Over the last three Financial Years, our top ten customers have contributed 48.09%, 63.85% and 57.01% of our total revenues from operations for Financial Year 2023, 2022 and 2021 respectively and 54.54% of our total revenues from operations for period ended September 30, 2023. Over the last three Financial Years, our top five customers contributed 28.91%, 43.14% and 35.64% of our total revenues from operations for Financial Year 2023, 2022 and 2021 respectively and 36.05% of our total revenues from operations for period ended September 30, 2023. The loss of orders from any of these significant customers will result in a considerable reduction in our revenue. Our business from customers is dependent on our continuing relationship with such customers, the quality of our products, competitive pricing and our ability to timely deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. If our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Significant dependence on them may increase the potential volatility of our results of operations and exposure to individual contract risks. In the event that any of these customers discontinue purchase of products from us, our results of operations and financial condition may be adversely affected.

4. ***The Company is yet to place orders for 86% of its plant & machinery for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machinery may delay our implementation schedule and may also lead to increase in price of these plant & machinery, further affecting our revenue and profitability.***

As on date of the Draft Red Herring Prospectus, we have placed orders for plant & machinery amounting Rs. 315.40 Lakhs and have made advance payment of Rs. 157.71 Lakhs towards the same out of internal accruals. Further, we have identified the type of plant and machinery required to be bought for our proposed manufacturing facility, and for which orders are yet to be placed which are amounting to Rs. 1,004.94 Lakhs as detailed in the “Objects of the Issue” beginning on page 79 of this DRHP. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost

overruns, changes in management's views of the desirability of current plans, change in supplier of equipment, among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machinery, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the Project, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled "Objects of the Issue" beginning on page 79 of this DRHP.

5. ***We generate our major portion of sales from our operations in certain geographical regions especially Maharashtra, Karnataka, Goa and Delhi and internationally also. For the year ended March 31, 2023 and period ended September 30, 2023 our Company generated 82.04% and 89.96% from Domestic Sales and 17.96% and 10.04% from International Sales respectively of our revenue from operation cumulatively. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.***

We generate major sales from our customers domestically situated at Maharashtra, Karnataka, Goa and Delhi. These 4 states contribute 74.62% of total sales For the year ended March 31, 2023 and 76.16% for the period ended September 30, 2023.

For the year ended March 31, 2023 and period ended September 30, 2023 our Company generated 82.04% and 89.96% from Total Domestic Sales and 17.96% and 10.04% from International sales respectively of our revenue from operation cumulatively.

Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, regulatory regimes, business practices, culture and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside the above states and international market may adversely affect our business prospects, financial conditions and results of operations. However, our Company at present is supplying goods on pan India basis and has started strengthening its customer base in other states but we are yet to scale our operations in these regions. While our management believes that the Company has requisite expertise to mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

6. ***Any significant decline in the demand for our products i.e., coated duplex paper boards or introduction of alternative technology or consumer habits may adversely affect our profitability and business prospects.***

Our product coated duplex paper boards are mainly used in the packaging industry. Our customers decision to seek alternative technology coupled with the development of more alternatives and our inability to respond to these changes, may adversely affect our business and results of operations. Our ability to anticipate changes in technology and to supply new and enhanced products successfully and on a timely basis will be a significant factor in our ability to grow and to remain competitive. In addition, our business, operations and prospects may be affected by various policies and statutory and regulatory requirements and developments that affect our customer's industry in India. In the event of a significant decline in the demand for our products i.e., coated duplex paper boards, our business, results of operations and financial condition may be materially and adversely affected.

7. ***We are mainly dependent on imports for supply of our major raw material; i.e., waste paper.***

Our Company meets its demand of raw material i.e., waste paper by importing the same mainly from the United States of America, United Kingdom, Central Europe, Middle East, etc. Over dependence on imports and lack of back-up arrangements from Indian suppliers may adversely affect our profitability in case the trade relations of India with any of these countries get strained in the future or the suppliers face any sort of problems due to internal issues of their countries. Also, the exchange rate between the Indian Rupee and currencies of the countries from where the waste paper is imported may fluctuate and adversely affect our results of operations. Depreciation of the Indian rupee against the U.S. Dollar and other foreign currencies may adversely affect our results of operations by increasing the cost of our products. Volatility in the exchange rate may negatively impact our cost of operations and operating results.

8. ***Industry information included in this Draft Red Herring Prospectus has been exclusively derived from an industry report commissioned and paid for by us in connection with the Offer. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have availed the services of an independent third-party research agency, Dun & Bradstreet Information Services India Pvt. Ltd. to prepare and issue the Industry Report, for the purposes of inclusion of such information in this Draft Red Herring Prospectus exclusively in connection with the Issue. The Industry Report is subject to various limitations and based upon certain assumptions, estimates, forecasts and projections that are subjective in nature. Although we believe that the data in the Industry Report may be considered to be reliable, the accuracy, completeness and underlying assumptions are not guaranteed and dependability cannot be assured. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. As there are no standard data gathering methodologies in the industry, methodologies and assumptions may vary widely among different industry sources. Furthermore, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus.

9. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals.

Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" at pages 198 and 203 respectively of this DRHP.

10. ***Exchange rate fluctuations may adversely affect our results of operations as we import a significant value of raw materials from various countries internationally. Exposed to foreign currency exchange rate fluctuations may adversely impact our results of operations, cash flows and cause our financial results to fluctuate.***

Our financial statements are prepared in Indian Rupees. However, a significant portion of the raw material purchased are through import. Accordingly, we have currency exposures relating to forex other than in Indian Rupees, particularly the U.S. Dollar. During the six months ended September 30, 2023, Fiscal 2023, Fiscal 2022 and Fiscal 2021, our net purchase from imports amounted to ₹ 5,608.07 lakhs, ₹ 14,894.69 lakhs, ₹ 11,746.98 lakhs and ₹ 3,787.40 lakhs, respectively, which constituted 79.50%, 76.82%, 67.18% and 47.28%, respectively, of the aggregate of purchases of raw material consumed. Therefore, changes in the relevant exchange rates could also affect import cost of raw materials and operating results. We are affected primarily by fluctuations in exchange rates among the U.S. dollar and the Indian Rupee, and our business, results of operations and financial condition may be adversely affected by fluctuations in the value of the Indian Rupee against the U.S. Dollar or other foreign currencies. Additionally, we have earned gains due to these fluctuations in foreign currency in the six months period ended September 30, 2023, Fiscal 2023, Fiscal 2022 and Fiscal 2021 of ₹ 56.07 lakhs, ₹ 194.12 lakhs, ₹ 267.37 lakhs and ₹ 21.05 lakhs, respectively based on the Restated Financial Statements. These gains were related to instances where the market exchange rate at the time of payments was in our favour or against us as compared to the rates when we entered into such transactions and were accounted.

In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our business, financial condition, results of operations and cash flows. We closely monitor our exposure to foreign currencies, however, this may not be sufficient to protect us against incurring potential foreign exchange related losses. Our use of these derivatives broadly subjects us to market and credit risk, including counterparty credit risk and the risk of incurring financial losses when foreign exchange rates move contrary to expectations or if our risk management procedures prove to be inadequate, which could adversely affect our results of operation, liquidity and financial condition. For further information on our exchange rate risk management, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Quantitative and Qualitative Disclosures about Risk – Market Risk - Foreign Currency Risk” on page 195.

11. We have certain contingent liabilities that have not been provided for in our Company’s financials which if materialized, could adversely affect our financial condition.

Our contingent liabilities as on September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 is as under:

(Rs. in Lakhs)

For further details, see the section entitled “Financial Statements, as restated” on Annexure 1 of this DRHP.

12. *The shortage or non-availability of power and water facilities may adversely affect our coated duplex paper boards manufacturing process and have an adverse impact on our results of operations and financial condition.*

Our coated duplex paper boards manufacturing process requires substantial amount of power and water facilities. In order to meet our power requirements the Company has installed captive power plant at our manufacturing facility to generate electricity with a capacity to generate electricity up to 4 MW. Further our manufacturing process also requires substantial amount of water. Water is majorly required in pulping process for slushing of paper to make slurry. We currently source our water requirement from MIDC. Any disruption / non-availability of power or water or any failure on our part to arrange alternate sources of electricity and water supply, in a timely manner and at an acceptable cost shall directly affect our production which in turn shall have an impact on operations and results of our Company.

13. *The industry in which we operate is labour intensive and our manufacturing operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Paper industry being labour intensive is dependent on labour force for carrying out its manufacturing operations. In order to retain flexibility and control costs, our Company appoints independent contractors who in turn engage on-site contract labour for performance of our certain operations. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition and we may also be subject to legal proceedings in this regard. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, as amended, we may be required to absorb a number of such contract labourers as permanent employees. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

Further, non-availability of laborers at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock- outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

14. *We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition. Further, we may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates for our growth plans and cannot assure that we will obtain the desired credit ratings of our Company, in the future, which could have a material adverse effect on our business, results of operations and financial condition.*

We have entered into agreements with certain banks for short-term and long terms facilities. As of September 30, 2023, we had total borrowings of ₹ 7,660.31 lakhs on consolidated basis. In terms of

security, we are required to create a mortgage or charge over our movable properties. We may also be required to furnish additional security if required by our lenders. Additionally, we are required to, among others, maintain the prescribed debt coverage ratio, net total debt, and fixed asset coverage ratio. There can be no assurance that we will be able to comply with these financial or other covenants at all times or that we will be able to obtain the consent necessary to take the actions that we believe are required to operate and grow our business.

Further, we are susceptible to changes in interest rates and the risks arising therefrom. Certain of our financing agreements provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further, under certain of our financing agreements, the lenders are entitled to charge the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating.

15. *Volatility in the supply and pricing of our raw materials may have an adverse effect on our business, financial condition and results of operations.*

The principal raw material used in our manufacturing process is waste paper. In addition to waste paper, we also require certain chemicals for carrying out our manufacturing process. The costs of raw materials for the period ended September 30, 2023 have contributed 53.80 % and for the year ended March 31, 2023, March 2022 and March 2021 have contributed 59.25 %, 55.88 %, 48.53 % respectively of the total revenue. We majorly source our waste paper requirement through imports.

The imports for the period ended September 30, 2023 have contributed 34.98 % and for the year ended March 31, 2023, March 2022 and March 2021 have contributed 40.25 %, 47.28 %, 52.86 % respectively of the total purchases. We majorly source our waste paper requirement through imports.

We do not have long term agreements with any of our raw material suppliers and we purchase such raw materials on spot order basis.

Our top 10 suppliers for the period ended September 30, 2023 have contributed 54.06 % and for the year ended March 31, 2023, March 2022 and March 2021 have contributed 51.12 %, 64.76 % and 53.73% respectively, of our total purchases. While we are not significantly dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms.

Further, there may be volatility in prices of our raw material and if we are not able to compensate for or pass on our increased costs to customers, such price increases could have a material adverse impact on our result of operations, financial condition and cash flows. Additionally, we may not be able to pass on every instance of increase in input cost and may have to pursue internal cost control measures.

16. *We have not entered into any long term or definitive agreements with our customers. If our customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.*

We have not entered into any long term or definitive agreements with our customers, and instead rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Our customers do not, typically, place firm purchase orders until a short time before the products are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production or sales. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customer's vendor preferences. Additionally, our customers have high and exacting standards for product quantity and quality as well as

delivery schedules. Any failure to meet our customer's expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

17. ***Our Company is dependent on third party transportation providers, with whom we have no formal arrangements, for the delivery of our raw materials and goods and any disruption in their operations or a decrease in the quality of their services or an increase in the transportation costs could adversely affect our Company's reputation and results of operations.***

We rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of raw material from our suppliers from domestic as well as from International market and for transportation from our finish products to our customers which includes export. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any transport service providers and engage them on a need basis. Additionally, availability of transport solutions in the market we operate in is typically fragmented. We do not enter into written documentation in relation to the transportation services we hire which poses various additional risks including our inability to claim insurance. Further, the cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost effective manner. Accordingly, our business is vulnerable to increased transportation costs including as a result of increase in fuel costs, transportation strikes, delays, damage or losses of goods in transit and disruption of transportation services because of whether related problems, strikes, lock-outs, accidents, inadequacies in road infrastructure or other events.

Although we have not experienced any disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may be cost inefficient, thereby affecting our operations and profitability.

18. ***Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.***

Modernization and technology upgradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

19. ***Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.***

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Our secured debt has been availed at floating rates of interest. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled "Financial Indebtedness" beginning on page 180 of this DRHP.

20. ***Our business is dependent on our single manufacturing facility, and we are subject to certain risks in our manufacturing process. Any slowdown or shutdown in our manufacturing operations could have an adverse effect on our business, financial condition and results of operations.***

Our Company have single manufacturing facility located at Plot No. F-1, Pophali - Chiplun Industrial Area, MIDC, Kherdi, Tal. Chiplun, Ratnagiri, 415604, Maharashtra engaged in manufacturing of Coated Duplex Boards. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Being dependent on our sole manufacturing facility heightens our exposure to adverse developments related to regulation, as well as economic, demographic and other changes at the location as well as the occurrence of natural and man-made disasters, which may adversely affect business, results of operations and financial condition.

If our manufacturing facility is harmed or rendered inoperable by factors such as, including the breakdown or failure of equipment, difficulties or delays in obtaining raw materials, spare parts and equipment / machines, raw material shortages, performance below expected levels of output or efficiency, facility obsolescence or disrepair, natural or man-made disasters (including earthquakes, fire, floods, acts of terrorism and power outages) and industrial accidents, it may render it difficult or impossible for us to efficiently operate our business for some time, or require us to shut major part of our operations, which may adversely affect our business, financial condition, result of operations and cash flows. For instance, our business operations were temporarily disrupted on account of the temporary shutdown of the manufacturing facilities on account of the lockdown imposed by the central / state authorities to combat the spread of COVID-19. Additionally, any failure or disruption in power or water supply could affect our daily operations and substantially increase our manufacturing costs. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

21. *Information relating to our production capacities and the historical capacity utilization of our manufacturing facility included in this DRHP is based on various assumptions and estimates and future production and is certified by third party and capacity utilization may vary.*

The information relating to the estimated annual installed capacity and the average estimated annual available capacity of our manufacturing facility included in this DRHP are based on various assumptions and estimates of our management that have been taken into account by the chartered engineer in the calculation of our capacity. These assumptions and estimates include the standard capacity calculation practice of industry after examining the installed capacity, calculations and explanations provided by our management, the period during which the facility operates in a year, availability of raw ingredients, expected utilization levels, estimated downtime resulting from scheduled maintenance activities, assumptions relating to unscheduled breakdowns, as well as expected operational efficiencies. Actual production levels and capacity utilization rates may therefore vary significantly from the estimated annual installed capacity and the average estimated annual available capacity information of our facility.

Undue reliance should therefore not be placed on our capacity information or historical capacity utilization information for our existing facility included in this DRHP. Further, average estimated annual available capacity has been calculated on the basis of the estimated daily available capacity for the relevant periods, as certified by Sanjay S. Ranade, Chartered Engineer pursuant to certificate dated February 06, 2024. Significant changes from our annual available capacity could adversely affect our results of operations, cash flows and financial condition

22. *We have in the past entered into related party transactions and may continue to do so in the future, subject to relevant compliances under applicable laws and rules as amended, which may potentially involve conflicts of interest with the equity shareholders.*

We have in the course of our business entered into transactions with related parties. For Details of the related party transactions in the six-months period ended September 30, 2023 and Fiscals 2023, 2022 and 2021 respectively, see "Restated Financial Information – Notes forming part of the Restated Financial Information – Note : Related Parties" on Annexure 1.

Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge. These transactions, inter-alia includes salary, remuneration, loans and advances, and interest etc. Our Company entered into such transactions at arm length price due to easy proximity and quick execution. The Transaction is in compliance with Companies act and other

applicable regulations. However, there is no assurance that we could not have obtained better and more favourable terms that our Company not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such an event there would be no adverse effect on results of our operations. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition.

23. ***Our operations are subject to environmental and workers' health and safety laws and regulations. We may have to incur material costs to comply with these regulations or suffer material liabilities or damages in the event of an incidence or non-compliance of environment, health and safety and other similar laws and regulations which may have a material adverse effect on our reputation, business, results of operations and financial condition.***

Our operations are subject to environmental laws and regulations in India, including The Environment Protection Act, 1986, The Water (Prevention and Control of Pollution) Act, 1974, The Air (Prevention and Control of Pollution) Act 1981, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 framed under the Environment (Protection) Act, 1986 and other regulations promulgated by the Ministry of Environment, Forest and Climate Change, Government of India ("MoEF") and various statutory and regulatory authorities and agencies in India. We are subject to regulations with respect to a range of environmental matters including limitations on land use, licensing requirements, management of materials used in manufacturing activities, the storage of inflammable and hazardous substances and associated risks, the storage, treatment and disposal of wastes, remediation of contaminated soil and groundwater, air quality standards, water pollution and discharge of hazardous materials into the environment. For details of the key regulations applicable to our business, see "Key Regulations and Policies in India" on page 143. The discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liabilities towards the government and third parties and may result in our incurring costs to remedy any such discharge or emissions.

Environmental laws and regulations in India have become and continue to be more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management and other expenditure to comply with environmental standards. Any failure on our part to comply with any existing or future regulations applicable to us may result in legal proceedings, including public interest litigation, being commenced against us, third party claims or the levy of regulatory fines. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our manufacturing facilities.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

24. ***We are subject to various laws, regulations, approvals and licenses required in the ordinary course of business. Any failure to obtain or retain them in a timely manner may materially adversely affect our operations.***

Our business and operations are subject to a number of approvals, statutory and regulatory licenses, registrations and permissions for construction of our manufacturing facility, in addition to extensive government regulations for the protection of the environment and occupational health and safety. We have either made or are in the process of making an application or renewal for obtaining necessary approvals that are not in place or have expired. We may also need to apply for additional approvals including the renewal of approvals which may expire from time to time, in the ordinary course of business. For details, see "Government and Other Approvals - Material approvals in relation to our business" on page 143. If we fail to retain, renew or receive any of such approvals, licenses, registrations, permissions or renewals, in a timely manner or at all, our business, financial condition, results of operations and prospects may be

adversely affected. For further information on pending renewals and pending material approvals, see “Government and Other Approvals – Material approvals applied for but not received” on page 143.

Further, our government approvals and licenses are subject to certain conditions, some of which are onerous and require us to make substantial compliance-related expenditure. If we fail to comply or a regulator claims that we have not complied with such conditions, our business, prospects, financial condition and results of operations may be adversely affected. For further information, see “Outstanding Litigation and Material Developments” page 198.

25. *We have experienced negative cash flows from operating, investing and financing activities in the past.*

We have in the past, and may in the future, experience negative cash flows from operating, investing and financing activities. The following table sets forth our net cash inflow/(outflow) from operating, investing and financing activities for the periods / years indicated:

(₹ in lakhs)

Particulars	For the six months ended September 30, 2023	For the financial year ended		
		March 31, 2023	March 31, 2022	March 31, 2021
Net cash flows from / (used in) operating activities	567.84	2,353.22	(1,032.00)	1,193.02
Net cash flows from / (used in) investing activities	223.09	(1,826.04)	(565.69)	(382.37)
Net cash flows from / (used in) financing activities	(790.29)	(544.85)	1,616.08	(814.44)

We had net cash outflow from operating activities of ₹ 1,032.00 lakhs during the 12 months period ended March 31, 2022. Any negative cash outflows from operating activities over extended periods, or significant cash outflows in the short term from investing and financing activities, could have an adverse impact on our cash flow requirements, business operations and growth plans. As a result, our cash flows, business, future financial performance and results of operations could be adversely affected. For further details, see “Management's Discussion and Analysis of Financial Condition and Results of Operations - Cash Flows” on page 185.

26. *Our Company has availed unsecured loans from promoters / Directors which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

Our Company has availed unsecured loans in the past from our directors or shareholders from time to time to meet the business requirements. Such loans have been unsecured and repayable on demand. Such unsecured loans from directors and shareholders carry an interest at the rate of 10% p.a.

Name of lender	Amount outstanding as on (Rs. in lakhs)
Hitendra Dhanji Shah	1,010.72
Prafulla Hitendra Shah	121.80
Rushabh Hitendra Shah	61.45
Total	1,193.97

For further details of unsecured loans of our Company, refer Chapter titled “Financial Indebtedness” on page 180.

If any or all of the above lenders seek repayment of any such unsecured loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may affect our business, cash flows, financial condition and results of operations.

27. *We may be subject to labour unrest, slowdowns and increased wage costs, which may adversely affect our business, results of operations and financial condition.*

As of February 29, 2024, we had 231 employees and workers at our manufacturing facility. The success of our operations depends on availability of labour and good relationships with our labour force. As of the date of this Draft Red Herring Prospectus, our employees are not members of any organised labour unions. Shortage of skilled or unskilled personnel or increased wage demands could have an adverse effect on our business and results of operations. In addition, work stoppages caused by disagreements with employees like strikes and lockouts may adversely affect our operations. Although we have not had instances of strikes and labour disputes in last three years, we may experience strikes or lockouts on account of labour disputes in the future. Such events could disrupt our operations and may have a material adverse effect on our business, results of operations and financial condition. In addition, we also may face protests from local citizens at our existing facilities, which may delay or halt our operations.

We experienced a partial shutdown of our manufacturing facility in India during the nationwide lockdown due to the COVID-19 pandemic. Events like these could result in liabilities, or adversely affect our reputation with suppliers, customers, regulators, employees and the public, which could in turn affect our financial condition and business performance. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition.

28. *The success of our business and growth depends substantially on our management team and operational workforce. Our inability to retain them could adversely affect our businesses.*

Our senior management and key management personnel are difficult to replace. Our success and growth depends upon consistent and continued performance of our employees with direction and leadership from senior management. The key managerial personnel play a strategic role in developing and building relations with our key stakeholders, including investors, board members, suppliers and other strategic business relationships on a regular basis. They play a significant role in building and maintaining strong relationships with critical stakeholders into the future.

Our industry is characterized by high demand for skilled employees, and we may need to offer in order to attract and retain our employees in the future. We cannot assure you that we will be able to attract and retain the key personnel that we will need to achieve our business objectives. As we utilize advance technologies in our operations and business, we require expertise and skilled employees. We may not be able to identify, attract or retain such employees with the skillsets we require in a timely manner, on commercially favorable terms or at all. If we are unable to offer competitive salaries to our employees, we may not be able to retain them. If one or more of our key personnel are unable or unwilling to continue in their present positions, or if they join a competitor or form a competing company, we may lose valuable operational, business or other knowhow and expertise and we may not be able to replace them easily. Further, we may not be able to effectively or successfully transition the responsibilities of our key management personnel or senior management personnel to new employees. Our business may be significantly disrupted and our financial condition and results of operations may be materially and adversely affected by any of the foregoing.

We also depend on our employees to perform our operations, deliver our services to customers and grow our business. If any of our employees are not properly trained, incentivized or motivated to perform our services in accordance with our quality standards, operating procedures, safety regulations or applicable laws, this may adversely affect our brand and our business.

Further, there can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. In the event that we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, results of operations and financial condition may be adversely affected.

29. *Our insurance coverage could prove inadequate to satisfy potential claims or protect us from potential operational hazards and losses which may have a material adverse effect on our business, results of operations and financial condition.*

Our operations are subject to various risks inherent to the industry in which we operate including defects, malfunction and failure of processing equipment, fire, riots, strikes, explosions, loss-in-transit for our products, accidents and natural disasters. We have obtained insurance policies that we believe are customary in our industry and provide for commercially appropriate insurance coverage for a variety of risks. In the financial year 2021-22, there have been one instance of flood in our factory wherein we had filed a claim for loss in FY 2021-22. The company has claim receivable of Rs. 1951.10 Lacs in FY 2021-22 and has received Rs. 1378.61 Lacs in FY 2022-23. The company has yet to receive Rs. 572.49 Lacs from the New India Assurance Co. Ltd. The company has filed arbitration claim for the same. For further information regarding the insurance policies obtained by us, see “Our Business - Insurance” on page 129.

However, there can be no assurance that our current insurance policies will insure us fully against all risks and losses that may arise in the future. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In cases where certain loss or damages are not covered under our insurance policies, or even if such losses are insured, we are required to pay a significant deductible on any claim for recovery of such a loss, or the amount of the loss may exceed our coverage for the loss or the premium charged is significantly increased, our results of operations and cash flows could be adversely affected. In addition, our insurance policies are subject to annual review, and we cannot assure you that we will be able to renew these policies on similar or otherwise acceptable terms, or at all. If we were to incur a serious uninsured loss or a loss that significantly exceeds the limits of our insurance policies, it could have a material adverse effect on our financial condition, results of operations and cash flows.

30. *We do not own our Registered Office from where our operations are being conducted and have been taken on lease. Any difficulty in seeking renewal or extension of such lease terms may cause disruption in our operations.*

Our Registered Office is located on leased premises. These lease agreements may be terminated in accordance with their respective terms, and any termination or non-renewal of such leases could adversely affect our operations. Additionally, the said lease agreements also have annual escalation clauses for rent payments.

There can be no assurance that we will be able to retain or renew such leases on same or similar terms, or that we will find alternate locations for the existing facilities on terms favourable to us, or at all. Failure to identify suitable premises for relocation of existing operations, if required, or in relation to new or proposed properties we may purchase, in time or at all, may have an adverse effect on our production and supply chain, the pace of our projected growth as well as our business and results of operations.

31. *After the completion of the Offer, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company.*

As on the date of this Draft Red Herring Prospectus, our Promoters and members of the Promoter Group held 100% of the paid-up share capital of our Company. For details of their shareholding pre and post Issue, see “Capital Structure” on page 66. After the completion of the Issue, our Promoters along with the Promoter Group will continue to collectively hold substantial shareholding in our Company, i.e. [●]%. Our Promoters will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders’ approval, including the composition of our Board, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters as our controlling shareholder could conflict with our interests or the interests of its other shareholders. We cannot assure you that our Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further information in relation to the interests of our Promoters in the Company, please see “Our Promoters and Promoter Group”, “Our Management” and “Restated Financial Statements” on pages 168, 153 and Annexure 1 respectively.

32. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our ability to pay dividends in the future will depend on a number of factors identified in the dividend policy of our Company, liquidity position, profits, capital requirements, financial commitments and financial requirements including business expansion plans, cost of borrowings, other corporate actions and other relevant or material factors considered relevant by our Board, and external factors, such as the state of the economy and capital markets, applicable taxes including dividend distribution tax, regulatory changes and other relevant or material factors considered relevant by our Board. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013. We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. We cannot assure you that we will be able to pay dividends in the future. For further information, see “Dividend Policy” on page 175.

33. *Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency. Our management will have broad discretion over the use of the Net Proceeds.*

We intend to utilize the Net Proceeds of the Issue as set forth in “Objects of the Issue” on page 79. The funding requirements disclosed as a part of the Objects of the Issue are based on internal management estimates in view of past expenditures, and have not been appraised by any bank or financial institution. These are based on current conditions and are subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies. Our management, in accordance with the policies established by our Board of Directors from time to time, will have flexibility in deploying the Net Proceeds of the Issue. Based on the competitive nature of our industry, we may have to revise our business plan and / or management estimates from time to time and consequently our funding requirements may also change. Our management estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws, and may have an adverse impact on our business, financial condition, results of operations and cash flows.

Various risks and uncertainties, including those set forth in this section as well as in “Objects of the Issue” on page 79, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we shall utilize amount allocated towards general corporate purposes to undertake expenditures and investments towards our business expansion strategies which are not specific or identified at this stage. Further, the outcome of this expenditure and investment is not ascertainable or quantifiable at this stage and may be disproportionate to the revenue generated. Further, we may not be able to attract personnel with sufficient skills or sufficiently train our personnel to manage our expansion plans. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment.

34. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.*

We propose to utilise the Net Proceeds towards the proposed objects of the Issue, see “Objects of the Issue” on page 79. In accordance with Sections 13(8) and 27 of the Companies Act 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot

assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of Objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

35. *The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as decided by our Company in consultation with the Book Running Lead Managers. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, refer chapter title "Capital Structure" on page 66.

EXTERNAL RISK FACTORS

Risks related to India

1. *Our business and operations are located in India and as such, we are subject to regulatory, economic, social and political uncertainties in India, many of which are beyond our control.*

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We are incorporated in India, and almost all of our business and all of our personnel are located in India. Consequently, our business, cash flows and results of operations will be affected by a number of macroeconomic and demographic factors in India which are beyond our control. In particular, our total income and profitability are strongly correlated to consumer discretionary spending in India, which is influenced by general economic conditions, salaries and employment levels and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, increased energy prices, rising interest rates or other industry-wide cost pressures could also affect consumer behavior and spending for BPC products and lead to a decline in our total income and profitability.

While our results may not necessarily track India's economic growth figures, the Indian economy's performance affects the environment in which we operate. These factors could have an adverse effect on our business, financial condition, cash flows and results of operations.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

2. *Changing laws, rules and regulations and legal uncertainties, including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, cash flows, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, GoI has notified the Finance Act, 2021 ("**Finance Act**"), which introduced various amendments to the taxation laws in India. Under the Finance Act, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. Further, the GoI has announced the Union Budget for the Financial Year 2023 pursuant to which the Finance Act of 2022 has introduced various amendments. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules

and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Further, the GoI introduced new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020 (“**Social Security Code**”), the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, which consolidate, subsume and replace numerous existing central labor legislations, were to take effect from April 1, 2021 (collectively, the “**Labour Codes**”). The GoI has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been finalized, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. For instance, under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government) of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, cash flows, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

3. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

India’s sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, all which are outside the control of our Company. Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. Any adverse revisions to India’s credit ratings for domestic and overseas debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

4. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities. Under foreign exchange regulations which are currently in force in India, transfer of shares between non-residents and residents is freely permitted (subject to compliance with sectoral norms and certain other restrictions) provided they comply with the pricing guidelines and reporting requirements specified under applicable law. Further, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. We sell our products on a retail and on a business-to-business basis under the wholesale trading model and single brand retail. Under the Consolidated FDI Policy, 100% foreign direct investment is permitted in a company engaged in manufacturing, wholesale trading as well as single brand product retail, under the automatic route, subject to certain conditions specified thereunder. In the event of foreign direct investment beyond 51%, an investee entity is also required to comply with certain local sourcing norms as specified in the FEMA Rules and the Consolidated FDI Policy. Our inability to comply with any such conditions may restrict our ability to raise capital in the future or in the ability of foreign investors to purchase Equity Shares.

Further, in accordance with Rule 6(a) of the FEMA Rules and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms and conditions or at all. For further information, see “Restrictions on Foreign Ownership of Indian Securities” on page 314. Our ability to raise any foreign capital under the FDI route is therefore constrained by Indian law, which may adversely affect our business, cash flows, financial condition, results of operations and prospects.

5. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us.

Furthermore, economic developments globally can have a significant impact on India. In particular, the global economy has been negatively impacted by the conflict between Russia and Ukraine. Governments in the United States, United Kingdom, and European Union have imposed sanctions on certain products, industry sectors, and parties in Russia. The conflict could negatively impact regional and global financial markets and economic conditions, and result in global economic uncertainty and increased costs of various commodities, raw materials, energy and transportation. In addition, recent increases in inflation and interest rates globally, including in India, could adversely affect the Indian economy.

In addition, China is one of India’s major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. The sovereign rating downgrades for Brazil and Russia (and the imposition of sanctions on Russia) have also added to the growth risks for these markets. These factors may also result in a slowdown in India’s export growth. Any significant financial disruption could have an adverse effect on our business, financial condition, cash flows and results of operation.

6. *If inflation rises in India, increased costs may result in a decline in profits and result of operations may be adversely affected.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of third party suppliers and contract manufacturers, rents, wages, raw materials and other expenses. In recent years, India has experienced consistently high inflation, especially and increasingly so in recent months, which has increased the price of, among other things, our rent, raw materials and wages. Further, while the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not worsen and rise in the future. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Risks related to the offer

7. *The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book-building process

and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the securities markets in India and other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

8. *Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Further, withholding tax may be applicable on sale of shares by Non- Resident / FII under section 115E and 115AD.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

There is no certainty on the impact of Indian tax laws or other regulations, and which may adversely affect the Company’s business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

9. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application, and Retail Individual Investors are not permitted to withdraw their Application after Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Application. Retail Individual Investors can revise their Application during the Offer Period and withdraw their Application until the Offer Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within six Working Days from the Offer Closing Date, events affecting the Investors’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Application and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors’ ability to sell the Equity Shares allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline upon listing. QIBs and Non-Institutional Applicants will therefore not be able to withdraw following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Application Form and Allotment.

10. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares is proposed to be determined by us in consultation with the Lead Manager, through a book-building process. This price is based on numerous factors, as described under “*Basis for Issue Price*” on page 92, and may not be indicative of prices that will prevail in the open market following the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, we cannot assure you that investors will be able to resell their Equity Shares at or above the Issue Price.

11. *Investors may have difficulty enforcing foreign judgments against us or our management.*

The Company is a limited liability company incorporated under the laws of India. The majority of our directors and executive officers are residents of India. All of our assets and the assets of our Directors are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons outside India or to enforce judgments obtained against us or such parties outside India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 (“CPC”), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. Some jurisdictions including the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the GoI to be reciprocating countries for the purposes of Section 44A of the CPC.

However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

12. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to

maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution.

However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

13. Any future issuance of Equity Shares or convertible securities or other equity linked securities by us may dilute your shareholding and sales of the Equity Shares by our major shareholders may adversely affect the trading price of the Equity Shares.

We may be required to finance our growth through future equity offerings. Any future issuance of our Equity Shares, convertible securities or securities linked to our Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in us. Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or encumber the Equity Shares in the future. Any future issuances could also dilute the value of your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

14. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of the Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

15. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

Key justification for holding levels

Key assumptions for working capital projections made by our Company:

Sr. No.	Particulars	Assumptions
Current Assets		
1	Inventories	<p>The holding levels of inventories for in the business of the manufacturing of recycled paper in India, specifically grey back and white back Duplex, have seen fluctuations over the years.</p> <p>Inventory Holding Levels Justification: In fiscal 2021, the inventory holding level was at 107 days, which significantly decreased to 47 days in fiscal 2022. This reduction could be attributed to operational adjustments or better inventory management practices implemented during this period.</p> <p>Despite the aim to maintain inventory levels of around 2 and a half to 3 months from fiscal year 2022-23 onwards, the holding levels slightly increased to 50 days in fiscal 2023 and further to 70 days in the half-year ended September 2023. This increase might be due to the company's strategic decision to stock higher inventory of imported raw material, as mentioned in the additional information. The transit period required to receive the material at the plant could have contributed to the observed increase in inventory days.</p>

Sr. No.	Particulars	Assumptions
		<p>The projected inventory holding levels for fiscal 2024 and 2025 are expected to be 68 and 62 days, respectively. These levels align with the company's aim to reduce the holding period of inventories indicating a more stable inventory management strategy.</p> <p>One crucial factor influencing the inventory levels is the Cost of Goods Sold (COGS). The COGS has increased substantially from INR 9,054.06 Lakhs in fiscal 2021 to INR 18,275.59 Lakhs in fiscal 2022, and then to INR 19,935.04 Lakhs in fiscal 2023. This increase in COGS reflects the growing scale of operations and the need for raw materials to meet production demands.</p> <p>This strategy aligns with the observed fluctuations in inventory holding levels. The significant decrease in fiscal 2022 might have been an adjustment period or a response to changing market conditions. As operations and demand increased, the company strategically adjusted the inventory levels to ensure a consistent and sufficient supply of raw materials.</p> <p>The planned increase in inventory holding levels for fiscal 2024 and 2025 is likely a proactive measure to support the expected growth in operations. It indicates a forward-looking approach to inventory management, anticipating the needs of the business and taking measures to ensure a stable production process.</p> <p>In conclusion, the fluctuations in inventory holding levels for the company manufacturing recycled paper can be justified by the increasing scale of operations, a higher Cost of Goods Sold, and a strategic decision to stock imported raw materials. The projected increase in inventory levels aligns with the company's aim to support growing operations, ensuring a steady and reliable supply of materials for the production of grey back and white back Duplex.</p>
2	Trade receivables	<p>The holding level of trade receivables for the company engaged in manufacturing recycled paper and duplex in India has exhibited fluctuations over the years, reflecting changes in sales volumes and the company's efforts to optimize its receivables management policy.</p> <p>In fiscal 2021, the trade receivables holding period stood at 61 days, indicating that, on average, it took the company 61 days to collect payments from its customers. This decreased to 44 days in fiscal 2022, suggesting an improvement in collection efficiency. However, there was a slight increase to 49 days in fiscal 2023, followed by a further increase to 117 days in the half-year ended September 2023.</p> <p>These fluctuations can be better understood in the context of the company's sales performance. The company experienced significant growth in sales over the years, with sales increasing from INR 16,508.82 Lakhs in fiscal 2021 to INR 31,290.04 Lakhs in fiscal 2022. Despite this substantial increase, the trade receivables holding period decreased, indicating effective management of receivables and timely collection from customers.</p> <p>The projected data for fiscal 2024 and 2025 show a notable decrease in the trade receivables holding period to 55 days and 54 days, respectively. This is a industry trend of trade payable period of 45-60 days. The company expects to further optimize its receivables management policy and enhance collection efficiency.</p> <p>Additionally, the company's strategic focus on maintaining a credit period of around 2 months for its customers indicates a balanced approach to managing cash flow and customer relationships. By offering a credit period aligned</p>

Sr. No.	Particulars	Assumptions
		<p>with industry standards, the company aims to facilitate higher turnover and enhance profitability in the forthcoming financial years.</p> <p>Overall, while there have been fluctuations in the holding level of trade receivables, the company's strategic initiatives and commitment to maintaining an optimal credit period position it well for sustained growth and profitability in the competitive landscape of the recycled paper and duplex manufacturing industry in India.</p>
3	Cash and Bank Balance	Company intends to hold higher cash & cash equivalents in F.Y. 2023-24, 2024- 25 and 2025-26 to keep strong liquidity so that its routine operations will not affect due to liquidity crunch.
4	Short Term Loans and advances	In order to meet timely supply raw material and maintain favourable relations with the suppliers, the management is expecting a slight increase in vendor advances.
Current Liabilities		
1	Trade payables	<p>The holding level of trade payables for a company engaged in the business of manufacturing recycled paper in India, specifically the manufacturers of grey back and white back Duplex, has shown fluctuations over the years. The trade payables increased from 154 days in fiscal 2021 to 84 days in fiscal 2022, remained consistent at 83 days in fiscal 2023, and then increased to 164 days in the half-year ended September 2023. The projected levels for fiscal 2024 and fiscal 2025 show a significant decrease to 94 and 82 days, respectively.</p> <p>This variation in trade payables can be justified by considering the additional information provided. The company engaged in negotiations with suppliers to secure more favorable terms, which contributed to better working capital management. This negotiation likely resulted in the reduction of trade payables from 154 days in fiscal 2021 to 84 days in fiscal 2022, demonstrating the company's efforts to optimize its financial structure.</p> <p>The substantial increase in expenses from INR 12,806.67 Lakhs in fiscal 2021 to INR 28,779.34 Lakhs in fiscal 2023 indicates a corresponding increase in business operations. The company anticipates a continued surge in expenses, reaching INR 9,820.17 Lakhs in the half-year ended September 2023. To support this growth, the company emphasizes the necessity of increasing trade payables, explaining the rise from 83 days in fiscal 2022 to 94 days in the projected year ended 2024.</p> <p>The additional information also outlines the company's strategic plan to maintain trade payables at 2-3 months in fiscal 2023-24 and fiscal 2024-25. This foresighted approach considers the anticipated increase in payables due to overall business operations and growth.</p> <p>In conclusion, the fluctuation in trade payables can be justified by a combination of negotiating favorable terms with suppliers, accommodating the larger volume of purchases required for business growth, and the strategic planning to align trade payable days with the expected increase in overall business operations. These measures indicate a proactive and strategic approach to working capital management, ensuring the company's financial stability while supporting its expansion and growth objectives.</p>
2	Other current liabilities and short term provisions	To expand company needs to hire more employees & its employees benefit cost & other related expenditure may increase, so that its other current liabilities will also get increased in the same proportion along with statutory dues and tax provisions.

SECTION IV - ABOUT OUR COMPANY INDUSTRY OVERVIEW

Industry Overview

Global Macroeconomic Scenario

The global economy is expected to report a moderate further to 3% GDP growth in CY 2023 and 2.9% in CY 2024. Global banks were carrying a historically high debt burden after COVID. Central banks took tight monetary measures to control inflation and spike in commodity prices. Russia's war with Ukraine further affected the global supply chains and inflated the prices of energy and other food items. These factors coupled with war-related economic sanctions impacted the economic activities in Europe.

While China was facing a crisis in the real estate sector and prices of properties were declining, with the reopening of the economy, consumer demand is picking up again. The Chinese authorities have taken a variety of measures, including additional monetary easing, tax relief for corporates, and new vaccination targets for the elderly. The government has also taken steps to help the real estate sector including cracking down on debt-ridden developers, announcing stimulus for the sector and measures to encourage the completion and delivery of unfinished real estate projects. The sector is now witnessing investments from developers and demand from buyers.

Global headline inflation is set to fall from 8.7 % in CY 2022 to 7.0 % in CY 2023, primarily on the back of softening commodity prices. Most of the central banks in the world has been increasing interest rates since CY 2021 to control inflation, and this is having an impact. With the sharp rise in policy rates, vulnerabilities in the banking sector have come into focus. Fears of contagion have risen across the broader financial sector, including non-banking financial institutions with regulators taking action to stabilize the banking system.

Global GDP Growth Scenario

Global economic activities experienced a sharper-than-expected slowdown in CY 2022. One of the highest inflations in decades forced most of the central banks to tighten their fiscal policies. Russia's invasion of Ukraine affected the global food supply resulting in a further increment in the cost of living. As a result, global growth declined from 6.1% in CY 2021 to 3.5% in CY 2022.

Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise, and it has evolved over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom, and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.)

In the current scenario, global GDP growth is forecasted to record a moderate growth of 3% in CY 2023 as compared to 3.5 % growth in CY 2022. While high inflation and rising borrowing costs are affecting private consumption, on the other hand, fiscal consolidation is affecting government consumption.

Moderating growth in developed economies will affect the GDP growth in CY 2024 and global GDP is expected to record marginal growth of 2.9% in CY 2024. The current crisis in the housing sector, bank lending, and industrial sectors are affecting the growth of global GDP. Inflation forced central banks to adopt tight monetary policies. After touching the peak, inflationary pressures are slowly easing out. This environment weighs against interest rate cuts by many monetary authorities. The expectation is therefore still for slowing growth in the second half of CY 2023 and the first half of CY 2024.

GDP Growth Across Major Regions

GDP growth of major regions including the United States, Latin America, Europe, Middle East & Central Asia, and Sub-Saharan Africa, are showing signs of slow growth and recession. Meanwhile, GDP growth in Emerging and Developing Asia (India, China, Indonesia, Malaysia etc.) is expected to increase from 4.4% in CY 2022 to 5.3% in CY 2023.

Source-IMF World Economic Outlook 2023

Except for Emerging and Developing Asia, all other regions are expected to record a decline in GDP growth rate in CY 2023 as compared to CY 2022. GDP growth in the United States is expected at 1.6% in CY 2023. Tight monetary and financial conditions coupled with high inflations are the major factors in this subdued growth.

Higher energy prices are curbing consumer demand in Europe's largest economies. Surging inflation and a decline in government spending are further affecting on an overall basis as Europe is expected to record GDP growth of 0.8% in CY 2023 as compared to 3.5% growth in CY 2022. China is expected to see strong increase in its GDP growth after the government has lifted the restrictions of its zero-COVID policy. China is expected to record a 5.4% growth in its GDP in CY 2023. Asian economies are expected to drive most of the global growth in CY 2023, as they will benefit from the ongoing reopening dynamics and less intense inflationary pressures compared to other regions.

Global Economic Outlook

Private consumption and growth in emerging markets, particularly in Asia, have played a crucial role in sustaining global economic growth throughout 2023. However, the surge in energy and food prices is a growing concern, and this is a trend that demands our vigilant attention. The global economy is now believed to be past the peak interest rates and it indeed at or near the end of the most stringent monetary tightening cycle in recent history. The European Central Bank (ECB) chose to deliver its last blow in the fight against inflation before growth concerns take precedence; the Bank of England (BoE), in a reversal of fortune, opted to pause its tightening cycle, primarily in response to a weak inflation print; and the U.S. Federal Reserve (Fed) held interest rates at current levels, in line with expectations, but maintained a still largely hawkish tone. Meanwhile, several other central banks, both in developed and emerging markets, are opting to either cut interest rates or maintain them at current levels. Moreover, the global economy has avoided the kind of derailment that the most pessimistic analysis suggested at the start of this tightening cycle.

Notably, supply-side shocks have once again emerged as the biggest risk to the global economic outlook. Recent developments in the food and energy markets threaten to undo the hard-earned gains from monetary tightening. Persistently tight global oil supplies, coupled with a recent strike in LNG facilities in Australia (now resolved), have propelled energy costs upward – oil above USD100/barrel is no longer an anomaly. The recent escalations in the Middle East conflict between Israel and Hamas will only add to these upward pressures. Added to this is a recent surge in food prices, particularly the spike in prices of rice, a staple in many parts of Asia. Regardless of cause – policy choices or weather events – the consequence is backsliding on containing inflation. More importantly, these developments threaten to throw off-balance inflation expectations among consumers, who have been the backbone of economic resilience across markets in 2023 so far.

Among emerging markets, the discussion has long moved away from inflation; central banks across several economies have already begun delivering rate cuts. Generally, the pressure on currencies against the U.S. dollar is quite visible, partly because the Fed is still maintaining its hawkish posture.

Region wise, the outlook for Asia Pacific is retained at ‘deteriorating’. Economic growth in the region has been held up by domestic consumption and investments. However, sluggish performance of merchandise exports, which continue to exert downward pressure on economic prospects, remains a challenge. A recovery in the tourism sector has been a bright spot, although it is yet to fully regain pre-pandemic levels. Furthermore, most central banks in the region are now holding interest rates at elevated levels as inflation remains on a downward trajectory.

This coincides with firming expectations of higher for longer interest rates in the U.S. Consequently, currencies in the region have generally weakened against the US dollar, reflecting both weakening growth prospects for regional economies and the greenback's strength. In addition to economic challenges, the Asia-Pacific region faces environmental vulnerabilities, with weather events contributing to rising prices, particularly for staples such as rice.

India Macroeconomic Analysis

GDP Growth Scenario

India's economy showed a sign of resilience with GDP growing by 7.2% in FY 2023. Although this translates into a moderation in demand (compared to FY 2022), the GDP growth in FY 2023 represents a return to pre pandemic era growth path. Despite this moderation in growth, India continues to remain one of the fastest growing economies in the world.

Countries considered include - Largest Developed Economies and BRICS (Brazil, Russia, India, China, and South)

Countries have been arranged in descending order of GDP growth.

There are quite a few factors aiding India's economic recovery – notably its resilience to external shocks (Russia – Ukraine conflict) and rebound in private consumption. This rebound in private consumption is bringing back the focus on improvements in domestic demand, which together with revival in export demand is a precursor to higher industrial activity. Already the capacity utilization rates in Indian manufacturing sector are recovering as industries have stepped up their production volumes. As this momentum sustains, the country may enter a new capex cycle. The universal vaccination program by the Government has played a big part in reinstating confidence among the population, in turn helped to revive private consumption.

Realizing the need to impart external stimuli, the Government stepped up its spending on infrastructure projects which in turn had a positive impact on economic growth. The capital expenditure of central government increased by nearly 24.5% during FY 2023 as compared to the previous fiscal. The improvement was accentuated further as the Union Budget 2023-2024 announced 37.4% increase in capital expenditure (budget estimates), to the tune of Rs 10 trillion. The announcement also included 30% increase in financial assistance to states at Rs 1.3 trillion for capex. This has provided the much-needed confidence to private sector, and in turn attracted private investment.

On the lending side, the financial health of major banks has witnessed an improvement which has helped in improving the credit supply. With capacity utilization improving, there would be demand for credit from corporate sector to fund the next round of expansion plans. Banking industry is well poised to address that demand. Underlining the improving credit scenario is the credit growth to micro, small and medium enterprise (MSME) sector as the credit outstanding to the MSME sector by scheduled commercial banks in the financial year FY 2023 grew by 12.3% to Rs 22.6 trillion compared to FY 2022. The extended Emergency Credit Linked Guarantee Scheme (ECLGS) by the Union Government has played a major role in improving this credit supply.

India's GDP in FY 2023 grew as per provision data grew by 7.2% compared to 9.1% in the previous fiscal on the back of slowing domestic as well as external demand owing to series of interest rate hikes globally to tackle high inflation. The year-on-year moderation in growth rate is also partly due to a fading impact of pandemic-induced base effects which had contributed towards higher growth in FY 2022.

Sectoral Contribution to GVA and annual growth trend

Source: Ministry of Statistics & Programme Implementation (MOSPI)

Sectoral analysis of GVA reveals growth tapered sharply in industrial sector which is estimated to have grown by just 4.4% against 11.6% in the previous fiscal. In the industrial sector, growth across major economic activity such as mining, manufacturing, construction sector slowed and it registered a growth of 4.6%, 1.3% and 10% in FY 2023 against a growth of 7.1%, 11.1% and 14.8% in FY 2022, respectively. Utilities sector too observed a marginal moderation in y-o-y growth to 9% against a 9.9% in the previous years.

Talking about the services sectors performance, with major relaxation in covid restriction, progress on covid vaccination and living with virus attitude, business in service sector gradually returned to normalcy in FY 2023. Economic recovery was supported by the service sector as individual mobility returned to pre-pandemic level. The trade, hotel, transport, communication, and broadcasting segment continued to strengthen and grow by 14 % in FY 2023 against 13.8% in the previous year and financial services, real estate and professional services sector recorded 7.1% y-o-y growth against 4.7% y-o-y growth in the previous year. However, overall service sector growth was curbed by moderation in public administration and defence services sector which recorded 7.2% yearly increase against 9.7% increase in the previous year.

Quarterly Sectoral Growth Trend

On quarterly basis, the country growth moderated in Q2 and Q3 of FY 2023 which highlights impact of slowing economy on the back of monetary tightening. During Q3 FY 2023, the country's GDP grew by 4.7% against 5.4% y-o-y increase in the previous quarter. However, the fourth quarter of FY 2023 saw a rebound in growth rate, indicating an optimistic scenario. GDP growth strengthened further in Q1 FY 2024 to 7.8% and it managed to growth above 7% in Q2 FY 2024.

Source: Ministry of Statistics & Programme Implementation (MOSPI)

Q2 FY 2024 Quarterly GVA number indicated revival as it registered 7.4% growth compared to 5.4% in Q2 FY 2023. Industrial sector emerged as a bright spot which supported overall GVA to grow above 7%. The industrial sector GVA grew by 13.18% in Q2 FY 2024 against a decline of 0.55% in corresponding quarter previous year. Within industrial sector, India's manufacturing sector exhibited sharp improvement by registering 13.9% y-o-y growth against a decline 3.8% in the same quarter previous year. Construction sector too exhibited 13.3% y-o-y growth in Q2 of FY 2024 against 5.7% y-o-y growth in the previous quarter, mining and quarrying sector, and Electricity, gas, water supply & other utility services sector registered 10% and 10.1% y-o-y growth respectively. In Q2 FY 2023, yearly growth stood as -0.1% and 6% in mining and quarrying and Electricity, gas, water supply & other utility services sector, respectively.

While quarterly growth in industrial sector exhibited improvement, both agriculture and services sector indicated moderation during Q2 FY 2024. Agriculture sector GVA moderated to 1.22% in Q2 FY 2024 from 2.49% in the same quarter previous year.

Within service sector, quarterly growth moderated to 5.8% in Q2 FY 2024 from 9.43% in Q2 FY 2023. Trade, hotel, transport, communication, and broadcasting segment observed sharp moderation in growth which registered merely 4.3% y-o-y growth in Q2 FY 2024 as compared to 15.6% growth in the Q2 FY 2023. Other services sector broadly classified as Financial, Real Estate & Professional Services too reported moderation and observed 6% y-o-y growth in Q2 FY 2024 against 7.1% (Q2 FY 2023) while Public Admin, Defence & Other Services registered 7.4% y-o-y growth against 5.4% during the previous period, respectively.

Index of Industrial Production

Industrial sector performance as measured by IIP index exhibited moderation in FY 2023 by growing at 5.3% (against 11.4% in FY 2022) as series of rate hike to tame inflation impacted the industrial sector performance. Previously IIP index exhibited temporary recovery in FY 2022 from the low of Covid induced slowdown in industrial growth during FY 2020 and FY 2021. Manufacturing index, with 77.6% weightage in overall index, grew by just 4.7% in FY 2023 against 11.8% y-o-y growth in FY 2022 while mining sector index too grew by just 5.8% against 12.2% in the previous years. Electricity sector Index witnessed improvement of 1% over the previous year and registered 8.9% y-o-y increase in FY 2023

Source: Ministry of Statistics & Programme Implementation (MOSPI)

Sources: MOSPI

As per the use-based classification, growth in all segments deteriorated for FY 2023 as compared to FY 2022. Consumer good and intermediate goods were worst hit segments followed by infrastructure / construction Goods. The contracting IIP data points towards adverse operating business climate as global headwinds, high inflation, and monetary tightening cumulatively impacted the broader industrial sector performance.

Monthly IIP Growth Trend

Source: Ministry of Statistics & Programme Implementation (MOSPI)

In FY23, IIP index improved steadily during April and May but moderated sharply in the subsequent three month and it measured lowest in October 2022 while it showed uneven movement in the subsequent month too. IIP again moderated to register 1.9 % y-o-y growth in March 2023. In current fiscal FY 2024, the index has reported steady improvement over the last fiscal. Average of Monthly IIP data from April to October indicated 6.9% y-o-y growth against 5.3% y-o-y increase in the previous year. Manufacturing and Mining index both exhibited improvement in growth between April -October 2023 and registered 6.4% and 9.4% y-o-y growth against 4.9% and 4% y-o-y growth between April to October 2022. Electricity sector index exhibited moderation in growth, and it grew by 7.9% against 9.4% during the above period.

Sources: MOSPI

As per the use-based classification, growth in all segments exhibited improvement in October 2023 as compared to previous month. The improving IIP data points towards India's resilience amidst challenging operating business climate as global headwinds, high inflation and monetary tightening is likely to have adverse impact on the overall global economic performance.

Growth Outlook

Amidst the difficult and uncertain external economic environment, the Indian government has delivered a balanced Union Budget in FY2024 which focuses on achieving an inclusive and sustainable growth while adhering to the fiscal glide path. Notwithstanding the external risk, there is a sustained momentum in economic activity supported by domestic drivers. The economy continues to gain momentum, led by strong domestic factors such as private consumption, and increased fixed investments, along with substantial public-sector expenditure.

The rupee is under pressure from various areas: a strong US dollar propelled the currency to historical lows in October 2023; the Federal Reserve will hold interest rates higher for longer; US treasury yields are elevated; crude oil prices are higher; and headline inflation, although it moderated to a four-month low in October, will remain high. The RBI will continue to intervene to stabilise the rupee.

Considering the depreciation of the rupee, unpredictable capital movements and the improvement in domestic demand, it is likely that there will not be any rate cuts until early 2024. The transmission of the current round of rate hikes (250 bps) is expected to be completed by the end of the 2023-24 financial year, meaning lending rates will continue to increase. In response to the cumulative 250 bps hike in the policy rate since May 2022, the weighted average lending rates on fresh and outstanding loans of scheduled commercial banks increased 187 bps and 111 bps respectively in May 2022–September 2023.

A slowdown in economic and business activities, especially in developed markets, has impacted direct investment flows to India, both inbound and outbound. Outward FDI commitments in October fell m/m and y/y and inward FDI has also been sluggish; net FDI declined to USD4.5bn in April-September 2023, from USD19.6bn in the same period a year earlier. FII inflows remain volatile. In September and October, foreign institutional investors were net sellers in the equity market before turning net buyers in November.

Demand for Indian goods in key markets such as the US, Mainland China, Bangladesh and Singapore has seen a significant drop in recent months, and external demand will continue to be subdued and the World Trade Organization in October reduced its projection for global export growth in 2023 from 1.7% to 0.8%. Even though the subdued global trade and concerns of a global slowdown pose a challenging business climate, the India growth prospect appears appear bright". The government's increasing infrastructure spending, expansion of public digital platforms and other path break scheme/policies such as PM GatiShakti, the National Logistics Policy, and the Production-Linked Incentive (PLI) schemes are expected to boost manufacturing output and support India's economic growth in the medium to long term period.

Key factors that would propel India's economic growth in the coming years.

Government focus on infrastructure development

Infrastructure development has remained a recurring theme in India's economic development. As India aims to grow to a USD 5 trillion economy by 2027, the construction sector that includes infrastructure construction will be critical for boosting economic growth as it is the key growth enabler for several other sectors. Infrastructure development provides impetus to other sectors like cement, bitumen, iron and steel, chemicals, bricks, paints, tiles, financial services among others. A unit increase in expenditure in the construction sector has a multiplier effect on other sectors with a capacity to generate income as high as five times in other sectors. The sector enjoys intense focus from the Government which is well reflected in higher budgetary allocations. To push the infrastructure development, the government has also announced higher budgetary allocation, various arrangements for raising funds through road asset monetization plans and converting of NHAI's existing InvIT into a public one is also planned. With economic targeting to reach USD 5 trillion economy by 2027, demand for various infrastructure facilities such as power, cargo movement, passenger movement is likely to grow which necessitates steady capacity addition in infrastructure facilities. Speedy progress and time-bound completion of infrastructure projects would be a key factor to watch that will determine the sector's performance.

The launch of flagship policies like National Infrastructure Pipeline (NIP), and PM Gati Shakti plan have provided the coordination & collaboration that was lacking earlier. Both NIP and PM Gati Shakti are ambitious billion-dollar plans that aim to transform India's infrastructure, elevating it to the next level. These projects are expected to improve freight movement, debottleneck the logistics sector, and improve the industrial production landscape, which would provide incremental growth in GDP.

Development of Domestic Manufacturing Capability

The Government launched Production Linked Incentive (PLI) scheme in early 2020, initially aimed at improving domestic manufacturing capability in large scale electronic manufacturing and gradually extended to other sectors. At present it covers 14 sectors, ranging from medical devices to solar PV modules. The PLI scheme provides incentives to companies on incremental sales of products manufactured in India. This incentive structure is aimed at attracting private investment into setting up manufacturing units and thereby beef up the domestic production capabilities. The overall incentives earmarked for the PLI scheme is estimated to be INR 2 lakh crore. If fully realized, the PLI scheme would have the ability to add nearly 4% to annual GDP growth, by way of incremental revenue generated from the newly formed manufacturing units.

Strong Domestic Demand

Domestic demand has traditionally been one of the strong drivers of the Indian economy. After a brief lull caused by the Covid-19 pandemic, domestic demand is recovering. Consumer confidence surveys by Reserve Bank / other institutions point to an improvement in the consumer confidence index, which is a precursor of improving demand. India has a strong middle-class segment which has been the major driver of domestic demand. Factors like fast-paced urbanization and improving income scenarios in rural markets are expected to accelerate domestic demand further. This revival is perfectly captured by the private final consumption expenditure (PFCE) metric. PFCE as a percentage of GDP increased to nearly 59.2 during the first half of FY 2023¹, which is the highest level it has achieved during the past few years. Although pent-up demand has played a part in this surge, this is an indication of normalization of demand.

There are two factors that are driving this domestic demand: One, the large pool of consumers and second, the improvement in purchasing power.

The share of the middle class increased from nearly 14% in 2005 to nearly 30% in 2021 and is expected to cross 60% by 2047 (Placeholder1)². This expanding middle class household segment is fuelling India's growth story and would continue to play a key role in propelling India's economic growth.

As per National Statistics Office (NSO) India's per capita income (in current prices) stood at INR 1.72 lakhs in FY 2023 which is nearly double of what it was in FY 2015. This increase in per capita income has impacted the purchasing pattern as well as disposable spending pattern in the country. Consumer-driven domestic demand is majorly fuelled by this growth in per capita income.

Digitization Reforms

¹ India Economic Survey FY 2023, Full year data is yet to be released.

² As per the survey conducted by People Research on India's Consumer Economy. Households with annual income in the range of INR 5 – 30 lakh is considered as middle-class households.

Ongoing digitization reforms and the resultant efficiency gains accrued would be a key economic growth driver in India in the medium to long term. Development of digital platforms has helped in the seamless roll out of initiatives like UPI, Aadhaar based benefit transfer programs, and streamlining of GST collections. All of these have contributed to improving the economic output in the country. Some of the key factors that have supported the digitization reforms include – the growth in internet penetration in India together with drop in data tariffs, growth in smartphone penetration, favourable demographic pattern (with higher percentage of tech savvy youth population) and India’s strong IT sector which was leveraged to put in place the digital ecosystem. All these factors are expected to remain supportive and continue to propel the digitization reforms in India.

Indian Paper Industry

Overview

The Paper Industry holds a significant historical presence in India, evolving since the establishment of the first mill in the country. Over time, there has been a substantial increase in the number of paper mills, particularly in recent years, leading to a notable rise in both the quantity of mills and overall production volume.

The Indian paper industry plays a noteworthy role on the global stage, contributing approximately 5% to the world's paper production. The industry's economic impact is substantial, with an estimated turnover exceeding INR 80,000 crore, contributing to approximately INR 5,000 crore to the national exchequer. In terms of employment, the industry directly engages 500,000 individuals and indirectly supports an additional 1.5 million jobs.

Most of the paper mills comprise of diverse technological landscape, ranging from the oldest to the most modern technologies. These mills utilize various raw materials, including wood, bamboo, recycled fibre, bagasse, wheat straw, and rice husk. The production shares indicate that approximately 21% are based on wood, 71% on recycled fibre, and 8% on agro residues.

According to industry sources, the paper & pulp industry has an annual turnover of INR 700 billion, with an estimated 861 paper mills, of which 526 are operational. The collective installed capacity stands at an impressive 30.73 million tonnes, portraying the industry's robust and expansive presence.

The Indian paper industry is highly fragmented. It encompasses small, medium, and large paper mills, each operating with production capacities ranging from 5 to 2000 tonnes per day. Despite contributing 5% to the world's paper production, per capita paper consumption in India remains low, standing at 15 kg. This figure falls far below the global average of 57 kg, indicating potential avenues for growth and increased consumption.

India's position as the fastest-growing market for paper globally presents an intriguing opportunity. As the nation's economy experiences growth, paper consumption is expected to witness a substantial leap forward. The anticipated trajectory suggests that the growth in paper consumption will be in multiples of GDP. In practical terms, an increase in consumption by one kg per capita would correspondingly result in a demand surge of 1

million tonnes. This projection brings out the industry's alignment with economic trends, presenting a promising scenario for future expansion and development.

Market Scenario

The roots of the Indian Paper Industry date back to 1812 when the inaugural paper mill was established in Behranpur. Since its inception, the industry has experienced significant growth, expanding both in terms of scale and scope. Currently, it ranks among the top 15 major paper producers globally.

In FY 2023, boasting an annual capacity of 30.73 million Tonnes Per Annum (TTPA), India successfully manufactured 23.67 million tonnes of paper and paperboard. This translates to approximately 88% of the capacity utilisation by the industry.

Metric	Unit	FY 2023
Installed Capacity	Million Tonnes Per Annum	30.73
Operating Capacity	Million Tonnes	25.61

Today, a significant 75% of the total production of paper and paperboard is derived from wastepaper or recycled paper sources. Wood and bamboo collectively account for approximately 18% of the share, emphasizing their continued contribution. Additionally, agro-based raw materials, including bagasse, wheat, and straw, contribute to 7% of the overall volume in the production of paper and paperboard.

Production-Consumption Scenario

The domestic paper and paper product production has grown steadily between FY 2018-23 where estimated production stood at 23.67 Mn tonnes in FY 2023. The slow growth observed after a remarkable rise of 10.3% in FY 2020 comes from the halted industry brought on by the covid-19 pandemic lockdowns. While the industry has now picked up, growth levels achieved pre-pandemic are yet to be achieved.

Indian Packaging Paper Industry and Duplex Board

Overview

Packaging plays a vital role in product presentation, acting as an attention-grabber in today's competitive market. It serves as a means to convey a product's message, establish brand visual appeal, and capitalize on impulse shopping behaviours. Besides marketing, packaging serves functions such as information transmission, product protection, convenience, and security. Paper, recognized for its environmental benefits over plastic, is extensively used in packaging due to its recyclability and ease of disposal.

The packaging industry is categorized into two segments: rigid and flexible. The rigid sector, constituting 36% of India's packaging, employs paper in the production of corrugated and paperboard boxes. These boxes, known for their strength and resilience, are used for various commodities, ensuring quality and longevity. On the other hand, the flexible sector, representing 64%, utilizes paper in the form of bags, sachets, and envelopes. Flexible paper packaging, cost-effective and lightweight, has gained popularity for its efficiency, making it essential in versatile packaging for food, beverages, personal care, and healthcare.

The Indian paper and packaging industry are experiencing robust growth, poised for significant expansion in the coming years. Valued at USD 50.5 billion in 2019, the industry is projected to reach USD 204.81 billion by 2025, demonstrating an impressive CAGR of 26.28% from 2020 to 2025. This remarkable growth is attributed to several factors, including the flourishing e-commerce, food processing, pharmaceuticals, FMCG, manufacturing, and healthcare sectors.

Source: Packaging Industry Association of India

Government initiatives such as ‘Make in India’ have further propelled the packaging industry’s positive trajectory, positioning it as the fifth-largest sector in the Indian economy. The sector’s growth is fundamentally driven by the expanding pharmaceutical, food processing, manufacturing, FMCG, and healthcare sectors, along with ancillary developments in emerging economies such as China, India, Brazil, Russia, and select East European countries. As a result, the Indian packaging industry stands at the forefront of economic growth, technological innovation, and strategic global positioning.

Growth in Pharma Sector

Between FY 2015-21, the Indian pharmaceutical industry witnessed a healthy annual revenue turnover growth, registering an 8% CAGR driven by robust domestic and export demands. However, the advent of the Covid-19 pandemic cast a shadow on revenue growth in FY 2022, especially affecting export revenue. Despite the challenges, pharmaceutical exports in FY 2022 remained steady at USD 24.62 billion, aligning closely with the preceding year's figures.

The disruptions in freight movement caused by the pandemic in the first half of FY 2022 severely impacted pharmaceutical exports, with a modest recovery observed in the latter part of the fiscal year, despite a weakened currency. Moving into FY 2023, India saw a noteworthy increase in pharmaceutical exports, reaching nearly USD 25.39 billion. Over the period from FY18 to FY23, the Indian pharmaceutical industry demonstrated resilience with a CAGR ranging from 6-8%, propelled by an 8% surge in exports and a 6% uptick in the domestic market.

Anticipating this growth momentum and considering expected developments, the pharmaceutical industry's annual revenue turnover is projected to reach USD 130 billion by 2030. This growth in the pharmaceutical industry is driving a substantial demand for duplex boards. As companies expand, the need for reliable packaging solutions is on the rise. Duplex boards, valued for their quality and versatility, are becoming essential for secure and efficient pharmaceutical packaging.

Growing FMCG Sector

The FMCG sector in India expanded primarily due to consumer-driven growth and increased product prices, particularly for essential goods. In the April-June 2023 quarter, India's FMCG sector witnessed a notable growth of 7.5% by volumes, marking the highest in the past eight quarters. This growth was propelled by a resurgence in rural India and increased expansion in modern trade. As India's fourth-largest sector, the FMCG industry has sustained a robust growth trajectory over the years, driven by factors such as rising disposable income, a growing youth population, and increased consumer brand awareness. Accounting for 50% of FMCG sales in India, household and personal care contribute significantly to the country's GDP. As of December 2022, the FMCG market reached USD 56.8 billion, while the Indian food processing market size reached USD 307.2 trillion in 2022, projected to reach USD 547.3 trillion by 2028 with a CAGR of 9.5% during 2023-2028. The advent of online retail and e-commerce has enabled FMCG businesses to market and sell their products nationwide with minimal investment in marketing activities. This robust growth in the FMCG sector in India is set to generate a heightened demand for duplex boards. As the sector expands, there is a growing need for reliable and efficient packaging solutions.

The demand for duplex boards is further accentuated as they provide effective packaging solutions for a wide range of products marketed and sold across the country. This trend aligns with the FMCG industry's focus on efficient and sustainable packaging solutions to meet the evolving demands of consumers and the market.

Growing demand for F&B products

According to industry reports, the food and beverage sector in India is increasingly growing. Constituting approximately 3% of India's GDP and accounting for nearly two-thirds of the entire retail market in the country, this industry is experiencing significant profitability. The expansion of the food and beverage sector can be attributed to various factors, including the ongoing urbanization, evolving dietary and lifestyle choices among millennials, and a surge in household spending rates.

In the food and beverage industry, there is a heightened demand for paper packaging owing to its recyclability, potential for reducing air pollution, and its capacity to contribute to environmental cleanliness. Consequently, the upward trajectory of the food and beverage industry is expected to positively impact the growth of the packaging paper sector.

Rising Consumption of Alcohol

A recent analysis published in the medical journal Lancet indicates a noticeable uptick in alcohol consumption in India spanning the last three decades. Various factors contribute to this rise, including the increasing levels of disposable income and the expanding urban population. The alcohol market in India, valued at USD 20 billion, is projected to experience a 7% annual growth from 2021 to 2025. This surge in consumption is influenced by shifting social norms, urbanization, female empowerment, higher incomes, and product innovations. Post a two-year pandemic-induced isolation, a growing number of young individuals, especially in urban areas, are engaging in social activities at restaurants, clubs, pubs, and bars. Notably, the evolving landscape during Hindu festive seasons prompts alcohol companies to boost production and distribution, aiming to enhance sales and maximize profits. The transformation from a lack of fine dining culture in the 1990s to a vibrant scene in metros and smaller towns underscores the dynamic shifts in India's alcohol consumption patterns.

This growing alcohol consumption in India is set to increase demand for duplex board liquor cartons. Duplex board liquor cartons, offering strength and printability, become essential for presenting diverse alcohol products. This demand peaks during Hindu festive seasons, driving liquor companies to boost production and heightening the requirement for duplex board-based liquor cartons to meet market dynamics and consumer preferences. This emphasizes the importance of packaging solutions that balance functionality with India's changing alcohol culture.

Close to a decade of high economic growth changed India's consumer demand landscape.

Indian economy enjoyed more than a decade of uninterrupted growth beginning the initial years of 1990-2000 periods as country dismantled its license regime. Higher operational freedom and increased integration with global economy propelled Gross Domestic Product to grow by an average rate of 7% per annum. This growth phase which created thousands of jobs primarily in urban centres created a new affluent middle-class segment with higher disposable income.

Lifestyle and consumption pattern of this middle class was entirely different from earlier consumer groups. Demand for consumer durable and non-durable products from this consumer class was higher. Along with higher disposable income the pick-up in consumer demand is credited to improved exposure to consumer centric western

markets. Consequently the sales of consumer durable products including home appliances, electronic products, furniture and non-durable products like food, personal and household hygiene products saw an increase.

Past few months has seen developments in government policy measures, credit growth, and steps to simplify regulatory framework. These developments have played a huge part in reviving growth in industrial sector after the covid-19 pandemic by improving credit flow and inducing growth in service sector, which is finally resulting in higher economic growth. Even as an erratic monsoon led to a spike in inflation in Q2 2024, consumer demand - which contributes about 60% of GDP growth - remained strong in a country of over 1.4 billion people, largely driven by urban dwellers.

Duplex board manufacturers who have strong relationship with their customers, innovative and diverse product offering, and capability to service customers across sectors and geography stand to benefit.

Foreign Trade

Exports

The export of duplex board has displayed a remarkable trajectory over the given years. In FY 2019, the export value stood at INR 4.6 billion, and by FY 2023, they reached INR 10.8 billion. The CAGR over this period stands at an impressive 24%, indicative of sustained and substantial growth.

Source: DGCI&S

Notably, the most notable growth occurred in FY 2022, with a staggering YoY increase of 81.13%, following a robust 28.47% growth in FY 2021. This exceptional growth can be attributed to the global surge in e-commerce, driving increased demand for packaging solutions. The duplex board, being a versatile and reliable material for packaging, has evidently thrived amidst these evolving market dynamics. Despite a marginal decline in FY 2023, the overall trend showcases the resilience and adaptability of the duplex board industry to global packaging needs.

UAE holds the largest share, accounting for 18% of the total exports of duplex board. This is followed by the United Kingdom, with 13% of the share. Following closely behind are Italy, USA, and Turkey, with 8%, 6%, and 6% of the export share, respectively. Rest of the world accounted for 49.67% of the export market.

Imports

Annual imports reached INR 2.6 billion in FY 2023, up by a phenomenal 136%, from INR 1.1 billion in FY 2022. This was driven by a swift embrace of online shopping by consumers and a renewed focus from prominent consumer goods and retail entities in the nation. The gross merchandise value (GMV) of India's e-tailers reached USD 60 billion in the FY 2023, up by 22% from USD 49 billion in FY 2022. This caused the huge demand boost for packaging materials, especially duplex boards, in the Indian market.

Majority of these imports were from Japan, accounting for 66.57% of the total imports for duplex boards. This was followed by China with 15.93% of the share. Nepal, Spain, and Malaysia accounted for 8.25%, 3.48% and 0.97% respectively. Rest of the world accounted for a total of 4.80% of the total imports.

Key Challenges

Indian Paper Industry confronts many challenges in terms of high production cost caused by inadequate availability and high cost of raw materials, non-availability of good-quality fibre, power cost and concentration of mills in one particular area, uneconomical plant size, technological obsolescence and environmental challenges.

Raw Material Shortage

The Indian paper industry heavily relies on raw materials like wood, bamboo, and bagasse, and any scarcity or price fluctuations in these resources can negatively impact the industry's operations and profitability. The Indian paper market currently faces an unsustainable condition due to severe shortages and elevated input costs.

Rising production costs, along with increased expenses in logistics, chemicals, and raw materials, have forced paper mills to establish new price benchmarks. The global awareness of supply chain challenges for 2023 heightened within the paper business community, given the uncertainties stemming from the pandemic and the Ukraine war, making predictions about future world cargo trends challenging. The decision by Indonesia to limit coal exports has also affected coal prices.

The significant shortage and high cost of basic raw materials have intensified the pressure on profit margins, leading to the closure of mills in some cases. The severity of the situation is underscored by the current cost of procuring wood in India, exceeding USD 100 per tonne, compared to other competitive countries with advanced paper manufacturing, where the cost is USD 60 per tonne.

Environmental Challenges

The paper industry, being a major contributor to environmental pollution, faces stringent regulations due to various environmental concerns. Issues such as climate change, human toxicity, ecotoxicity, photochemical oxidation, acidification, nutrification, deforestation, and solid refuse production are exacerbated by the resource- and capital-intensive nature of this business. In India, the paper industry is categorized as an agro-based industry, encompassing enterprises involved in producing pulp, paper, paperboard, and other cellulose-based products using wood as a raw material. This industry falls under both the Manufacturing and Agricultural sectors, which collectively contribute significantly to greenhouse gas emissions.

On a global scale, the paper and pulp industry accounted for around 190 million metric tonnes (MMT) of CO₂ emissions in 2021, marking a record high for the sector and representing about 2% of all industrial emissions. As per the Global Carbon Budget Report of 2022, India demonstrated the highest growth rate in carbon emissions among major contributors to global warming. With an annual increase of 3.8%, India became the fourth-largest emitter globally. Despite this growth, India's per capita carbon emissions remain significantly lower, being one-eighth of those in the United States and one-third of the global average. The report estimates India's total emissions in 2021 at 2.7 billion tonnes, slightly less than the EU's 2.8 billion tonnes. India's contribution to global emissions in 2021 was 7.5%, slightly below the EU's 7.7%.

While regulations play a crucial role in mitigating the adverse environmental effects of ongoing business operations, overly complex procedures and inflexible standards pose a threat to the predictability of future business opportunities. Moreover, they can hinder the motivation to explore more foundational and environmentally responsible technological advancements. Non-compliance with these regulations carries the risk

of fines, penalties, or even the shutdown of operations, impacting the industry's growth. These regulations manifest in various forms, including performance standards such as emission limit values, technology requirements, and incentive-based instruments like taxes/charges, voluntary/self-regulations, and tradable emission allowances.

Technological Challenges

The paper industry is in a continuous state of evolution, incorporating modern technologies and processes to enhance productivity, efficiency, and quality. Falling behind in adopting these technological advancements could place industry players at a competitive disadvantage. In comparison to global counterparts, including Scandinavian countries, the USA, Russia, China, Japan, Indonesia, etc., the Indian paper industry significantly lags in technology adoption, with only a few mills employing state-of-the-art technologies.

A notable challenge faced by the industry is the absence of domestic manufacturing capabilities for plant and machinery. Approximately 18% of paper production relies on forest-based raw materials like wood and bamboo, while the remaining comes from non-conventional sources like agro residues. Currently, 75% of production is attributed to the Recovered Paper (RCF) and wastepaper sector.

Confronting pollution challenges, numerous small and medium-sized agro-based mills, unable to bear the costs of chemical recovery, transitioned to utilizing Recovered Paper (RCF) for paper production. The predominant scenario in India's paper mills is the utilization of outdated technology, particularly in the face of the industry's intricate structure. The technology and equipment employed by mills vary based on their scale of operation and raw materials. This variance not only adversely affects the quality and pricing of the products but also poses environmental concerns, as obsolete technologies tend to be less efficient and more polluting.

To effectively compete with larger firms' smaller paper mills have to invest in improving their manufacturing technology, build economies of scale, ensure quality compliance, and create a robust distribution network. However, smaller firms, especially manufacturing firms in the SME space find it difficult to raise capital at a cheaper rate when compared to larger firms. Higher risk profile of these smaller firms results in funding agencies (banks, NBFCs) charge a premium. This lack of access to capital at a lower cost is preventing smaller paper mills to effectively compete with larger mills, thus contributing to the fragmented nature of the industry.

These challenges provide tremendous scope for improvement in terms of technological improvement. Therefore, many capital investments in recent years were aimed at deploying latest technologies and best practices to ensure environment compliances rather than increasing capacity.

Recently developed market challenges

The present market conditions for coated duplex board suggest a slowdown, with challenges arising from surplus capacity in various clusters and a decrease in demand. Mills in Gujarat encounter significant obstacles in both recycled duplex board and kraft paper segments, primarily due to sluggish order bookings from overseas markets, a crucial factor in selecting the mill's location near a port. Additionally, the region's overcapacity contributes to price pressure among manufacturers.

The Indian market is further affected by the availability of more affordable paper products from mills in Indonesia, Taiwan, and Malaysia, making domestic products relatively expensive. Mills are experiencing closures due to burdensome loans, EMIs, and accumulating fixed expenses like electricity bills, staff salaries, administrative costs, and maintenance expenses.

Despite a notable decrease in waste paper prices, the order influx from both domestic and overseas markets remains insufficient to fully capitalize on the available capacity. This resulted in a notable increase in inventory levels during Q1 as compared to Q2 in the current year. Consequently, mills found themselves compelled to implement combined shutdowns as a strategic move to stimulate demand within the market.

The challenges outlined, such as a slowdown in market conditions, surplus capacity, declining demand, and increased competition from overseas markets, present an opportunity for strategic innovation and adaptation in the industry. Despite the hurdles, there is a chance for mills to leverage these challenges as a catalyst for efficiency improvements, cost optimization, and diversification into emerging markets or product segments. By addressing issues like overcapacity and exploring new avenues for growth, mills can position themselves to not only weather the current market challenges but also emerge stronger and more resilient, tapping into unexplored opportunities within the evolving landscape of the coated duplex board and paper products industry.

Regulatory Scenario

Paper Industry in India is a key segment of the manufacturing economy with annual turnover of INR 70,000 Crs and Market size of INR 80,000 Crs.

Acknowledging its importance, Indian paper industry has been considered as one of the priority sectors. Hence, the Government of India is consistently taking steps to bring the tariffs in line with the ASEAN members. Paper pulp, paper, paperboard and newsprint industries have been de-licensed.

Up to 100% Foreign Direct Investment (FDI) is allowed in paper and pulp sector, through automatic route on all activities except those requiring an industrial license from location angle i.e. the project should not be located within 25 km from the periphery of a city with 1 million inhabitants or more.

Currently, Indian paper & paper product industry is extremely fragmented with numerous players in the small and medium sector. There is a lack of comprehensive regulations on quality compliance, emission standards, as well as manufacturing practices.

With regards to raw material availability, various laws such as the Indian Forest Act 1927, the Forest Conservation Act, 1980, and the National Forest Policy, 1988 mandate the phasing out the supply for wood for wood-based industries. As a result, the Government has sought to address the raw material deficit by encouraging agro-forestry including the commercial cultivation of trees for paper production by launching the National Agro-Forestry Policy in February 2014.

The policy reflects a growing trend of industry-sponsored farm forestry, in particular by players such as ITC and Andhra Pradesh Paper Mills Ltd.

Measures Proposed and Adopted to Improve the Raw Material Supply Scenario:

The scarcity of wood is a major concern to ensure input supplies for the paper manufacturing industry. Due to the scarcity of wood resources in India and absence of enabling policies favouring industrial/production plantation, securing future wood supplies at reasonable prices is the key challenge for domestic paper manufacturing industries.

Accordingly, a working group constituted under the 12th five-year plan, suggested measures to resolve the raw material problems affecting the paper industry. Few, of the group's major recommendations include:

Conversion of Forest Development Corporation (FDC) into the nodal agency to facilitate the growth of captive plantation.

Incentivising captive plantation, and contract farming, till the time the government approves the industry's proposal to use degraded forest lands for industrial plantations.

Zero import duty on all machines, implements and technology required to undertake such a project.

Regulatory Framework

The Ministry of Environment, Forest and Climate Change has reviewed the prescribed limits for non-paper materials in wastepaper consignments being imported from other countries.

The Directorate General of Foreign Trade (DGFT) has issued a clarification on the Implementation of the Paper Import Monitoring System dated 23rd January 2023.

Paper manufacturers complain of dumping of cheap paper into the country by global players. To address this issue, the government changed the import policy from free to free-with-mandatory registration under the Paper Import Monitoring System on 1 October 2022. Under this system, an importer is mandated to provide advance information online about the import of certain types of papers. The move is aimed at curtailing dumping of paper into the country so that domestic players could get pricing stability.

Duty Structure

The duty structure for Duplex boards in India involves several components, each contributing to the overall customs duty. As per the provided table, the breakdown of the duty structure is as follows:

Customs Duty	Rate of Duty (Tariff) %
Basic Customs Duty (BCD)	10

Customs AIDC	10
CESS	0.125
Social Welfare Surcharge (SWC)	10
GST Duty: IGST Levy	12
Total Duty	25.721

- **Basic Customs Duty (BCD):** The fundamental component of the duty structure is the Basic Customs Duty, set at a rate of 10%. This is a standard import duty applied to the assessed value of the imported Duplex boards.
- **Customs AIDC (Additional Duty):** An additional duty, known as Customs AIDC (Additional Duty), is imposed at a rate of 10%. This serves as an extra levy on the imported Duplex boards.
- **CESS (Cess Duty):** A Cess duty is applied at a rate of 0.125%. This additional charge contributes to specific funds or purposes, and in this context, it is a fractional percentage of the assessed value of the imported Duplex boards.
- **Social Welfare Surcharge (SWC):** The Social Welfare Surcharge is levied at a rate of 10%. This surcharge is designed to support social welfare initiatives and is added to the overall duty on the imported Duplex boards.
- **GST Duty: IGST Levy (Integrated Goods and Services Tax):** The Goods and Services Tax (GST) is applied in the form of the Integrated GST (IGST) at a rate of 12%. This is a comprehensive tax that subsumes various indirect taxes and is applicable to the import of Duplex boards.

Total Duty: The cumulative effect of the components results in a Total Duty of 25.721%. This encompasses the Basic Customs Duty, Customs AIDC, CESS, Social Welfare Surcharge, and IGST.

Competitive Landscape

According to various sources, India is the 15th largest producer of paper in the world and accounts for ~5% of the world's production of paper and paperboard. Currently, there operate more than 800 paper mills where most of the units operate in SMEs segment. Approximately 43 large units account for 30% of the total paper production and balance units mostly comprising of medium and small paper mills with production share of 70%. The production capacity of domestic paper mills ranges from 10 to 2000 tonnes per day. Only 25 odd mills have production capacity of 50,000 tonnes per annum.

The major players of the industry are in Andhra Pradesh, Tamil Nadu, Maharashtra, Punjab, Madhya Pradesh and Gujarat. In terms of numbers, Gujarat top the mill count with 111 units, followed by U.P (84), Tamil Nadu (70) and Maharashtra (48).

The location of paper mill is governed by a multitude of factors such as the availability of fibrous raw material, water, coal, local market and the favourable state policies. The end-users generally procure corrugated boxes from the vicinity to cut on the cost of transportation.

Between FY 2019 to FY 2023, net sales of the sample companies witnessed a positive trend, increasing at a CAGR of 7.25%. After a decline of approximately 15% in FY 2021 of net sales, attributed to the Covid-19 pandemic, the companies bounced back relentlessly in FY 2022 with an annual increase of 42.5%, crossing the pre-pandemic levels. This trend of growth was carried forward in FY 2023, with the year witnessing an annual increase of 6.3%.

Raw materials make up the largest share of expenses, accounting for around 55-60% of the net sales. Raw material for paper and paper products is wood pulp. The raw material expenses as a percentage of sales have been reducing over FY 2019 to FY 2023. While raw material expenses have been increasing due to factors such as lower waste paper generation in developed countries and resurgence of Covid-19 in the leading pulp producing countries, its share as a cost of net sales has been decreasing due to relatively slower rate of growth (5.2% CAGR) as compared to net sales (7.3% CAGR) observed in the sample period.

Pulp, paper and paper board manufacturing is one of the five most energy intensive industrial segments in the country. Energy consumption in Indian paper mills is even higher as majority of mills use older low efficient machinery. The production of duplex boards involves significant energy consumption for tasks such as pulp processing, drying, and the overall papermaking process. Thus, power and fuel expense form the second most significant cost head. As a result, these costs as a percentage of net sales have increased from 13.1% in FY 2019 to 14.7% in FY 2023.

Further, other expenses such as Salary and Wages, SGA expenses and Interest expenses have all seen a decline as a percentage of sales in FY 2023. Salary and wages now account for 4.1% of net sales, as compared to a high of

⁴ Agarwal Duplex Board Mills Ltd., N R Agarwal Inds. Ltd., Millenium Papers Pvt. Ltd.

5.5% in FY 2021. Similarly, SGA expenses now account for 1.9% of net sales, down from 4.5% in FY 2019. Lastly, interest expenses have also seen a decline, from 2.4% in FY 2019 to 0.6% in FY 2023.

Both Operating Margin and Net Margin have increased as a share of net sales in FY 2023. This could be attributed to a decline in cost heads such as SGA and Interest expenses, and increased sales (7.25% CAGR).

Growth Outlook

Packaging stands as the fifth-largest sector in the Indian economy, showing rapid growth and considerable potential for expansion. In 2019, the industry was valued at USD 50.5 billion, and it is expected to reach USD 204.81 billion by 2025, with a notable CAGR of 26.28% from 2020 to 2025.

The current paper market in the domestic territory exceeds 20 million tons per annum (MTPA), including over 2 MTPA imports. According to IPMA, paper consumption is projected to grow annually by 6-7%, reaching 30 million tonnes by FY2026-27. Notably, in 2022, the paper and paperboard packaging sector demonstrated robust growth over the past decade, propelled by advancements in e-commerce, pharmaceuticals, food processing, manufacturing, FMCG, and healthcare.

Paper, recognized for its environmental benefits over plastic, is extensively used in packaging due to its recyclability and ease of disposal. Anticipated growth in the Packaging Paper/Board segment suggests an increase from 13.32 million tonnes in FY 2022 to 18.15 million tonnes by FY 2028, reflecting the sector's dynamic evolution and its role in responding to the demands of diverse industries.

The apparent consumption for Duplex Board is estimated to increase in parallel to the overall packaging paper segment, projecting a rise from 5.65 million tonnes in FY 2023 to 7.69 million tonnes in FY 2028. The expanding E-Commerce industry, with an anticipated Gross Merchandise Value of USD 350 billion by 2030, underscores the need for efficient packaging solutions like duplex boards. Similarly, the pharmaceutical, FMCG, Food and Beverage, and alcohol sectors contribute significantly to the high growth trajectory.

These industries, characterized by resilience, sustainable practices, and evolving consumer preferences, collectively propel the demand for duplex boards. Duplex Board is poised to play a crucial role in meeting the future packaging requirements, reinforcing its significance in the market landscape.

MANUFACTURING PROCESS:

Our manufacturing process for Duplex Board can be summarized as follows:

Paper Manufacturing:

The waste paper normally received in the form of bales shall be fed to the pulper through a conveyor system. After adding water, the raw materials shall be agitated under an aggressive rotor. After stock preparation, contaminants like glass, metal, plastic, wood, sand, cloth etc. shall be removed to have a clean sheet of paper board. The standard process of removing contaminants shall consist of screening through holes of typically 1.2 mm dia. The rejects from such holes shall be taken in to a reject handling screen, where they are washed free of fiber as much as possible; balance shall be rejected and will be sent for co-processing. The screened stock shall pass through slot screening system of typical dia. 0.15 mm and the rejects shall be sent to a reject screen. The accepted stock from the slotted screen shall be passed through a De-Inking system (if required) in multiple stages, where ink particles are removed from the stock. After this process, the stock shall be thickened, heated & dispersed between very controlled gaps between two metal discs. The stock shall be thickened to a consistency, where it can be stored in a tower and then be used on the paper machine. All these screening and cleaning systems shall have upto four stages depending on the capacity of the processing line and the type of fiber and out throws.

Manufacturing Process Overview:

Paper is made up of connected fibers and these fibers can come from number of sources including cloth rags, cellulose fibers from plants, and, most notably trees. Paper production is basically a two-step process:

1. Fibrous raw material is first converted into pulp
2. Then the pulp is converted into paper

1) Pulp mill

Raw materials

Raw material is chosen based on properties of fiber required to make the end product of specified quality parameters based on market demand.

Pulping

Waste paper is blended with water and mixed in pulper to produce slurry type of material. Foreign elements are removed in this process along with fiber recovery from the waste.

Screening and cleaning

Slurry is then passed through screens and cleaners to remove foreign materials such as plastics, staples, glues, dust etc. to improve the fiber quality and to meet the quality.

Approach flow

The slurry is mixed with chemicals, filler elements and then cleaned again for sheet formation.

2) Paper machine

Sheet formation

The slurry is then put on a sheet to take that form and then water is removed using gravity.

Dewatering and Pressing

Vacuum is then used to remove water and later the sheet passes through rollers which press against the sheet to further drain the water and strengthen the paper.

Drying

The remaining water in the sheet evaporates as it passes through dryers of paper machine.

Starch application / sizing

Starch is applied on the surface of paper to increase the strength of paper and for smoother surface finish. The paper then passes through another section of dryers to remove moisture added due to starch solution applied on the surface.

Coating

Coating layers are applied on the top and bottom layers to improve surface finish and printability. On the top layer, coating provides a white and smooth surface which is suitable for offset printing for folding cartons

Roll formation

The final product from paper machine is obtained in the form of a jumbo roll.

3) Finishing house

Roll conversion and Cutting

Finishing house area has an equipment termed re-winder/sheet cutters to convert the large jumbo roll received from paper machine to rolls of smaller width and diameter based on order, or sheets, as per requirements of the convertor.

Quality check and Packaging before shipment

The small rolls cut in re-winder/ sheets made through sheet cutters are further checked for compliance of quality demands and then packed using best industrial practices for import and export market.

Adopting this strategy helps the company by aiding in reduced cost of production and a subsequent increase in the profit margin for the company. Moreover, efficient management of logistics and effective utilization of the supply chain will again help reduce the overall cost of production the company

Additionally, importing raw materials also offers benefits such as access to a wider range of suppliers, potential cost savings through competitive pricing, and opportunities to source specialized materials not readily available domestically, thereby enhancing the company's supply chain resilience and overall competitiveness.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled “Risk Factors” beginning on page 30 of this Draft Red Herring Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

➤ ***Changes in product mix and geographic mix***

To market products around a superior value proposition across grades and geographies, our Company has devised its product strategy and marketing policy prudently in accordance with the evolving international standards customized closely to the needs of customers across India. Our product line includes the Royal Grey Back, Prima Grey Back, and Royal White Back boards, ranging from 200 to 500 GSM. These products are designed to meet specific packaging needs across various industries such as food packaging, FMCG, garments, apparels, footwear, pharmaceuticals, playing cards, and liquor cartons.

➤ ***Raw material cost***

The expenditure on materials consumed represents the most substantial component of our operating expenses. In fiscal years 2021, 2022, 2023 and for the six months period ended September 30, 2023 expenditure on material consumed constituted 47.21%, 56.12%, 56.44% and 59.92% respectively, of our total expenses, and 46.5%, 55.30%, 55.42% and 57.84% of our total revenues for such periods. The availability and cost of raw materials have a considerable impact on our financial situation and operational results, constituting the most significant expense for our business.

Our Company meets its demand of raw material i.e., waste paper and chemicals by importing the same mainly from the United States of America, United Kingdom, Central Europe, Middle East, etc. For the year ended March 31, 2023 and September 30, 2023, our imported waste paper consumption was around 65.02% and 59.75% respectively of our total raw material purchases.

➤ ***Foreign Exchange Fluctuation Risk***

Our operational revenue includes revenue generated from both domestic sales and the export of our products. This gives us exposure to foreign currencies while we prepare our financial statements in Indian Rupees. For the six months period ended September 30, 2023 and Fiscals 2023, 2022 and 2021, our revenue from operations from exports were ₹ 2,139.66 Lakhs, ₹ 8,224.38 Lakhs, ₹ 15,399.53 Lakhs and ₹ 3,712.95 Lakhs respectively, representing 16.82%, 25.64%, 49.89% and 22.77% of our revenue from operations based on our restated financial statements.

We do not hedge our foreign currency exposure. Accordingly, we are affected by fluctuations in exchange rates among the U.S. Dollar, Indian Rupees and other foreign currencies. For the six months period ended September 30, 2023 and Fiscals 2023, 2022 and 2021, we recorded foreign currency exchange gains of ₹ 56.07 Lakhs, ₹ 194.12 Lakhs, ₹ 267.37 Lakhs and ₹ 21.05 Lakhs, respectively, due to fluctuations in foreign exchange rates. There can be no assurance that we will continue to record exchange gains solely from foreign exchange fluctuations, or that any hedging measures which we may take will enable us to avoid the effect of any adverse fluctuations in the value of the Indian Rupee against the U.S. Dollar or other foreign currencies.

Other factors affecting our business:

- Established Network of Dealers and Customers
- Dependencies on demand from end-user industries
- The shortage or non-availability of power and water facilities in manufacturing unit.
- Technological advancements could make our current technologies obsolete, requiring substantial capital investments.
- Equipped with state-of-the-art machines and ultra-modern technologies in its manufacturing facility.
- Large number of organized and unorganized players

- Changes in laws, rules & regulations and legal uncertainties

SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, has introduced an alternate payment mechanism using Unified Payments Interface (UPI) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIIs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days ("UPI Phase I"). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later ("UPI Phase II"), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors ("UPI Phase III"), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the "UPI Circulars") in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Bid-cum-Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a

conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.

Pursuant to the SEBI UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the SEBI UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – issue Book Running Lead Manager will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	23	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Under the current FDI Policy, 100% foreign direct investment is permitted in the manufacturing sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investor**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.
