SUMMARY OF INDUSTRY

The Indian Textile and Apparel Industry is valued at over US\$ 100 billion, employing over 45 million people and accounting for 14% of the country's industrial production. India is a global leader in producing several textile products, such as being the second biggest producer of silk, cotton and Multimode Fibre (MMF). It is also a world leader in jute production, accounting for nearly 70% of global production. Additionally, based on capacity, the country has the second largest vertically integrated production base after China. This leadership position gives the country significant advantages, such as manufacturing strength across the value chain and a huge raw material base. The value chain includes weaving, spinning, garmenting and processing.

The Confederation of Indian Industry (CII) expects the industry to achieve a production level of US\$ 250 billion by FY25, rising at a Compounded Annual Growth Rate (CAGR) of 12% between FY22 and FY25. In terms of exports, the CII expects industry exports to increase at a CAGR of 15% and reach US\$ 185 billion by FY25. This target would help India double its share of the global textile and apparel trade from the current level of 5%. Growth is expected to be driven by demographic dividend, an increasing tendency to spend more on lifestyle products, and the spread of e-retailing and organised retailing in smaller towns and rural areas, thus boosting domestic demand. The growth in the industry will maximise value creation and employment generation and boost investment of approximately US\$ 180 billion in the industry.

INTERNAL RISK FACTORS:

1. Our registered office and Factory premises are on lease basis.

Our Registered Office and factory premises is located at H- 629 Phase - II RIICO Industrial Area, Sitapura, Jaipur, Rajasthan – 302022. We are operating our manufacturing unit and carrying out administrative work from this premises i.e., Registered Office. Our Company has taken this premises on lease basis having approximately 700 Sq. Mtrs. area from Mr. Shubh Karan Dugar for a period of 5 years w.e.f. 01/05/2023 to 5 years i.e. 30/04/2028 at a monthly rent of Rs. 1,50,000/- p.m., with a condition that rent will be increased by 10% at an interval of 2 years and one year lock-in will be there. After one year period, either party can give one month notice for vacating the premises. There can be no assurance that the term of the lease agreements will be either continued or renewed for further period, and in such event the lessor/licensor terminates or does not renew the agreements, we may require to vacate the factory premises and registered Office and identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of production, business, time overruns and may adversely affect our operations and profitability and Brand image also.

2. We have very short operating history as company.

Our company was incorporated on March 24, 2023 has private limited Company and converted in to public limited company on August 09, 2023. We have started our business operation in the last week of financial year 2022-23. Thus, our operating history as company is less than six months. Our short span of our operating history, makes it difficult to assess our future prospects and historic growth rates or results of operations and which may not be representative or reliable indicators of our future performance. While we intend to continue to expand our operations, we may not be able to sustain historic growth levels and may not be able to leverage our experience in our existing markets in order to grow our business in new markets. If our operations continue to grow, for which there can be no assurance, we will have to continue to expand our sales and marketing, product development and distribution functions, to upgrade our management information systems and other processes, and to obtain more space for our expanding manufacturing activities and administrative support. Our continued growth could increase the strain on our resources, and we could experience serious operating difficulties, including difficulties in hiring, training and managing an increasing number of employees. If we are unable to manage our operations at our current size or to manage any future growth effectively, our brand image and financial performance may suffer adversely.

3. The top ten Buyers of Our Product and top ten suppliers for raw material contribute majority of revenue and source of Raw Material. We do not have long term agreement with the customer or supplier. The loss of any Customer or a decrease in the volume of order by any customer or any disruption in supply of raw material by any supplier may adversely affect our revenues and profitability.

The Revenue from top ten customers in the FY 2022-23, FY 2021-22 and FY 2020-21 was 95.13%, 81.86% and 87.96% of the total turnover. The loss of any customer or a decrease in the volume of orders may severely affect our revenues and profitability, if we are unable to develop and maintain a continuing relationship with our key customer or develop and maintain relationships with other new customers. The loss of a significant customer or a number of significant customers due to any reason whether internal or external related to their business may have a material adverse effect on our business and results of operations. Any decline in our Quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. The top ten customers are not related to the promoters or promoter group.

The purchase from top ten suppliers in the FY 2022-23, FY 2021-2022 and FY 2020-21 was 78.28%, 61.39% and 91.40% of the total purchase of material. The loss of any supplier due to any reason or disruption of the supply by the supplier, if we are not able to agree with the terms and conditions for the supply of material or we are not able to find the alternative supplier of raw material with same terms and conditions at which we are buying the material, may severely affect our revenue and profitably. The top ten suppliers are not related to the promoters or promoter group.

Creativity and keeping line and length with the latest fashion trends is one of the key attributes for success in this industry. A part of our production is for those products where we may not have an order in hand and the quantities are produced based on feedback received from merchandisers and management estimates. If we are not able to anticipate the demand, or misjudge the

quantity, inter alia, this could lead to lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

Any failure on part of such transport service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

The Manufacturing of Garments is our main activities, we purchase the raw materials from the market and prepare the readymade garments in our factory and sale the same in the market, our success depends on the smooth supply and transportation of raw materials, readymade Garments etc. from our suppliers to us and supply of Garments to our buyers/clients, both of which are subject to various uncertainties and risks. The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated

by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

4. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

5. Significant portion of our revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

We derive significant portion of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

6. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows

7. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

8. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

9. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as STT

is paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the sellers resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

The Government of India has recently announced the union budget for Fiscal 2022, pursuant to which the Finance Act may undergo various amendments. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have an adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company's business, financial condition, results of operations and cash flows.

10. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifthlargest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

INDIAN ECONOMY

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employee more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

THE INDIAN TEXTILE AND APPAREL INDUSTRY

The Indian Textile and Apparel Industry is valued at over US\$ 100 billion, employing over 45 million people and accounting for 14% of the country's industrial production. India is a global leader in producing several textile products, such as being the second biggest producer of silk, cotton and Multimode Fibre (MMF). It is also a world leader in jute production, accounting for nearly 70% of global production. Additionally, based on capacity, the country has the second largest vertically integrated production base after China. This leadership position gives the country significant advantages, such as manufacturing strength across the value chain and a huge raw material base. The value chain includes weaving, spinning, garmenting and processing.

The Confederation of Indian Industry (CII) expects the industry to achieve a production level of US\$ 250 billion

by FY25, rising at a Compounded Annual Growth Rate (CAGR) of 12% between FY22 and FY25. In terms of exports, the CII expects industry exports to increase at a CAGR of 15% and reach US\$ 185 billion by FY25. This target would help India double its share of the global textile and apparel trade from the current level of 5%. Growth is expected to be driven by demographic dividend, an increasing tendency to spend more on lifestyle products, and the spread of e-retailing and organised retailing in smaller towns and rural areas, thus boosting domestic demand. The growth in the industry will maximise value creation and employment generation and boost investment of approximately US\$ 180 billion in the industry.

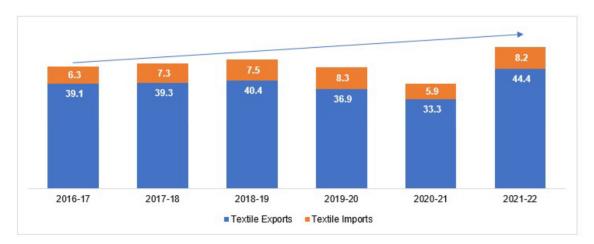

TEXTILE AND APPAREL EXPORTS FROM INDIA

The Indian textile industry contributes approximately 15% to the country's export earnings. In FY22, textiles, handicrafts and apparel accounted for 10.6% of India's total exports. Barring a decline in FY20 and FY21, exports have risen steadily since FY16. Textile and apparel exports rose to their highest level in FY22, reaching US\$ 44.4 billion and growing 41% over FY21 and 26% over FY20. Exports have increased 13.9% since FY16. In FY22, the US was the top export destination, accounting for 27% of textile exports, followed by the EU (18%) and Bangladesh (12%). Further details of textile and apparel exports are given below.

Commodity	2019-20	2020-21	2021-22	% Change
Readymade Garment	15,488	12,272	16,015	30.5%
Cotton Textiles	10,263	11,128	16,516	48.4%
Man-made Textiles	5,324	4,180	6,944	66.1%
Wool and Woollen textiles	181	109	166	52.3%
Silk Products	72	76	145	90.8%
Handloom Products	319	223	269	20.6%
Carpets	1,373	1,491	1,754	17.6%
Jute Products	357	397	537	35.3%
Handicrafts	3,564	3,443	2,088	-39.4%
Total Textile and Clothing	36,943	33,320	44,435	33.4%

As seen above, readymade garments represent the largest share of textile exports, followed by exports of cotton textiles until FY21. However, cotton textile exports rose significantly in FY22, surpassing the readymade garment segment and thus contributing to the highest share. India is a net exporter with respect to the textile and apparel industry, which implies that textile and apparel exports exceed the country's imports. Hence, the

industry is important in earning valuable foreign exchange and reducing the current account deficit. The government aims to achieve US\$ 100 billion in textile exports by 2030.

INDIAN TEXTILE TRADE (IN US\$ BILLION)

MARKET SIZE

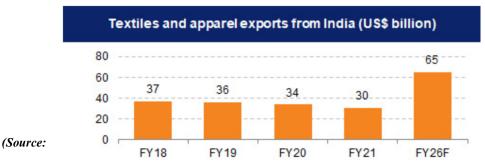

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers. In FY23, exports of readymade garments (RMG) including accessories stood at US\$ 16.2 billion. It is expected to surpass US\$ 30 billion by 2027, with an estimated 4.6-4.9% share globally.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period. Natural fibres are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$138 billion to US\$195 billion by 2025.

India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. During April-November in FY23, the total exports of textiles stood at US\$ 23.1 billion. India's textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

GOVERNMENT INITIATIVES TO PROMOTE EXPORTS OF TEXTILE AND APPARELS:

Given the textile and apparel industry's importance in developing the Indian economy, the government has $\frac{66}{66}$

announced several reforms to grow the industry and promote exports. Some of these reforms are mentioned below.

Development capital support will not exceed Rs. 500 crore (US\$ 62.6 million) for greenfield projects and Rs. 200 crore (US\$ 25 crore) for brownfield projects. Furthermore, the development capital support will be restricted to 30% of the project cost for the greenfield and brownfield projects. States with an encumbrance-free and contiguous land parcel of more than 1,000 acres as well as other textile and related facilities were invited to present applications. The parks will consist of the following infrastructure:

Establishment of Seven PM MITRA Parks: The government approved the establishment of seven Mega Integrated Textile Region and Apparel Parks, also called PM MITRA Parks, in the Union Budget for FY22. The parks will be set up at greenfield and brownfield sites across different states. PM MITRA is inspired by the Prime Minister's 5F vision i.e.:

- \succ farm to fibre
- \succ fibre to factory
- ➢ factory to fashion
- ➢ fashion to foreign

Development capital support will not exceed Rs. 500 crore (US\$ 62.6 million) for greenfield projects and Rs. 200 crore (US\$ 25 crore) for brownfield projects. Furthermore, the development capital support will be restricted to 30% of the project cost for the greenfield and brownfield projects. States with an encumbrance-free and contiguous land parcel of more than 1,000 acres as well as other textile and related facilities were invited to present applications. The parks will consist of the following infrastructure:

- Core Infrastructure consists of a plug and play facility, an incubation centre, roads, power, water, a waste system, a common processing house, and design and testing centres.
- Support infrastructure consists of workers' housing and hostel, warehousing, a logistics park, and medical, training and skill development facilities.

Production-Linked Incentive (PLI) Scheme: The government announced the PLI scheme for textile products to regain the country's dominance in the textile industry. The scheme is expected to create more than 7.5 lakh jobs directly and help companies emerge as global champions in the textile industry. The scheme plans to provide incentives worth Rs. 10,683 crore (US\$ 1.3 billion) over five years. It is also expected to promote investment in the industry by Rs. 19,000 crore (US\$ 2.4 billion) and increase production turnover by more than Rs. 3 lakh crore (US\$ 37.5 billion) in five years.

Besides the schemes mentioned above, the government has formulated initiatives by providing financial incentives in the form of subsidies and reduced taxes. The government, in 2021, scrapped the anti-dumping duty on PTA, a crucial raw material for manufacturing MMF and yarn. It also removed the anti-dumping duty on acrylic fibre, a raw material for yarn. The government also helps textile and apparel exporters under the Market Access Initiative Scheme.

OUTLOOK

The Indian textile and apparel industry is among the largest in the world. The industry benefits from the domestic availability of raw materials, a large manufacturing base, diversified and innovative products, and growing demand from domestic and international consumers. In terms of production, India is already a market leader in several industry segments, such as silk, cotton and jute production. In terms of exports, India recorded the highest textile exports in FY22, reaching US\$ 44.4 billion. Readymade garments and cotton textile comprise most of the country's textile and apparel exports. The government aims to reach US\$ 100 billion in textile exports by FY30 and has taken steps to achieve this ambitious target. Government schemes such as the establishment of PM MITRA Parks and the PLI scheme are expected to boost investment in the industry, contributing to significant growth in production, employment and exports. These measures will help India turn into a global market leader.

- Huge investments from global players such as Facebook, which is investing in Reliance Jio are being recorded in the e-commerce market. Google also reported its first investment worth US\$ 4.5 billion in Jio Platforms. This deal was followed by the purchase of Future Group by Reliance Retail, expanding the presence of the Ambani Group in the e-commerce space.
- Much of the growth for the industry has been triggered by an increase in internet and smartphone penetration. The number of internet connections in 2021 increased significantly to 830 million, driven by the 'Digital India' programme. Out of the total internet connections, ~55% of connections were in urban areas, of which 97% of connections were wireless.

By 2025, India will be home to 650 million users who consume short-form videos.
- The Government of India's policies and regulatory frameworks such as 100% Foreign Direct Investment (FDI) in B2B E-commerce and 100% FDI under automatic route under the marketplace model of B2C E-commerce are expected to further propel growth in the sector. As per the new FDI policy, online entities through foreign investment cannot offer the products which are sold by retailers in which they hold an equity stake.
- Through its Digital India campaign, the Government of India is aiming to create a trillion-dollar online economy by 2025. It has formed a new steering committee that will look after the development of a government-based e-commerce platform. The new committee, set up by the Commerce Ministry, will provide oversight on the policy for the Open Network for Digital Commerce (ONDC), which is an e-commerce platform that the government is backing for the development. The ONDC will serve as the infrastructure for setting up the final storefront, which will be similar to Flipkart and Amazon.

He has established proprietorship concern in the name and style of M/s. Aaika Creations, in November, 2017. M/s. Aaika Creations was started with a vision to bring a wave in the manufacturing industry in terms of meeting the end-to-end requirement of our customers enhancing the overall quality parameters. In Aaika Creations, he started off with some small & medium sized brands which could give him some consistent business and also, he can place himself in the market with bigger brands. His first year was with full of struggle as he was in the process of getting the knowledge and intricacy of the business& its loop holes, however, he focuses on the business potentiality. In initial years of his business, he focused on building up a strong team and strengthening roots in the market, studying the scope and opportunities in the business.

As founders of the Company our promoter knew that he will have to build up a USP (Unique Selling Products) for our Company in order to sustain and grow in right direction in the market. According to his study and survey of the market he found that there is a huge gap in the demand and supply of premium quality products in the market. Our promoter explored further in this segment and found that our styling and workmanship matches the requirement of premium products and hence we started approaching brands who work on the similar line of products.

In 2019, by collaborating with the one of the India's leading brands, our promoter got his first step towards his mission and vision. We used to regularly supply to "Arvind Lifestyle Brand Limited. Because of his hard work and knowledge of the industry, we established our self in the market for the said brand in very short span. The collaboration with the leading brand was the key turning point for our promoter and his business journey started blooming within short period of time. Because of the success in one segment, to expand the business horizontally, our promoter has decide to launch first our own brand "ANUTARRA" in the women's ethnic wear segment.

As a part of further development, we have listed our products on most of the available E-commerce platforms in the F.Y. 2019-20. Due to our manufacturing unit, we could control the cost of the product and as result, we are able to provide the best quality product at a very affordable price in the market. This has created more demand for our products/brands in the market. In 2020 we collaborated with Reliance Retail & scaled up our business to a new height. When the most of the business in the whole world was severally affected due to Covid-19, our doors were opened for new businesses and we grew in terms of business volume.

In the year 2021, we became one regular manufactures of Reliance Retail. We have executed an Agreement and Non-Disclosure Agreement (NDA) with Reliance Retails Limited, Mumbai, on May 30, 2023 for a term of three years. In 2021, we have launched our women western wear brand by the name of "KIZI". After market study, we understood the business dynamics by now and hence, we decided to launch our western wear segment as well, as it had a very consistent market. This gave us a wider publicity in the market and created our brand image in the market. In the year 2022, we have entered into distribution and wholesale network with our brands and consequently our sales increased to three times. This has helped us to captured the sizable share in the market for our Brands. We also provide facilities of job working for the renowned brands of India.

For effective cost control, we have tie ups with some of the major suppliers of raw materials required for our products. For fabric we have tie up with some of the certified mills from the state of origin of the fabric i.e. from Gujarat, Maharashtra and Tamil Nadu. Likewise, we procure our trims and accessories directly from the manufacturers, resulting our goods to be more cost effective. We usually tend to buy our raw materials when it is at the lower side as the greige fabric pricing keeps fluctuating due to the variance in yarn prices. As per our growth strategy, we also connected with the leading wedding collection brand of India.

We have also executed Products Supply agreement with M/s. Absolute Brands and Retails Private Limited (ABRPS), Banglore, vide Agreement dated June 05, 2023 for the supply of our products to the ABRPS on outright basis and ABRPS in turn sell the said products through its retail chain of store and through their E-Commerce Channel in India to the end customers. We have executed agreement for the supply of women wears which includes western wears and ethnic wears.

Similarly, we have entered in to an Agreement with M/s. Fab India Limited (FIL), New Delhi, vide Vendor Agreement (to Manufacture and Supply) dated June 21, 2023 for manufacturing of Branded products for FIL on Job Work basis under the brand name of "Fab India".

To promote our own Brands: 1. "Anutarra" - an ethnic wear collection for the women and 2. "Kizi" – a western wear collections for the women, we have our own clientele based in Jaipur only, who purchase in bulk from our Company and sale our products in the local markets through their shops. We do our own sale through our own website also, where we have provided all the options available in the apparel along with the online payment facilities.

In recent, our Company has taken over the ongoing proprietorship concern namely M/s. Aika Creations. For more details regarding past three years financials of Proprietorship i.e. M/s. Aika Creations, please refer "Financial Performance of the Proprietorship Firm" mentioned under chapter titled "Business Overview" beginning on Page 69 of this Draft Prospectus.

Women are quite possessive with the kind of choices when it comes to their clothing & styling. Majorly, there are 2 different categories in which the women's wear is divided, Ethnic & Western Wear. Manufacturing Process

The creation of women's wearing apparel involves a meticulously structured manufacturing process that transforms a design concept into a tangible garment ready for distribution. This process encompasses numerous steps, each contributing to the final product's quality, fit, and aesthetics. Below is an overview of the key stages involved in the manufacturing of women's wearing apparel:

1. Creation of Design

The journey begins with the design team conceptualizing and sketching the garment. This creative process involves envisioning the apparel's style, silhouette, and detailing. A tech pack is then prepared, including detailed drawings, design specifications, fabric selection, and garment measurements. This serves as a comprehensive guide for subsequent stages.

2. Pattern Making:

Based on the design and tech pack, a skilled pattern master develops paper templates known as patterns. These templates outline the various components of the garment, serving as a blueprint for cutting the fabric. Pattern-making ensures precision in shaping and sizing, which are critical for achieving consistent fit and style across different sizes.

3. Fit Sample:

A fit sample is crafted to evaluate the garment's measurements and fit on a dress form or mannequin. The quality and merchandising teams meticulously assess the fit sample against the tech pack specifications. If adjustments are required to enhance the fit, the pattern is modified accordingly.

PP (Pre-Production) Sample:

Upon receiving the fabric from the supplier, a preproduction sample is crafted. This sample represents the final product's **intended** quality and appearance. The quality and production managers scrutinize this sample to ensure it aligns with the desired standards. If the garment is being produced for a specific buyer, a PP sample is sent to them for approval

5. Size Set:

After receiving approval for the PP sample, a size set is produced. This involves creating a single garment piece in each size offered for the product. These garments are subjected to a thorough review to verify consistency in design, fit, and sizing across all sizes.

6. Layering and Cutting:

With the size set approved, the fabric is layered for efficient cutting. The pattern templates guide the precise positioning of the fabric pieces. Each component is methodically numbered and bundled to ensure accuracy during the subsequent stitching phase.

7. Stitching:

The cut fabric pieces are then sent for stitching, where skilled laborers assemble the garment. The production supervisor oversees the stitching process, addressing any queries or issues that arise. Some pieces are examined during stitching for inline quality checks

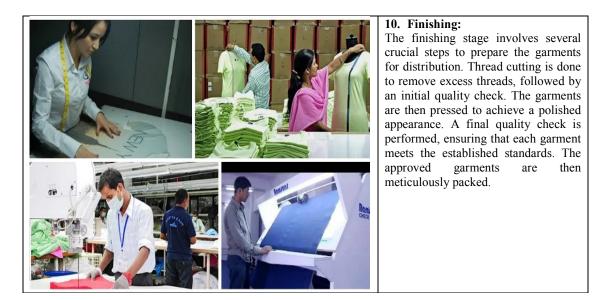

8. Checking of Stitched Garments:

Following stitching, all garments undergo a meticulous quality check. The quality checker assesses each piece for stitching precision, alignment, and other aesthetic and functional aspects. Any garments requiring alterations are sent back to the production line for corrections

9. Addition of Buttons and Accessories:

At this stage, buttons, zippers, and other accessories are added to the garment as per the design specifications. Attention to detail is crucial to ensure these components enhance both the garment's appearance and functionality.

11. Rejected Garments:

Throughout the manufacturing process, any garments that fail to meet the quality standards are identified and separated. These rejected garments are not included in the final product batch, ensuring that only garments of the highest quality are delivered to customers. We remove the brand logo from the rejected garments and then scrap the garments or sale it to the local vendors as an assorted product, the same is depends upon the terms with the respective brands.

In conclusion, the manufacturing process of women's wearing apparel is a meticulously orchestrated journey that involves creativity, precision, and attention to detail at every step. From the initial design concept to the final packed garment, each stage contributes to delivering garments that reflect the intended style, fit, and quality
