SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. You should carefully consider all information in this Prospectus, including the risks described below, before making an investment in our Equity Shares. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Prospectus also contains forward-looking statements that involve risks and uncertainties. We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of or deem immaterial, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the Issue, including the merits and risks involved. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Investors are advised to read the risk factors carefully before taking an investment decision in this Issue. Investors should not invest in this Issue unless they are prepared to accept the risk of losing all or part of their investment, and they should consult their tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

To obtain a better understanding of our business, you should read this section in conjunction with other chapters of this Prospectus, including the chapters titled “Our Business”, Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Financial Information” on page nos. 70, 138, 64 and 118 respectively of this Prospectus, together with all other financial information contained in this Prospectus. Our actual results could differ materially from those anticipated in these forward looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus.

In this section, unless the context otherwise requires, a reference to the “Company”, “we”, “us” or “our” is a reference to EP Biocomposites Limited. Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the years ended March 31, 2021 and March 31, 2020 and period ended September 30, 2021 and as included in “Financial Information” on page no. 118 of this Prospectus.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material individually but may be found material collectively.
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISKS

1. *Some of our solutions are license based; any failure on our part to successfully retain the license would have a material adverse effect on our operation and profitability.*

Some of our sanitation solutions are based on the patented “bio-digester” technology developed by DRDO (Defense Research and Development Organization). We are a licensee (through transfer of technology) and have partnered DRDO for technology commercialization for large-scale deployment of sanitation systems. Though the license is perpetual in nature, any failure on our part to retain the license could materially affect our business. Further any subsequent introduction of royalty claimed by DRDO will increase our cost and adversely affect our profitability as currently there is no royalty levied by DRDO on the product sale.

2. *Substantial portion of our revenue has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.*

Our customers include large corporate houses, trust & Industries. For the financial year ended March 31, 2021 and for the period ended September 30, 2021, our top ten clients accounted for approximately 43.79% and 63.47% of our revenue from operations. However the loss of any significant client would have a material effect on our financial results. The company is adding high value new clients through Acqua Division. However we cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as changes in government policies and bankruptcy, change of management, mergers and acquisitions in other cases could impact our business. If any of our major client becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

3. ***We do not have any agreement with the third party service providers to whom we outsource manufacturing of bio-digester tanks, also we are dependent on outside vendors for sanitary wares; consequently we are exposed to price and supply fluctuations for the same.***

Our Company relies on third parties for sanitary wares. Also, we outsource part of manufacturing of biodigester tanks to third party considering the additional business requirement. We outsource work to them on invoice basis and have no agreements with them. We also outsource to independent contractors at fair value determined by us. Further, we cannot assure you that our third party service providers will continue to be associated with us on reasonable terms, or at all. Since such third party service providers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such third party service providers, which may cause them to cater to our competitors alongside, or even instead of us. Also, in the absence of any contract, they may discontinue their service on a short notice and our production process may be stalled or hindered due to this. We may have to rely on inexperienced or costlier or unprofessional processing units which may compromise the quality of our finished products. Consequently, we may be exposed to price and supply fluctuations in these areas which may have a material effect on our business, results of operations and financials.

4. ***Our cost of production is exposed to fluctuations in the prices of raw materials required for the manufacture of our products as well as their availability.***

Our company is exposed to fluctuations in the prices of various raw materials such as Glass Fiber, Polyester Resin, Stainless Steel, MS rods, Cement, Sand, Adhesives, Pigments etc. due to various reasons such as increased manufacturing costs of these materials, increase in transportation costs, changes in core prices of minerals as a natural resource, etc. We typically do not enter into any supply agreements with our suppliers and all the above mentioned raw materials are bought by our Company from various suppliers on a order-to-order basis. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the results of our operations and our financial conditions. The prices of two major raw materials i.e. rasins and glass fibers have remained within the range except during the second wave of Covid -19. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our competitors being able to sell the products at lower rates than us due to their economies of scales, if we pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our historical margins. Upward fluctuations in the prices of the various raw materials may thereby affect our margins and profitability, resulting in a material adverse effect on our overall business, financial condition and results of operations. For further details of various raw materials required, see “Our Business” on page no. 70 of this Draft Prospectus.

5. ***We are dependent on third party transportation providers for the delivery of our products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.***

The toilet super-structures and the bio-tanks are made in our plants and transported to the installation sites; and our team members install/assemble the bio-toilets at the customer site. We use third party transportation providers for the delivery. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects. The company will tie up with reputed logistic partners for seamless operations in future. Any deterioration of

India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

6. *Our Company has reported certain negative cash flows from its operating activity, investing activity and financing activity, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.*

Our Company had reported certain negative cash flows from its operating activity, investing activity and financing activity in the period ended September 30, 2021 and previous years as per the restated financial statements and the same are summarized as under:

Particulars	For Period Ended Sep 30, 2021	For the Year Ended March 31,	
		2021	2020
Net Cash Generated from Operating Activities	(423.67)	3.45	11.62
Net Cash Generated from Investing Activities	(28.83)	0.02	-
Net Cash Generated from Financing Activities	448.81	(0.25)	(0.05)

For details, please refer "Management's Discussion and Analysis of Financial Conditions and Results of Operations" on page no. 18 of this Draft Prospectus. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

7. *Our Promoter and Directors play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Directors remain associated with us.*

Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations. We benefit from our relationship with our Promoter and Directors and our success depends upon the continuing services of our Promoter and Directors who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our Promoter and Directors have been actively involved in the day-to-day operations and management since the incorporation of the Company. Accordingly, our performance is heavily dependent upon the services of our Promoter and Directors. If our Promoter and Directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to find suitable or qualified replacements, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Moreover, we do not maintain key person insurance to insure against the loss of key personnel. Our Promoter, along with the key managerial personnel, has over the years built relations with manufacturers, customers and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

8. *The IPO Proceeds will be used to pay an interest free refundable security deposit to the owner/lessee of the manufacturing facility.*

Recently our Company has taken over the business of M/s OM Ventures with a vision to corporatize our business and to run the entire business under one roof. A Business Transfer Agreement dated August 31, 2021 has been entered into to give effect to the takeover of the business of M/s. OM Ventures (Proprietor Leena Kamat). Through Business Takeover Agreement, our company has taken over only business except real estate in order to save the excess expenses of the company for buying the property and other relevant expenses for transfer of the property. We believe that we currently need the Manufacturing facility on a lease hold basis. The land of the said premise is leased by GIDC to M/s OM Ventures. Hence, we have entered into a sub-leasing agreement dated August 13, 2021 for the land as well as building of manufacturing facility, with the owner/lessee of this land and building. Further this property is used by our company for obtaining debt and hence, we propose to pay an interest free refundable security deposit to the owner/lessee of the manufacturing facility of ₹ 200.00 lakhs, in order to compensate for

such land and asset being used by the company. Further, by paying a sizable deposit, this allows the company to keep our monthly lease costs low and hence helps us manage our cash flows and profitability better.

- 9. *Some of the immovable properties used by us are on lease and leave and license basis. If we are unable to renew existing lease and leave and license or relocate operations on commercially reasonable terms, there may be an effect on our business, results of operations and prospects.***

We do not own the premises from where we operate. We have entered into sub lease agreements for our manufacturing unit/registered office at Plot No 57, Shed No D-2/12, Bicholim Industrial Estate, Bicholim, Goa 403529. This agreement is renewable based on the terms of the agreement. We have also entered into Leave and License agreement for our Corporate Office dated 31st December 2021 w.e.f. 1st January 2022. This agreement is renewable based on the terms of the agreement. Further, if we are unable to renew the agreements pursuant to which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places and if we relocate our manufacturing unit and registered office as a result of any termination or non-renewal of our leases and rentals, we may incur additional cost as a result of such relocation. Any failure or difficulty faced by us in renewing leases, or disputes or other problems that we may face in the future with lessors may affect our business and prospects. For further details of our Properties, please refer to section titled “Our Business” beginning on Page no. 70 of this Draft Prospectus.

- 10. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our company is incorporated on January 17, 2020, as a public limited company under the provisions of the Companies Act, 2013. Our Company has recently acquired running business of M/s OM ventures (Proprietor Leena Kamat) w.e.f. August 31, 2021. Hence, earlier all the approvals were in the name of M/s OM Ventures. Our Company has made applications to an application to The Chief Inspector of Factories and Boilers for Factories license under Factories Act, 1948 for its premise situated at D2/12, Bicholim Industrial Estate Bicholim, North Goa- 403529. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” at page nos. 89 and 153 respectively of this Draft Prospectus.

- 11. *Failure to protect our intellectual property may adversely affect our reputation, goodwill and business Operations***

As on the date of this Draft Prospectus, our Company has one (1) registered trademark  under class 11 registered with the registrar of trademarks. For further details please refer the chapter titled “Government and Other Approvals” beginning on page no.153 of this Draft Prospectus. Any failure to renew registration of our registered trademarks may affect our right to use them in future. Our efforts to protect our intellectual property may not be adequate and any third party claim on any of our unprotected brands may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered trademarks. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks

Our corporate logo “” is registered in the name of our promoter Mr. Rajkumar Kamat. The said trademark is being used by the Company via a No Objection Certificate (“NOC”) granted by our promoter Rajkumar Kamat. If our promoter withdraws, refuses to renew or terminates this arrangement, we will not be able to make use of the said trademark and name in connection with our business. Any failure to renew registration of registered trademarks by our promoter may affect our right to use them in future. Further, we cannot assure that said trademark being used by the Company will not be invalidated or circumvented. For further details, pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page 70 of this Draft Prospectus.

12. We intend to repay certain loan facilities availed from our Director from the IPO Proceeds.

One of the objects of the Issue is the repayment of certain loan facilities, in full or in part, availed by our Company. We intend to use the proceeds from the Issue to repay part of the loans availed from our Directors. As of September 30, 2021, we have availed an aggregate of Rs 186.85 lakhs of unsecured loans from them and these loans were utilized for working capital needs & other funding requirements of the Company from time to time. We intend to repay an aggregate of Rs 80.00 lakhs of the said outstanding loan. We believe that the proposed repayment will enable us to improve our debt-equity ratio and reduce the total unsecured loans. For details of the outstanding loans proposed for repayment or prepayment, in full or in part from the Net Proceeds, refer the chapter “Objects of the Issue” on page 54 of this Draft Prospectus. The amount utilized to repay these loans will, therefore, not be available for investment in our business and will not result in any immediate increase in the value of your investment in our Equity Shares.

13. Our Company has availed unsecured loan from our Directors / Promoters which is repayable on demand.

Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition. Our Company, as per the restated financial statement as on September 30, 2021 has availed unsecured loans of Rs 186.85 lakhs out of which unsecured loan amounting to Rs 95.99 is repayable on demand at an interest rate of 10.50% p.a. Sudden recall may disrupt our operations and also may force us to opt for high interest bearing funding, resulting in financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no.118 of this Draft Prospectus. Any demand for the repayment of such unsecured loans, may adversely affect our cash flow and financial condition.

14. Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.

Our Company has employed 28 people as on September 30, 2021 all of whom are on our payrolls. The above includes employees in the top and middle management (including Executive Directors), and also employees who are part of manufacturing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

15. We have issued Equity Shares during the last year at a price that may be below the Issue Price.

We have issued certain Equity Shares in the last twelve months, at a price that may be lower than the Issue Price. Details of such issuances are given in the table below:

Date of Allotment	No. of Equity Shares	Issue Price	Nature of Allotment	Allotted Person
September 27, 2021	8,02,500	Rs 10	Right Issue	Allotted only to Promoters i.e. Leena Kamat and Rajkumar Kamat

For Further details of equity shares issued, please refer to the section titled “Capital Structure” beginning on page no. 46 of this Draft Prospectus

16. Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

17. There may be potential conflict of interests between our company and other venture or enterprises promoted by our promoter or directors.

The Main Object Clause of some of our Group Companies and certain companies forming part of our Group companies viz. EPEE Metal Goa Private Limited and EPEE Bio Solutions Pvt Ltd permits them to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Though each company has its independent business, we cannot be assured that we shall be able to adopt necessary measures for mitigating these conflicts and hence the same if not managed well, could adversely affect our results of operations and financial condition. Also, our Company does not have any non-compete or such other agreement / arrangement with the above said companies. Presently, EPEE Metal Goa Private Limited is engaged in the business of fire doors (which is not pursued by our Company) while the EPEE Bio Solutions has very negligible business activities. For further details, please refer to the chapters titled ‘Our Business’, ‘Our Group Companies’, beginning on page nos.70 and 114, respectively and Annexure XX - Related Party Transactions” on page no. 118 of this Draft Prospectus.

18. Our business is dependent on our operating facilities. The loss or shutdown of our facilities could have a material adverse effect on our business, financial condition and results of operations

Our facilities are at Bicholim Industrial Estate, Bicholim, Goa- 403529, and are subject to operating risks, such as shutdowns due to the breakdown of power supply or processes, performance below expected levels of output or efficiency, labour disputes, strikes, lockouts, disruption by extremist groups, or any other reason, and the need to comply with the directives and regulations of the Government of India (“GoI”) and relevant state government authorities. We are heavily reliant on our workers at unit. Our inability to continue to procure such services or any disputes with this group of labour could severely affect our operations and may cause under-utilisation of our capacities or a total shut down. Our operations involve a significant degree of integration, and our results of operations are dependent on the successful operation of each facility. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and prospects may be adversely affected by any disruption of operations at our facilities.

19. We have not made any alternate arrangements for meeting our regular working capital requirements. If our operations do not generate the necessary cash flow, our working capital requirements may negatively affect our operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

20. Our insurance coverage may prove inadequate to satisfy future claims against us.

Our business & assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be covered by insurance. We cannot guarantee that the existing insurance that we have will be able to cover any unforeseen losses to its full extent or at all. Besides, if any uninsured losses occur, the aforementioned losses will not be compensated to any extent. If we are required to take new coverage, there can be

no assurance that a suitable coverage will be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Presently, if we suffer a large uninsured loss our business, financial condition and results of operations may be adversely affected.

21. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investment.*

Our ability to remain competitive may be adversely affected by emerging technologies and our ability to adapt to such changes. Our technology and key infrastructure may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may not have the competitive edge. Although we strive to keep our technology, equipments and infrastructures in line with the latest technological standards, we may be required to implement new technology or upgrade the equipments employed by us. Further, the costs in upgrading our technology and modernizing the equipments are significant which could substantially affect our finances and operations. If we fail to exploit emerging technologies, it could have a material adverse effect on our business prospects, financial condition and results of operations.

22. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins, which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness is also measured by the technology we adopt as the industry is rapidly growing in India. Our inability to compete with this intense competition; will have material adverse impact on our Company's financial position.

23. *Our failure to accurately forecast demand or in case of order based procurements, any cancellation of orders or delay in supply of raw materials by suppliers to meet such orders, could result in an unexpected shortfall or surplus in the supply of our products resulting into higher inventory, which could adversely affect our operations and profitability.*

We maintain inventory of raw materials at our various units based on existing demand trends to meet a certain unexpected demand and also our production batches are set accordingly. We monitor the inventory levels based on our own projections of future demand. In the past, we have experienced high levels of inventory of Rs. 85.56 lakhs and Rs. 40 lakhs as per the restated financials as at September 30, 2021 and March 31, 2021 respectively to meet the demand. If we are unable to appropriately estimate the demand for our products for any reason, the same could result in surplus of inventory levels or unavailability of the same in high demand situations resulting in below potential sales. Additionally, in case of order based procurements, any cancellation of orders or delay in supply of raw materials by our suppliers to meet such orders, could also result in surplus or shortfall of our products, which could adversely affect our operations. Further, excess inventory of raw materials and finished products, subjects us to additional risks related to storage of the same, such as health and safety hazard and environmental damage and theft could adversely affect our operations and profitability.

24. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties, including our Promoter and Promoter Group. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favorable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Financial Statements – Annexure XXXII - Related Party Transactions" on page no. 118 of this Draft Prospectus.

25. *The outbreak of COVID-19 or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

An outbreak of a novel strain of coronavirus (COVID-19) was recognized by the World Health Organization as a public health emergency of international concern on January 30, 2020, and as a pandemic on March 11, 2020. The outbreak of COVID-19 has significantly and adversely impacted and will likely continue to impact economic activity and has contributed to significant volatility in global financial markets and led to operational challenges. It is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, stagnation, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. In particular, a number of governments and organizations have revised GDP growth forecasts for 2021 downwards in response to the economic slowdown caused by the spread of COVID-19, and it is possible that the COVID-19 pandemic will cause a prolonged global economic crisis or recession. In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as issuing advisories and imposing country or state wide lockdowns, including restrictions on travel and temporary closure of business operations and increased remote working protocols, which have significantly slowed down economic activity. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown announced on March 24, 2020. While there have been progressive relaxations and calibrated easing of lockdown measures by the Government, we cannot predict if stricter lockdowns will not be re-introduced or extended in the future. On account of the government imposed lockdown in India, operations at all of our manufacturing facilities were temporarily shut down with effect from March 24, 2020 and resumed operations in accordance with permissions from the local authorities. The COVID-19 pandemic and resulting government actions may affect our business, results of operations and financial condition, in the future, in a number of ways such as requiring a complete or partial closure of our operations. A strong base of loyal customers and diversified product range which caters to multiple customer segments like Hotels, Industry, Government besides Individuals & construction sector helped us continue our operations in spite of Covid. Increase in Raw material prices due to shortage in the market has affected our operations. Average of nearly 15% increase in raw material costs has impacted our bottom line; through the Top line has grown healthily. We continued our operations after making arrangements to meet the government’s requirements on sanitization, people movement and social distancing. However the prices are now slowly falling in places with economy opening up.

Further, due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. The outbreak, or threatened outbreak, of any severe communicable disease (particularly the COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, and lockdowns. On account of the nationwide lockdown we experienced certain operational disruptions and we cannot predict the further impact COVID-19 may have on our operations, the operations of our customers, and those of our respective vendors and suppliers. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause further economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and we cannot predict the future impact of COVID-19 on our ability to perform critical functions. We are closely monitoring the impact of COVID-19 on all aspects of our business, but there can be no assurance that such monitoring will enable us to avoid part or all of any future impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its

severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, and loss of life, injuries and impact the wellbeing of our people. Further in case the lockdown is reinstated, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

26. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

27. *If we are not able to manage our growth or to successfully implement our business plan, it could have an effect on our results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to develop relationships with customer and suppliers. For further details, see the section titled “Our Business – Our Strategies” on page no. 70 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Market Expansion
- Investing in Human Resources and Building a Professional Organization
- Partnerships with industry and non-governmental players
- Networking
- Strengthening Supply Chain
- Digital Marketing

If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

28. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements.*

Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

29. *Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.*

Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the products. Any failure to meet the scheduled timelines set by our customers or loss or damage may lead to our customers raising claims against us. Although Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases.

- 30. *Our Promoter has extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoter in the future or can be called at any time, affecting the financial.***

Our Promoter has provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoter in connection with our Company's borrowings.

- 31. *Our Promoter and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.***

After the completion of Initial Public offer of 5, 04,000 new equity shares to general public still, our Promoter and Promoter Group may beneficially own approximately 68.96% of our post-Issue equity share capital. As a result, the Promoter and Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

- 32. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.***

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

- 33. *Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.***

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

- 34. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page no.54 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

- 35. *The rate of interest for the loans obtained by us from the bank is variable and any increase in interest rates may adversely affect our results of operations and financial condition.***

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company’s credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled “Financial Indebtedness” on page no.147 of this Draft Prospectus Further, in recent years, the Government of India have taken measures to control inflation, which have included tightening the monetary policy by raising 23 interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

- 36. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations which will require us to file audited annual and unaudited half yearly and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

- 37. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment. Further, the funding plan has not been appraised by any bank or financial institution and is not subject to any monitoring by any independent agency. Our Company’s management will have flexibility in utilizing the Net Proceeds from the Issue. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.***

Our Company intends to use the Net Proceeds from the Fresh Issue for the purposes described in “Objects of the Issue” on page 54 of this Draft Prospectus. In terms of Regulation 262 of the SEBI (ICDR) Regulations, we are not

required to appoint a monitoring agency since the Issue size is not in excess of ₹ 10,000 lakhs. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. The funding plans are in accordance with our own estimates and have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business. Our Board will have significant flexibility in temporarily investing the Net Proceeds of the Issue. Accordingly, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of its business, increased profitability or an increase in the value of your investment.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in this Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

38. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other significant shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising debt or equity financing. In addition, any perception by investors that such issuances or sales might occur may also affect the trading price of our Equity Shares. We cannot assure you that we will not offer Equity Shares or that our shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

39. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

40. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and

reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

41. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

42. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms. In addition, we cannot assure you that any required approvals for borrowing in foreign currency will be granted to us without onerous conditions, or at all. Such, and other, limitations on raising foreign capital may adversely affect our business growth, results of operations, and financial condition.

EXTERNAL RISK FACTORS

43. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

44. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

45. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighboring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of

our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

46. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

47. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in and our operations are in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include: political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;

- occurrence of natural or man-made disasters;
- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- changes in India's tax, trade, fiscal or monetary policies;
- prevailing regional conditions,
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- Other significant regulatory or economic developments in or affecting India.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

48. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.*

Having our business operations in multiple jurisdictions, we are subject to varying central and state tax regimes. The applicable categories of taxes and tax rates also vary significantly from jurisdiction to jurisdiction, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each country as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditure incurred. Our business and financial performance may be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business or the regulator enforcing them in any one of those countries may adversely affect our results of operations.

To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see “*Statement of Special Tax Benefits*” on page 61 of this Draft Prospectus for details in relation to possible tax benefits available to our Company. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time and any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

49. *Any adverse change in India's credit rating by an international rating agency could materially adversely affect our business and profitability.*

India's sovereign rating is Baa3 with a “stable” outlook (Moody's), BBB-with a “stable” outlook (S&P) and BBB-with a “negative” outlook (Fitch). India's sovereign rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse change in India's credit ratings by international rating agencies may adversely impact the Indian economy and consequently our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares

50. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated

economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

51. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in NIFTY, NSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

DETAILS OF THE FUND REQUIREMENTS

1) Long term lease deposit for leasing Manufacturing Facility

Our company is incorporated on January 17, 2020, as a public limited company under the provisions of the Companies Act, 2013. Initially, our company had started procuring orders of fibre re-inforced polymers (FRP) products such as door shutters, frames, Biodigester Tanks, Bio toilets besides Bacteria Innoculum & allied products, after procuring the order we would give the manufacturing work of the same to M/s OM Ventures (Proprietorship of our promoter Leena Kamat) on Job Work basis.

Thereafter, recently our Company has taken over the business of M/s OM Ventures with a vision to corporatize our business and to run the entire business under one roof. A Business Transfer Agreement dated August 31, 2021 has been entered into to give effect to the takeover of the business of M/s. OM Ventures (Proprietor Leena Kamat).

Through Business Takeover Agreement our company has taken over only business except real estate in order to save the excess expenses of the company for buying the property and other relevant expenses for transfer of the property. We believe that we currently need the Manufacturing facility on a lease hold basis. The land of the said premise is leased by GIDC to M/s OM Ventures. Hence, we have entered into a sub-leasing agreement dated August 13, 2021 for the land as well as building of manufacturing facility, with the owner/lessee of this land and building. Further this property is used by our company for obtaining debt and hence, we propose to pay an interest free refundable security deposit to the owner/lessee of the manufacturing facility of ₹ 200.00 lakhs, in order to compensate for such land and asset being used by us. Further, by paying a sizable deposit, this allows us to keep our monthly lease costs low and hence helps us manage our cash flows and profitability better. Further it avoids sunk costs towards duties and transfer charges etc also when we move to another property in the future and we get our deposit back upon vacating this premise without the hassle and costs of transfer etc at such stage.

2) Part Repayment of Loan

We have from time to time availed unsecured loan from our Directors. As on September 30, 2021 our Company had total outstanding unsecured loans from Leena Kamat, i.e. Promoter Director amounting to ₹ 95.99 lakhs as confirmed by the Statutory Auditor M/s. S. P. Bhandare & Associates., Chartered Accountants, vide Certificate dated January 11, 2022. This loan carries interest at the rate of 10.50%. M/s. S. P. Bhandare & Associates., Chartered Accountants, has further confirmed that this loan was mainly utilized for working capital needs & other funding requirements of the Company from time to time. For further details, see “Financial Indebtedness” on page no. 147 of this Draft Prospectus.

Our Company proposes to utilize an amount of ₹ 80.00 lakhs out of the Net Proceeds towards repayment of the borrowings obtained from Leena Kamat- our Promoter Director.

As of the date of this Draft Prospectus, Our Company has not repaid the above mentioned loan availed from Leena Kamat. However, we may repay the above loan, before we obtain proceeds from the Issue, through other means and source of financing, including bridge loan or other financial arrangements, which then will be repaid from the proceeds of the Issue.

3) Funding Working Capital Requirement

Our business was originally being run as a proprietorship named M/s. OM Ventures. Further, our company has taken over the business with a vision to corporatize our business. A Business Transfer Agreement dated August 31, 2021 has been entered into to give effect to the takeover of the business of M/s. OM Ventures (Proprietor Leena Kamat)

Our business is working capital intensive and we fund the majority of our working capital requirements in the ordinary course of our business from

financing from bank, unsecured loan from directors, financial institutions and internal accruals. As at September 30, 2021, our fund-based sanctioned working capital facilities comprised ₹196 lakhs from banks & other financial institutions. For further information, please refer “Financial Indebtedness” on page no. 147 of this Draft Prospectus.

Justification for holding period levels

Particulars	Details
Current Assets	
Inventories	We procure our raw material required for manufacturing of products in advance based on estimated requirement, we procure on order to order basis and these bring down our inventory levels. Hence we have estimated the inventory levels at an average 84 days.
Trade Receivables	Being a manufacturing company of fibre re-inforced polymers (FRP) products such as door shutters, frames, Biodigester Tanks, Bio toilets besides Bacteria Innoculum & allied products, we work with private as well as the government sector for the projects and hence, we get our revenue once project is completed. Our sales collection tenures would differ from project to project. Hence we have estimated the trade receivable levels at an average of 180 days.
Current Liabilities	
Trade Payables	Since our debtor cycles are slow hence we ensure that even our suppliers are managed around similar credit period. Based on the same we have assumed to take creditors payment period to be at around 202 days for FY 2022-23.

INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications, publically available documents and industry sources. Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly, investment decisions should not be based on such information. You should read the entire Draft Prospectus, including the information contained in the sections titled “Risk Factors” and “Financial Statements” and related notes beginning on page nos. 18 and 118 of this Draft Prospectus.

Global Economic Overview

The global economic recovery is continuing, even as the pandemic resurges. The fault lines opened up by COVID-19 are looking more persistent—near-term divergences are expected to leave lasting imprints on medium-term performance. Vaccine access and early policy support are the principal drivers of the gaps. The global economy is projected to grow 5.9 percent in 2021 and 4.9 percent in 2022, 0.1 percentage point lower for 2021 than in the July forecast. The downward revision for 2021 reflects a downgrade for advanced economies—in part due to supply disruptions—and for low-income developing countries, largely due to worsening pandemic dynamics. This is partially offset by stronger near-term prospects among some commodity-exporting emerging market and developing economies. Rapid spread of Delta and the threat of new variants have increased uncertainty about how quickly the pandemic can be overcome. Policy choices have become more difficult, with limited room to maneuver.

The global economic recovery continues amid a resurging pandemic that poses unique policy challenges. Gaps in expected recoveries across economy groups have widened since the July forecast, for instance between advanced economies and low-income developing countries. Meanwhile, inflation has increased markedly in the United States and some emerging market economies. As restrictions are relaxed, demand has accelerated, but supply has been slower to respond. Although price pressures are expected to subside in most countries in 2022, inflation prospects are highly uncertain. These increases in inflation are occurring even as employment is below pre-pandemic levels in many economies, forcing difficult choices on policymakers. Strong policy effort at the multilateral level is needed on vaccine deployment, climate change, and international liquidity to strengthen global economic prospects. National policies to complement the multilateral effort will require much more tailoring to country-specific conditions and better targeting, as policy space constraints become more binding the longer the pandemic lasts.

Despite recent increases in headline inflation in both advanced and emerging market economies, long-term inflation expectations remain anchored. Looking ahead, headline inflation is projected to peak in the final months of 2021 but is expected to return to pre-pandemic levels by mid-2022 for most economies. But given the recovery’s uncharted nature, considerable uncertainty remains, and inflation could exceed forecasts for a variety of reasons. Clear communication, combined with appropriate monetary and fiscal policies, can help prevent “inflation scares” from unhinging inflation expectations.

Indian Economic Overview

Since the 2000s, India has made remarkable progress in reducing absolute poverty. Between 2011 and 2015, more than 90 million people were lifted out of extreme poverty.

However, the COVID-19 pandemic led India's economy into a contraction of 7.3 percent in FY21, despite well-crafted fiscal and monetary policy support. Following the deadly 'second wave,' growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labour reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India's labour force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labour market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

Economic Outlook

After growing at very high rates for years, India's economy had already begun to slow down before the onset of the COVID-19 pandemic. Between FY17 and FY20, growth decelerated from 8.3 percent to 4.0 percent, with weaknesses in the financial sector compounded by a decline in the growth of private consumption. In FY21, the economy contracted by 7.3 percent.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound - with a strong base effect materializing in FY22 - and growth is expected to stabilize at around 7 percent thereafter.

Sanitation market- Global:

Globally [3.6 billion people](#) lack access to safely managed sanitation services. Almost 8% of the global population practices open defecation. Despite significant gains — 2.4 billion people gained access to improved toilets or latrines between 2000 and 2020 — sanitation was one of the most off-track Millennium Development Goals (MDGs) globally. Today, 1.7 billion people still lack even basic services. Among those, 580 million shared improved sanitation facilities with other households, counted as “limited” services and 616 million used “unimproved” facilities. The data reveal pronounced disparities, with two thirds of people who still lacked even basic services lived in rural areas. Nearly half of them lived in sub-Saharan Africa. The world missed the MDG target for sanitation by almost 700 million people.

In addition to the challenges of providing many millions of rural households with adequate sanitation, the world continues to urbanize, and cities and small towns will increasingly bear the burden of poor sanitation — with an estimated 57% of urban dwellers lacking access to toilets that provide a full sanitation service, 16% of urban dwellers lacking access to basic sanitation services, and almost 100 million urban residents practicing open defecation.

The benefits of tackling the challenges of sanitation are manifold. Improved sanitation leads to lower disease burden, improved nutrition, reduced stunting, improved quality of life, increased attendance of girls at school, healthier living environments, better environmental stewardship, increased job opportunities and wages, improved competitiveness of cities, and economic and social gains to society more broadly.

Recent analysis shows that ending open defecation can save children's lives by reducing disease transmission, stunting, and under-nutrition, which are important for childhood cognitive development and future economic productivity. Without adequate sanitation facilities, girls are more likely to drop out of school or are vulnerable to attacks while seeking privacy.

A lack of sanitation also holds back economic growth. Poor sanitation [costs billions](#) to some countries, amounting to the equivalent of 6.3% of GDP in Bangladesh (2007), 6.4% of GDP in India (2006), 7.2% of GDP in Cambodia (2005), 2.4% of GDP in Niger (2012), and 3.9% of GDP in Pakistan (2006). The economic losses are mainly driven by premature deaths, the cost of health care treatment, lost time and productivity seeking treatment, and lost time and productivity finding access to sanitation facilities. Pollution resulting from improper disposal and treatment of wastewater and domestic fecal sludge also affects both water resources and ecosystems. At the same time, fecal sludge and wastewater can provide valuable resources (water, nutrients, soil conditioner, briquettes and energy) and economic opportunities, especially in urban areas and in water-scarce environments.

Strategy:

The World Bank Group (WBG) has been addressing water and sanitation issues globally with large-scale finance and technical assistance to countries across the world. With its impact on so many aspects of human and economic development, sanitation will be one of the key drivers to ending extreme poverty by 2030, as it will be an important input to the World Bank's Human Capital Index. The World Bank Group is committed to using innovative approaches to help meet the sanitation challenges of ending open defecation, improving service delivery, and closing the loop from access to sanitation facilities through to sustainable disposal or reuse of wastewater and fecal sludge. To date, the World Bank has committed US\$10 billion to sanitation and water services, which will reach 132 million people. Earlier work by the Bank on advocacy, innovative approaches and policy dialogue, has led to large scale impact in rural and urban sanitation projects in countries such as India, Vietnam, Egypt, Haiti, Mozambique, Tanzania, Ethiopia, Bangladesh, Bolivia and Ghana.

Another strategy to expand access to sanitation — in both urban and rural locations — is the recognition that private sector participation will be key in helping us meet the needs of all citizens. To accelerate access to basic sanitation services for 2.4 billion people, and access to safely managed services for an additional 2.2 billion people, governments will need to further leverage the private sector's professional capacity and investment. Partnering with the private sector can tap into its capacity to innovate new affordable and aspirational products and service delivery for poorer households, strengthen distribution and supply chains, increase responsiveness to customer demand, and apply the best social and commercial marketing practices to change behaviour, a particularly crucial consideration for sanitation. Private sector participation can also be tapped into for the efficient collection, conveyance, treatment and proper disposal/reuse of fecal sludge and wastewater.

Sanitation – Indian Overview

India has made rapid progress in ending open defecation across the Country which is having a huge impact on improving water, sanitation and hygiene (WASH). Just a few years ago, in 2015, nearly half of India's population of around 568 million people suffered the indignity of defecating in fields, forests, bodies of water, or other public spaces due to lack of access to toilets. India alone accounted for 90 per cent of the people in South Asia and half of the 1.2 billion people in the world that defecated in the open.

By 2019, according to the latest estimates, the number of people without access to toilets has reduced significantly by an estimated 450 million people. A tremendous achievement, only possible because of the Swachh Bharat Mission (SBM) (Clean India Campaign), led by the Prime Minister. UNICEF has been a proud partner of the Swachh Bharat Mission. Going forward, it is important to ensure that there is sustained usage of toilets by, all at all time.

Whether in the cities or the countryside, open defecation has historically been most prevalent among the poorest citizens. This practice amounted to tonnes of faeces introduced daily into the environment, which regularly exposed India's children to excrement through direct contact. The risk of spreading diarrheal and waterborne diseases is compounded by the lack of regular hand washing and microbial contamination of water in their homes and communities. The situation contributed to nearly 100,000 diarrhoeal deaths of children under five years in India.

Poor sanitation can also have a ripple effect when it hinders national development because workers are suffering from illnesses and living shorter lives, thereby producing and earning less, and unable to afford education and stable futures for their children. Inadequate water, sanitation and hygiene (WASH) services in India's health facilities, contributes to

the high neonatal mortality rate, which is currently 24 deaths per 1000 live births. Sepsis – mostly spread in health facilities – contributes to 15 per cent of the overall neonatal mortality and 11 per cent of maternal deaths. And the risks do not end there when they are brought home to a community that lacks toilets.

In India's schools, recent reports also showed that 22 per cent did not have appropriate toilets for girls, 58 per cent of preschools had no toilet at all and 56 per cent of preschools had no water on the premises. Less than 50 per cent of the population has access to safely managed drinking water (located on premises, available when needed and free of contamination). Chemical contamination of water, mainly through fluoride and arsenic, is present in 1.96 million dwellings. Moreover, two-thirds of India's 718 districts are affected by extreme water depletion, and the current lack of planning for water safety and security is a major concern. India has made rapid progress in ending open defecation across the Country. The number of people defecating in open in India has reduced significantly by an estimated 450 million people. However, we all need to ensure sustained use of toilets and hygiene practices by all, at all times.

Ensuring Sustainability of Sanitation Services

On the 150th birth anniversary of Mahatma Gandhi, India celebrated the end of the five-year Swachh Bharat Mission (SBM), the world's biggest behaviour change programme to eliminate open defecation. While the country was commended for having gone from 39 per cent to almost universal toilet coverage in just five years, a lot was remained to be accomplished.

According to the national statistics, over 100 million household toilets were constructed by the deadline benefitting 500 million people across 630,000 villages, but the government acknowledged that more had to be done. Consistent reinvestment in building up and strengthening the rest of the sanitation cycle and reaching last-mile populations remained a priority in the way forward.

To sustain the gains achieved in the first phase of SBM, the Government of India launched the second phase of the flagship programme to ensure that communities remain clean by preventing faecal waste from flowing into fields and contaminating the surroundings.

According to the State of the World's Sanitation Report by UNICEF and WHO, over half the world's population (around 4.2 billion people), despite the progress being made in sanitation, use services that leave human waste untreated, threatening human and environmental health. This hampers child development and social and economic progress, making the fulfilment of child rights, good physical, mental and social well-being unattainable in the absence of safe sanitation.

Getting thousands of gram panchayats to reach this milestone calls for decentralized planning, investment in human resources, budgetary provision, and an excellent supervisory and management structure to ensure that the behaviour change activities are undertaken even after the initial declaration of ODF status.

India Water and Wastewater Treatment (Wwt) Technology Market

The Indian water and wastewater treatment (WWT) technology market was valued at USD 2,042.91 million in 2020.

The COVID-19 outbreak has been negatively affecting the economy of India. The pandemic negatively affected the operations of several end-user industries of the market studied, which reduced the outflow of industrial wastewater. The COVID-19 pandemic resulted in a huge drop in oil demand. The drop in demand resulted in the futures market for oil turning negative. This resulted in the decreased investments and a major scaling back in the drilling activities. As a result, the demand for water treatment technologies in the industry declined. In the food and beverage industry, labor shortage and the shutdown of plants reduced the food production levels in 2020. The food and beverages industry accounts for ~3% of India's GDP, and it is the single largest employer in the country, with more than 7.3 million workforces. Food items other than staple food and ready-to-eat food witnessed a significant decline, owing to the decreased food consumption in restaurants and hotels. These trends negatively impacted the growth of the food industry. Furthermore, in the pulp and paper industry, reduced imports of packaging material by major consumers resulted in a domestic oversupply of pulp and paper products in the manufacturing countries.

This oversupply issue is negatively affecting the growth of the industry.

- In the medium term, the rapidly diminishing freshwater resources and growing wastewater complexities are likely to drive the demand for water and wastewater treatment technologies in India.

- The high cost of water treatment plants and the impact of the COVID-19 pandemic are expected to hinder the growth of the market studied.
- Innovations in water treatment technologies are anticipated to act as an opportunity for the market studied.

The Indian water and wastewater treatment (WWT) technology market is segmented by equipment type and end-user industry:

Equipment Type	Treatment Equipment	Oil/Water Separation Suspended Solids Removal Dissolved Solids Removal Biological Treatment/Nutrient and Metals Recovery Disinfection/Oxidation Other Treatment Equipment
	Process Control Equipment and Pumps	
End-user Industry	Municipal Food and Beverage Pulp and Paper Oil and Gas Healthcare Poultry and Agriculture Chemical and Petrochemical Other End-user Industries	

The Municipal Segment to Dominate the Market:

Wastewater treatment is necessary and used across India in different cities. The major applications of treatment technologies include preliminary treatment, primary and secondary treatment, tertiary treatment, biological nutrient removal (BNR), resource recovery, and energy generation. Municipal wastewater treatment involves a lot of biomass. Therefore, biological treatment is a major step used for the treatment of bio waste. Wastewater technology is primarily used in municipal wastewater treatment by the municipal authority of various cities across India. The constant rise in the urban population in major Indian cities has created the demand for wastewater treatment facilities in the country to balance the population with the availability of freshwater. According to a survey by the United Nations, in 2030, 40.76% of the country's population is expected to reside in urban areas. As per the World Bank, India, along with China, Indonesia, Nigeria, and the United States, will lead the world's urban population surge by 2050.

In the coming years, desalination is expected to be a prominent technology in the Indian cities for the filtration of water due to the rising scarcity of fresh water in the country. Desalination is a process through which the salinity of seawater is removed, thereby converting it into potable water. The two main desalination processes are the distillation process and the membrane process. The distillation process includes multi-stage flash evaporation (MSFE), multi-effect distillation (MED), vapor compression (VC), and multi-effect distillation-vapor compression (MED-VC) cover approximately 50% of the total desalination process.

Fibre Reinforced Plastic (FRP) Composite Market

Global Fibre-reinforced Polymer (FRP) Composites Market is valued at 6,194 kilotons in 2020.

The market was negatively impacted by COVID-19 in 2020. Considering the pandemic scenario, the construction activities were stopped temporarily during the lockdown in order to curb the spread of COVID-19. For instance the construction output had decreased by 28.4% in the euro area (EU-19 member countries) and by 24% in the European Union (EU-27 member countries) in April 2020 compared to April 2019, mainly due to the impact of the COVID-19. This decreased the demand for FRP composites materials in the construction sector. However, the demand for FRP

composites has increased significantly to construct medical shelters for COVID-19 patients across different parts of the globe, including the United States, India, and others. For instance, in June 2020, Tata Steel introduced FRP composites-based 500-bed Greenfield hospital for quarantining COVID-19 patients in Kasargod, Kerala, India.

Over the short term, the increasing demand from the construction sector and the growing demand for energy efficiency in the aerospace and automotive industries are expected to drive the market's growth. On the flip side, declining automotive production, high initial cost, and technical challenges regarding the FRP composites outbreak are expected to hinder the growth of the market studied. The building and construction industry is expected to dominate the fibre-reinforced polymer (FRP) composites market over the forecast period.

Asia-Pacific is expected to represent the largest market, owing to the increasing consumption from countries such as China, India, and Japan.

Key Market Trends

- Increasing Demand from Transportation Sector
- Fibre-reinforced polymer (FRP) composites are widely used in the transportation industry in automotive, aircraft, helicopters, and spacecraft to boats and ships.
- Fibre-reinforced polymer (FRP) are composites used in almost every type of advanced engineering structure, with their usage ranging from aircraft, helicopters, and spacecraft through to boats, ships and offshore platforms, and to automobiles.
- In the transportation industry, fibre-reinforced polymer (FRP) composite material serves as the best alternatives to conventional materials like steel or aluminium owing to weight and cost issues. FRPs are ideal replacements for wood, in marine waterfront environments, or on ships, where they reduce the structural weight and enhance corrosion resistance.
- Overall, FRP composites can weigh up to 75% less than steel while being lighter and stronger than concrete. Owing to this, they are widely being used in the transportation industry. Overall, the rising production of various modes of transportation is expected to drive market growth.

5. Environmentally-friendly and Sustainable System

India is home to 17% of the world's population but has only 4% of the world's freshwater resources. At present, 75% of Indian households do not have access to drinking water and close to 90% of rural households have no access to piped water.

Bio STPs + utilizes multiple technologies innovatively , to customize the waste treatment process for optimum results and minimal cost, while delivering output fully in line with the latest 2020 pollution control norms, thereby contributing effectively to environment protection. The mission is to become the leader in sanitation and water recycling space in India by introducing the most technologically advanced yet environmentally friendly products. By the year 2025, the company hopes to achieve their goal of recycling 100 million liters of water every day.

The bio-toilet is a complete environmentally-friendly system. The fecal matter isn't left to ground, nor does it pollute the ecology in any manner. The system ensures that the human waste is completely degraded or "eaten up". The effluent water is pathogen-free, can be re-used or left to seep into the ground. Even as it percolates, it recharges the water table. Above all, the system doesn't require any energy source or other input for treatment, rather gives out utilizable biogas. There is a growing need to conserve more water and make India more self-sustainable. The bio-toilet can be easily installed without high cost, for the economically challenged or for the people at the bottom of pyramid (BoP). Bio STP Plus utilizes multiple technologies innovatively, to customize the waste treatment process for optimum results and minimal cost. Our company also manufactures FRP Doors that are unique, eco-friendly and greener alternatives to wooden doors. Our company also manufactures FRP Doors that are unique, eco-friendly and greener alternatives to wooden doors.

PRODUCTS AND SERVICES

The product categories being offered by EPBL are as follows:

1. Bio-Digester Tank

Bio-Digester Tank

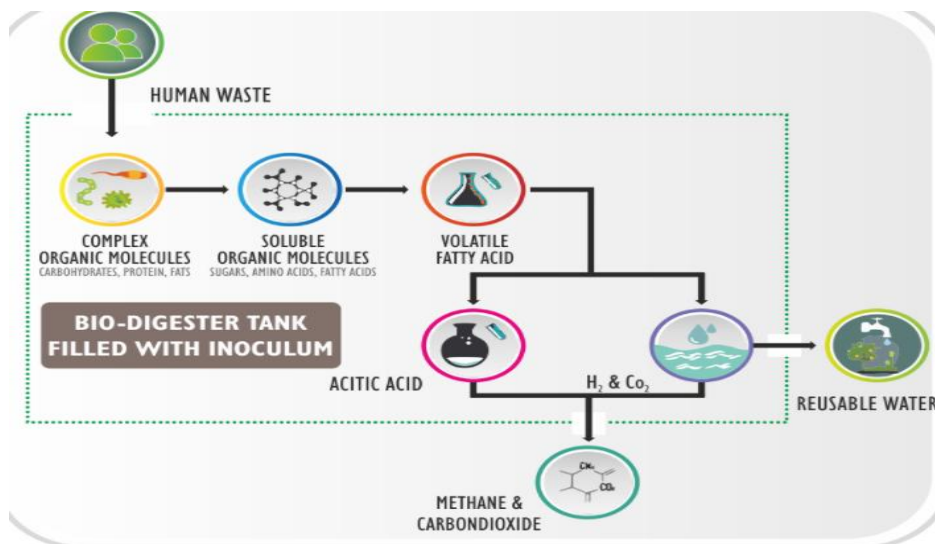

AMI Inoculum (Bacteria) Plant

FRP Toilet With Bio-Digester Tank

It is a unique sanitation technology which provides complete breakdown of human waste at all scales. With DRDO certified technology, an Inoculum's bacterium deactivates 99% of pathogens under anaerobic conditions, being easily operable in even extreme weather conditions. The only by-products are water, which is fit for gardening, and odourless gas. Only one bacterial inoculation and this system can degrade even detergents and phenyl.

With the cutting-edge technology of DRDO, benefits of the Bio-Digester toilet are many; some of these benefits are:

- Eco-Friendly
- Cost Effective
- Wide applicability in varying climatic conditions and usage
- Simple design and construction
- Maintenance Free and no recurring costs
- Minimum water consumption

The Technology

Bio-digester uses a consortium of anaerobic bacteria that have been screened and gradually adapted to work at temperatures as low as -5°C through the isolation of psychrophilic bacteria from Antarctica/Siachen. These act as inoculums (seed material) to the bio-digesters and convert the organic waste into methane and CO₂. The anaerobic process inactivates the pathogens responsible for water-borne diseases. Bio-digesters serve as reaction vessels for bio-methanation and provide anaerobic conditions and the required temperature for the bacteria.

We manufacture/produce the entire range of base products: bio-toilets, bio-tanks and bacterial culture, and services consultancy. We have been working on product innovations and applying this technology to varied sanitation requirements.

Installation of bioloo

The installation of bioloo, comprising of super-structure and the bio-tanks (specially designed) below or behind the toilet structure, are carried out at the site. The site engineer at the installation site ensures that everything is according to the plan and drawing. Pre-fabricated toilet is supplied to be installed at the site as per the requirement and budget. The toilet super-structure and the bio-tank are made in the plant and transported to the place of installation, and our team members fit the toilet at the customer site.

2. BIO STP

Sewage Treatment Plants

The company Designs, Fabricates, Supplies, Erects and Commission Sewage Treatment Plants (STP) for treating sewage generated by Industry, large colonies, Hotels, Hospitals, IT Parks and commercial buildings. As per new National pollution control norms, the Sewage Treatment Plant (STP) has become a statutory requirement of all the State Pollution Control Boards.

Features of BIO- STP

The Principle

STP work on the principle of Aerobic Treatment with the help of aerobic bacteria, which is most conventional and proven method throughout the world known as anaerobic digestion. Bio STP combines the Aerobic & Anaerobic

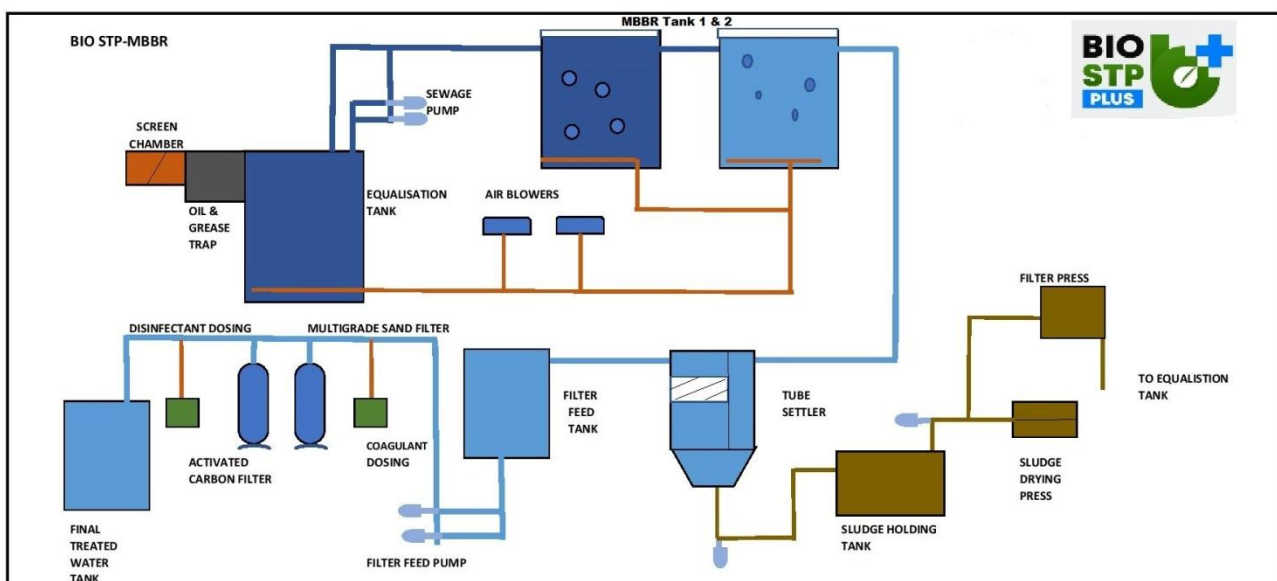

Treatment.

Technologies Used

- MBBR: Moving Bed Bio reactor
- SBR: Sequential Bioreactor
- MBR: Membrane Bio Reactor

MBR: Membrane Bio Reactor

This technology is a combination of membrane process like microfiltration, nanofiltration, and ultra filtration with biological waste water treatment process. It is one of the most important innovation in waste water treatment as it overcome the drawbacks of the conventional ASP(Activated Sludge Process), including large space requirement for secondary clarifiers, liquid–solid separation issues, production of excess sludge, and limitations with removal of recalcitrant. Its claimed ability to hold and sustain mixed liquor suspended solids (MLSS) of three to four times than what is possible in the conventional aeration tanks which in turn offers minimization of the footprint of the treatment plant.

FRP Shutters:

Our ISO 9001-2015 certified factory manufactures and supplied Fibre Glass shutters of 31/35/44mm (+/-1mm) thickness with seasoned hard wood of styles such as top rail, lock rail and bottom rail. The FRP skin is 1.5mm/2mm thick. Shutters are waterproof as well as mild acid/alkali resistant, manufactured rigorously in line with IS 4020 1998 test standards.

NPC Frames:

We supply GRP frames.

Advantages of FRP:

Wood has traditionally been the preferred material for building products; however it is a scarce resource and has led to serious environmental crises, including rapid depletion of forest cover. In the pursuit of finding suitable and superior substitutes, there has been extensive R&D for FRP (Fibre Reinforced Polymer) and GRP (Glass Reinforced Polymers). Sandwich technology used in Doors & Submarines has been found to be effective for doors.

Installation of FRP Doors

One of the many benefits of FRP Doors includes the ease of installation. This means they can be fixed in wooden, marble, masonry, Ferro cement or FRP Frames, making them the ideal choice for any type of aesthetic looks that need to be achieved.

Sandwich Structure

FRP is made of a sandwich structure, which consists of two albeit high strength face sheets (Glass Fibre Polymers composites); bonded by liquid adhesive to a light-weight core that is Expanded Polystyrene (EPS) or Polyurethane Foam. Each component by itself is relatively weak and flexible; however, when combined in a sandwich panel, they produce a stiff, strong yet light-weight structure. Core materials serve to stabilize face sheets against buckling under compression, torsion or bending loads, providing a rigid and highly effective structure. Sandwich concept is one of the most widely accepted forms of composite structures in primary load bearing structures and their construction.

PDCA CYCLE:

COMPETITION

We face competition from various domestic and other players in the market. Most of our competitors in the regional level are from the unorganized sector of the industry. We intend to continue competing vigorously to capture more market share and manage our growth in an optimal way. We expect that our commitment to quality, past record of timely execution and transparency will provide us with an edge over our competitors. Further we believe that our competition also depends on several factors which include changing business framework, competitive price, and established relationship with suppliers, brand recognition etc. We are one of the few companies manufacturing FRP Doors and Bio Digester Tanks in the Organized Sector. With the introduction of GST, unorganized market is shrinking at faster rate than before and organized companies like ours can expand rapidly in collaboration with local entrepreneurs in other areas. The focus will be on expanding to the huge untapped markets in India and abroad as substantial part of the funds will be utilized to strengthen this aspect. We therefore believe that we will be able to grow healthily despite competition.

The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations. The professional tax is charged as per the List II of the Constitution. The professional taxes are classified under various tax slabs in India. The tax payable under the State Acts by any person earning a salary or

The provisions relating to assessment, audit, valuation, time of supply, invoice, accounts, records, adjudication, appeal etc. given under the CGST Act are applicable to IGST Act.

Further, the Company is also governed by various State Goods and Service Tax statutes for levy and collection of tax on intra-State supply of goods and services or both which are as follows:

- *Goa Goods and Service Tax Act, 2017.*

E. OTHER LEGISLATIONS:

Transfer of Property Act, 1882(“T.P. Act.”)

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the T.P. Act. The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- **Sale:** The transfer of ownership in property for a price paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognizes several forms of mortgages over a property.
- **Charges:** Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- **Leases:** The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- **Leave and License:** The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908(“Registration Act”)

The Registration Act was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Contract Act, 1872(“Contract Act”)

The Indian Contract Act codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963(“Specific Relief Act”)

The Specific Relief Act is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Specific Relief Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Competition Act aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India (“**Competition Commission**”) which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations. The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

The Companies Act, 2013 (the “Companies Act”)

The Companies Act, *inter alia*, regulates the incorporation of companies, prescribes the roles and responsibilities of directors, shareholders and key managerial personnel and the procedure for undertaking various corporate actions by the company. Declaration of dividends by companies is regulated, among other sections, under Section 123 of the Companies Act. One of the conditions stated therein is that dividend can be declared by a company out of profits for the year or out of profits for the previous financial year, subject to compliance with the specified conditions, or out of money provided by the state or central government for the payment of dividend by the company. Also, dividend can be declared and paid only from the free reserves of the company. Similarly, a number of restrictions and conditions are set out in Section 68 of the Companies Act for undertaking a buy back by companies. For instance, a buy-back can be conducted by a company only from its free reserves, securities premium account or from proceeds of the Offer of any shares or other specified securities subject to compliance with specified conditions. Further, a company is not permitted to undertake a buy-back of more than twenty five per cent of the aggregate of paid-up capital and free reserves of the company in a particular financial year and no offer or buy-back can be made within a period of one year from the date of closure of the preceding offer or buy-back, if any.

We are also required to comply with the Competition Act, 2002, as amended (“**Competition Act**”), which regulates practices having an appreciable adverse effect on competition in the relevant market in India and combinations (including mergers, amalgamations and acquisitions) in excess of certain thresholds.

The Trademarks Act, 1999 (“Trademarks Act”)

Under the Trademarks Act, a trademark is a mark capable of being represented graphically and which is capable of distinguishing the goods or services of one person from those of others used in relation to goods and services to indicate a connection in the course of trade between the goods and some person having the right as proprietor to use the mark. A ‘mark’ may consist of a device, brand, heading, label, ticket, name signature, word, letter, numeral, shape of goods, packaging or combination of colors or any combination thereof. Section 18 of the Trademarks Act requires that any person claiming to be the proprietor of a trade mark used or proposed to be used by him, must apply for registration in writing to the registrar of trademarks. The trademark, once applied for and which is accepted by the Registrar of Trademarks (“**the Registrar**”), is to be advertised in the trademarks journal by the Registrar. Oppositions, if any, are invited and, after satisfactory adjudications of the same, a certificate of registration is issued by the Registrar. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal fee.

F. REGULATIONS REGARDING FOREIGN INVESTMENT

Foreign investment in India is governed by the applicable provisions of Foreign Exchange Management Act, 1999 (“**the FEMA**”) along with the provisions of Foreign Exchange Management (Non-Debt Instruments Rules), 2019, as amended (“**Non-Debt Instrument Rules**”) as well as the FDI Policy, defined below, issued by the Department for Promotion of Industry and Internal Trade (“**DPIIT**”), from time to time. Further, the RBI has enacted the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 which regulate the mode of payment and reporting requirements for investments in India by a person resident outside India.

ANNEXURE IV

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

I. Corporate Information

EP Biocomposites Limited is a Public Limited Company domiciled in India and incorporated under the provisions of the Companies Act, 2013 on 17th January, 2020. The Company is engaged in manufacture of fibre reinforced polymer products, allied products and providing of bio toilet Solutions. EP Biocomposites Limited has taken over the business of the Proprietary concern M/s OM Ventures (Proprietor: Leena Kamat) which is active since 2002 through a Business Transfer Agreement.

II. Significant Accounting Policies

1. Basis of Presentation of Financial Statements:

These financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP) to comply with the Accounting Standards specified under section 133 of the Companies Act, 2013, read with Rule 7 of the companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the Act"). The financial statements have been prepared on accrual basis under the historical cost convention.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

2. Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

3. Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

4. Taxes on Income

Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred Income taxes reflect the impact of timing differences between taxable income and accounting Income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain as the case may be that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain as the case may be that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

5. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as Current Investments. All other investments are classified as Long Term Investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Long term investments are carried in the financial statements at cost.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

6. Property Plant and Equipment:

Property, plant and equipment (PPE), being fixed assets are tangible items held for use or for administrative purposes and are measured at cost less accumulated depreciation and any accumulated impairment. Cost comprises of the purchase price including import duties and non-refundable purchase taxes after deducting trade discounts and rebates and any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Management. Financing costs relating to acquisition of assets relating to acquisition of assets which take substantial period of time to get ready for intended use are also included to the extent they relate to the period up to such assets are ready for their intended use. Gains or losses arising from derecognition of property, plant & equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized. The residual values, useful lives and methods of depreciation of property, plant & equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. During the year the company does not possessed any Tangible assets. During the year the company was operating in a rent free accommodation provided by the director.

Depreciation

Depreciation on Property, Plant and equipment are provided under written down value method as per the useful lives and manner prescribed under schedule II to the Companies Act, 2013. Depreciation is calculated after reclassification of assets.

Intangible Assets

Intangible Assets are recognised only if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. During the year the company does not possessed any intangible assets.

7. Current Assets, Loans & Advances

In the opinion of the Board and to the best of its knowledge and belief the value on realisation of current assets in the ordinary course of business would not be less than the amount at which they are stated in the Balance Sheet and repayable on demand.

8. Inventories

Finished and Semi-Finished products produced and Raw materials purchased by the Company are carried at lower of cost and net realisable value after providing for obsolescence, if any.

Cost of inventories comprises all costs of purchase, cost of conversion and other costs incurred in bringing them to their respective present location and condition.

9. Recognition of Income & Expenditure

Income and expenditure is recognized and accounted for on accrual basis. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue from sale of goods is recognised on transfer of significant risks and rewards of ownership to the customer and when no significant uncertainty exists regarding realisation of the consideration. Sales are recorded net of sales returns, sales tax/VAT, cash and trade discounts.

10. Earning Per Shares

The Company reports Basic and Diluted earnings per equity share in accordance with the Accounting Standard - 20 on Earning per Share. In determining earning per share, the Company considers the net profit after tax and includes the post tax effect of any extraordinary/exceptional items. The number of shares used in computing basic earning per share is the weighted average number of equity shares outstanding during the period. The numbers of shares used in computing diluted earning per share comprises the weighted average number of equity shares that would have been issued on the conversion of all potential equity shares. Dilutive potential equity shares have been deemed converted as of the beginning of the period, unless issued at a later date.

11. Provision, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources.

Contingent Liabilities are not recognised but are disclosed in the notes. Contingent Assets are neither recognised nor disclosed in the financial statements.

RECENT DEVELOPMENT

Impact of COVID-19

Since the onset of the COVID-19 pandemic in March 2020, our Company has responded swiftly by implementing various processes to ensure our operations continue seamlessly. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. We are engaged in the manufacturing and supply of fibre re-inforced polymers (FRP) products such as door shutters, frames, Biodigester Tanks, Bio toilets & allied products for construction and industrial applications. A strong base of loyal customers and diversified product range caters to multiple customer segments like Hotels, Industry, Government besides Individuals & construction sector helped us continue our operations inspite of Covid. An Increase in Raw material prices due to its shortage in the market has affected our operations. Average of nearly 15% increase in raw material costs has impacted our bottom line, through the Topline has grown healthily. We continued our operations after making arrangements to meet the government's requirements on sanitization, people movement and social distancing. However the prices are now slowly falling in places with economy opening up.

We consider that our swift response and proactive steps taken have mitigated the impact of COVID- 19 pandemic on our business and personnel thus far. And we were able to remain growth oriented and profit oriented. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in "Risk Factors" on page 19 of this Draft Prospectus. We are continuously monitoring the economic conditions and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business. For more details, see Risk Factors Affecting Results of Operations and Financial Condition – COVID-19 Pandemic on page 18 of this Draft Prospectus

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

1. *Some of our solutions are license based; any failure on our part to successfully retain the license would have a material adverse effect on our operation and profitability.*

Some of our sanitation solutions are based on the patented “bio-digester” technology developed by DRDO (Defense Research and Development Organization). We are a licensee (through transfer of technology) and have partnered DRDO for technology commercialization for large-scale deployment of sanitation systems. Though the license is perpetual in nature, any failure on our part to retain the license could materially affect our business. Further any subsequent introduction of royalty claimed by DRDO will increase our cost and adversely affect our profitability as currently there is no royalty levied by DRDO on the product sale.

2. *Some of the immovable properties used by us are on lease and leave and license basis. If we are unable to renew existing lease and leave and license or relocate operations on commercially reasonable terms, there may be an effect on our business, results of operations and prospects.*

We do not own the premises from where we operate. We have entered into sub lease agreements for our manufacturing unit/registered office at Plot No 57, Shed No D-2/12, Bicholim Industrial Estate, Bicholim, Goa 403529. This agreement is renewable based on the terms of the agreement. We also have entered into Leave and License agreement for our corporate office dated 31st December 2021 w.e.f. 1st January 2022. This agreement is renewable based on terms of agreement. Further, if we are unable to renew the agreements pursuant to which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places and if we relocate our manufacturing unit, registered office or Corporate Office as a result of any termination or non-renewal of our leases and rentals, we may incur additional cost as a result of such relocation. Any failure or difficulty faced by us in renewing leases, or disputes or other problems that we may face in the future with lessors may affect our business and prospects. For further details of our Properties, please refer to section titled “Our Business” beginning on Page no. 70 of this Draft Prospectus.

3. *Our Company has availed unsecured loan from our Directors / Promoters which is repayable on demand.*

Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition. Our Company, as per the restated financial statement as on September 30, 2021 has availed unsecured loans of Rs 186.85 lakhs out of which unsecured loan amounting to Rs 95.99 is repayable on demand at an interest rate of 10.50% p.a. Sudden recall may disrupt our operations and also may force us to opt for high interest bearing funding, resulting in financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no.118 of this Draft Prospectus. Any demand for the repayment of such unsecured loans, may adversely affect our cash flow and financial condition.

4. *Substantial portion of our revenue has been dependent upon our few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.*

Our customers include large corporate houses, trust & Industries. For the financial year ended March 31, 2021 and for the period ended September 30, 2021, our top ten clients accounted for approximately 43.79% and 63.47% of our revenue from operations. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as changes in government policies and bankruptcy, change of management, mergers and acquisitions in other cases could impact our business. If any of our major client becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect pharmaceutical industry in India. India’s gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth.

We face competition from various domestic and other players in the market. Most of our competitors in the regional level are from the unorganized sector of the industry. We intend to continue competing vigorously to capture more market share and manage our growth in an optimal way. We expect that our commitment to quality, past record of timely execution and transparency will provide us with an edge over our competitors. Further we believe that our competition also depends on several factors which include changing business framework, competitive price, and established relationship with suppliers, brand recognition etc. We are one of the few companies manufacturing FRP Doors and Bio Digester Toilets in the Organized Sector. With the introduction of GST, unorganized market is shrinking at faster rate than before and organized companies like ours can expand rapidly in collaboration with local entrepreneurs in other areas. The focus will be on expanding to the huge untapped markets in India and abroad as substantial part of the funds will be utilized to strengthen this aspect. We therefore believe that we will be able to grow healthily despite competition.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “**UPI Circulars**”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020; the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP issued the Consolidated Foreign Direct Investment Policy notified by the D/o IPP F. No. 5(1)/2017-FC-1 dated August 28, 2017, with effect from August 28, 2017 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect prior to August 28, 2017. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DIPP issues an updated circular.

Amidst the current pandemic caused by Covid-19, the Government of India has amended the extant FDI Policy, vide Press Note No. 3 (2020 Series). The said amendment has also been made in the Foreign Exchange Management (Non-debt Instrument) Rules, 2019. As per the aforesaid amendment a non-resident entity can invest in India, subject to the FDI Policy except in those sectors/activities which are prohibited. However, an entity of a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, can invest only under the Government route. Further, in the event of the transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within this restriction/purview, such subsequent change in beneficial ownership will also require Government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI and (iv) documentation, reporting requirements and other conditions as may be specified by the RBI in consultation with the Central Government, are adhered for such transfers

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For details, see “*Issue Procedure*” on page no. 175 of this Draft Prospectus.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.
