Overview of Industry

The global engineering services outsourcing market size was valued at USD 1.06 trillion in 2020. It is expected to expand at a compound annual growth rate (CAGR) of 22.9% from 2021 to 2028. The increasing collaboration between Engineering Service Providers (ESPs) and Original Equipment Manufacturers (OEMs) is expected to emerge as one of the primary factors contributing to the growth in the adoption of engineering services outsourcing (ESO). The globalization of R&D activities, the rising demand for integrating the latest technologies in the product offerings, and the growing need to shorten the product lifecycles and cut costs are also expected to contribute to the growth of the market. The ESO market has been evolving continuously in line with the strong emphasis of the clients on outsourcing various services as part of the efforts to cut costs.

The ESO model has also been evolving accordingly to deliver smart solutions to the clients. As such, the market has witnessed a paradigm shift from core-engineering services to embedded engineering solutions, including automation, analytics, and the internet of things (IoT), among others. Meanwhile, advances in technology have paved the way for products-as-a-service engineered with integrated IT solutions capable of scheduling maintenance and preventing unexpected outages by predicting those in advance. At the same time, the globalization of R&D activities has compelled the key market players to include global systems of delivery in their respective business strategies.

The market has been witnessing a paradigm shift in engineering service requirements from mechanical and non-core requirements to core competencies in niche markets. The changing approaches toward product lifecycle development are cementing the position of ESPs in the OEMs’ supply chains. As the ESO delivery continues to evolve, ESPs are creating service delivery models, which integrate much broader engagement portfolios, and an authorization framework, which facilitates innovation and accelerates both bottom-line and top-line growth.

The implementation of Industry 4.0 is encouraging smart manufacturing and driving the demand for the latest industrial solutions based on robotics, AI, and machine learning, thereby opening opportunities for IT integration in the service offerings of ESPs. End-use industries and industry verticals, particularly automotive, and aerospace, among others, which require dedicated hardware manufacturing capabilities, are emerging as potential clients for providers of digital transformation services. As such, the rising demand for automation mechanisms in the open system architecture is expected to open immense opportunities for ESPs. On the contrary, new entrants may find it challenging to establish a foothold in the market owing to a looming lack of

project expertise, technology expertise, and business operations.

However, digitization also leads to cyber security issues. Incumbents of various end-use industries and industry verticals exchange large volumes of information, including data related to monitoring, load management, and quality assurance, with service providers, OEMs, and consumers. Similarly, service providers, OEMs, and suppliers also often exchange confidential information on technology, performance, and specifications of services or equipment to enhance collaboration on design, development, and support. Hence, manufacturers are undertaking preventive measures, such as assessing the network operations, protecting crucial information with access codes, and retaining the original versions of the design or the source code, as part of the efforts to protect the Intellectual Property (IP).

The onshore segment accounted for the highest revenue share of over 55.0% in 2020 and is expected to continue dominating the market over the forecast period. Onshore services envisage the delivery of services to an OEM based in the country where the ESP is based. The political and geopolitical barriers, time zone barriers, and language & cultural barriers are some of the barriers that prompt OEMs to opt for onshore outsourcing of engineering services. Onshore outsourcing particularly annuls language barriers and helps in enhancing communication between OEMs and service providers, which further enhances the delivery of products and services.

Offshore services envisage cross-border delivery of engineering services. The offshore segment is anticipated to witness sluggish growth as compared to that of the onshore segment owing to the global inflation rates, high churn rates, training costs, and growing preference for outsourcing to onshore partners. Additionally, ESPs need to abide by various regulations mentioned in the outsourcing contracts while catering to clients present in different countries. The nominal growth of the offshore segment can be attributed to the availability of cost-effective resources and easy availability of a skilled talent pool in countries, such as India, China, Malaysia, Mexico, and the Philippines.

INDIAN ENGINEERING INDUSTRY

Introduction

The engineering sector is the largest of the industrial sectors in India. It accounts for 27% of the total factories in the industrial sectors and represents 63% of the overall foreign collaborations. India's engineering sector has witnessed a remarkable growth over the last few years driven by increased investment in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India, on its quest to become a global superpower, has made significant stride towards developing its engineering sector. The Government has appointed Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products, and services from India. India export transport equipment, capital goods, other machinery/equipment, and light engineering products such as castings, forgings, and fasteners to various countries of the world. The Indian semiconductor industry offers a high growth potential area as industries which source semiconductors as inputs are themselves witnessing high demand.

India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

2. *An inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.*

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our profitability. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors. Additionally, in some projects, in case of delay due to our fault or because of defective work done by us, clients have the right to rectify the defective work, or engage a third party to complete the work and deduct additional costs or charges incurred for completion of the work from the project price payable to us. Such factors would have an effect on our results of operations and financial condition.

3. *Our business is dependent on the performance of infrastructure and other related industries. Uncertainty regarding the infrastructure sector, economic conditions and other factors beyond our control could adversely affect demand for our services, our costs of doing business and our financial performance.*

Our products are primarily used in infrastructure and related sectors. Adverse conditions in or uncertainty about these markets, or the economy could adversely impact our end-customers’ confidence or financial condition, causing the reduction of demand for our services. The performance of these sectors, and consequently the demand for our services in these sectors, are dependent on economic and other factors such as government policies, regulations and budgetary allocations as well as investments made in these industries and sectors.

4. *Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

We have experienced negative cash flows in the past which have been set out below:

Particulars	June 30, 2021	March 31, 2021	March 31, 2020	March 31, 2019
Net cash generated from/(used in) operating activities	21.21	40.88	(9.72)	51.97
Net cash generated from/(used in) investing activities	5.52	(30.52)	(3.63)	(96.00)
Net cash generated from/ (used in) financing activities	-	(15.00)	(2.43)	14.54

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 127 and 131, respectively of this Draft Prospectus.

5. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our projects. In the event there are delays in our current or future orders and we are unable to receive extensions from our customers, we may be exposed to liquidated damages and termination apart from entailing significant cost and time overruns. Additionally, in some contracts, in case of delay due to deficiency in services or because of defective work done by us, clients may have the right to complete the work at our risk and cost by engaging a third party. We may also be subject to claims resulting from defects arising from services provided by us within the warranty periods extended by us. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. Faults in design and execution might also require repair work, which may not be foreseen. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

6. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us.*

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Our Promoters, have over the years built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

7. *Our success depends on our ability to attract and retain key employees, and our failure to do so could harm our ability to grow our business and execute our business strategies.*

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. Our performance and success substantially depends on the ability to attract and retain our key employees, including our management team and experienced engineers. Although some of the members of our senior management have been with us for a long period of time, there can be no assurance that any member of our senior management or other key employees will not leave us in the future. Our success is also highly dependent on our continuous ability to identify, hire, train, retain and motivate highly qualified management, technical, sales and marketing personnel. In particular, the recruitment of skilled engineers and experienced sales personnel remains critical to our success. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

8. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

9. *Our pricing structures may not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our contracts could be or become unprofitable.*

We negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. Depending on the particular contract, we may use time-and-materials pricing, pursuant to which we typically invoice on periodical basis for the services that we provide to our client. In certain instances, we enter into time-and materials pricing arrangements, but with the inclusion of fixed-price elements for certain specified services. Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimizing the costs of service delivery through business process digitalization and deployment of tools, and effectively leveraging our sales and marketing

and general and administrative costs. Our contracts could yield lower profit margins than anticipated, if we do not accurately estimate the resources required, costs and timing for completing projects, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin. However our contracts usually provides for escalation and delay charges clause to minimise such risks.

10. *Our top 10 customers contribute majority of our revenues from operations for the year ended March 31, 2021 and for the period ended June 30, 2021. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top 10 and top 5 customers contributed 54.39% and 45.12% of our revenues for the year ended March 31, 2021 and contributed 87.80% and 57.24% of our revenues for the period ended June 30, 2021. Larger contracts from few customers may represent a larger part of our portfolio, increasing the potential volatility of our results and exposure to individual contract risks. Such concentration of our business on a few projects or clients may have an adverse effect on our results of operations and result in a significant reduction in the award of contracts which could also adversely affect our business if we do not achieve our expected margins or suffer losses on one or more of these large contracts, from such clients. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. While we believe that we shall not face challenges in finding new customers in the ordinary course of business, our results of operations and financial condition may be adversely affected if we remain dependent on few customers.

11. *There have been some instances of delays and non-filing in the past with certain statutory authorities and non-compliances with certain provision of statutory regulations applicable to us. If the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.*

In the past, there have been some instances of delays in filing statutory forms with the RoC such as some of MGT-14 and DPT-3 was filed under the CFSS Scheme, 2020 of MCA without any penalty and delay filing of MGT-14 which was filed after the order for condonation of delay u/s. 460(b) of the Companies Act, 2013 with penalty. Also our Company has not complied with some provision of section 62 in respect of share issued in the year 2018. Further, there have been certain errors while filing our GST return due to inadvertence for the period FY 2018-19 and FY 2019-20 resulting in mismatch between turnover as per our GST return and as per the audited financials of our Company. We may encounter problems in executing the orders in relation to our services, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such services or cause its cancellation. Due to the possibility of cancellations or changes in scope and

schedule of delivery of such services, resulting from our customers discretion or problems we encounter in the delivery of such services or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such services can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

In the ordinary course of business, we extend credit to our customers. Consequently, we are exposed to the risk of the uncertainty regarding the receipt of the outstanding amounts. As at June 30, 2021 our trade receivables was Rs. 132.69 lakhs. Our results of operations and profitability depend on the credit worthiness of our customers. Certain of these customers may have weak credit histories and we cannot assure that these counterparties will always be able to pay us in a timely fashion, or at all. Also, failure to comply with quality requirements may lead to disqualification for bidding for future projects or could lead to cancellation of contracts which may have a material adverse effect on our business and revenue.

14. *If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. Our operations are subject to many environmental laws and regulations in Rajasthan in which we operate.

Our Company has made applications to regulatory authorities for grant of the following Government / statutory approvals and licenses but the same has not been issued to us till date:

In the event of non-renewal or termination of the agreement, we may have to vacate our current premises and shift to new premises.

There can be no assurance that we shall be able to find a suitable location, or one at present terms and conditions. Any additional burden due to shifting of premises, or increased capital expenditure, may adversely affect our business operations and financial conditions. Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our clients. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of fees for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual service fees. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. 19. *We have a substantial level of sundry debtors.*

As of March 31, 2021 and for the period ended June 30, 2021 the aggregate amount owed to us by our debtors was Rs. 130.50 lakhs and Rs 132.69 lakhs, respectively. Of the above trade receivables, Rs. 23.07 lakhs has been outstanding for more than 6 months for the year ended March 31, 2021 and Rs. 78.18 lakhs has been outstanding for more than 6 months for the period ended June 30, 2021. Customer concentration

coupled with high debt increase the credit risk of our business. General economic conditions may adversely affect the financial conditions of our debtors, and may result in defaults by some of these debtors. In the event of defaults by our debtors we may suffer a liquidity shortfall and incur additional costs, including legal expenses, in recovering the sums due and payable to us. Further, we may be subject to working capital shortages due to delays or defaults in payments by customers. If buyers default in their payments on an assignment for which we have devoted significant resources or if an order or assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

20. *We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.*

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. Thus some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

21. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company has not entered into any long-term contract with any of customers. Any change in the consumption pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

22. *Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company's results of operations and its financial condition.*

Modernization and technology upgradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Presently we are using softwares for designing, mapping etc. with the latest technological standards however in future we may be required to implement new technology or upgrade the software and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the software may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process as well as R & D would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

23. *We have in the past entered into related party transactions and may continue to do so in the future.*

We have entered into various transactions with our Promoters, Directors and their relatives and Group Companies. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "Financial Statements" beginning on page 127 of the Draft Prospectus.

24. *There may be potential conflict of interests between Our Company and other venture or enterprises promoted by our promoter or directors.*

The main business object/activities of one of our group company, DM Consulting Engineers Private Limited permit it to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and our Group Company in circumstances where our respective interests diverge. Further M/s. DM Consulting Engineers Private Limited is allowed to carry on activities as per its MOA, which are similar to the activities carried by our Group. However, there have been no operations in the said Group Company till date. Further, our Promoters, are also directors on the board of our Group Companies. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoters may favour other companies in which our Promoters have interest.

25. *We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.*

We derive a part of our revenue from international operations also. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect us to the extent of cost of goods and sales in foreign currency terms. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our results of operations.

26. *We are subject to risks associated with expansion into new geographic regions.*

Expansion into new geographic regions, including different states in India, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including, laws and regulations, uncertainties and customer's preferences, political and economic stability. By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

27. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

28. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

29. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could

subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

30. *The deployment of funds raised through this offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from offer is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this offer, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

31. *Within the parameters as mentioned in the chapter titled ‘Objects of this Offer’ beginning on page 69 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of the offer. The fund requirement and deployment mentioned in the Objects of this offer have not been appraised by any bank or financial institution.*

We intend to use Net Proceeds towards meeting the funding the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2021-22 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Offer” beginning on page 69 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘Objects of the Offer’ beginning on page 69 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

However, Audit Committee will monitor the utilization of the proceeds of this offer and prepare the statement for utilization of the proceeds of this Issue. However in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

32. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this offer or any shortfall in the offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Offer” beginning on page 69 of this Draft Prospectus.

33. *Our insurance coverage may not be adequate.*

Our Company has not obtained any insurance coverage in respect of certain risks. Hence, there can be no assurance that we will be able to adequately cover the losses in respect of which the insurance has not been availed. If we suffer a significant uninsured loss our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “Our Business” beginning on page 90 of this Draft Prospectus.

34. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Offer, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the offer, our Promoters and Promoter Group will collectively own [●] % of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

35. *Our future funds requirements, in the form of offer of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

36. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 126 of this Draft Prospectus.

37. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Our Directors and Key Managerial Personnel (“KMP”) are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “Capital Structure” and “Our Management” on pages 59 and 109, respectively, of this Draft Prospectus.

38. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of nonregistration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

39. *Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

However, in the event that the Offer is withdrawn or not completed for any reason whatsoever, all the Offer related expenses will be exclusively borne by our Company. The expenses of the Selling Shareholders will, at the outset, be borne by our Company and the Selling Shareholders will reimburse our Company for such expenses incurred by our Company on behalf of the Selling Shareholders, in relation to the Offer, upon successful completion of the Offer in the manner as prescribed under applicable law and agreed amongst the Company and the Selling Shareholders. For further informations, please see “Objects of the Offer” on page 69.

45. *Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.*

The Equity Shares would be quoted in Rupees on the BSE and the NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

46. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized in excess of Rs. 1,00,000/- on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains tax in India at the specified rates in case STT was paid on the sale transaction. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

47. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and

decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

48. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

Indian legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders of our Company than as shareholders of a corporation in another jurisdiction.

49. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

External Risk Factors

50. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted.

Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

51. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

52. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

53. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign ratings have recently been downgraded. Any further adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

54. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.*

As stated in the reports of the Auditor included in this Draft Prospectus under chapter “Financial Statements as restated” beginning on page 127, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

55. *The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition. Hostilities, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural or man-made disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

56. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, The Finance Act, 2020 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, the Finance Act, 2019 stipulates any sale, transfer and issue of securities through exchanges, depositories or otherwise to be charged with stamp duty. The Finance Act, 2019 has also clarified that the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company’s business and operations.

Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, effective from July 1, 2020, has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for

additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

57. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

58. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. All our Company's Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

59. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

GLOBAL OUTLOOK

Although recent vaccine approvals have raised hopes of a turnaround in the pandemic later this year, renewed waves and new variants of the virus pose concerns for the outlook. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The 2021 forecast is revised up 0.3 percentage point relative to the previous forecast, reflecting expectations of a vaccine-powered strengthening of activity later in the year and additional policy support in a few large economies.

The projected growth recovery this year follows a severe collapse in 2020 that has had acute adverse impacts on women, youth, the poor, the informally employed, and those who work in contact-intensive sectors. The global growth contraction for 2020 is estimated at -3.5 percent, 0.9 percentage point higher than projected in the previous forecast (reflecting stronger-than-expected momentum in the second half of 2020).

(Source: IMF Staff Estimates)

Note: AEs = Advanced Economies, EMDEs = Emerging Markets and Developing Economies, WEO = World Economic Outlook

The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spill overs, and structural characteristics entering the crisis as portrayed in the table above.

Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal

distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic. The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign debt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20.

Multiple vaccine approvals and the launch of vaccination in some countries in December have raised hopes of an eventual end to the pandemic. Moreover, economic data released after the October 2020 WEO forecast suggest stronger-than-projected momentum on average across regions in the second half of 2020. Despite the high and rising human toll of the pandemic, economic activity appears to be adapting to subdued contact-intensive activity with the passage of time. Finally, additional policy measures announced at the end of 2020—notably in the United States and Japan—are expected to provide further support in 2021–22 to the global economy. These developments indicate a stronger starting point for the 2021–22 global outlook than envisaged in the previous forecast.

However, surging infections in late 2020 (including from new variants of the virus), renewed lockdowns, logistical problems with vaccine distribution, and uncertainty about take-up are important counterpoints to the favourable news. Much remains to be done on the health and economic policy fronts to limit persistent damage from the severe contraction of 2020 and ensure a sustained recovery.

Major central banks are assumed to maintain their current policy rate settings throughout the forecast horizon to the end of 2022. As a result, financial conditions are expected to remain broadly at current levels for advanced economies while gradually improving for emerging market and developing economies. Within this latter group, differentiation between investment-grade sovereigns (who have been able to issue external debt in large amounts in 2020) and high-yield borrowers (many of whom are constrained in their ability to take on additional debt and until recently have not accessed international markets during the pandemic) is expected to subside as the recovery takes hold. As noted in the January 2021 Global Financial Stability Report Update, markets remain upbeat about prospects for 2021, banking on continued policy support.

Reflecting the projected global recovery, oil prices are expected to rise in 2021 just over 20 percent from the low base for 2020, but will still remain well below their average for 2019. Non-oil commodity prices are also expected to increase with those of metals, in particular, projected to accelerate strongly in 2021.

Note: Real effective exchange rates are assumed to remain constant at the levels prevailing during October 23–November 20, 2020. Economies are listed on the basis of economic size. The aggregated quarterly data are seasonally adjusted. WEO = World Economic Outlook.

1. Difference based on rounded figures for the current and October 2020 WEO forecasts. Countries whose forecasts have been updated relative to October 2020 WEO forecasts account for 90 percent of world GDP measured at purchasing-power-parity weights.
2. For World Output, the quarterly estimates and projections account for approximately 90 percent of annual world output at purchasing-power-parity weights. For Emerging Market and Developing Economies, the quarterly estimates and projections account for approximately 80 percent of annual emerging market and developing economies' output at purchasing-power-parity weights.
3. Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.
4. For India, data and forecasts are presented on a fiscal year basis and GDP from 2011 onward is based on GDP at market prices with fiscal year 2011/12 as a base year.
5. Indonesia, Malaysia, Philippines, Thailand, Vietnam.
6. Simple average of growth rates for export and import volumes (goods and services).
7. Simple average of prices of UK Brent, Dubai Fateh, and West Texas Intermediate crude oil. The average price of oil in US dollars a barrel was \$41.29 in 2020; the assumed price, based on futures markets (as of January 4, 2021), is \$50.03 in 2021 and \$48.82 in 2022.
8. The inflation rate for the euro area is 0.9% in 2021 and 1.2% in 2022, for Japan is –0.1% in 2021 and 0.5% in 2022, and for the United States is 2.1% in 2021 and 2022, respectively.
9. Excludes Venezuela.

After an estimated 3.5 percent contraction in 2020, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022 as portrayed in the table above. The estimate for 2020 is 0.9 percentage point higher than projected in the October WEO forecast. This reflects the stronger than-expected recovery on average across regions in the second half of the year. The 2021 growth forecast is revised up 0.3 percentage point, reflecting additional policy support in a few large economies and expectations of a vaccine-powered strengthening of activity later in the year, which outweigh the drag on near-term momentum due to rising infections. The upgrade is particularly large for the advanced economy group, reflecting additional fiscal support—mostly in the United States and Japan—together with expectations of earlier widespread vaccine availability compared to the emerging market and developing economy group.

INDIAN OUTLOOK

Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's GDP (at constant 2011-12 prices) was estimated at Rs 33.14 trillion (US\$ 452.74 billion) for the second quarter of FY2020-21, against Rs 35.84 trillion (US\$ 489.62 billion) in the second quarter of FY2019-20.

India is the fourth-largest unicorn base in the world with over 21 unicorns collectively valued at US\$ 73.2 billion, as per the Hurun Global Unicorn List. By 2025, India is expected to have ~100 unicorns by 2025 and will create ~1.1 million direct jobs according to the Nasscom-Zinnov report 'Indian Tech Start-up'.

India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030's, for productivity and economic growth according to McKinsey Global Institute. Net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's foreign exchange reserves stood at US\$ 581.131 billion in the week up to December 18, 2020 according to data from RBI.

Indian Economic Recovery

India has evolved through the pandemic on the back of strong policy initiatives by the government, along with an optimistic outlook for economic recovery. India has administered 4 million doses of COVID-19 vaccines in two weeks since January 16, 2021, becoming the fifth-largest inoculated country globally. India has become the world's vaccine hub and extended support to 90+ countries seeking to stock up vaccines.

Since March 2020, early lockdown, health-infra ramp-up, incremental unlocking, blanket testing, social distancing, tailored fiscal stimulus (to reduce supply-side disruptions and revive demand) and structural reforms initiated by the government have helped restrict the fatality rate in India to 1.2%—one of the lowest in the world. India is emerging as the world's fastest-growing major economy, with the IMF holding its growth forecasts as high as 6.8% for FY23. Also, the Economic Survey 2020-21 has drawn attention to the V-shaped economic growth—a testament to the burgeoning Indian economy and its intrinsic strength.

Sustained economic recovery was recorded in January 2021. Agriculture witnessed strong growth due to a healthy season of Rabi sowing. As of January 29, 2021, the total area sown under Rabi crops stood at 685 lakh hectares, a 2.9% YoY increase. Total area sown under Kharif stood at 1,117 lakh hectares, a 4.8% YoY increase. In December 2020, tractor sales increased by 41.2% YoY. For the 2020-21 Kharif season, total paddy procurement grew 17.75% YoY (as of February 4, 2021). From the ongoing Kharif Marketing Season (KMS) procurement operations, with MSP value worth Rs 1.14 lakh crore (US\$ 15.71 billion), 89 lakh farmers have already benefitted.

Between April 2020 and January 2021, employment demand under the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) improved significantly (51.5% YoY). Until January 2021, 323.2 crore person-days' work was recorded under the scheme, a 46.8% YoY increase.

In January 2021, the Manufacturing Purchasing Managers' Index (PMI) in India stood at 57.7, compared with 56.4 in December 2020. This was driven by new orders and rising exports. In January 2021, merchandise exports rose 5.4% YoY. PMI Services Index also increased to 52.8 in January 2021, from 52.3 in December 2020. Overall business optimism improved in January 2021 owing to launch of the COVID-19 vaccination programme.

FDI remains a significant engine of economic growth and a key source of India's non-debt financing. Total FDI inflows stood at a record high of US\$ 58.37 billion between April 2020 and November 2020, a 22.4% increase over first eight months of 2019-20, supporting India's position as a favored global investor destination. Net FPI inflows stood at US\$ 1.23 billion in January 2021.

RBI kept the liquidity adjustment facility (LAF) policy repo rate unchanged at 4.0% from Feb. 3 to Feb. 5, 2021, because of the Monetary Policy Committee's (MPC) assessment of the current and evolving macroeconomic situation.

In the Union Budget 2021-22, capital expenditure for FY22 has been targeted to increase at 34.5% over FY21 (BE) and reach Rs 5.5 lakh crore (US\$ 75.81 billion) to boost the economy.

Under the Aatmanirbhar Bharat (self-reliant India) Mission, structural reforms and policy push, along with a series of steps announced in the Union Budget 2021-22 to achieve broad-based inclusive development, are likely to reinforce the economy and put it back on a strong and sustainable growth path in the coming year. India's real GDP growth for FY22 is projected at 11% by the Economic Survey 2020-21. The January 2021 WEO update forecasts 11.5% growth in FY22 and 6.8% in FY23, closer to the potential growth rate for the economy. According to the IMF, in the next two years, India is also expected to emerge as the fastest-growing economy.

Road Ahead

India's GDP is expected to reach US\$ 5 trillion by FY25 and achieve upper-middle income status on the back of digitization, globalization, favorable demographics, and reforms.

India is also focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from

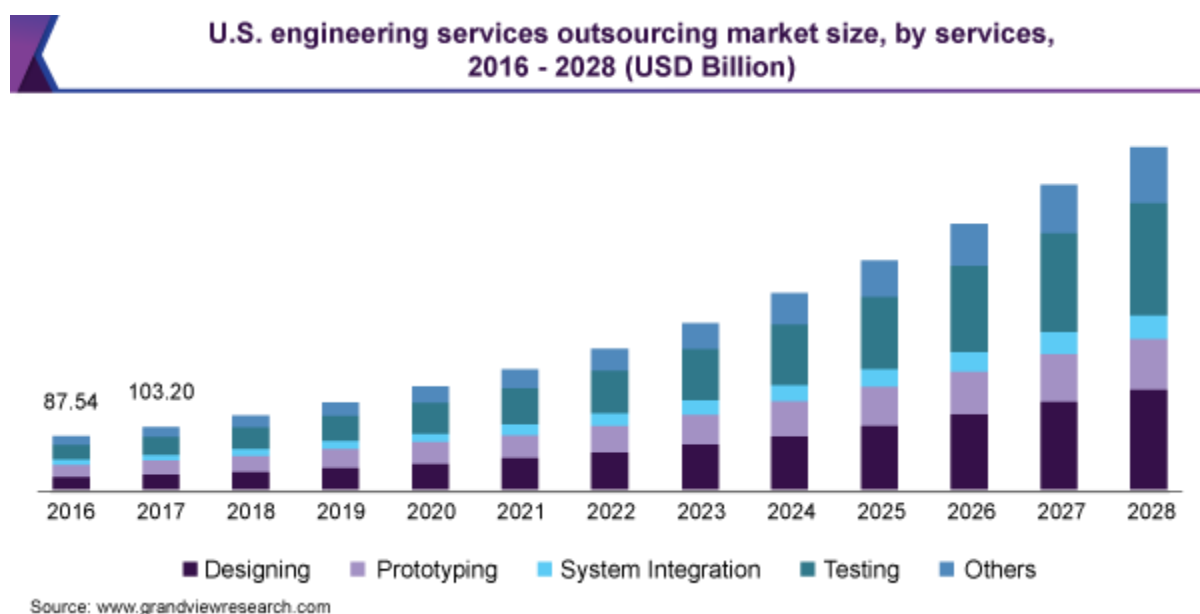

non-fossil sources by 2030, which is currently 30%, and have plans to increase its renewable energy capacity from to 175 gigawatts (GW) by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

GLOBAL ENGINEERING INDUSTRY

The global engineering services outsourcing market size was valued at USD 1.06 trillion in 2020. It is expected to expand at a compound annual growth rate (CAGR) of 22.9% from 2021 to 2028. The increasing collaboration between Engineering Service Providers (ESPs) and Original Equipment Manufacturers (OEMs) is expected to emerge as one of the primary factors contributing to the growth in the adoption of engineering services outsourcing (ESO). The globalization of R&D activities, the rising demand for integrating the latest technologies in the product offerings, and the growing need to shorten the product lifecycles and cut costs are also expected to contribute to the growth of the market. The ESO market has been evolving continuously in line with the strong emphasis of the clients on outsourcing various services as part of the efforts to cut costs.

The ESO model has also been evolving accordingly to deliver smart solutions to the clients. As such, the market has witnessed a paradigm shift from core-engineering services to embedded engineering solutions, including automation, analytics, and the internet of things (IoT), among others. Meanwhile, advances in technology have paved the way for products-as-a-service engineered with integrated IT solutions capable of scheduling maintenance and preventing unexpected outages by predicting those in advance. At the same time, the globalization of R&D activities has compelled the key market players to include global systems of delivery in their respective business strategies.

The market has been witnessing a paradigm shift in engineering service requirements from mechanical and non-core requirements to core competencies in niche markets. The changing approaches toward product lifecycle development are cementing the position of ESPs in the OEMs' supply chains. As the ESO delivery continues to evolve, ESPs are creating service delivery models, which integrate much broader engagement portfolios, and an authorization framework, which facilitates innovation and accelerates both bottom-line and top-line growth.

The implementation of Industry 4.0 is encouraging smart manufacturing and driving the demand for the latest industrial solutions based on robotics, AI, and machine learning, thereby opening opportunities for IT integration in the service offerings of ESPs. End-use industries and industry verticals, particularly automotive, and aerospace, among others, which require dedicated hardware manufacturing capabilities, are emerging as

potential clients for providers of digital transformation services. As such, the rising demand for automation mechanisms in the open system architecture is expected to open immense opportunities for ESPs. On the contrary, new entrants may find it challenging to establish a foothold in the market owing to a looming lack of project expertise, technology expertise, and business operations.

However, digitization also leads to cyber security issues. Incumbents of various end-use industries and industry verticals exchange large volumes of information, including data related to monitoring, load management, and quality assurance, with service providers, OEMs, and consumers. Similarly, service providers, OEMs, and suppliers also often exchange confidential information on technology, performance, and specifications of services or equipment to enhance collaboration on design, development, and support. Hence, manufacturers are undertaking preventive measures, such as assessing the network operations, protecting crucial information with access codes, and retaining the original versions of the design or the source code, as part of the efforts to protect the Intellectual Property (IP).

The onshore segment accounted for the highest revenue share of over 55.0% in 2020 and is expected to continue dominating the market over the forecast period. Onshore services envisage the delivery of services to an OEM based in the country where the ESP is based. The political and geopolitical barriers, time zone barriers, and language & cultural barriers are some of the barriers that prompt OEMs to opt for onshore outsourcing of engineering services. Onshore outsourcing particularly annuls language barriers and helps in enhancing communication between OEMs and service providers, which further enhances the delivery of products and services.

Offshore services envisage cross-border delivery of engineering services. The offshore segment is anticipated to witness sluggish growth as compared to that of the onshore segment owing to the global inflation rates, high churn rates, training costs, and growing preference for outsourcing to onshore partners. Additionally, ESPs need to abide by various regulations mentioned in the outsourcing contracts while catering to clients present in different countries. The nominal growth of the offshore segment can be attributed to the availability of cost-effective resources and easy availability of a skilled talent pool in countries, such as India, China, Malaysia, Mexico, and the Philippines.

INDIAN ENGINEERING INDUSTRY

Introduction

The engineering sector is the largest of the industrial sectors in India. It accounts for 27% of the total factories in the industrial sectors and represents 63% of the overall foreign collaborations. India's engineering sector has witnessed a remarkable growth over the last few years driven by increased investment in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

India, on its quest to become a global superpower, has made significant stride towards developing its engineering sector. The Government has appointed Engineering Export Promotion Council (EEPC) as the apex body in charge of promotion of engineering goods, products, and services from India. India export transport equipment, capital goods, other machinery/equipment, and light engineering products such as castings, forgings, and fasteners to various countries of the world. The Indian semiconductor industry offers a high growth potential area as industries which source semiconductors as inputs are themselves witnessing high demand.

India became a permanent member of the Washington Accord (WA) in June 2014. The country is now a part of an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

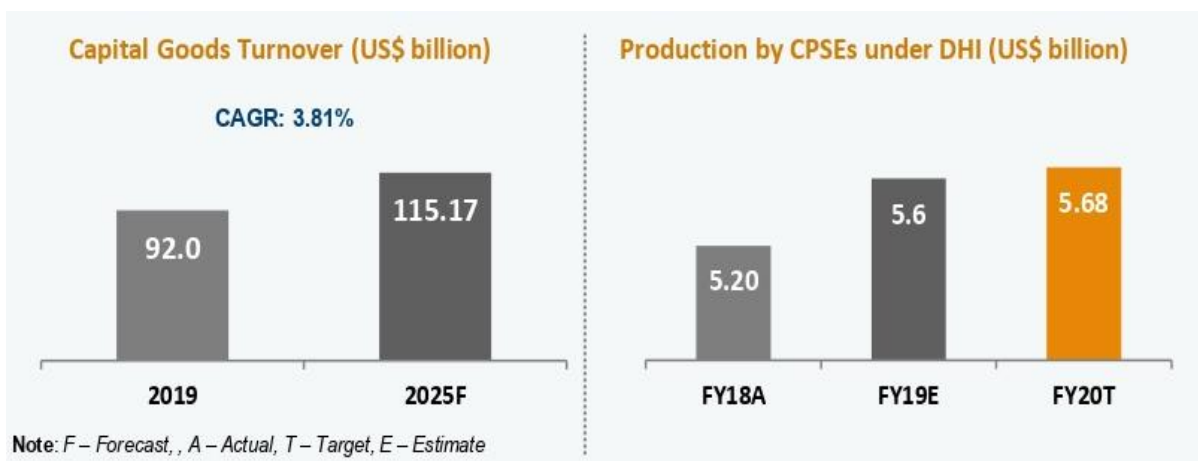

Turnover of the capital goods industry was estimated at US\$ 92.00 billion in 2019 and is forecast to reach US\$ 115.17 billion by 2025.

India exports engineering goods mostly to US and Europe, which account for over 60% of the total export. Engineering exports were recorded at US\$ 75.90 billion in April (FY20) and reached US\$ 60.25 billion in January (FY21). Index of industrial production (IIP) for electrical equipment industry stood at 105.5 in FY20.

In June 2021, the country's engineering goods exports recorded a 52.61% increase compared with the same interval last year.

According to the National Association of Software and Service Companies (Nasscom), India's share in the global engineering and research and development (ER&D) market is likely to expand at a CAGR of 12-13% to reach US\$ 63 billion by 2025.

The Indian machine tool production and consumption were estimated at Rs. 6,150 crore (US\$ 872.46 million) and Rs. 15,670 crore (US\$ 2.22 billion), respectively, in 2019-20.

Investments

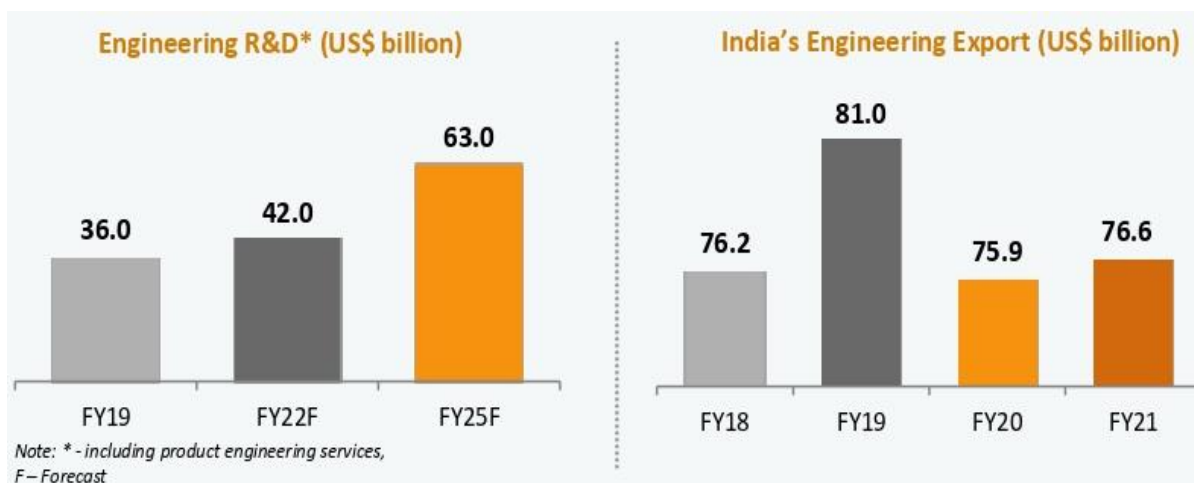

100% FDI is allowed through the automatic route, with major international players looking for growth opportunities to enter the Indian engineering sector. The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing cost, technology, and innovation. In line with CGST Act, each state Government has enacted State Goods and Service Tax Act for respective states.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

Customs Act, 1962

The provisions of the Customs Act, 1962 and rules made there under are applicable at the time of import of goods i.e. bringing into India from a place outside India or at the time of export of goods i.e. taken out of India to a place outside India. Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public Offer of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public Offers, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Offer closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment in India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed).
