2. ***Our contracts with our clients are generally time bound and contain clauses for termination of contract. Failure to renew existing contracts within the anticipated timeframe may adversely affect the business of the Company.***

Our major portion of the revenue from operations is derived from the Contract Logistics Services undertaken by our Company. For the year ended March 31, 2018, our total revenue from operations were Rs. 34,288.13 Lakhs of which Contract Logistics service contributed more than 75% of the same. Further, our total revenue for the period ended September 30, 2018 was Rs. 20,824.36 Lakhs out of which significant portion contributed towards Contract Logistics services. Most of our contracts typically have a tenure ranging from one to three years. Further, most of our contracts can be terminated by our clients with or without cause, by giving short notice and without compensation and our business may be adversely affected if our contracts with our clients are not renewed within the anticipated timeframe, or at all, however we believe in maintaining long term relationship with our Customers. Further, our inability to secure new contracts to settle the loss of these contracts or our inability to accurately forecast the renewal of client contracts may create uncertainties with respect of our revenues and earnings from our client contracts, any of which may in turn materially and adversely affect our business, financial condition and results of operations.

3. ***Our failure to perform in accordance with the standards prescribed in our client contracts could result in loss of business or payment of compensation or damages as per terms of contract.***

For providing Contract Logistic Services, we enter into various agreements/contracts with our clients. These agreements may require us to comply with the code of conduct for execution of contract as prescribed by our clients such as timely placement of trucks, timely delivery fulfillment, compliance of statutory rules and regulations etc. Failure to comply with such prescribed rules or effectively address capacity constraints or accurately predict capacity requirements, our clients may experience deficiency in service. In such event, we may be required to pay compensation or damages to our clients as per the terms set out in the contracts or there may be a possibility of contract termination in adverse situation, which can adversely affect our business, financial condition and results of operations.

4. ***Our fuel expenses constitute a significant component of our operating costs. If we are unable to pass on the costs to our customers, our profit margins may be adversely affected.***

Our most significant operating costs include Fuel costs, vehicle hiring charges, toll charges etc. The cost of fuel has increased in recent years and fluctuates significantly due to various factors beyond our control, including, international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, government policies and regulations and availability of alternative fuels. In case of Contract Logistic Services, we generally have a fuel price variation clause in the contract, which assist us in passing on the increased fuel cost to our clients. In Less Than Truck Load (LTL Division) and fleet rental division, in case of substantial increase in fuel price we increase our freight rates, in order maintain to profit margins. There can be no assurance that we will be able to do so in part or in full, in future and hence any significant increase in the price of fuel will have a significant impact on our profit margins. Further, in LTL and Fleet Rental division, any excessive increase in freight can impact the competitiveness of our Company in the market.

5. ***Our Contract Logistics division significantly depends on third party logistics (i.e. outsourced vehicles) for providing transportation services to our customer apart from our owned vehicles. Any disruptions in hiring vehicles or any misconduct from their staff will affect our customer base and financial position of our Company.***

Our Company has a fleet of 355 owned vehicles as on date of this Draft Red Herring Prospectus; majority of which are purchased in FY 2017-18 & 2018-19. Apart from large fleet of goods transportation vehicles, we also hire a significant number of vehicles for our contract logistics operations. Our cost of hiring vehicles in FY 2016-17 and 2017-18 were significant to the total expenses of respective year. Our long term relationship with the small transporters (vendors) have helped us to gain access to approximately 1000 to 1200 vehicles, through which we are able to fulfil transportation requirements of our customers on timely basis. We hire

additional trucks from third parties due to volume of orders and tight delivery schedules, nature of goods to be transported and customer's preference exposing us to the risk of timely availability of third-party vehicles. Further, we do not have any control over the servicing and maintenance of these vehicles. Non-availability of hired trucks or other vehicles, delay in obtaining them and/ or break down, on-road repairs or service interruptions, any misconduct from their staff may result in loss of orders, delays in delivery of goods which could lead to customer dissatisfaction and loss of business, which in turn could adversely affect our business, results of operations and financial condition. Although our company has multiple third-party vehicle suppliers and has long term relationship with them and has not faced any major loss in past due to non-availability of hired vehicles, we cannot assure you that this will have no adverse impact on business in future.

6. *We may be unable to attract, recruit and retain employees with the requisite skills such as experienced drivers may adversely impact our business, results of operations and financial results.*

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. As on date of this Draft Red Herring Prospectus, our Company has employed approximately 250 fleet drivers on pay roll basis. Our goods transportation business is significantly dependent on our ability to attract, recruit and retain a sufficient number of experienced drivers. Experienced and skilled workers in our industry are highly sought after, and competition for talent is intense. Our employees may terminate their employment with us prematurely and we may not be able to retain them. The industry suffers from high turnover of drivers. This high turnover rate requires us to continuously recruit a substantial number of drivers in order to operate vehicles. If we experience any failure to attract and retain competent personnels or any material increase in labour costs as a result of the shortage of skilled labour, our competitiveness and business would be damaged, thereby adversely affecting our financial condition and operating results. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

7. *We have entered into contracts with third parties for the adequate and timely supply of equipment and maintenance of our vehicles, and any delays or increases in cost related thereto may adversely affect our business.*

We have entered into contracts with third parties for the adequate and timely supply of equipments and maintenance of our vehicles. We have availed Annual Maintenance Contract (AMC) from Ashok Leyland Limited, which is for a period of 7.5 years from the date of purchase of truck, under which Ashok Leyland Limited provides preventive, maintenance and repair support at its workshops/dealers across all over India under which breakdown support, replacement of normal wear and tear part, lube replacement and other maintenance services are duly provided. We have also entered into an agreement with JK Tyre & Industries Limited pursuant to which the vehicle tyres are provided on lease basis to us by JK Tyre and tyre management operations such as procurement of new & retreaded tyre, tyre fitment and repair, and wheel alignment is carried by JK Tyre for the vehicles owned by us. These arrangements enable us to ensure quality and efficiency of maintenance services for our vehicles and significantly reduce inventory costs and transportation costs for spares and also enables us to ensure timeliness and certainty of spare parts supplies. In the event Ashok Leyland and/or JK Tyres Limited or any other significant supplier discontinue our existing arrangements with such supplier, there can be no assurance that we would be able to procure similar type of maintenance services, equipment, spares and other materials from a comparable supplier at commercially acceptable rates or at all. Any disruption in the arrangements may have a material adverse effect on our business, results of operations and financial condition.

8. *We do not verify the contents of the goods transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.*

We transport various types of goods as part of our Less Than Truck Load (LTL) and Contract Logistics Business. We do obtain a declaration from the client regarding the contents of the parcel to be delivered and its value. However we do not independently verify its contents. We also do not have any equipment to enable us to verify all our consignments prior to loading such consignments on our vehicles. We cannot assure that these parcels do not contain any hazardous or illegal goods. In such circumstances, our business partners' vehicles may be confiscated, which could in turn, adversely affect our business, operations and reputation. Our business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us. Further, we are subject

to various national, state and local safety laws and regulations. In the course of our operations, we may store, transport or arrange for the storage or transportation of substances defined as hazardous under applicable laws. If any damage or injury occurs as a result of our storage or transportation of hazardous, explosive or illegal materials, we may be subject to claims from third parties, and undertake liability, for such damage or injury even if we were unaware of the presence of the hazardous, explosive or illegal materials, which could materially and adversely affect our business, operations, reputation, financial condition and results of operations.

9. *The nature of our business exposes us to liability, claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often the essence in our Contracts. We typically enter into contracts which provide for liquidated damages for time overruns. In the event there are delays in our current or future orders and we are unable to receive extensions from our customers, we may be exposed to liquidated damages and termination apart from entailing significant cost and time overruns. Additionally, in some contracts, in case of delay due to deficiency in services or because of defective work done by us, clients may have the right to complete the work at our risk and cost by engaging a third party.

In the event, we fail to perform under the terms of a contract, a bank guarantee may be called upon by our customer, which could adversely affect our financial condition and results of operations. We may also be subject to claims resulting from defects arising from services provided by us within the warranty periods extended by us. Failure to effectively cover ourselves against industry risks for any of these reasons could expose us to substantial costs and potentially lead to material losses. To minimize our exposure, we selectively seek indemnities from our vendors and subcontractors in accordance with project requirements up to the time of final acceptance. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

10. *Our transportation business is dependent on the network of roads and our ability to utilize our vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect our business operations and/ or profitability.*

Our transportation business is dependent on the road network across the country. There are various factors which affect road transport including but not limited to bad weather conditions, natural calamities, regional disturbances, political unrest, improper conduct of the drivers/ motormen, accidents or mishaps and third party negligence etc. Even though we have deployed various measures to mitigate risks caused due to such factors to the extent possible, some of these could cause damage and affect our operations and/ or condition of our fleet and thereby increase our operational cost. Also, any such disruptions could cause delays in the delivery of our consignments to their destination for which we may be held liable to pay transit delay penalty as per contractual terms, which could affect our operations and profitability.

11. *An increasing age of transportation vehicles and increasing prices of new vehicles may adversely affect our business and results of operations.*

As the age of our fleet increases, we expect maintenance costs related to our fleet to also increase, as under the AMC obtained by us, the rate of AMC is incremental year on year. We may also acquire new vehicles to expand our business or to manage operational efficiencies and reduce cost of maintenance. Unless we continue to expand and upgrade our fleet of goods transportation vehicles and acquire such vehicles on commercially favorable terms, our aging fleet may result in increased operating and maintenance costs. For details regarding the same, please refer “*Our Business*” beginning on page 105 of this Draft Red Herring Prospectus.

12. *Disruptions or failures in our information technology systems may affect our operations.*

Our business is significantly dependent on the efficient and uninterrupted operation of our information technology infrastructure that connects our various branches, warehouses and fleet centers across India. We are dependent on the IT System for a number of functions, including financial and operational controls and tracking of fleets & consignments. Any disruption of our information technology systems may require us to incur further expenditure to set up more advanced IT systems. In the event of a system failure, our business could experience significant disruption for such time period which could have a material adverse effect on

our business and results of operations. In addition, if we fail to maintain our information technology systems or fail to upgrade or replace our information technology systems to handle increased volumes, meet the demands of our customers and protect against disruptions of our operations, we may lose orders and customers which could adversely affect our business.

Further, Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

13. *Our Company has not complied with certain statutory provisions under Companies Act. Such non-compliances/lapses may attract penalties.*

Our Company has not complied with certain statutory provisions in the past including but not limited to the following:

- Our Company was required to appoint Whole Time Company Secretary under Section 383A of the Companies Act, 1956/Section 203 of Companies Act, 2013 after crossing the limit of Paid up share capital of Rs. 2 crores on March 31, 2008 and on increase of the aforesaid limit to Rs.5 Crore as amended in Companies (Appointment and Qualifications of Secretary) Amendment Rules, 2009. However, the said requirement for appointment of Whole Time Company Secretary was fulfilled by our Company in September, 2016. Thus, as on date of the Draft Red Herring Prospectus, the Company has complied with the requirements of Section 203 of Companies Act, 2013.
- In June 2007, Our Company has inadvertently filed Form -2 (return of allotment) of 25, 00,000 shares, however in actual no such allotment has been made by the Company. Also, the Authorized Share Capital of the Company at the time of filing of form was not sufficient to issue further 25,00,000 shares. 41. *Within the parameters as mentioned in the chapter titled ‘Objects of this Offer’ beginning on page 79 of this Draft Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.*

We intend to use Offer Proceeds towards meeting the fund required towards Warehouse development, Technology up gradation /development of Digital Platform, Fleet Centre Up gradation/ development, Funding the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Offer Proceeds in financial year 2018-19 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Offer Proceeds, please refer chapter titled “*Objects of the Offer*” beginning on page 79 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘*Objects of the Offer*’ beginning on page 79 of this Draft Red Herring Prospectus, the Management will

have significant flexibility in applying the proceeds received by our Company from the Offer. Our Board of Directors will monitor the proceeds of this Offer.

However, Audit Committee will monitor the utilization of the proceeds of this Offer and prepare the statement for utilization of the proceeds of this Offer. However in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Offer without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

- 42. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Offer*” beginning on page 79 of this Draft Red Herring Prospectus.

- 43. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Offer, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Offer, our Promoters and Promoter Group will collectively own [●] % of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 44. *Our Company has unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.***

As on September 30, 2018, our Company has unsecured loans amounting to Rs. 185.73 lakhs from bank and financial institutions that are repayable on demand to the relevant lender. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, please refer the chapter titled “*Financial Statements as Restated*” beginning on page 158 of this Draft Red Herring Prospectus.

- 45. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds

are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

46. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 157 of this Draft Red Herring Prospectus.

47. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel (“KMP”). They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for KMP in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

48. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Our Directors and Key Managerial Personnel (“KMP”) are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on pages 65 and 136, respectively, of this Draft Red Herring Prospectus.

49. *We have taken guarantees from Promoters and members of Promoter Group in relation to debt facilities provided to us.*

We have taken guarantees from Promoters and members of Promoter Group in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information please see the chapter titled “*Financial Indebtedness*” beginning on page 175 of this Draft Red Herring Prospectus.

50. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Few of our agreements may not be stamped adequately or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

51. *We have in the past entered into related party transactions and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters, Directors and their Relatives. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "Related Party Transactions" beginning on page 156 of the Draft Red Herring Prospectus.

52. *Industry information included in this Draft Red Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Red Herring Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

OFFER SPECIFIC RISKS

53. *There are restrictions on daily/weekly/monthly/annual movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchange in India i.e. BSE Limited, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchange. The percentage limit on circuit breakers is set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

54. *After this Offer, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Adverse media reports on Company or pertaining to the Industry in which we operate;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the

Equity Shares may fluctuate after this Offer. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Offer or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Offer.

55. ***The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.***

The Offer Price of our Equity Shares has been determined by Book Built method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 86 of this Draft Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

56. ***QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.***

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid Period and withdraw their Bids until Bid Closing Date. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

57. ***Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

INDUSTRY RISKS

58. ***Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

OTHER RISKS

59. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter “*Financial Statements as restated*” beginning on page 158, the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

60. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long term capital gains exceeds Rs. 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of Rs. 1,00,000/- pa. shall be chargeable at the rate of 10%.

Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

61. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to “*Key Industry Regulations and Policies*” on page 120 for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any

amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

62. *Financial instability in Indian financial markets could adversely affect our Company’s results of operations and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchange in India have in the past experienced substantial fluctuations in the prices of listed securities.

63. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The GoI has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

64. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of

governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

65. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

66. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

67. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

68. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Offer) Bidders can bid at any price within the price band. For instance, assume a price band of Rs.20.00 to Rs.24.00 per equity share, Offer size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

GLOBAL ECONOMIC OVERVIEW

According to the International Monetary Fund (IMF), the global economy is experiencing a near-synchronous recovery, the most broad-based since 2010. In 2017, roughly three-quarters of countries experienced improvements in their growth rates, the highest share since 2010. The latest World Economic Outlook (WEO) of the IMF shows global GDP growth accelerated to around 3.6 percent in 2017 from 3.2 percent in 2016, and the forecast for 2018 has been upgraded by 0.2 percentage points to 3.9 percent. Although rebounding, global growth is still well below levels reached in the 2000s.

One reason why the recovery has spread around the globe is that world trade in goods and services has finally emerged from its torpor, registering 4.7 percent real volume growth in 2017 compared with 2.5 percent in 2016. Another reason is that commodity producers such as Russia, Brazil, and Saudi Arabia, which for the past few years been suffering from depressed prices, have benefitted from the upswing in demand. Commodity prices increased smartly in 2017, led by petroleum, whose price rose by 16 percent to reach \$61 per barrel by the end of the year.

Even as global growth and commodity prices have surged, inflation has remained remarkably quiescent, remaining below 2 percent in the main advanced regions. Consequently, monetary policies in the US, Eurozone and Japan have remained highly accommodative despite a strong recovery. These unusual settings—rapid growth, ultra-low interest rates—at a late stage in the economic cycle have produced the rarest of combinations: record-high high bond prices and stock market valuations, both at the same time. The consensus forecast calls for these conditions to be sustained in 2018, as companies respond to buoyant demand conditions by stepping up investment, some governments (such as the US) embark on expansionary fiscal policies, while advanced country monetary policies remain stimulative and world trade continues to grow briskly.

What are the risks? Of course, there are the usual geo-political and geo-economic risks: war in the Korean peninsula; political upheaval in the Middle East; aggressive output cuts by Saudi Arabia (and Russia) in advance of the planned listing of the Saudi Arabian oil company, Aramco, which could force oil prices even higher; a final reckoning from China’s unprecedented credit surge in the form of capital controls, slowdown in growth, and a sharply depreciating currency with consequences for the global economy (Economic Survey, 2016-17, Chapter 1); and trade tensions that could lead to skirmishes, and then spiral out of control. But perhaps the main risks lie on the macro-finance front in advanced economies. These stem from three, inter-related, sources:

- Asset valuations (price-equity ratios) tend to revert to their mean. And the faster and higher they climb, especially so late in the economic cycle, the greater the risk of sharp corrections.
- Simultaneously high valuations of both bonds and equities tend to be briefly lived because they suffer from an acute tension: if future earnings and economic growth are so bright, justifying high equity prices, interest rates cannot be forever so low.
- And if interest rates rise—or if markets even sense that central banks will need to shift their stance—both bond and equity prices could correct sharply. A plausible scenario would be the following. The IMF is now forecasting that advanced country output gaps will close in 2018 for the first time since the Global Financial Crisis. As this occurs, wages would start rising, eating into profits (which would prick equity valuations); and as inflation rises in tandem, policy makers would be forced into raising rates, deflating bond valuations and further undermining share prices.

What would happen to growth if asset prices correct? Surely, the impact would be far smaller than it was in 2007-09, because advanced countries are far less vulnerable than they were a decade ago. In particular, the leverage tied to these assets is much lower, which would minimize contagious propagation; while banks are much better buffered, with higher levels of capital and core deposits, and lower levels of risky assets.

Even so, there would be some consequences. For one, a large decline in wealth would force advanced country consumers to cut back on their spending, which in turn would lead firms to curtail their investments. And if this happens, monetary and fiscal policies would have much less room for expansionary manoeuvre since interest rates are already low while government debts are high. And the political implications of yet another decline in asset prices, the second in a decade, could also be significant, with effects that are difficult to imagine.

In sum, assessing future risks hinges on two calls: interest rate policy and asset valuations. On policy, extraordinarily low rates have, to paraphrase Paul Krugman, become “an obsession in search of a justification.” Initially justified by the dislocations caused by the Global Financial Crisis, then by large output gaps, they are now defended on the grounds that inflation remains weak, even as the slack in product and labour markets is disappearing rapidly. Will the gathering new evidence on closing output gaps and rising employment dispel that obsession?

On valuations, the prognosticator must navigate a narrow strait: steering clear of the “Cry of Wolf” trap (bond prices will finally, finally correct, having defied the prediction of correction in each of the last several years), without succumbing to the siren call of “This Time is Different” (stock valuations are sustainable this time because interest rates will remain at historic lows).

OVERVIEW OF INDIA’S ECONOMIC PERFORMANCE IN 2017-18

Economic activity

The key question going forward is whether the economy has troughed, and if so at what pace it will recover toward its medium term trend. High frequency indicators do suggest that a robust recovery is taking hold as reflected in a variety of indicators, including overall GVA, manufacturing GVA, the IIP, gross capital formation (Figure 17) and exports.

Similarly, real non-food credit growth has rebounded to 4 percent in November 2017 on a year-on-year basis, while the squeeze on real credit to industry is abating (Figure 18). Moreover, the flow of nonbank resources to the corporate sector, such as bond market borrowing and lending by NBFCs, has increased by 43 percent (April-December 2017 compared to the same period a year ago), substituting in part for weak bank credit. Rural demand, proxied by motor cycle sales, and auto sales, while not yet back to its pre-demonetization trend, are recovering (Figures 19 and 20).

(Seasonally adjusted, in thousands)

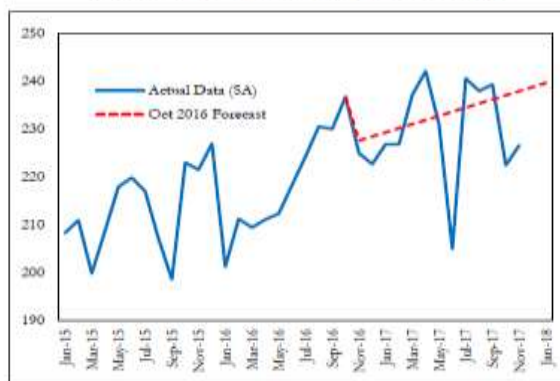

Figure 20. Sale of Passenger Cars
(Seasonally adjusted, in thousands)

Perhaps most significantly, the behaviour of manufacturing exports and imports in the second and third quarters of this fiscal year has started to reverse. The re-acceleration of export growth to 13.6 percent in the third quarter of FY2018 and deceleration of import growth to 13.1 percent, in line with global trends, suggest that the demonetization and GST effects are receding. Services export and private remittances are also rebounding (Figure 21).

On demonetization specifically, the cash-to-GDP ratio has stabilized, suggesting a return to equilibrium. The evidence is that since about June 2017 the trend in currency is identical to that pre-demonetization (Figure 22). The stabilization also permits estimation of the impact of demonetization: about Rs. 2.8 lakh Crores less cash (1.8 percent of GDP) and about Rs. 3.8 lakh Crores less high denomination notes (2.5 percent of GDP).

A final, important factor explaining the growth recovery is fiscal, which is providing a boost to aggregate demand. For reasons related to smoothening the transition, GST revenues will only be collected for 11 months, which is akin to a tax cut for consumers. Meanwhile, overall revenue expenditure growth by the central and state governments at remains strong at 11.7 percent (April to November). Cyclical conditions may also lead to lower tax and non-tax revenues, which act as an automatic stabilizer.

All this said, while the direction of the indicators is positive, their level remains below potential. IIP growth (April-November 2017 over same period in the previous year) is 3.2 percent, real credit growth to industry is still in negative territory, and the growth in world trade remains less than half its level of a decade ago. Moreover, even though the cost of equity has fallen to low levels, corporates have not

raised commensurate amounts of capital, suggesting that their investment plans remain modest (Box 6). In other words, the twin engines that propelled the economy's take-off in the mid-2000s – exports and investment – are continuing to run below take-off speed.

Meanwhile, developments in the agriculture sector bear monitoring. The trend acceleration in rural wages (agriculture and non-agriculture), which had occurred through much of 2016 because of increased activity on the back of a strong monsoon, seems to have decelerated beginning just before the kharif season of 2017-18 (Figure 23) but it is still greater than much of the last three years. Three crop-specific developments are evident. Sowing has been lower in both kharif and rabi, reducing the demand for labour. The acreage for kharif and rabi for 2017-18 is estimated to have declined by 6.1 percent and 0.5 percent, respectively. Pulses and oilseeds have seen an increase in sowing, but this has translated into unusually low farmgate prices (below their minimum support price, MSP), again affecting farm revenues. The so-called TOP perishables (tomatoes, onions, and potatoes) have meanwhile fluctuated between high and low prices, engendering income uncertainty for farmers.

The CSO has forecast real GDP growth for 2017-18 at 6.5 percent. However, this estimate has not fully factored in the latest developments in the third quarter, especially the greater-than-CSO-forecast exports and government contributions to demand. Accordingly, real GDP growth for 2017-18 as a whole is expected to be close to 6 3/4 percent. Given real GDP growth of 6 percent in the first half, this implies that growth in the second half would rebound to 7.5 percent, aided by favourable base effects, especially in the fourth quarter.

Average CPI inflation for the first nine months has averaged 3.2 percent and is projected to reach 3.7 percent for the year as a whole. This implies average CPI inflation in the last quarter of 5 percent, in line with the RBI's forecast. Therefore, the GDP deflator is expected to grow by 3.6 percent for 2017-18, somewhat higher than the CSO's forecast of 2.8 percent. Consequentially, nominal GDP growth is estimated at 10.5 percent, compared with the CSO's 9.5 percent estimate.

Macroeconomic indicators

After 13 months of continuously under-shooting the inflation target by an average of 130 basis points, headline inflation for the first time crossed the RBI's 4 percent target in November, posting a rate of 5.2 percent in December 2017 (Figure 24). The recent upswing in inflation stems from rising global oil prices (not all of which has been passed on to consumers), unseasonal increases in the prices of fruits and vegetables, and the 7th Pay Commission housing rent allowances, which mechanically increase inflation. Stripped of all these factors, underlying inflation has been increasing at a more modest pace, reaching 4.3 percent at end-December—in part because firms are passing the incidence of GST on to final consumers only gradually.

The current account deficit has also widened in 2017-18 and is expected to average about 1.5-2 percent of GDP for the year as a whole. The current account deficit can be split into a manufacturing trade

deficit, an oil and gold deficit, a services deficit, and a remittances deficit (Figure 25). In the first half of 2017-18, the oil and gold balance has improved (smaller deficit of \$47 billion) but this has been offset by a higher trade deficit (\$18 billion) and a reduced services surplus (\$37 billion), the latter two reflecting a deterioration in the economy's competitiveness.

Despite these developments, the overall external position remains solid. The current account deficit is well below the 3 percent of GDP threshold beyond which vulnerability emerges. Meanwhile, foreign exchange reserves have reached a record level of about \$432 billion (spot and forward) at end-December 2017, well above prudent norms.

Fiscal developments

Bond yields have increased sharply (Figure 26) since August 2017, reflecting a variety of factors, including concerns that the fiscal deficit might be greater-than-budgeted, expectations of higher inflation, a rebound in activity that would narrow the output gap, and expectations of rate increases in the US. As a result, the yield curve has become unusually steep (Figure 27).

The fiscal deficit for the first eight months of 2017-18 reached 112 percent of the total for the year, far above the 89 percent norm (average of last 5 years), largely because of a shortfall in non-tax revenue, reflecting reduced dividends from government agencies and enterprises. Expenditure also progressed at a fast pace, reflecting the advancing of the budget cycle by a month which gave considerable leeway to the spending agencies to plan in advance and start implementation early in the financial year. Partially offsetting these trends will be disinvestment receipts which are likely to exceed budget targets.

GST revenue collections are surprisingly robust given that these are early days of such a disruptive change (See Box 7). Government measures to curb black money and encourage tax formalization, including demonetization and the GST, have increased personal income tax collections substantially (excluding the securities transactions tax). From about 2 percent of GDP between 2013-14 and 2015-16, they are likely to rise to 2.3 percent of GDP in 2017-18, a historic high. Precise estimates of the government's contribution to this improvement vary depending on the methodology used. An econometric exercise yields an estimate of Rs. 40,000 Crores over the two fiscal years of 2016-17 and 2017-18.3 Another based on comparing the difference in actual tax buoyancy in 2016-17 and 2017-18 over the previous seven-years' average buoyancy, yields an estimate of about Rs. 65,000 Crores (both exclude the 25,000 Crores collected under the Income Disclosure Scheme and Pradhan Mantri Garib Kalyan Yojana). Thus, the sum of all government efforts increased income tax collections, thus far, between Rs. 65,000 and Rs. 90,000 Crores. These numbers imply a substantial increase in reported incomes (and hence in formalization) of about 1.5 percent to 2.3 percent of GDP.

As a result of the budget overruns, the central government's fiscal deficit until November 2017 was Rs. 6.1 lakh crore compared to the budgeted Rs. 5.5 lakh crore. In contrast, state governments seem to be hewing closely to their targeted fiscal consolidation – in part because the centre has guaranteed them a large increase in their indirect tax take, as part of the GST agreement.

Reflecting largely fiscal developments at the centre, a pause in general government fiscal consolidation relative to 2016-17 cannot be ruled out. In addition, the measured deficit for 2017-18 will include Rs. 80,000 crore (0.5 percent of GDP) in capital provided to public sector banks. But this will not affect aggregate demand, as reflected in international accounting practice which deems such operations as financing (“below-the-line”) rather than expenditure.

In the case of borrowing by the states, markets have perhaps inadequately taken into account the fact that higher market borrowings by them does not reflect higher deficits; rather about Rs. 50,000 crore or 0.3 percent of GDP of market borrowings is due to changes in the composition of financing, away from higher cost NSSF borrowings toward lower cost market borrowings. This lack of strict correspondence between the deficit and borrowings at the central and state levels (Figure 28) is discussed in greater detail in Box 8. For general government, about Rs. 40,000 Crores represents greater market borrowings that is not due to deficits—a fact which markets apparently have not internalized.

Another factor contributing to the rise in bond yields has been stepped-up Open Market Operations (OMO) by the RBI. This amounted to a net sale of about Rs. 90,000 Crores during April-December 2017-18 (compared to a net redemption of Rs. 1.1 lakh Crores during the same period in 2016-17) to sterilize the impact of foreign flows, themselves induced by high interest rates.

OUTLOOK FOR 2018-19

The outlook for 2018-19 will be determined by economic policy in the run-up to the next national election. If macro-economic stability is kept under control, the ongoing reforms are stabilized, and the world economy remains buoyant as today, growth could start recovering towards its medium term economic potential of at least 8 percent.

Consider the components of demand that will influence the growth outlook. The acceleration of global growth should in principle provide a solid boost to export demand. Certainly, it has done so in the past, particularly in the mid-2000s when the booming global economy allowed India to increase its exports by more than 26 percent per annum. This time, the export response to world growth has been in line with the long-term average, but below the response in the mid-2000s. Perhaps it is only a matter of time until exports start to grow at a healthy rate. Remittances are already perking up, and may revive further due to higher oil prices.

Private investment seems poised to rebound, as many of the factors exerting a drag on growth over the past year finally ease off. Translating this potential into an actual investment rebound will depend on the resolution and recapitalization process. If this process moves ahead expeditiously, stressed firms will be put in the hands of stronger ownership, allowing them to resume spending. But if resolution is delayed, so too will the return of the private capex cycle. And if this occurs public investment will not be able to step into the breach, since it will be constrained by the need to maintain a modicum of fiscal consolidation to head off market anxieties.

Consumption demand, meanwhile, will encounter different tugs. On the positive side, it will be helped by the likely reduction in real interest rates in 2018-19 compared to the 2017-18 average. At the same time, average oil prices are forecast by the IMF to be about 12 percent higher in 2018-19, which will crimp real incomes and spending—assuming the increase is passed on into higher prices, rather than absorbed by the budget through excise tax reductions or by the oil marketing companies. And if higher oil prices requires tighter monetary policy to meet the inflation target, real interest rates could exert a drag on consumption.

Putting all these factors together, a pick-up in growth to between 7 and 7.5 percent in 2018-19 can be forecasted, re-instating India as the world’s fastest growing major economy. This forecast is subject to upside potential and downside risks. The biggest source of upside potential will be exports. If the relationship between India’s exports and world growth returns to that in the boom phase, and if world growth in 2018 is as projected by the IMF, then that could add another ½ percentage point to growth.

Another key determinant of growth will be the implementation of the IBC process. Here timeliness in resolution and acceptance of the IBC solutions must be a priority to kick-start private investment. The

greater the delays in the early cases, the greater the risk that uncertainty will soon shroud the entire IBC process. It is also possible that expeditious resolution may require the government to provide more resources to PSBs, especially if the haircuts required are greater than previously expected, the ongoing process of asset quality recognition uncovers more stressed assets, and if new accounting standards are implemented.

Persistently high oil prices (at current levels) remain a key risk. They would affect inflation, the current account, the fiscal position and growth, and force macroeconomic policies to be tighter than otherwise. One eventuality to guard against is a classic emerging market “sudden stall” induced by sharp corrections to elevated stock prices. (Box 9 suggests that India’s stock price surge is different from that in other countries but does not warrant sanguine-ness about its sustainability.) Savers, already smarting from reduced opportunities in the wake of demonetization, from depressed gold prices, and from lower nominal interest rates, would feel aggrieved, leading to calls for action. Stock price corrections could also trigger capital outflows, especially if monetary policy unwinds less hesitantly in advanced countries and if oil prices remain high. Policy might then have to respond with higher interest rates, which could choke off the nascent recovery. The classic emerging market dilemma of reconciling the trade-off between macro-stability and growth could then play itself out.

A key policy question will be the fiscal path for the coming year. Given the imperative of establishing credibility after this year, given the improved outlook for growth (and hence narrowing of the output gap), and given the resurgence of price pressures, fiscal policy should ideally have targeted a reasonable fiscal consolidation. However, setting overly ambitious targets for consolidation—especially in a pre-election year—based on optimistic forecasts that carry a high risk of not being realized will not garner credibility either. Pragmatically steering between these extremes would suggest the following: a modest consolidation that credibly signals a return to the path of gradual but steady fiscal deficit reductions.

Against this overall economic and political background, economic management will be challenging in the coming year. If the obvious pitfalls (such as fiscal expansion) are avoided and the looming risks are averted that would be no mean achievement.

INDIAN LOGISTICS INDUSTRY

The presence of a robust logistics-related infrastructure and an effective logistics management system facilitates seamless movement of goods from the point of origin to that of consumption, and aids an economy’s movement to prosperity. The progress of logistics sector holds an immense value for Indian economy as well; as such advancement would increase exports, generate employment and give the country a significant place in the global supply chain.

As per the Economic Survey 2017-18, the Indian logistics sector provides livelihood to 22 million-plus people and improving the sector would facilitate a 10% decrease in indirect logistics cost, leading to a growth of 5-8% in exports. Further, the Survey estimates that the worth of Indian logistics market would be around US\$ 215 billion in next two years compared to about US\$ 160 billion currently. The boom in next couple of years is expected largely due to the implementation of Goods and Service Tax (GST).

Today, the Indian logistics sector is a sunshine industry and is going through a phase of transformation. Due to the initial efforts of Government of India (GoI), such as Make in India programme and improvements in infrastructure along with the emergence of skilled professionals, the country’s position bettered from 54 in 2014 to 35 in 2016 in the World Bank (WB)’s Logistics Performance Index (LPI), in terms of overall logistics performance. In fact, India improved its tally in all the six components of LPI. India also registered an overall 30 points rise in 2017 and stood at 100th position compared to 2016, in the WB’s Ease of Doing Business Index (EoDBI).

There exists a tremendous scope for further jump in India’s rankings if the existing infrastructural and cost inefficiencies are addressed. The Survey goes on to identify the challenges that beset the Indian logistics industry, the foremost of which is it being largely in the unorganized realm. The other challenges hindering its growth include high cost, underdeveloped material handling infrastructure, fragmented warehousing, presence of multiple regulatory and policy making entities, lack of seamless movement of goods across modes, and poor integration with modern information technology. These challenges, particularly the ones pertaining to procedural complexities, redundant documentations and

involvement of several agencies at our ports and borders, severely dent our performance in international trade, resulting into about 70% of the delays.

The need of the hour is to formulate an integrated logistics policy. Today the stakeholders have to deal with multiple government agencies at the union, state and local levels, which result into avoidable delays. The integrated logistics policy could go a long way in streamlining and consolidating multidepartment requirements, besides facilitating corrective action, effective monitoring and prompt grievance redressal. Along with it, a mechanism needs to be created to measure the sector's performance at regular intervals against the set benchmarks, thus, providing evidences to the policymakers so that a favourable policy environment is created.

To alter the country's logistics landscape, GoI has taken a number of decisions. The GST regime is certain to expedite faster conversion of informal logistics setups to formal ones and speed up freight movement at interstate borders due to dismantling of check posts. There is a target to reduce the logistics cost in India from the present 14% of GDP to less than 10% of it, by 2022. A national committee headed by Cabinet Secretary is in place to develop the pan-India roadmap for trade facilitation.

The Ministry of Commerce and Industry (MoCI) is developing an integrated logistics portal which would serve as a transactional e-marketplace by connecting buyers, logistics service providers and the relevant government agencies such as customs, port community systems, port terminals, shipping lines, railways, etc. Once functional, it would reduce delays and facilitate a transparent, informative and convenient trading system. Recently the Ministry also launched a new Logistics Ease across Different States Index to rank states for the support they provide to improve logistics infrastructure within their respective jurisdictions.

The logistics sector now finds a place in the Harmonized Master List of Infrastructure Subsector. This inclusion is set to benefit the logistics industry as it will now have an access to cheaper and long term credit. Such a move will also lead to simplification of the approval process for the construction of multimodal logistics parks. Lastly, it will encourage market accountability through regulation and will attract investments from debt and pension funds into recognized projects.

The commitment of GoI towards an integrated development of logistics sector through policy amendments, infrastructural development, tax reforms and technology adoption will certainly deliver desirable results. It will enhance our trade competitiveness, create jobs, shoot up country's performance in global rankings and pave the way for India to become a logistics hub. Such measures will also contribute to creation of a New India by 2022, as envisioned by the Prime Minister of India.

ROAD NETWORK IN INDIA:

India has about 54.8 lakh kilometres of road network, which is the second largest in the world. As on 31st March, 2017, out of total road network the length of national highways comprises 1,14,158 km with 1,61,487 km of state highways and 52,07,044 km of other roads. In 2001 total road length was 33,73,520 km with total number of 55 million vehicles on the roads. In 2015, total road length increased to 54,72,144 km while the total number of motor vehicles grew by four times to 210 million. The composition of vehicle shows that the share of two wheelers and passenger cars, jeep & taxis has increased on Indian road while the share of public transport like buses and also goods vehicles contracted over the period.

Both the two wheelers and passenger cars are putting pressure on Indian roads. 8.38 Realizing the need, the Government is developing more roads and taking a lot of major initiatives/programmes like National Highways Development Projects (NHDP), improvement of road connectivity in Left Wing Extremism (LWE) affected areas, Special Accelerated Road Development Programme for North-Eastern region (SARDP-NE), National Highway Interconnectivity Improvement Programme (NHIP) under proposed World Bank Loan Assistance, and Bharatmala programme.

In the year 2016-17, around 88% of the projects involving around Rs 1,00,000 crores of investment have been appropriately reengineered and restructured by proactive policy interventions and rigorous monitoring by the Ministry of Road, Transport and Highways (MORTH) and National Highways Authority of India (NHAI). This sector is still facing constraints like availability of land for NH expansion and upgradation; significant increase in land acquisition cost; lack of equity with developers; too many bottlenecks and checkpoints on NHs which could adversely impact benefits of GST; higher cost of financing; and lesser traffic growth than expected shortfall in funds for maintenance.

INDIAN LOGISTICS MARKET BY 2020

Logistics market in India is expected to be worth US\$ 307 billion by 2020, India spends around 14.4% of its GDP on logistics and transportation as compared to less than 8% spent by the other developing countries. The Government of India's ambition to replace the National Maritime Development Program (NMDP) with the more comprehensive Maritime Agenda 2010–2020 is in line with its objective to increase port capacity. It intends to encourage private investment in both major and non-major ports and bring port performance at par with international standards. Through this program, government plans to invest INR 2,870 billion in generating total port capacity of 3,200 MMT and cater to expected cargo traffic of 2,500 MMT by the end of 2020. Over 160 airports currently fall into this category and following through on this initiative would improve regional connectivity across the nation. It is difficult to say exactly what scale of impact this will have on the logistics sector since most goods are still transported by road or rail.

The Cargo and Logistics Industry in India can expect to grow at CAGR of 16% in the coming years with inflow of new investments that in turn will create new opportunities for the logistics sector. The 'Make in India' campaign will see investments connect India to global production networks and would generate significant new business for logistics in India. This will make India an attractive location to do business as compared to others in the region.

Going forward, the evolution of India's Cargo and Logistics Industry can be realized through uniform progress across all segments. Appropriate policy changes and opening up capacity and increasing speed with which goods are transported in all modes of transportation, especially rail and water transport, are imperative for the growth of the industry. Transportation of bulk commodities from road to appropriate modes such as rail and waterways can free up capacity for fast moving goods. Further, setting benchmarks and standards for the industry will drive uniformity of warehouses, storage and transport equipment.

GOVERNMENT INITIATIVES

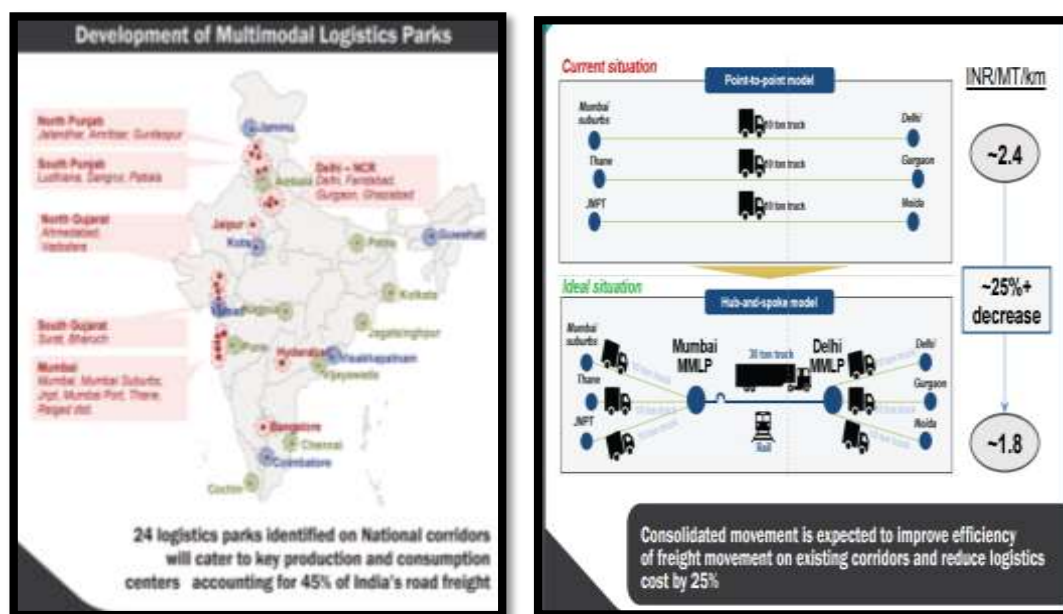

Planning for Multi Model Transport Systems

With a view to facilitating efficient and seamless freight movement, the Ministry of Road Transport and Highways has conceptualized a scheme for the development of Logistic Parks at appropriate locations in the country. The Logistic Parks are being developed by the National Highways Authority of India (NHAI) in coordination with relevant agencies like the Industrial Development Authority/ Corporation under Central/ State Government.

A detailed study on 'Logistics Efficiency Enhancement Program (LEEP)' for freight traffic has been undertaken at MoRTH. Development of Multimodal Logistics Parks has been identified as a major intervention under the study. As an outcome of the study, 35 locations has been identified for development of Logistics Parks across the country and a Logistics Parks Policy has been developed. Project DPRs are under preparation for 6 locations:- Vijaywada, Chennai, Bangalore, Hyderabad, Surat and Guwahati.

In order to develop the Logistics Parks in an integrated manner and bring all stakeholders together, the ministry had organized the India Integrated Transport and Logistics Summit- 2017 from May 3-5, 2017 in New Delhi where representatives from the Government, State Governments, national and international experts, investors, developers, consultants and other stakeholders participated.

During the summit, 33 MoUs were signed for development of logistics and associate involving State Governments, Land Ports Authority of India (LPAI), Inland Waterways Authority of India (IWAI), Container Corporation of India (CONCOR) and others.

Motor Vehicle (Amendment) bill, 2017

The Ministry constituted a Group of Ministers across states to deliberate upon and propose strategies for reducing road fatalities and to suggest actionable measures for implementation. On the basis of recommendations of the GoM, MoRTH introduced the Motor Vehicle (Amendment) Bill 2016 in Parliament (Lok Sabha) on 9th August, 2016. The Bill address road safety issues by providing for stiffer penalties, permitting electronic enforcement, improving fitness certification and licensing regime, statutory provisions for protection of good Samaritans and recognition of IT enabled enforcement systems. The Bill also paves way for reforms in public transport which in turn will help in improving road safety. The Bill contains provisions for treatment of accident victims during golden hour which will help in saving precious lives. The Bill also aims to simplify processes for the citizens dealing with transport departments and usher in an era of transport reforms in the country. The Bill has been passed by the Lok Sabha and has been referred to the Select Committee of Rajya Sabha. The Select Committee of the Rajya Sabha presented its report on 22nd December, 2017 with the recommendation to enact the

legislation without any modification. The Bill is expected to be considered and passed by Rajya Sabha in the forthcoming Budget session of the Parliament, 2017.

Strengthening Public Transport System

The Ministry has introduced a scheme w.e.f. 15.03.2010 to provide financial assistance to states for strengthening public transport system in the country. The scheme envisages assistance for introduction of Information Technology such as Global Positioning System (GPS)/ Global System for Mobile Communications (GSM) based vehicle tracking system, electronic ticket vending machines etc. Under the scheme, twenty three projects of seventeen states namely Karnataka, Haryana, Tamil Nadu, Himachal Pradesh, Gujarat, Punjab, Kerala, Rajasthan, Odisha, Uttarakhand, Andhra Pradesh, Arunachal Pradesh, Assam, Nagaland, Sikkim, Goa and J&K for bringing latest IT related features in their road transport services covering rural/ mofussil areas were sanctioned for central assistance during the year 2011-11 to 2016-17. During 2017-18, one or two more projects from SRTUs may be sanctioned as they are under process at different stages.

M-Parivahan

This app is primarily meant for common citizen and transport operators who can access various transport related services like payment of Road Tax, applying for various services, take appointment with RTO, upload documents etc. It will provide a very unique feature of virtual Driving License and virtual Registration Certificate through back-end connectivity to Transport National Register, encrypted QR code and Aadhar- based authentication- which will allow an option to replace existing physical documents/ cards with the secured, enforceable, digital identities. The app will also have other informative features, accident reporting module, violation reporting module and so on.

Rectification of Black Spots

The Ministry has so far identified 789 road accident black spots in various States of which 138 are on State roads. 189 spots have already been rectified and sanctions for rectification of 256 spots accorded till date which are in different stages of bidding/ progress.

Training of Drivers

Ministry has been working in association with States, Vehicle manufactures and NGOs for strengthening the driving training. Institute of Driving Training and Research (IDTRs) have been established in a few states which act as model driving training centres with state of art infrastructure. Ministry has also launched a scheme for creating driving training centres in all the districts of the country in due course and also supports refresher training programmers for heavy commercial vehicles drivers.

Model automated centres for checking fitness of vehicles:

Ministry has sanctioned 20 Inspection and certification centres for testing the fitness of the commercial vehicles through an automated system. Six centres are already operational. These centres will provide for objective evaluation of road worthiness of the heavy commercial vehicles. Based on the encouraging experience, it is now proposed to extend this scheme to all the states during next year.

New steps for safety of vehicles:

- (a) Heavy Vehicles: All heavy vehicles have been mandated to have ABS fitted on them. The bus body code has been implemented which would help improve the passenger safety as well as ensure minimum level of comfort. The truck body code has also been notified.
- (b) Motor cars- One of the highlights of the year is the mandate for car manufactures to fit additional safety features on cars to be manufactured from 1st July, 2019. These include compulsory air- bags, speed warning audio alert, seat belt audio alerts and reverse sensors.

REGULATORY TAILWINDS – GOODS AND SERVICES TAX (GST)

With the implementation of the tax on goods and services (GST) since July 1, 2017, business units across the country have begun to feel its impact. Since the GST has subsumed all other taxes, such as the service tax, VAT, Octroi, special taxes, etc. collected by central and state governments in India, the reform is extensive. The organized Logistics sector is expected to be one of the key beneficiaries in India of the efficiencies brought in by the new ‘One India – One Tax’ regime.

Traditionally, logistics has been operationally challenged by complicated transport networks, high coordination costs across supply chain, inadequate infrastructure and multi-point taxation.

Below are the key issues faced by organized LSPs Pre-GST:

- At present unorganized companies dominate the Indian logistics industry, accounting for approximately 80 percent of the total logistics market in India. These companies operate in hyper local markets, do not generally comply with government regulations or pay taxes, and hence have a price advantage over organized logistics players.
- Previously, the supply of a product from the manufacturing location to the customer entailed an excise duty, a VAT which could be imposed at state and central levels and a central sales tax. In some states, there was also the additional burden of an octroi imposed at state borders. Most organized players had to establish warehouses and transit points in several states to avoid paying multiple state taxes. However, this only caused more problems in accounting and increased supply chain complexity for companies, while also giving rise to opportunities for tax evasion.
- The operating efficiency of the logistics industry has been low due to the complexity of the networks, the increasing costs of coordination in supply chains, inadequate infrastructure and the imposition of entry fees in different states. In addition to these, the multitude of commercial taxes was making administration a difficult and expensive process to manage.

Implementation of GST is expected to improve performance of logistics across all sub-segments. Some of the benefits are expected to be as follows:

- Idle time for truck fleet is expected to reduce by 20% due to elimination/rationalization of check post between states (more than 20 states have already removed check posts)
- Resources spent on paperwork for transport companies is likely to be reduced significantly. Currently industry spends 50-60% of resources on documents related to tax compliance and deposit of interstate sales tax
- Elimination of octroi is expected to reduce congestion and improve productivity for logistics industry for distribution in large cities
- Introduction of single e-way bill will enable hassle free movement of goods throughout the country and help plug tax evasion loopholes used by the unorganized transportation players.
- Warehouse infrastructure is expected to improve – physical infrastructure and scale of operations

Implementation of GST could create multiple opportunities for LSPs on account of supply chain optimization initiatives by companies in key user industries

Average penetration of contract logistics is 13% (for addressable segments) in FY 2017 due to multiple factors including pre-GST complex tax structure of India. GST implementation is expected to drive penetration of outsourced logistics. The opportunities for LSPs due to GST implementation can be broadly classified into two categories – physical infrastructure & services and expansion of role in the value chain.

Physical infrastructure and services

GST will result in creation of large logistics parks and new parks will evolve as key hubs. The hub location will be determined on account of logistics efficiency, rather than on account of regulatory/tax reasons. Private companies and Government have aggressive plans to build large logistics parks across the country. LSPs could have larger distribution center operations at key location in India. It would allow firms to redesign supply chains take advantage of scale economies. It would also bring significant improvement in asset utilization and increase in operational efficiency. The larger Distribution Centers would enable the following:

- Allow for bulk-breaking and cross docking from one location
- Ease of entry across states would reduce transportation delays
- Lower inventory levels due to lesser number of locations where inventory is stored resulting in significant reduction in the carrying cost of such stock
- Capability to handle multi-industry users including B2C
- Automation to enable velocity of cargo movement
- Ability to provide infrastructure to conduct last mile value additions on cargo

Creation of larger Distribution Centers (DCs) is expected to drive increase in share of organized LSPs due to following reasons:

- Average size of truck unit is expected to increase. Organized companies are better placed to invest in better rolling stock and manage productivity
- Larger distribution centers at key locations and capability to handle complexity resulting in efficient transportation operations across India. Organized companies are better suited to service this demand
- Larger distribution centers and transportation networks would require investments in automation and processes

Expansion of role in value chain

Under GST, a third-party logistics provider would now have more incentive to provide services that have a high degree of value addition as there will no longer be multiple tax incidences and entire input tax is passed through. Example of VAS include: Inventory and order management, Procurement, Packing / kitting, Warehouse management planning, IT enabled management systems and analytics, Co-located facilities etc. Organized service providers are significantly better placed to offer customers consistent reliable service for above mentioned activities.

OTHER REGULATORY DRIVERS

The Government of India is expected to invest approximately INR 10.3 trillion in roads (national highways, state roads and rural roads) between Fiscals 2018 and 2022. In case of railways, the investment is estimated at INR 6.7 trillion between Fiscals 2016 and 2020. Significant investments by the Government to improve rail and road infrastructure are expected to improve the overall logistics scenario across India.

Further, the Ministry of Road Transport and Highways is developing an integrated, multi-modal logistics and transport policy intended to reduce logistics costs in India to match globally comparable rates and thereby increase the competitiveness of Indian products. The policy is intended to include, among other things, the construction and integration of a network of transport routes, including freight

corridors, the development of logistics parks to serve as storage and distribution centers, and the development of stations to facilitate inter-modal transport.

In December 2017, the Central Government announced the Bharatmala project, an umbrella programme for the highways sector that focuses on optimizing efficiency of road traffic movement across the country by bridging critical infrastructure gaps. 34,800 km of highways will be constructed under the Phase-1 of Bharatmala project (2018 – 2022). After completion of the project, 70 – 80 percent of freight will move along national highways as against the 40 percent at present.

OUR BUSINESS

OVERVIEW OF BUSINESS:

We are an integrated supply chain solution company, providing land base logistics, warehouse and other value-added services in India. We offer a broad, integrated freight transportation service under bulk load, dedicated load (to-and-fro), full truck load (FTL) and less than truck load (LTL) utilizing company-owned fleets or through independent third party-operator; and other ancillary services such as warehouse and value-added services. We offer technology-enabled logistic and other distribution solution designed primarily for the corporate customer. We believe that our competitive advantage is our “3PL” business model along with an optimal mix of necessary assets for our operation such as fleets and warehouses. This operational flexibility created by our asset-light “3PL” business model, coupled with our necessary asset, enhances our ability to satisfy multiple supply chain needs of our customers. In addition to the supply chain solution, a small portion of our revenue includes fleet rental service, wherein we provide our fleet on a rental basis to the small retail customers.

As on date of this Draft Red Herring Prospectus, we operate a technology-enabled fleet of more than 350 fleets and approximately 1,400 fleets provided by independent third party-operators, out of total fleets approximately 70% fleets are on roads daily on an average basis. All of our fleets have been equipped with electronic log since 2012 with real-time tracking facilities. During financial year 2018, we transported or arranged approximately 8 lakhs tons of loads for shipment throughout PAN India.

As on date of this Draft Red Herring Prospectus, we operate PAN-India through an established network of 30 branches (6 fleet centers and 9 warehouses). Further, we manage over 1 lakh sq. ft. of warehouse space, and these warehouses are either rented/leased.

We began our relationship with petrochemical corporate by offering “3PL” logistic service on early 2000. We believe petrochemical contract logistic tender contract have high eligibility criteria and selective experienced logistics company can participate, which we believe has translated into high entry barriers in high-value contracts. Since then we have expanded our relationship with other corporate player in different sectors. We offer our service to diverse and sophisticated customers who value our quality service in meeting their multiple needs. We serve hundreds of customer ranging from small to medium-sized companies to major corporates, operating in various sectors across India, including petrochemicals, fast-moving consumer goods (FMCG), automobile, tyre, electronic, mineral, metal, and garment.

As a land base logistic pure player since its incorporation and backed by more than 16 years of experience, we can offer not only individual logistic service but logistic solution ranging from the performance of the traditional logistic operation to the design of a solution that is integrated into the customer’s strategy. Our services enable our customers to focus on their core competencies while reducing their costs and inventory levels, shortening their lead time-to-market and enhances their supply chain visibility.

We are operating in a favorable industry environment, poised to benefit from structural growth and ongoing consolidation. During the last few years, the shipper (including logistic operator) has gradually shifted its thinking from supplying separate service (warehousing, transportation, labor for value-added services, etc.) to fully integrated supply chain solution. We believe our ability to offer multiple services through a balance of own vehicle and through third parties facilities, automated technology and a diversifying portfolio across industry sector which may be competitive advantage for our business.

Further, we have implemented a comprehensive business program to improve operational efficiency. We have employed two programs in which we have outsourced our maintenance activities to OEM’s. First, under the tyre maintenance program, we have entered into an agreement with JK Tyre and Industries Ltd. Second, under vehicle annual maintenance cost (AMC) program we have availed AMC from Ashok Leyland Ltd. Further, as a part of the transformation into digitization, we have implemented a cash-less system across logistic services by adopting route expense cards, fuel cards, and toll tag cards. Thus enabling us to focus more on our core business activities. Finally, in association with the Institute

of Road Safety & Fleet Management, we regularly conduct training & road safety awareness program for our drivers to ensure the overall safety measures adopted by our drivers.

- c. LTL and Warehousing and value-added services Division: For less than truck load transportation, warehousing, distribution, and other value-added services

a. Contract Logistic:

Contract logistics is based on systematic contractual formalization and allocation of appropriate assets. Our service includes long-haul and local shipping primarily utilizing dry van. Under contract logistic, we provide customized freight movement that is tailored to meet customers' requirements and typically are long-term contracts. We enter into contracts (through tender basis/negotiation). Our contract is typically for multiple years, usually, 2 to 3 years and experience high renewal rate as switching cost is typically material given the systems and highly integrated into our customer's operations. We mainly serve the industrial customer in the contract logistics business.

The majority of our contracts are based on a mixture of a per kilometer/ per ton/ per load pricing, often with protection in our favor relating to volume and scope changing as well as indexation clauses for fuel cost, other pass-through.

Our major portion of the revenue is derived from the contract logistics business. In the six month period ended September 2018 and financial year 2018, our revenue from contract logistics division was Rs. 17,774 lakhs and Rs. 26,999 lakhs respectively.

- i. **Bulk Load (Bulk):** Logistic management of the high-volume contract. It involves transportation of freight in multiple fleets at a point in time. This is a point to point movement which involves freight movement of from customers' designated location to their delivery point or destination.
- ii. **Full Truck Load (FTL):** Logistic management of freight that requires the entire space on a fleet. This is a point to point movement which involves freight movement of from customers' designated location to their delivery point or destination.
- iii. **Dedicated Load (to-and-fro):** Fleets are dedicated to the customer. Services may include multiple pickups and drops, local and home deliveries, reverse logistic, freight handling, and freight network designing etc.

b. Fleet Management:

Organizes and optimizes transport schedules and routes over a given geographic area. Optimizing route plan reduces the mileage with no load and vehicle operating time, thus reengineer route helps in reduction of operational costs. In the six month period ended September 2018 and financial year 2018, our revenue from fleet rental service segment was Rs. 768 lakhs and Rs. 3,643 lakhs respectively.

Further, the Fleet Management Division focuses on four key elements:

- Velocity – how quickly freight moves through our network
- Price – how the load is related to a revenue per mile basis
- Fright flow – how the lane fits in our network with backload or continuous moves; and
- Seasonality – how consistent the freight demand is throughout the year.

- i. **Fleet Operation:** This is a cost center dedicated to fleet maintenance and management. The division looks after impact costs, service levels, availability and life expectancy of all fleets. As part of the division is to improve operational efficiency, we have employed two programs in which we have outsourced our maintenance activities to JK Tyre and Industries Ltd. and Ashok Leyland Ltd. Further, as on date of this Draft Red Herring Prospectus, we operate 6 fleet centers.
- ii. **Fleet Rental Service:** Under this, we provide our owned fleets on hire basis to retail customers. We generally offer unutilized vehicle on short-term rental. Mostly idle fleets/ reverse load fleets are given on a rental to take advantage of the sudden rise in fleet demand. We use artificial intelligence to identify demand and routes fleets accordingly automatically during peak agriculture season.

c. LTL & Warehousing:

Under LTL & warehouse, we provide inbound logistics and outbound distribution logistics. Inbound logistic involves optimization of our customer's collection routes, reduction of their inventory through warehouse management and consolidation and enhancement of their production efficiency by kitting and other value-added services. Outbound distribution logistic involves multi-user warehouse trailered to multiple customer needs. It also includes arranging fleets and coordinating the distribution of our customers' finished products between warehouses to end customers including home delivery. warehousing space. Our warehouses are situated in West Bengal (3), Gujarat (3), Assam, Bengaluru, and Maharashtra. Our integrated, end-to-end warehousing and value-added service solution include warehousing, inventory management, order picking, kitting, co-packing, packing, consolidation, and multi-supplier consolidation etc.

OUR COMPETITIVE STRENGTHS:

We believe our established PAN-India presence, numerous asset base, with barriers to entry in large value petrochemical sector, young fleets and operational efficiency program differentiates us from most of the regional-based competitor and positioned us well in the marketplace.

a. Customer-focused operation process

We strive to go beyond the mere traditional logistic service with an aim to penetrate deep into the core of our customers' logistics strategy. To fulfill this objective, we focus on the customer relationship and understanding customer's current and future challenges and needs.

We believe our customer choose our services because we have good understanding and a positive track record of credentials notably in a petrochemical sector where we serve leading manufacturer in market. On back the operational success in the petrochemical sector, we have expanded and diversified our customer profile fast-moving consumer goods (FMCG), automobile, tyre, which we believe have high growth potential for logistic companies.

b. Young & modern fleet

Owing own fleets in our operation offers us a significant advantage in a fragmented logistic industry. As on the date of this Draft Red Herring Prospectus, we operate with 355 fleets, 6 fleet centers at multiple locations strategically positioned throughout India. Additionally, as a modern fleet company out of total owned fleets, the age of 325 fleets are less than 3 years. Further, modern fleets in turns lower maintenance and repair expense and increase asset utilization as compared with an older fleet.

As on the date of this Draft Red Herring Prospectus, the following chart shows the tonnage capacity of our owned fleet:

Further, with this fleet size, we can offer wide geographic coverage while maintaining the efficiency associated with significant productivity per fleet along with within maintaining our operating margin.

c. Broad land base service portfolio

We have a comprehensive logistics service offering across land base transportation with a various range of offering including bulk load, dedicated load (to-and-fro), full truck load (FTL) and less than truck load (LTL). This offers a variety of flexibility and different solution to our customers' requirement and as well as to handle various transport complexities.

Further, we have a strong and diversified customer base, ranging from major corporates to small & medium sized companies, having a wide variety of shipping needs, including the performance of the traditional logistic operation to the design of solution which surges fleet flexibility and logistic operations. We believe through mix asset model can provide end-to-end logistics solutions to the customers in our target industries.

d. Integrated supply-chain management with an optimal mix of “3PL” and asset base

We believe we have developed a differentiated business model having an optimal mix of “3PL” business along with necessary assets. As part of our wide range of solution including transportation and distribution, warehousing and other value-added services.

Our asset-light “3PL” business model enables us to offer a wide variety of flexible and scalable land base solution based on our customers’ requirements. Asset-light business model helps us to manage to fluctuation in fleet demand. Further, we have a large network of third party-operator providing us around 1,400 fleets. Along with trucking business, to third party-operator, we provide regular support in fuel, tyres, on route support, which aids in maintaining a good relationship.

Our own fleet allows us to provide an exceptional level of service to our customers and consistently excel as a reliable partner, especially at times of peak demand. Further our asset-light business complements incremental freight to the asset base and also helps to facilitate the expansion of our current customer base.

We believe our asset-based network and relationship with third party-operator allow us to provide supply chain service, including “3PL” to our customer at a competitive rate. Further, we believe that our business model offers the following advantages compared with primarily asset-based or complete asset-light “3PL” business such as we can scalable business through owned and third party-fleets, undertake dedicated fleet (to-and-fro) contracts, customized vehicles base on customers’ requirement, gain spot benefit of market when freights are high, efficiently manage journey risk management and have better controls, training employees and undertake new route development activities etc.

e. A culture geared towards information technology (IT)

We have given technology as one of our top priorities so that we can offer customers cutting-edge technological solutions. Our centralized IT network is capable of connecting our branch offices with our corporate office, which enables us a seamless real-time monitoring of our operation and consignment booking and delivery status. From our centralized IT network we monitor on-time performance, productivity per fleet, safety, and margins, among others. This helps in efficiently serving our customers’ shipping needs and optimize freight management. Further, the IT platform we offer is integrated with the customers and can be tailored to customers’ needs. We also use artificial intelligence in fleet rental service segment to identify demand and routes fleets accordingly automatically during peak agriculture season.

Further, as a part of the transformation into digitization, we have implemented a cash-less system across logistic services by adopting route expense cards, fuel cards, and toll tag cards. During the start of the trip money required by the driver for the trip is calculated by artificial intelligence base on cost per kilometer and credited into the card, thus eliminating cash requirement. Thus allowing us to improve the operational and financial performance of our operating fleet centers.

We believe our customer, our driver and we benefit from this IT investment such as supply chain management, on-time deliveries, continuous tracking of loads, rapid routing, route analysis, fueling, and minimizes bulk cash requirement. This has also helped in increasing the profitability per load and operating margin over the last years.

f. Built-in cost reductions program to drive up operational efficiency

We have implemented a comprehensive business program to improve operational efficiency. We have employed two programs in which we have outsourced our maintenance activities to OEM's. First, under the tyre maintenance program we have entered into an agreement with JK Tyre and Industries Ltd. Second, under vehicle annual maintenance cost (AMC) program we have availed AMC from Ashok Leyland Ltd. JK Tyre will provide tyre on lease basis and provide services such as fitment and repair tyre, wheel alignment etc. Further, Ashok Leyland will provide preventive, maintenance and repair service at its workshops/dealer across PAN-India.

We entered into such routine servicing and maintenance of our fleet contact, in an effort to avoid costly on-road repairs and deadhead miles. Following the program is designed to reduce downtime and enhance the resale value of fleets, better fuel efficiency, and reduced accident risk. Overall this program will also enable us to reduce our maintenance costs compared to small competitors and other minor spare part thefts.

OUR BUSINESS STRATEGIES:

We recognize the fact that India is operating in a favorable industry environment and poised to benefit from structural growth and ongoing consolidation. Drivers of this growth include the continued outsourcing of logistics & warehousing activities, fragmented nature of the shipper and our customers' requesting for more comprehensive offerings. We aim to achieve to grow our business by pursuing the following strategies:

a. Tap major untapped market having the potential for organic growth

Seek to explore area with high growth potential, while maintaining our usual approach of supporting existing customers and consolidating local market position. We believe the Company is well positioned to grow and profit from:

- i. Mass market:** Our expertise is based on the logistical management of high-volume contracts and searches for optimizing solutions along the entire supply chain. We aim to continue to serve new types of customer in the petrochemical sector. Further, at present in most mass consumption markets are large retailers or FMCG manufacturers. Our main objective will be to increase market share in these markets.
- ii. Dedicated service:** The size and scale of our fleet and fleet network allow us to provide the fleets and serve higher service level requirement for dedicated contracts. Dedicated contracts are used for high-service and high-priority freight, sometimes to replace private fleets previously operated by the customer. The dedicated operation generally produces higher margin and lower driver turnover than other modes of operations. Further, improves asset utilization and reduces deadhead miles. We believe these opportunities will increase with time in the logistics industry.
- iii. Exploring business opportunities in new business:** We will also keep exploring opportunities in new business segments that we anticipate will experience growth in the near future. In the near term, we are exploring coastal shipping and inland waterway.
- iv. Reverse logistics network:** We intend to ensure optimal allocation and utilization of fleet to achieve the economic as well as fulfilling customer specific requirements. For this tactical planning is vital for transportation and we intend to consolidate our operations. We intend to use artificial intelligence in network designing, scheduling of fleets and routing of fleets.

b. Reduce customer concentration risk

We believe a diverse portfolio of service, customer & end market will allow us to be resilient and consistent financial performance throughout all business cycle. One of our key business strategy i.e to reduce customer concentration risk in the petrochemical sector and diversify our presence across fast-moving consumer goods (FMCG), automobile, tyre, electronic, mineral, metal, and garment. Going forward, we intend to continue to focus our business in this sector and further grow our revenue.

c. Increase asset productivity

We believe we have a substantial opportunity to improve the productivity of our existing assets through the following measures:

- i. Increase the percentage of company-owned fleets, through which we aim to improve our margin
- ii. Capitalize on a strong logistic market to increase average own transportation revenue per mile by using sophisticated technology, type of freight selection and network management tools to reduce our freight mix and reduce deadhead miles.
- iii. Select, maintain and dispose of our fleet based on rigorous analysis of our investments and operating costs.
- iv. Maintaining discipline regarding the timing and extent of company-owned fleet growth based on the availability of new business.

d. Continue to invest in new fleets & multi-user warehouse

We plan to continuously invest in necessary assets for our operation such as fleets and warehouses. We intend to increase our existing fleet size from 355 fleets in a discipline phase manner. Further, we also intend to increase existing warehouse capacity of over 1 lakh sq. ft. of warehouse space by obtaining additional warehouses in India at a suitable strategic location through lease or license agreements. At present we are evaluating multiple opportunities in Hyderabad, Delhi, Ahmedabad, and Surat. We also intend to provide a wide variety of warehousing and value-added services from these new multi-user warehouses.

e. Further invest in a technology platform

We intend to continuously invest in information technologies that compliment the solution we provide to our customers. In order to continue to meet our customers’ transportation requirements, we also intend to invest in specific technology applications software that will improve and/or expand our offering. Pursue artificial intelligence to accommodate individual drivers' preferences with the goal of improving driver satisfaction and retention. Further, we plan on leveraging our technology were by we can lower our operating costs and increasing our margins.

We operate on basis of “3PL” business model along with an optimal mix of necessary assets for our operation such as fleets and warehouses. As part of our business, we consult, design supply chain solution for our customers’ from transportation to warehouse and allied value-added services.

i. Independent third-party-operated fleets – “3PL”

We supplement our business with fleets provided by third party-operator, who operate their own fleets and are responsible for most ownership and operating expense. As on the date of this Draft Red Herring Prospectus, we have a wide range of network of third party-operator providing us 1,400 fleets. We procure third party-fleets both contractually and in the spot market. To our customers, we offer transport management expertise and/or arrange for third party-operator to haul freight that does not fit or network and/or non availability of fleet at particular fleet centers. This “asset-light” business model allows for scalability of service as well as the flexibility to develop and offer customized logistic solution across diverse sectors.

ii. Own fleets

We operate a modern fleet of approximately 355 vehicles. All our fleets are dry van operated by company employed drivers. Modern fleets help attract and retain drivers, promote safe operation, and reduce maintenance and repair cost. We believe our modern fleet offers at least three key advantage over competitors with older fleets. First, new fleet requires fewer repairs and are available for dispatch more of the time. Second, newer fleet is typically more attractive to drivers. Third, give us the ability to better train our drivers with respect to safe driving behavior.

As on the date of this Draft Red Herring Prospectus, the following table shows the type and age of our owned fleet:

Our fleet consists of many kinds of vehicles ranging	Vehicles	% to Overall
7 MT	1	~0%
15 MT	76	21%
20 MT	22	6%
21 MT	81	23%
25 MT	75	21%
30 MT	100	28%
Total	355	100%
Less than 3-Year-old fleets		325

Further based on the volumes we purchase, we believe that we have a cost advantage in the procurement of new fleets compared to the prices paid by local fleet companies. Our Company has also obtained all the required national permits for the passage of fleets. In addition to the permits, our fleet is also equipped to transport food items as approved and licensed by the Food Safety and Standards Act, 2006. Further, more than 70% of our fleets are BS-IV compliant.

The following map provides information regarding our fleet centers in India:

During the start of the trip money required by the driver for the trip is calculated by artificial intelligence base on cost per kilometer and credited into the card. This has eliminated cash requirement.

d. Pricing and Payment Option

The pricing of our services is determined on the basis of the weight/volume of the relevant freight and as well as the distance of the delivery point. We have three kinds of payment options as detailed below:

- i. **“Paid” Option:** The “paid” option is generally used under LTL division. Under this option, the customer pays the freight charges at the time of booking. This facility enables us to realize revenue on the immediate basis from the customers.
- ii. **“To Pay” Option:** The customer does not pay the charges at the time of booking under this option; instead the person to whom the freight is delivered (i.e. consignee) is required to pay the freight charges at the time of collection of the freight. This payment option is the most preferred option for our customers. This payment option is popular among customers in the unorganized sector, particularly SMEs, distributors, and traders. Although there is a risk of non-payment by the consignee, in order to minimize the risk of default, we continue to retain possession of the consignment until payment. The “To Pay” option is generally used in LTL division and in some cases in FTL division.
- iii. **Ongoing Accounts:** Under this payment option, our services are provided to the customers on credit and we maintain an ongoing account of receivables from such customers. The customer is required to settle the account on a periodic basis. This facility is extended only to selected high-volume and regular customers, usually major corporates. Due to deferred payment terms and comparatively higher credit periods, this payment method is used only for FTL services.

For six month period ended September 2018 and in the financial year 2018 we purchased approximately 77% and 38% respectively of our fuel through a cashless fuel card. We believe that our most effective protection in fuel cost is to use indexation clauses in our contracts. Indexation case to some extent adequately covers risk in fuel price. We do not use derivative instruments as a hedge against fuel cost risk and have limited intentions of evaluating this possibility.

Our Financial Statements, as restated have been derived from our audited financial statements for the respective years. Accordingly, the degree to which our Restated Financial Statements will provide meaningful information to a prospective investor in countries other than India is entirely dependent on the reader's level of familiarity with Indian GAAP, Companies Act, SEBI Regulations and other relevant accounting practices in India.

This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors such as those described under "Risk Factors" and "Forward Looking Statements" beginning on pages 28 and 20 respectively, and elsewhere in this Draft Red Herring Prospectus.

Our Financial Year ends on March 31 of each year. Accordingly, all references to a particular Financial Year are to the 12 months ended March 31 of that year.

OVERVIEW

We are an integrated supply chain solution company, providing land base logistics, warehouse and other value-added services in India. We offer a broad, integrated freight transportation service under bulk load, dedicated load (to-and-fro), full truck load (FTL) and less than truck load (LTL) utilizing company-owned fleets or through independent third party-operator; and other ancillary services such as warehouse and value-added services. We offer technology-enabled logistic and other distribution solution designed primarily for the corporate customer. We believe that our competitive advantage is our "3PL" business model along with an optimal mix of necessary assets for our operation such as fleets and warehouses. This operational flexibility created by our asset-light "3PL" business model, coupled with our necessary asset, enhances our ability to satisfy multiple supply chain needs of our customers. In addition to the supply chain solution, a small portion of our revenue includes fleet rental service, wherein we provide our fleet on a rental basis to the small retail customers.

As on date of this Draft Red Herring Prospectus, we operate a technology-enabled fleet of more than 350 fleets and approximately 1,400 fleets provided by independent third party-operators, out of total fleets approximately 70% fleets are on roads daily on an average basis. All of our fleets have been equipped with electronic log since 2012 with real-time tracking facilities. During financial year 2018, we transported or arranged approximately 8 lakhs tons of loads for shipment throughout PAN India.

As on date of this Draft Red Herring Prospectus, we operate PAN-India through an established network of 30 branches (6 fleet centers and 9 warehouses). Further, we manage over 1 lakh sq. ft. of warehouse space, and these warehouses are either rented/leased.

We began our relationship with petrochemical corporate by offering "3PL" logistic service on early 2000. We believe petrochemical contract logistic tender contract have high eligibility criteria and selective experienced logistics company can participate, which we believe has translated into high entry barriers in high-value contracts. Since then we have expanded our relationship with other corporate player in different sectors. We offer our service to diverse and sophisticated customers who value our quality service in meeting their multiple needs. We serve hundreds of customer ranging from small to medium-sized companies to major corporates, operating in various sectors across India, including

petrochemicals, fast-moving consumer goods (FMCG), automobile, tyre, electronic, mineral, metal, and garment.

As a land base logistic pure player since its incorporation and backed by more than 16 years of experience, we can offer not only individual logistic service but logistic solution ranging from the performance of the traditional logistic operation to the design of a solution that is integrated into the customer's strategy. Our services enable our customers to focus on their core competencies while reducing their costs and inventory levels, shortening their lead time-to-market and enhances their supply chain visibility.

We are operating in a favorable industry environment, poised to benefit from structural growth and ongoing consolidation. During the last few years, the shipper (including logistic operator) has gradually shifted its thinking from supplying separate service (warehousing, transportation, labor for value-added services, etc.) to fully integrated supply chain solution. We believe our ability to offer multiple services through a balance of own vehicle and through third parties facilities, automated technology and a diversifying portfolio across industry sector which may be competitive advantage for our business.

Further, we have implemented a comprehensive business program to improve operational efficiency. We have employed two programs in which we have outsourced our maintenance activities to OEM's. First, under the tyre maintenance program, we have entered into an agreement with JK Tyre and Industries Ltd. Second, under vehicle annual maintenance cost (AMC) program we have availed AMC from Ashok Leyland Ltd. Further, as a part of the transformation into digitization, we have implemented a cash-less system across logistic services by adopting route expense cards, fuel cards, and toll tag cards. Thus enabling us to focus more on our core business activities. Finally, in association with the Institute of Road Safety & Fleet Management, we regularly conduct training & road safety awareness program for our drivers to ensure the overall safety measures adopted by our drivers.

Man Mohan Pal Singh Chadha and Sanjeev Kumar Elwadhi Vs. Era Landmarks Limited. & Another

A Complaint Petition No. 42/2017 dated January 31, 2017 was filed by Man Mohan Pal Singh Chadha and Sanjeev Kumar Elwadhi (hereinafter referred to as complainants) before the Hon'ble State Consumer Disputes Redressal Commission, Haryana under Section 17 of Consumer Protection Act, 1986 against the Era Landmarks Limited and Another (hereinafter referred to as opposite party). Man Mohan was approached by the opposite party to purchase a residential apartment. The opposite party ensured Man Mohan that he will get the possession by mid 2015. Man Mohan expressed his apprehension about being the sole purchaser of the flat and as his financial position was insufficient to purchase a heavy residential apartment. But the representative of opposite party suggested to induct a co applicant to purchase the flat which would enable them to defray the payments without any difficulty. The Complainants were convinced and made the initial payment and as per the plan, made several other payments for the apartment in good faith. In this way through false assurances and misrepresentations opposite party collected an amount of Rs. 43,58,568 from the complainants. The construction of the tower was progressing at snail pace and hence the complainants realised that there is no way that the delivery of the apartment would be done within the given time frame. In May 2015 a letter was circulated by the opposite party stating that no development has taken place in construction due to some issues and severe financial liquidity. After this the Complainants have repeatedly contacted the opposite parties telephonically and reiterated their willingness to pay the entire outstanding amount for the cost of the apartment, provided the builders offer them possession of their booked apartment. However, the opposite parties have refused to give any answer, constraining the complainants to approach Hon'ble Commission to seek a refund of their paid monies from the opposite parties.

Being aggrieved by this act the present compliant has been filed for refund of **Rs. 43,58,568/-** along with interest at the rate of 18% p.a being **Rs. 32,96,201/-** along with **Rs. 2,50,000/-** towards compensation for deficiency in service, unfair trade practice and **Rs. 50,000/-** as litigation expenses.

The matter is currently pending.

Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100%

2,000	21	5,000	166.67%
2,500	20	7,500	250%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example.
