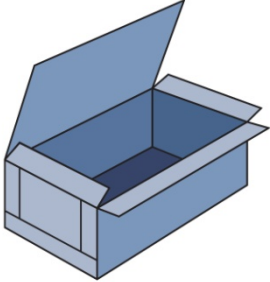

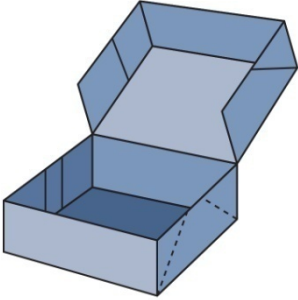

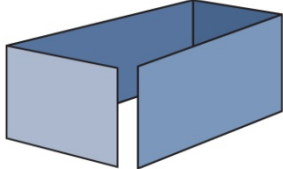

Box Styles

Boxes can be used to ship everything from apples to washing machines. By changing the design of a box, combining layers of corrugated or adding interior packaging, a corrugated box can be manufactured to efficiently ship and store almost any product.

Many standard box styles can be identified in three ways: by a descriptive name, by an acronym based on that name, or by an international code number. The numerical code system, known as the International Fibreboard Case Code, was developed by the European Federation of Corrugated Board

Manufacturers (FEFCO) in collaboration with the European Solid Board Organization (ESBO) to avoid confusion when communicating in different languages.

Below are some common box style categories and designs. Keep in mind there are many other standard styles from which to choose. In addition, corrugated boxes can be custom designed to meet the specific needs of any box user. A manufacturer's representative will have more information about additional box style options.

BENEFITS OF CORRUGATED

Corrugated Packaging is naturally the best choice because of the following reasons:

Protects

Transports

Sells

Recycles

Protects

Before a product makes its way into the hearts and minds of consumers, it has to arrive in perfect condition. Corrugated packaging combines structural rigidity with cushioning qualities to protect contents from damage. One of the reasons it works so well is found in its basic construction, which uses a middle layer of fluting to absorb impact.

Architects have known for thousands of years that a curved arch is the strongest way to span a given space. The inventors of corrugated fiberboard applied this same principle to paper when they put arches in the corrugated medium. These arches are known as flutes, and they enable corrugated to resist bending and pressure from all directions.

These flutes are little engineering marvels and a key to corrugated's protective qualities. The arches form rigid columns, capable of supporting a great deal of weight while cushioning the container's contents. The flutes also serve as insulators, providing some product protection from sudden temperature changes.

Combining high-tech engineering and the versatility to custom-design every package for its particular contents and shipping requirements, corrugated's cushioning quality is matched by its stacking strength, preventing damage in transit.

Transports

Multiple studies have shown that corrugated makes the most efficient use of space in truckloads, which is an important determinant of shipping costs. With innovative design, boxes can be right-sized to any product – eliminating wasted space and minimizing the need for void fill materials (such as air pillows, packing peanuts, etc.).

The corrugated industry ran multiple case studies to compare the system costs of transporting various fresh produce commodities in corrugated vs. reusable plastic containers (RPCs). Studies compared costs for transporting onions, strawberries, tomatoes, apples, broccoli, citrus, grapes and watermelon. Every study showed that corrugated is the more economical choice. It provides the greatest cube efficiency, and its light weight allows a truckload to cube out before it weighs out – meaning that every

available inch of space is optimally utilized, minimizing freight and handling costs with fewer trucks, less fuel, and lower emissions

(Source: <https://www.corrugated.org/transport/>)

Sells

Exciting technological advances are being made in corrugated manufacturing, enabling the package to more powerfully fulfill a key marketing function. Digital printing capabilities have improved dramatically in the past few years to support direct printing of intricate, colorful graphics on corrugated board. Many corrugated manufacturers are now investing in equipment to make production – scale, digitally-printed boxes with sharper, cleaner graphics on corrugated board than ever before.

Of course, innovations in retail are also driving an explosion in e – commerce options, even for fresh foods. Meal kit subscription services are making headway in capturing a new home delivery market. And then there’s the home delivery services cropping up that are extensions of supermarkets’ businesses.

E – commerce raises the visibility of corrugated as more boxes are delivered to consumer homes and offices. This trend will continue to grow as consumers transition toward online shopping and away from brick – and – mortar stores.

Corrugated packaging helps to convey information about the product inside – Big changes in the food industry are being driven by a shifting consumer paradigm. Today’s shoppers are concerned with product transparency – especially when it comes to food – as never before, a result of growing health consciousness. This creates an imperative for brands to communicate more information about their products. In produce and other perishable categories, consumers want to know the location of origin, nutritional information, farming methods, variety, and additional attributes that address the product’s sustainability and healthiness.

Thanks to improvements in printing technology, corrugated can now more effectively serve as a product’s advertising billboard when used as a primary package or display container. By direct – printing the box with brand messaging, beautiful graphics, product information, and more, producers can make the most of the package that so effectively transports their products from farm to store and doorstep.

Recycles

Corrugated’s successful recovery rate contributes to overall improvements in the industry’s environmental impact. Released to the public in June 2017, the latest corrugated industry life cycle assessment (LCA) confirms continued environmental progress through increased efficiencies in mill energy systems, increased use of low – Impact fossil fuels, and increased recovery for recycling. Commissioned by the Corrugated Packaging Alliance and conducted by the National Council for Air and Stream Improvement (NCASI), the LCA found that corrugated packaging recovery reduced the industry’s greenhouse gas emissions (GHG) by 35 percent between 2006 – 2014 by keeping corrugated out of landfills. Methane emissions from landfills are a significant contributor to global warming.

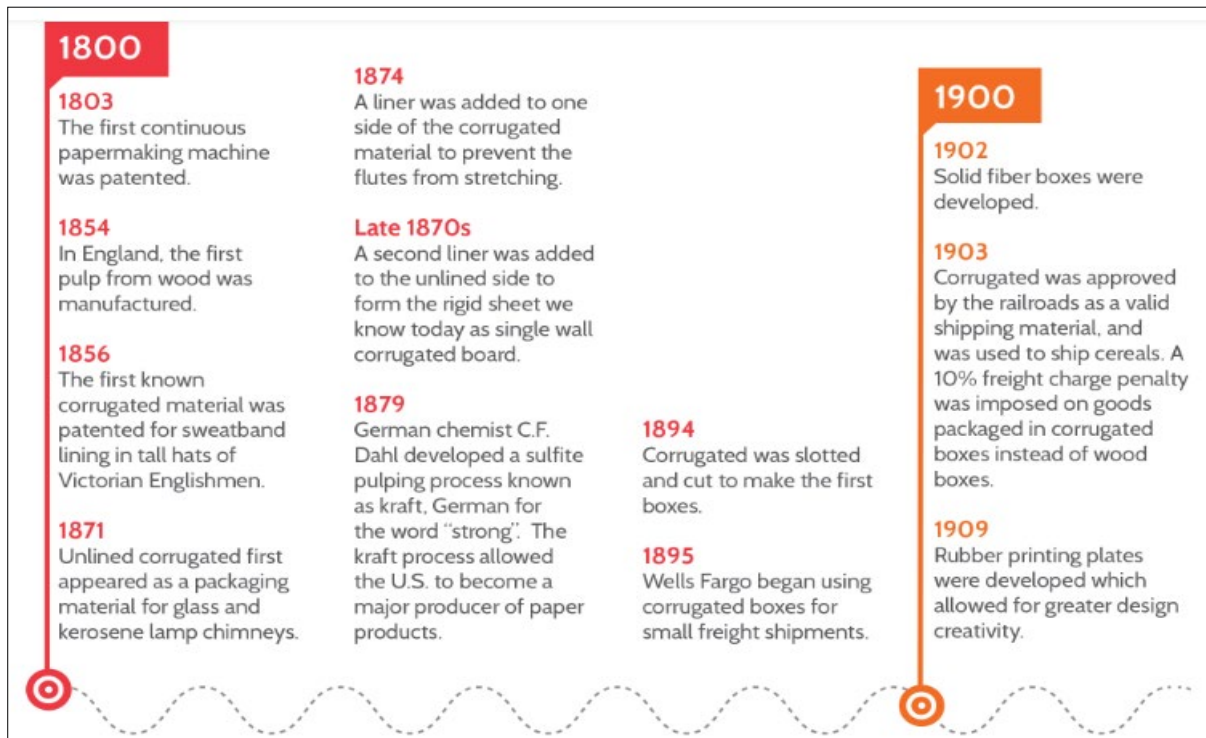

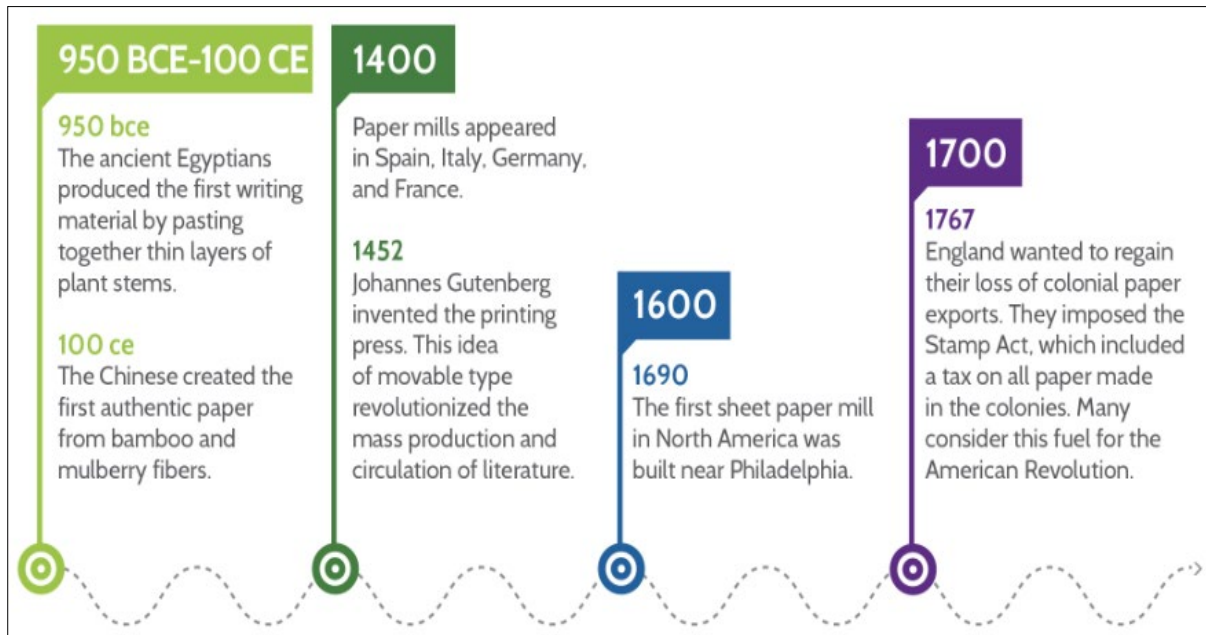

Also, paper mills have shifted their fuel sources further away from non – renewable fossil fuel sources like oil and coal. In 2014, the fuel mix used by mills consisted of 73 percent natural gas – a 27 percent

increase since 2006. Increasing the amount of natural gas used relative to non – renewable fuels reduces contributions to global warming and greenhouse gas emissions.

HISTORY OF CORRUGATED

The History and Evolution of Corrugated Packaging is as under:-

1900

1912

The freight charge penalty was dropped on west bound freight.

1914

Interstate Commerce Commission ruled in favor of the R.J. Pridham Company of Los Angeles and deleted the last of the punitive freight charges on corrugated boxes. This set the stage for a rapid expansion of the corrugated industry.

1919

Rail classifications were combined, forming Rule 41, which specified the minimum caliper and Mullen (burst strength) of individual facings.

1920s

Corrugated containers overtook solid fiberboard as the packaging of choice.

1935

The Stein Hall Company reconverted the corrugated industry to starch adhesives. They replaced a silicate of soda-based formula with a formula based on a mixture of cooked and uncooked starch. They applied heat at the glue line, which solidified the starch and created an instant bond.

1940

The Autoplatten die cutter was invented.

1940s

The recovery boiler, along with the ability of the kraft process to accept a wider variety of wood species and produce stronger fibers, made the kraft process the dominant pulping process starting in the 1940s.

1944

The railroad rules changed to require the minimum combined weight of the facings versus caliper.

1957

Flexographic printing was introduced. This method of printing virtually replaced letterpress and oil-based ink by the 1970s.

1960s

The flexo folder-gluer and flexo rotary die cutter were invented.

Photopolymer printing plates were introduced allowing for improved accuracy in creating printing plates from original artwork.

1963

McKee et. al. published equations for predicting box strength.

1968

Item 222 appeared, providing truck shipping rules.

1970

The Occupational Safety and Health Act (OSHA) was passed, regulating packaging machinery and plant operations.

1973

The Universal Product Code (UPC) bar code was introduced.

The CID (Corrugated Industry Development) study laid the groundwork for high speed continuous run corrugators.

1974

The first 110 inch corrugators were introduced.

1977

The Transportation Safety Act was amended to directly regulate manufacturers, vendors, and shippers of hazardous materials.

Early 1980s

Innovations were made in corrugator design to enhance productivity and reduce waste: automated slitters, automatic order change, fingerless single facers, quick corrugator roll change, increased splice speeds, and shorter flute profiles.

Emergence of electronics in the areas of corrugated box design, production scheduling, machine controls, production records, and billing improved productivity and quality.

Preprint printing emerged.

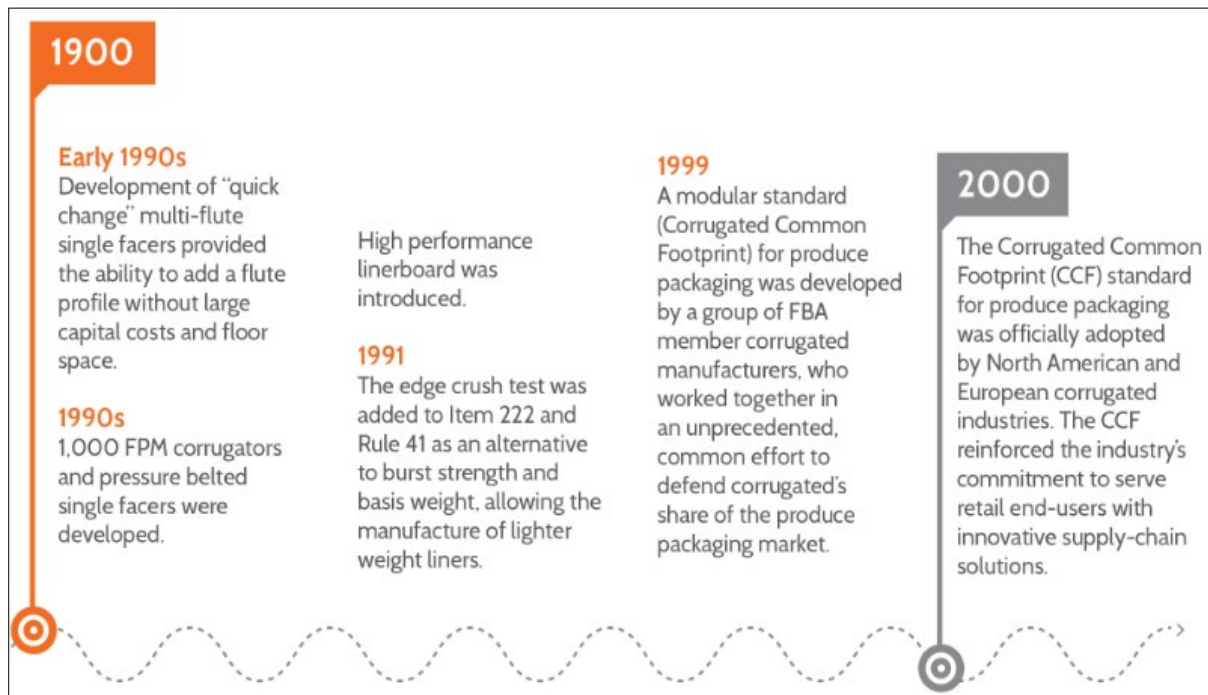

1981

The extended nip press was patented by Beloit allowing the development of high ring crush containerboard.

Late 1980s

New developments in the anilox roll, plate, and press design drove the industry into short-run, high-graphic products.

High shear systems for rapid mixing of starch adhesives were introduced.

- India is expected to retain its position as the world's leading recipient of remittances in 2018, with total remittances touching US\$ 80 billion, according to World Bank's Migration and Development Brief.

Government Initiatives

The Union Budget for 2018 – 19 was announced by Mr. Arun Jaitley, Union Minister for Finance, Government of India, in Parliament on February 1, 2018. This year's budget will focus on uplifting the rural economy and strengthening of the agriculture sector, healthcare for the economically less privileged, infrastructure creation and improvement in the quality of education of the country. As per the budget, the government is committed towards doubling the farmers' income by 2022. A total of Rs 14.34 lakh crore (US\$ 196.94 billion) will be spent for creation of livelihood and infrastructure in rural areas. Budgetary allocation for infrastructure is set at Rs 5.97 lakh crore (US\$ 81.99 billion) for 2018 – 19. All time high allocations have been made to the rail and road sectors.

India's unemployment rate is expected to be 3.5 per cent in 2018, according to the International Labour Organization (ILO).

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent.

Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the government are listed below:

- National Institute for Transforming India (NITI) Aayog released a strategic document titled 'Strategy for New India @ 75' to help India become a US\$ 4 trillion economy by FY23.
- The Government of India is going to increase public health spending to 2.5 per cent of GDP by 2025.
- The Government of India released the maiden Agriculture Export Policy, 2018 which seeks to double agricultural exports from the country to US\$ 60 billion by 2022.
- Around 1.29 million houses have been constructed up to December 24, 2018, under Government of India's housing scheme named Pradhan Mantri Awas Yojana (Urban).
- Village electrification in India was completed in April 2018.
- Around 22.43 million households have been electrified up to December 17, 2018 under the Pradhan Mantri Sahaj Bijli Har Ghar Yojana (SAUBHAGYA). Moreover, 100 per cent household electrification has already been achieved in 25 states, as of December 2018.
- Prime Minister's Employment Generation Programme (PMEGP) will be continued with an outlay of Rs 5,500 crore (US\$ 755.36 million) for three years from 2017 – 18 to 2019 – 20, according to the Cabinet Committee on Economic Affairs (CCEA).
- The target of an Open Defecation Free (ODF) India will be achieved by October 2, 2019 as adequate funding is available to the Swachh Bharat Mission (Gramin), according to Ms Uma Bharti, Minister of Drinking Water and Sanitation, Government of India.
- The Government of India has decided to invest Rs 2.11 trillion (US\$ 32.9 billion) to recapitalise public sector banks over the next two years and Rs 7 trillion (US\$ 109.31 billion) for construction of new roads and highways over the next five years. As of November 2018, Rs 82,000 crore (US\$ 11.75 billion) has already been infused and the government is planning to infuse Rs 42,000 crore (US\$ 6.02 billion) more by March 2019.
- The mid – term review of India's Foreign Trade Policy (FTP) 2015 – 20 has been released by Ministry of Commerce & Industry, Government of India, under which annual incentives for labour intensive MSME sectors have been increased by 2 per cent.

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper – middle income status on the back of digitisation, globalisation, favourable demographics, and reforms. India's revenue receipts are estimated to touch Rs 28 – 30 trillion (US\$ 385 – 412 billion) by 2019, owing to Government of India's measures to strengthen infrastructure and reforms like demonetisation and Goods and Services Tax (GST).

India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non – fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from to 175 GW by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

INDIAN ECONOMY – GROWTH OUTLOOK FOR 2018 – 19

State of the Economy

The year 2017 was marked by a number of key structural initiatives to build strength across macro – economic parameters for sustainable growth in the future. The growth in the first half of the year suffered despite global tailwinds. However, the weakness seen at the beginning of 2017, seems to have bottomed out as 2018 set in. Currently, the economy seems to be on the path to recovery, with indicators of industrial production, stock market index, auto sales and exports having shown some uptick (shown below). We believe that India’s economic outlook remains promising for FY 17 – 18 and is expected to strengthen further in FY 18 – 19. However, the signs of green shoots should not be taken for granted as downside risks remain.

The biggest challenges for 2018 are as to how the economy can maintain its recovery in the face of increasing inflationary pressures, coupled with a higher fiscal deficit as well as an increasing debt burden. The key to this conundrum lies in the revival of consumer demand and private investment.

India - World Decoupling (GDP, %)

Source: IMF, Deloitte

The objective of this paper is to present an analysis of the current Indian economic scenario along with the expectations from the period ahead.

Decoupled, but still one of the fastest growing economies:

Over the last few quarters, what has become increasingly evident is the divergence between Indian and global growth. This decoupling largely happened as India’s growth was hit on account of mega policy announcements.

One of the other reasons for this can possibly be attributed to shifting real interest rate trends. During 2016, India’s real interest rates followed a downward global trend. However, after this the rates started shifting upwards which affected investment activity, led to currency appreciation and resulted

in subdued export activity. In contrast to the economic situation in India, global economic conditions have gained momentum and have possibly created a ripple effect across regions. International Monetary Fund (IMF) has estimated global growth to have grown faster at 3.7% in 2017 against what was earlier projected, with revival largely apparent across Europe and Asia¹. With broad based recovery on the cards, global growth forecast has been moved up by 0.2 percentage points to 3.9% for 2018 and 2019. Growth outlook for the US has been estimated to be positive due to improvement in domestic demand as well as the anticipated boost to the economy by way of U.S. tax policy changes. Across other developed economies, the Euro area saw further expansion on the back of falling unemployment rates, investment optimism, and lower interest rates which have stimulated consumption further, while the effects of strong external demand were visible in Japan where manufacturing activity moved to the upside. Looking ahead, for 2018, it is widely expected that this decoupling will not continue. As per IMF and World Bank, world economy is expected to grow at 3.7% and 3.1% in 2018 while the Indian economy is expected to grow at 7.4% and 7.3%, respectively for 2018. We expect India to grow by 6.7% in FY17 – 18 and further by 7.2% in FY18 – 19 on account of uptick in investment activity and broader market adjustments to previous market disruptions. Currently, India is the world’s seventh – largest economy at USD 2.2 trillion, sitting between France and Italy. A report by World Economic Forum has projected that by 2050, the Indian economy is expected to be the world’s second – largest, behind only China.

GLOBAL ECONOMIC ENVIRONMENT AND OUTLOOK FOR GROWTH

As the global cyclical upswing approaches its two – year mark, the pace of expansion in some economies appears to have peaked and growth has become less synchronized across countries. Among advanced economies, growth divergences between the United States on one side, and Europe and Japan on the other, are widening. Growth is also becoming more uneven among emerging market and developing economies, reflecting the combined influences of rising oil prices, higher yields in the United States, sentiment shifts following escalating trade tensions, and domestic political and policy uncertainty. While financial conditions remain generally benign, these factors have resulted in capital inflow reductions, higher financing costs, and exchange rate pressures, more acute in countries with weaker fundamentals or higher political risks. High – frequency data present a mixed picture of near – term global activity. Retail sales volumes appear to have picked up in the second quarter, and survey data of purchasing managers for the service sector remain generally strong. Industrial production, however, appears to have softened, and survey data of purchasing managers in manufacturing indicate a weakening of new export orders.

Commodity prices and inflation: Largely reflecting supply shortfalls, global oil prices increased 16 percent between February 2018 (the reference period for the April 2018 WEO) and early June 2018 (the reference period for the July 2018 WEO Update). In June, the Organization of Petroleum Exporting Countries (OPEC) and non – OPEC oil producers agreed to raise oil production by about 1 million barrels per day from current levels, correcting the recent undershooting of the November 2016 group target. Market expectations suggest that declining capacity in Venezuela and US sanctions on Iran may pose difficulties for the group to deliver the agreed upon production increase consistently. Futures markets, however, indicate prices are likely to decline over the next 4–5 years (in part due to increased US shale production)—as of end June, medium – term futures prices are about \$59 per barrel (20 percent below current levels). The increase in fuel prices has lifted headline inflation in advanced and emerging market economies. Core inflation has strengthened in the United States as the labor market has tightened further, and inched up in the euro area. Core inflation in emerging markets has also increased, reflecting pass-through effects from currency depreciation in some cases and second – round effects of higher fuel prices in others. Prices of agricultural commodities have increased marginally, reflecting diminishing excess supply.

Financial conditions in advanced economies: With firmer readings on inflation and strong job creation, the US Federal Reserve continued the course of gradual policy normalization. It raised the target range for the Federal Funds rate by 25 basis points in June, while signaling two additional rate hikes in 2018 and three in 2019—a steeper schedule than indicated in March. The ECB announced that it will taper its monthly asset purchases from the current €30 billion to €15 billion in October, with an anticipated end to the program on December 31. It also indicated it will maintain policy rates at their current levels at least through the summer of 2019, a somewhat more accommodative forward guidance than anticipated by markets. US Treasury 10 – year yields, at around 2.85 percent as of early July, have risen modestly since February, while yields on German 10 – year bonds, at around 30 basis points, have declined over the same period. Among other advanced economies, in late May Italian sovereign spreads widened by their largest amount since 2012, following difficulties around the formation of a new government. They have since declined but remain around 240 basis points as of early July on concerns about future policies. Spillovers to other advanced economies’ bond markets were mostly contained, with other euro area spreads remaining compressed. Equity prices in advanced economies are generally higher than their February – March levels. After the February spike, volatility has subsided and risk appetite has been strong. Consequently, financial conditions in advanced economies remain generally accommodative.

Financial conditions in emerging markets: Central banks in key emerging market economies — including Argentina, India, Indonesia, Mexico, and Turkey—have raised policy rates, responding to inflation and exchange rate pressures (coupled with capital flow reversals in some cases). Long – term yields have also increased in recent months, and spreads have generally widened. Most emerging market equity indices have declined modestly, reflecting, in some cases, concerns about imbalances (e.g., Argentina and Turkey), and, more generally, rising downside risks to the outlook.

Exchange rates and capital flows: As of early July 2018, the US dollar has strengthened by over 5 percent in real effective terms since February (the reference period for the April 2018 WEO), while the euro, Japanese yen, and British pound sterling are broadly unchanged. In contrast, some emerging market currencies have depreciated sharply. The Argentine peso has weakened by over 20 percent and the Turkish lira by around 10 percent, due to concerns about financial and macroeconomic imbalances. The Brazilian real has depreciated by over 10 percent on a weaker – than – expected recovery and political uncertainty. Weaker – than – anticipated macroeconomic data for South Africa contributed to the 7 percent depreciation of the South African rand, unwinding part of the sharp appreciation that had occurred in late 2017 and early 2018. The currencies of the largest emerging market economies in Asia have remained broadly in line with their levels in February, with the Chinese renminbi depreciating modestly. Reflecting signs of financial stress in some more vulnerable countries and growing trade tensions, capital flows to emerging economies weakened in the second quarter (through May) after a strong start to the year, with a pickup in non-resident sales of portfolio debt securities.

Global Growth Forecast

Global growth for 2018 and 2019 is projected at 3.9 percent, as forecast in the April 2018 WEO. While headline numbers suggest a broadly unchanged global outlook relative to the April WEO, underlying revisions point to differing prospects across economies. The baseline forecast assumes gradually tightening but still favorable financial conditions, with localized pressures based on differences in fundamentals. Monetary policy normalization in advanced economies is assumed to proceed in a well – communicated, steady manner. Domestic demand growth (notably investment, which has been an important part of the global recovery) is expected to continue at a strong pace; even as overall output growth slows in some cases where it has been above trend for several quarters. In the baseline forecast, the direct contractionary effects of recently announced and anticipated trade measures are expected to be small, as these measures affect only a very small share of global trade so far. The baseline forecast also assumes limited spillovers to market sentiment, even if escalating trade tensions are an important downside risk.

Advanced economy growth is expected to remain above trend at 2.4 percent in 2018—similar to 2017—before easing to 2.2 percent in 2019. The forecast for 2018 is lower by 0.1 percentage point compared to the April WEO, largely reflecting greater – than – expected growth moderations in the euro area and Japan after several quarters of above – potential growth.

- In the **United States**, near – term momentum in the economy is expected to strengthen temporarily in line with the April WEO forecast, with growth projected at 2.9 percent in 2018 and 2.7 percent in 2019. Substantial fiscal stimulus together with already-robust private final demand will lift output further above potential and lower the unemployment rate below levels last registered 50 years ago, creating additional inflationary pressures. Imports are set to pick up with stronger domestic demand, increasing the US current account deficit and widening excess global imbalances.
- Growth in the **euro area** economy is projected to slow gradually from 2.4 percent in 2017 to 2.2 percent in 2018 and to 1.9 percent in 2019 (a downward revision of 0.2 percentage point for 2018 and 0.1 percentage point for 2019 compared with the April WEO). Forecasts for 2018 growth have been revised down for **Germany** and **France** after activity softened more than expected in the first quarter, and in **Italy**, where wider sovereign spreads and tighter financial conditions in the wake of recent political uncertainty are expected to weigh on domestic demand.
- The growth forecast for **Japan** has been marked down to 1.0 percent for 2018 (0.2 percentage point below the April WEO projection) following a contraction in the first quarter, owing to weak private consumption and investment. The economy is expected to strengthen over the remainder of the year and into 2019, aided by stronger private consumption, external demand, and investment. Emerging market and developing economies have experienced powerful crosswinds in recent months: rising oil prices, higher yields in the United States, dollar appreciation, trade tensions, and geopolitical conflict. The outlook for regions and individual economies thus varies depending on how these global forces interact with domestic idiosyncratic factors. Financial conditions remain generally supportive of growth, though there has been differentiation across countries based on economic fundamentals and political uncertainty. With the updraft on oil exporters from higher oil prices largely offset by the combined drag on other economies from the forces described above, the group’s overall 2018 and 2019 growth forecasts remain unchanged from the April WEO at 4.9 and 5.1 percent, respectively.
- **Emerging and Developing Asia** is expected to maintain its robust performance, growing at 6.5 percent in 2018–19. Growth in China is projected to moderate from 6.9 percent in 2017 to 6.6 percent in 2018 and 6.4 percent in 2019, as regulatory tightening of the financial sector takes hold and external demand softens. India’s growth rate is expected to rise from 6.7 percent in 2017 to 7.3 percent in 2018 and 7.5 percent in 2019, as drags from the currency exchange initiative and the introduction of the goods and services tax fade. The projection is 0.1 and 0.3 percentage point lower for 2018 and 2019, respectively, than in the April WEO, reflecting negative effects of higher oil prices on domestic demand and faster – than – anticipated monetary policy tightening due to higher expected inflation. Growth in the ASEAN – 5 group of economies

is expected to stabilize at around 5.3 percent as domestic demand remains healthy and exports continue to recover.

- In **Emerging and Developing Europe**, growth is projected to moderate from 5.9 percent in 2017 to 4.3 percent in 2018 and further to 3.6 percent in 2019 (0.1 percentage points lower than in the April WEO for 2019). Financial conditions have tightened for some economies with large external deficits— notably **Turkey**, where growth is set to soften from 7.4 percent in 2017 to 4.2 percent this year.
- Growth in **Latin America** is projected to increase modestly from 1.3 percent in 2017 to 1.6 percent in 2018, and further to 2.6 percent in 2019 (0.4 and 0.2 percentage points lower than projected in the April WEO). While higher commodity prices continue to provide support for commodity exporters in the region, the subdued outlook compared with April reflects more difficult prospects for key economies, owing to tighter financial conditions and needed policy adjustment (Argentina); lingering effects of strikes and political uncertainty (Brazil); and trade tensions and prolonged uncertainty surrounding the NAFTA renegotiation and the policy agenda of the new government (Mexico). The outlook for Venezuela, which is experiencing a dramatic collapse in activity and a humanitarian crisis, was revised down further, despite the pickup in oil prices, as oil production has declined sharply.
- Oil exporters in the **Middle East, North Africa, Afghanistan, and Pakistan** region have benefited from the improved outlook for oil prices, but the outlook for oil importing countries remains fragile. Several economies still face large fiscal consolidation needs and the threat of intensifying geopolitical conflict continues to weigh on growth in the region. Growth is projected to strengthen from 2.2 percent in 2017 to 3.5 percent in 2018 and further to 3.9 percent in 2019— 0.2 percentage point higher than in the April WEO for 2019.
- The recovery in **Sub – Saharan Africa** is set to continue, supported by the rise in commodity prices. For the region, growth is expected to increase from 2.8 percent in 2017 to 3.4 percent this year, rising further to 3.8 percent in 2019 (0.1 percentage point higher for 2019 than forecast in the April WEO). The upgraded forecast reflects improved prospects for **Nigeria's** economy. Its growth is set to increase from 0.8 percent in 2017 to 2.1 percent in 2018 and 2.3 percent in 2019 (0.4 percentage point higher than in the April WEO for 2019) on the back of an improved outlook for oil prices. Despite the weaker than – expected first quarter outturn in **South Africa** (in part due to temporary factors), the economy is expected to recover somewhat over the remainder of 2018 and into 2019 as confidence improvements associated with the new leadership are gradually reflected in strengthening private investment.
- Growth in the **Commonwealth of Independent States** is projected to stabilize at around 2.3 percent in 2018–19, with an upward revision of 0.1 percentage point for each year compared with the April WEO. The outlook for the **Russian** economy is similar to the April projection, with the positive effects of higher oil prices counterbalanced by the impact of sanctions, while the outlook for **Kazakhstan** has improved on stronger oil prices.

Risks Tilted to the Downside

While the baseline forecast for global growth is roughly unchanged, the balance of risks has shifted to the downside in the near term and, as in the April 2018 WEO, remains skewed to the downside in the medium term. The possibility for more buoyant growth than forecast has faded somewhat in light of the weak outturns in the first quarter in several large economies, the moderation in high – frequency economic indicators, and tighter financial conditions in some vulnerable economies. Downside risks, on the other hand, have become more salient, most notably the possibilities of escalating and sustained trade actions, and of tighter global financial conditions.

- **Financial tensions:** Recent bouts of volatility highlight the possibility of abrupt shifts in global financial conditions due to markets' reassessment of fundamentals and risks, including changing expectations about monetary policy or the effects of rising trade tensions, sudden increases in

risk- or term premia, and increasing political uncertainty. As discussed in the April 2018 WEO and **Global Financial Stability Report**, signs of firmer than-expected inflation in the United States could lead to a shift in market expectations of US interest rate hikes, which are currently well below those in the WEO baseline forecast. A sudden deterioration of risk appetite could trigger disruptive portfolio adjustments, accelerate and broaden the reversal of capital flows from emerging markets, and lead to further US dollar appreciation, straining economies with high leverage, fixed exchange rates or balance sheet mismatches. In some euro area countries, policy inaction and political shocks at the national level could lead to sovereign spread decompression, worsening public debt dynamics and weakening bank balance sheets. In China, where the authorities are taking welcome steps to slow credit growth, uncoordinated financial and local government regulatory action could have unintended consequences that trigger disorderly repricing of financial assets, increase rollover risks, and lead to stronger-than-forecast negative effects on activity.

- **Trade tensions:** The outlook is also clouded by ongoing trade tensions and waning support for global economic integration in some advanced economies. In the past few months, the United States has imposed tariffs on a variety of imports, prompting retaliatory measures from trading partners. At the same time, NAFTA and the economic arrangements between the United Kingdom and the rest of the European Union are under renegotiation. An escalation of trade tensions could undermine business and financial market sentiment, denting investment and trade. Beyond its immediate toll on market sentiment, the proliferation of trade measures could increase the uncertainty about the potential breadth of trade actions, thus hindering investment, while higher trade barriers would make tradable goods less affordable, disrupt global supply chains, and slow the spread of new technologies, thus lowering productivity.
- **Non-economic factors:** By raising the possibility of slower reform implementation or significant changes in policy objectives, political uncertainty, including in the context of upcoming elections or their immediate aftermaths in several countries, could deter private investment and weaken economic activity. In Europe, the late May sell – off in Italian bonds has once again turned the spotlight on deep structural challenges and thin buffers at the national level, posing significant risks to the outlook. Geopolitical risks and domestic strife are weighing on the outlook in several economies, especially in the Middle East and sub-Saharan Africa. Furthermore, many countries remain vulnerable to the economic and humanitarian costs of extreme weather events and other natural disasters, with potentially significant cross border ramifications through migration flows.

Policy Priorities

While the baseline forecast for the global economy points to continued, if less even expansion in 2018–19, the potential for disappointments has increased. Against this backdrop, there is an even greater urgency to advance policies and reforms that extend the current expansion and strengthen resilience to reduce the possibility of a disruptive unwinding. Moreover, medium – term per capita growth projections remain below past averages in many economies. Without comprehensive measures to raise potential output and ensure the benefits are shared by all, disenchantment with existing economic arrangements could well fuel further support for growth – detracting inward – looking policies. Multilateral cooperation within an open, rule – based trade system has a vital role to play in preserving the global expansion and strengthening medium-term prospects. Given the diversity of cyclical positions, structural constraints, and available policy space, policy priorities differ across countries.

- In **advanced economies**, the macroeconomic stance should be tailored to the maturing cyclical position. Where inflation is converging to targets, a gradual, well – communicated, data dependent monetary normalization can ensure a smooth adjustment. With debt levels near record highs in many countries, fiscal policies should start rebuilding buffers where needed. The pace should be calibrated to avoid sharp drags on growth, with appropriate measures to enhance economic inclusion. Procyclical fiscal stimulus should be avoided and rolled back (e.g., United States), while further steps should be taken by countries with fiscal space and excess external surpluses to boost domestic growth potential and address global imbalances (e.g., Germany). To strengthen medium term prospects, countries should prioritize supply – side measures that raise

potential output and productivity, including investing in physical and digital infrastructure, boosting labour force participation where aging threatens future labour supply, and enhancing workforce skills. Repairing remaining pockets of vulnerability in the financial sector is essential in some advanced economies in the euro area, including through continued balance sheet cleanup, promoting consolidation in overbanked jurisdictions, and boosting bank profitability. More broadly, avoiding an indiscriminate rollback of post crisis regulatory reforms would help maintain resilience in a potentially more volatile financial environment.

- Many **emerging market and developing economies** need to enhance resilience through an appropriate mix of fiscal, monetary, exchange rate, and prudential policies to reduce vulnerability to tightening global financial conditions, sharp currency movements, and capital flow reversals. Long-standing advice on the importance of reining in excess credit growth where needed, supporting healthy bank balance sheets, containing maturity and currency mismatches, and maintaining orderly market conditions has become even more relevant in the face of renewed market volatility. In general, allowing for exchange rate flexibility will be an important means for cushioning the impact of adverse external shocks, although the effects of exchange rate depreciations on private and public sector balance sheets and on domestic inflation expectations need to be closely monitored. With debt levels rising rapidly in both emerging and low-income economies over the past decade, fiscal policy should focus on preserving and rebuilding buffers where needed, through growth-friendly measures that protect the most vulnerable. To raise potential growth and enhance its inclusiveness, structural reforms remain essential to alleviate infrastructure bottlenecks, strengthen the business environment, upgrade human capital, and ensure access to opportunities for all segments of society.
- **Multilateral cooperation** remains vital to address challenges that transcend countries' borders. Global economic integration under an open, rule based multilateral trade system has raised living standards, helped lift productivity, and spread innovation throughout the world. To preserve and broaden these gains, countries should work together to reduce trade costs further and resolve disagreements without raising tariff and non – tariff barriers. Cooperative global efforts are essential across a range of other areas, such as completing the financial regulatory reform agenda, preventing further build-up of excess global imbalances, strengthening international taxation, and mitigating and coping with climate change. These include the increase in US tariffs on imported solar panels, washing machines, steel, aluminum, and a range of Chinese products, and the announced retaliatory measures by trading partners as of July 6. The effect of the broader trade actions announced by the United States on July 10 is not incorporated in the baseline.

MANUFACTURING PROCESS

The production flow-chart from procurement of raw materials to finished products mentioned below:

The manufacturing process can be broadly divided into:

Procurement of Raw Material:

As per the design and specification of the boxes required by the customers, the raw material requirement is assessed and the orders are placed with the vendors. The raw material is then tested for its GSM and Bursting Factor with regard to the pre defined specifications before it is sent for deployment in the production process. Their primary raw material is Kraft paper or Duplex paper.

Manufacturing of Corrugated Sheets:

In the next step the reels of Kraft paper is loaded on the Corrugation Machine. The paper is hardened with heat and steam which is passed between a set of pressurised corrugating roller. This process gives the paper a flute shape (a wavy layer) in the single facer. Glue is applied to the tips of the flutes on one side at the right places and the flute liner are pressed against the flatliner. This creates a corrugated board which is so stiff that it cannot be rolled up, this is cut into flat sheet as per the required size to make the boxes which has been ordered. The resultant sheet will have two sides, one is corrugated and one is plain.

Gluing of Corrugated Sheet to make 3Ply/5Ply/7Ply:

In the next process the output of previous step is loaded on the pasting machine whereby glue is applied on the corrugated side of the sheet and another Kraft paper / Duplex paper (Plain /Printed) sheet is pasted to form a 3 Ply Board. This machine is used to create 5 ply and 7 ply boards as well depending upon the needs and requirements of the customers.

Slitting – Scoring and Printing Process:

The board is passed through a slitter -scorer machine for trimming the cardboard and cuts in to large sheets is called box blank for sizing the sheet in accordance with the height & width requirements of the customers. The slit & scored sheet is then passed through Die-cutting machine where sheet is cut or punch out as per the required length & width requirement of the Box. The Sheet is then passed for quality check of the box using Bursting Strength Testing machine which checks the quality, strength, stiffness and GSM requirement of the boxes. Further, the scored sheet is then placed into the feeding section of the printing machine is used to print with bright color ink which display features like company name , logo, product information, etc. This printed sheets are then slotted at the sections where the sheets is to be folded.

Stiching & Bundling Process:

In the next process, the folded sheet is passed through the stitching machine where the extreme end of folded sheet are pinned with metal wire to form a box. Finally, these boxes are then bundled and strapped through auto ejector machine and ready to dispatch.

Packaging is a global industry and therefore we face intense competition from various domestic and international manufacturers and traders. Being a fragmented industry, the competition emerges from various small and big players in the industry. Even in the locality in which we are operating in Vasai, there are substantial number of traders and manufacturers of corrugated boxes. Some of our competitors have resources greater than available with us.

We believe the principal elements of competition in our industry are quality, technical ability, performance record, sustained relationship with existing clients and vendors, use of technically upgraded plant and machinery, timely delivery and reliability. We compete against our competitors by establishing ourselves as knowledge-based production unit with industry expertise in the segment which enables us to provide our clients with quality products. However, price is the deciding factor in most cases. The industry in which the company operate is unorganized and fragmented with certain small and medium – sized companies and entities.

Due to industry's fragmented nature, there is no authentic data available to our company on total industry size and market share of our company vis-à-vis competitors. Although one of our major competitors is Worth Peripherals limited this is a listed company and is engaged in the similar business.

The Goods and Services Tax Act, 2017

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer.

Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India –Arun Jaitley. This Act has been made applicable with effect from July 1, 2017. With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus, there will be a comprehensive and continuous mechanism of tax credits. The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services. India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Professional Tax

The professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The state governments of the following states have levied professional tax: Karnataka, West Bengal, Andhra Pradesh, Maharashtra, Tamil Nadu, Gujarat, Assam, Chhattisgarh, Kerala, Meghalaya, Orissa, Tripura, Telangana and Madhya Pradesh. The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations.

All imports are sought to be subject to a duty with a view to affording protection to indigenous

industries as well as to keep the imports to the minimum in the interests of securing the exchange rate of Indian currency. For the purpose of exercising proper surveillance over imports and exports, the Central Government has the power to notify the ports and airports for the unloading of the imported goods and loading of the exported goods, the places for clearance of goods imported or to be exported, the routes by which above goods may pass by land or inland water into or out of Indian and the ports which alone shall be coastal ports. The Restated Summary Statements of Assets and Liabilities of the Company as on September 30, 2018 and the related Restated Summary Statements of Profits and Losses and Cash Flows Statement for the period / years ended September, 2018 have been compiled by management from the financial statements of the company for the period ended on September 30, 2018.

"The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the notified sections, schedules and rules of the Companies Act 2013 including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006 as per section 211(3C) of the Companies Act, 1956 (which are deemed to be applicable as Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014).

The presentation of financial statements requires estimates and assumption to be made that affect the reported amount of assets and Liabilities on the date of financial statements and the reported amount of revenue and expenses during the reporting period. Difference between the actual result and estimates are recognized in the period in which results are known/materialized."

(C) Significant Accounting Policies:

(a) Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenue and expenses during the reported period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the Carrying amounts of Assets or Liabilities in future periods.

(b) Fixed Assets:

Fixed Assets are stated at cost of acquisition or construction less accumulated depreciation and impairment loss, if any. The cost of an asset comprises of its purchase price and any directly attributable cost of bringing the assets to working condition for its intended use. Sales comprises sale of goods and services, net of trade discounts and include exchange differences arising on sales transactions.

(e) Foreign Currency Transactions:

Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction. Monetary foreign currency assets and liabilities are translated into Rupees at the exchange rate prevailing at the Balance Sheet Date. "The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the notified sections, schedules and rules of the Companies Act 2013 including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006 as per section 211(3C) of the Companies Act, 1956 (which are deemed to be applicable as Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014).

The presentation of financial statements requires estimates and assumption to be made that affect the reported amount of assets and Liabilities on the date of financial statements and the reported amount of revenue and expenses during the reporting period. Difference between the actual result and estimates are recognized in the period in which results are known/materialized."

(C) Significant Accounting Policies:

(a) Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenue and expenses during the reported period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the Carrying amounts of Assets or Liabilities in future periods.

(b) Fixed Assets:

Fixed Assets are stated at cost of acquisition or construction less accumulated depreciation and impairment loss, if any. The cost of an asset comprises of its purchase price and any directly attributable cost of bringing the assets to working condition for its intended use. Expenditure on additions, improvements and renewals is capitalized and expenditure for maintenance and repairs is charged to profit and loss account.

(c) Depreciation:

Effect from April 1st, 2014 depreciation is provided based on useful life of asset as prescribed in schedule II of Companies Act 2013 except non-charging of 100% depreciation on assets costing below Rs.5000/-. The carrying amount as on April 1st, 2015 is depreciated over the balance useful life of asset.

Depreciation on additions to the assets and the assets sold or disposed of during the year is provided on pro rata basis, at their respective useful life or rate of depreciation as prescribed with reference to the date of acquisition / installation or date of sale / disposal.

(d) Revenue Recognition:

Revenue is recognized when it is earned and no significant uncertainty exists as to its realization or collection. Revenue from sale of goods is recognized on delivery of the products, when all significant contractual obligations have been satisfied, the property in the goods is transferred for price, significant risk and rewards of ownership are transferred to the customers and no effective ownership is retained. Sales comprises sale of goods and services, net of trade discounts and include exchange differences arising on sales transactions.

(e) Foreign Currency Transactions:

Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction. Monetary foreign currency assets and liabilities are translated into Rupees at the exchange rate prevailing at the Balance Sheet Date. All exchange differences are dealt with in Profit and Loss Account.

(f) Investments:

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of Investments. On disposal of investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

(g) Employee Benefits:

As per Accounting Standard- 15, Employee Benefits issued by the Institute of Chartered Accountants of India, Company is required to assess its gratuity liability each year on the basis of actuarial valuation and make provision for gratuity liability. Deferred Tax Assets arising from timing differences are recognized to the extent there is a reasonable certainty that the assets can be realized in future.

(i) Borrowing Cost:

Borrowing Cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

(j) Segment Reporting:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular. The Government has also enacted Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 in suppression of Foreign Exchange Management (Transfer or issue of Security by a Person Resident outside India) Regulations, 2000.
