Internal Risks

Risks relating to the business of our Company

- 1. We have a limited operating history and may be subject to risks inherent in early-stage companies, which may make it difficult for you to evaluate our business and prospects.***

Our Company was incorporated in the year of 2021, with an intent to carry on textile business. However, in the following year of 2022, our Company ventured into the business of manufacturing and trading of diamonds. Since, we have a limited operating history, it may be difficult for you can evaluate our business and prospects. You must consider our business and prospects in light of the risks and difficulties we face as an early-stage company with a limited operating history and should not rely on our past results as an indication of our future performance.

Further, our management may have less experience in implementing our business plan and strategy compared to our more well-established competitors, including our strategy to increase our market share and build our brand name. In addition, we may face challenges in planning and forecasting accurately as a result of our limited historical data and inexperience in implementing and evaluating our business strategies. Our inability to successfully address these risks, difficulties and challenges as a result of our inexperience and limited operating history may have a negative impact on our ability to implement our strategic initiatives, which may have an adversely effect on our business, prospects, financial condition and results of operations.

2. ***We are dependent on third parties for various stages of our operation. As on date of this Draft Prospectus, we do not have any formal arrangements with the said third-parties, and we may be unable to maintain or establish formal arrangements with such third parties in the future. In the event of any disruptions with such third-party job worker, or failure of such third parties to adhere to the relevant quality standards, or complete the work process, would lead to have a negative effect on our reputation, business, and financial condition.***

We mainly depend on third party job workers for carrying out various stages of our operations, namely being, cleaving, laser cutting, and polishing of rough diamonds. We do not have specific written agreements with such job workers and accordingly, they are not contractually bound to deal with us exclusively, and we may face the risk of our competitors offering better terms, which may cause them to prefer our competitors over us.

Any unscheduled, unplanned or prolonged disruption of operations at our job-workers' manufacturing facilities, including on account of power failure, fire, mechanical failure of equipment, performance below expected levels of output or efficiency, obsolescence of equipment or manufacturing processes, non-availability of adequate labour or disagreements with workforce, lock-outs, earthquakes and other natural disasters, industrial accidents, any significant social, political or economic disturbances or infectious disease outbreaks, could affect our operations process.

We are also exposed to the risk of our job-workers failing to adhere to the standards set for them by us in respect of ensuring appropriate marking, cutting, shaping, and polishing quality, which in turn could adversely affect our sales and revenues. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

Any delay or failure on the part of our job-workers to deliver the products in a timely manner or any litigation involving these job-workers may have a material adverse effect on our business, profitability, and reputation. Our operations could be disrupted if we do not successfully manage relationships with our job-workers, if they do not perform or are unable to perform agreed-upon services, or if they are unwilling to make their services available to us at reasonable prices. If job-workers do not perform their contractual obligations, it could adversely affect our reputation, business, financial condition and results of operations.

3. ***Any significant increase in price of rough diamonds and labour costs could adversely impact our profit margins.***

In the recent years, there has been a significant increase in the cost of rough diamonds, which has resulted in an increase in our operational cost. We cannot assure you that we will be able to procure quality rough diamonds at competitive prices or at all. In addition, if for any reason, our primary suppliers of rough diamonds curtail or discontinue their delivery to us, in the quantities we need and at prices that are competitive, our ability to undertake our business operations could be impaired, our delivery schedules could be disrupted, and our business and reputation may be adversely affected. Further, any rise in prices of rough diamond may cause manufacturers or jewellers to delay their purchases, thereby adversely affecting our business, operations, and financial condition.

Since, our business operations are heavily dependent on the third-party job-workers, and any event of increase in their daily wages, would result in increase of the costing of the polished diamonds, which could affect our ability to withstand the competition in the industry, thereby adversely affecting our business, operations, and financial condition.

4. ***We are exposed to risks associated with online security and fraud.***

The secure transmission of confidential information over the Internet and telephone is essential to maintaining our customers' and suppliers' confidence in us. Security breaches, whether instigated internally or externally on our system or other Internet-based systems, could significantly harm our business. While we use secure transmission protocols on our marketplace, we may not be able to prevent security breaches involving the confidential information of our suppliers and customers, including any breaches with regards to transactions from our payment services. If we choose to deploy secure transmission protocols on our marketplace in the future, our implementation efforts may require significant additional costs or be unsuccessful, and a new set of protocols may not prevent all security breaches.

Finally, there can be no assurance that the confidential information of our suppliers and customers will be protected on third-party payment gateways.

5. ***Our e-commerce platform faces distinct risks, and our failure to successfully manage those risks could have a negative impact on our profitability.***

Our Company has recently forayed to explore the online sale facility through e-commerce platform accessible at www.shooradesigns.com. Our Company believes that by providing wide range of diamonds for sale on our Company e-commerce platform along with other marketplaces will work as an added advantage to grow and scale up our business by leveraging the bandwidth to reach out to customers across various part of the country.

The e-commerce platform runs on technology that requires continuous upgradation and innovation at various levels & intervals, there can be no assurance that the upgradation shall be done on a need-to-update basis, which would involve an amount of risk. Similarly, the technology of the e-commerce segment of our business is exposed to certain risks and any failure on our part to manage or mitigate such risk can disrupt our e-commerce business or platform and may have an adverse effect on our profitability and result of operations.

6. ***Our income and sales are subject to seasonal fluctuation and lower income in a peak season may have a disproportionate effect on our result of operation.***

Our sales have exhibited certain seasonal fluctuations, reflecting higher sales volumes on festivals and other occasions such as Dhanteras, Diwali, Christmas, Akshaya Tritiya and wedding seasons which occur in the third and fourth quarter of the fiscal year. Any lower than expected net sales during the third or fourth quarters of the fiscal year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year, or could impair our cash flows. Any slowdown in supplying the polished diamonds to the manufactures or jewellers or failure by us to prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

7. ***Our Company was recognized as a start-up company by the Department for Promotion of Industry and Internal Trade for the purpose of working in the 'Textiles and Apparel Industry' and 'Apparel and Accessories Sector'. However, post-change in the business of our Company no application has been made for recognizing our Company as a start-up in the field of 'Gems and Jewelry Industry'. In the following year of 2022, our Company ventured into the business of manufacturing and trading of diamonds. However, post-alteration of the main object of the business and post-venturing into a new industry all-together, our Company failed to make an application to the Department for Promotion of Industry and Internal Trade for amending the said certificate.

Any negative publicity regarding our Company, our polished diamonds could adversely affect our reputation and our results of operations. Customer preferences could be affected by a variety of issues including non-acceptance of diamonds from specific regions, non-promotion of jewellery by the fashion industry, and a decrease in the perceived value and customer satisfaction of the jewellery compared to its price.

As a result, any such demand may materially and adversely affect our business, results of operations, financial condition and cash flows. 10. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

As on date of this Draft Prospectus, there is no systematic inventory management and control systems in place in our Company. Our results of operations are dependent on our ability to effectively manage our inventory. If our management has misjudged the expected demand it could adversely impact the results by accumulation of excess inventory.

11. *If we are unable to collect our receivables from our clients, our results of operations and cash flows could be adversely affected.*

Our business depends on our ability to successfully obtain payment from our customer(s) for our polished diamonds sold to them. We typically bill and collect the payment on immediate sale to delivery basis. Recovery of our receivables and timely collection of client balances also depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected.

12. *Any failure of or disruption to our information technology systems could adversely impact our business and operations. Further, we are exposed to risks associated with online security and fraud.*

We rely on our information technology systems to provide us with connectivity for our business functions through our software, hardware and network systems. We cannot assure you that we can successfully block and prevent all hacking or other breaches. As a result, failure to protect against technological disruptions of our operations could materially and adversely affect our business, financial condition and results of operations.

We also have an e-commerce platform, www.shooradesigns.com for online shopping experience we provide to our customers. Many of our control systems are dependent on third-party software and technology. Our website and third-party software may be subject to damage, software errors, computer viruses, security breaches and the delayed or failed implementation of new updates. Further, the secure transmission of confidential information over the Internet and telephone is essential to maintaining our customers' and suppliers' confidence in us. Security breaches, whether instigated internally or externally on our system or other Internet-based systems, could significantly harm our business, and we may not be able to prevent security breaches involving the confidential information of our suppliers and customers, including any breaches

with regards to transactions from our payment services. If we choose to deploy secure transmission protocols on our marketplace in the future, our implementation efforts may require significant additional costs or be unsuccessful, and a new set of protocols may not prevent all security breaches.

Finally, there can be no assurance that the confidential information of our suppliers and customers will be protected on third-party payment gateways.

- 13. *There have been instances of delayed / incorrect filings in the past with certain Regulatory Authorities. If the Regulatory Authorities impose monetary penalties on us or take certain punitive actions against our company in relation to the same, our business, financial condition and results of operations could be adversely affected.***

There have been instances of delayed/ incorrect filings in the past with certain regulatory authorities. There are certain forms which have been subsequently filed with additional fees, as specified by registrar of companies / ministry of corporate affairs. Except as mentioned in this Draft Prospectus, till date, there has been no penalty levied on the Company for such delays / defaults. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the regulatory authorities impose monetary penalties on us or take certain punitive actions against our company in relation to the same, our business, financial condition and results of operations could be adversely affected. While we ensure implementation of required compliance systems, we cannot assure you that such inaccuracies and non-compliances will not happen in the future and that our Company will not be subject to any action by statutory or regulatory authorities.

- 14. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.***

Our business is working capital intensive and requires significant portion of working capital and major portion of which is utilized towards trade receivables and trade payables. Further, our Company intends to continue growing by reaching out to newer clients/ customers and also increasing the sales in the existing customers base. Our growing scale and expansion may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out of debts, could adversely affect our financial condition and result of our operations.

For description of the objects, see '*Objects of the Issue*' on page 69 of this Draft Prospectus.

- 15. *The Company require certain approvals and/or licenses in the ordinary course of business to operate. Failure to obtain and/or renew in a timely manner may affect the operations of the company.***

The Company requires certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for the business to operate. In this regard the Company has obtained the required license for carrying out business activity including the PAN, GST Registration.

Further, there can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. As a result, the company might not be able to execute its business operations as planned. Furthermore, an inability to obtain or maintain approvals or licenses required for the operations may adversely affect the operations.

Government approvals, licenses, clearances, and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Moreover, approvals, licenses, clearances, and consents covering the same subject matter are often required at State Government levels. If the company fail to comply, or a regulator claim that that company has not complied, with these conditions, the company might not be able to commence or continue to work.

For description of the regulations to which we are subject, see '*Key Industry Regulations and Policies*' on page 95 of this Draft Prospectus.

- 16. *The land and premises at which our Registered Office is situated has been taken on rental basis by our Company. If we are unable to renew existing rental agreement or relocate operations on commercially reasonable terms, there may be an adverse effect on our business, financial condition, result of operations and cash flows.***

The Registered Office of our Company situated at the premises of Diamond Apartments Co-op Housing Society, LT H No. 7/3388/A, 6th floor, C/1, 601, Haththupura char rasta, Surat – 395003, Gujarat, India, is not currently owned; we are using the property of our Promoter and Director vide NOC dated January 05, 2021.

Further, upon expiration of the aforesaid rental agreement, we shall be required to negotiate the terms and conditions on which the rental agreement is to be renewed. In the event that these agreements are not renewed on commercially acceptable terms or at all, we may suffer a disruption in our operations. Further, if in an event alternative premises are not available at the same or similar costs, size or locations, our business, financial condition, and results of operations may be adversely affected.

Furthermore, since the premises is owned by our Promoter, Mr. Rajeshbhai Labhubhai Mer, it may lead to conflict of interest.

17. *We operate in a competitive market and face competition from other manufacturers. Any increase in competition may adversely affect our business and financial condition.*

The markets in which we operate are highly competitive. Our competitors include both organized as well as unorganized local players in the various markets in which we operate. See '**Industry Overview**' on page 82. Some of our competitors have achieved significant recognition for their brand names due to their presence over the years. Industry consolidation, either by virtue of mergers and acquisitions or by a shift in market power among competitors, may accentuate these trends and give our competitors an upper hand. In addition, some of our competitors in smaller local markets have advantages of having strong reputations and established trust with customers due to various factors and presence over the years, which could be difficult for us to challenge or replicate in a sustained manner in the future. We expect competition could increase with new entrants coming into this industry, who may have more flexibility in responding to changing business and economic conditions, and existing players consolidating their positions. Some of our competitors may have access to significantly greater resources, including the ability to spend more on advertising and marketing and hence the ability to compete more effectively. We face competition across our business activities from varied peers. Further, although e-commerce space is not currently a major competitive channel in the jewellery sector, we may face increased competition from e-commerce in the future. Some of our competitors are larger and have greater financial resources or a more experienced management team than us. Like us, they may also benefit from greater economies of scale and operating efficiencies. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may have a negative effect on our sales. Further, our competitors may set up showrooms in the vicinity of our existing showrooms and may offer their products at lower prices, resulting in a decreasing of sales of our products. We cannot assure you that we can continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising will affect our business, results of operations and financial condition. We believe that our principal competitive factors include brand name, quality of product, product style, product range, innovation, display, multiple choice, price transparency and competitiveness, various schemes, personalized service to our customers, scalability of production, store location and accessibility, designs suited to local preferences and choices, varied and efficient employee strength base, advertising and promotion. We cannot give any assurances that we will be able to compete successfully on all of these factors against existing or future competitors in the future. To compete effectively and to attract customers in diverse markets, we must continue to market and competitively price our products, and we may experience downward pricing pressures, increased marketing expenditures and loss of market share.

For more details on the competitive landscape in India, see '**Industry Overview**' on page 82 of this Draft Prospectus.

18. *Our business reputation is critical for growing our business and any adverse publicity regarding us or our promoters and investors may have a material adverse effect on our business, prospects, financial condition, and results of operations.*

The market for technology services in India has gained great momentum and is highly competitive and rapidly evolving. Some of its competitors may have significantly greater financial, technical, and marketing resources and might be generating greater revenues. Further, some of them have a pan-India presence resulting in better brand recall across India and have long-standing relationships with their clients within and outside our country and are therefore the preferred service providers for many of the clients. The Company cannot assure its investors that it will be able to retain its clients or attract new clients while competing successfully against such competitors.

In addition, our brand and business reputation will be adversely affected in the event of any adverse publicity relating to one of our Promoters.

Any significant claim or litigation, employee misconduct, operational failure, regulatory investigation, media speculation and adverse publicity, whether actual, unfounded, or merely alleged, could damage our brand, business reputation and

confidence of customers. Our brand may also be adversely affected if our products, or the services provided by our employees, agents do not meet customer expectations. Negative publicity could result from any failure in business continuity or information technology systems.

Any damage to our brand or business reputation may result in loss of existing and potential customers, and inability to maintain existing or enter into additional distribution arrangements. Furthermore, negative publicity may result in an increase in regulatory scrutiny of our operations, and an increase in claims litigation, which may further increase our cost of operations and adversely affect our profitability. Negative publicity may also influence market perception of our business and affect our ability to maintain our credit ratings. Accordingly, any adverse impact on our brand and business reputation may have a material adverse effect on our business, prospects, financial condition, and results of operations.

19. *The trademark is owned by our Promoter Director Mr. Satish Kalubhai Kansodariya, who may not be able to protect our trademarks from infringement.*

Any unauthorised use of our trademarks could harm our reputation or commercial interests. In addition, our enforcement against third-party infringers or violators may be unduly expensive and time-consuming, and any remedy obtained may constitute insufficient redress relative to the damages we may suffer. For details, see '**Our Business**' and see '**Government and Other Approvals**' on pages 90 and 165 of this Draft Prospectus.

20. *Our business depends on our Promoters. Any attrition rate of our senior management may affect our business growth.*

We believe that the experience of our Promoters and senior management has been critical to our success and business growth over the years. Their in-depth knowledge of the market and the business operations have ensured our growth in the business.

As a result, any loss of the services of any of our Promoters could materially and adversely affect our business, financial condition and results of operations. The replacement of Promoters may not be straightforward or achievable in a timely manner as they have years of knowledge and experience in this business, and we may be required to wait indefinitely to fill positions until we find suitable candidates. Furthermore, attracting, hiring, and retaining experienced and qualified senior management with years of experience in this business sector could require increasing compensation and benefits payable to such personnel, which could affect our operational costs and accordingly, our financial condition and results of operations.

21. *Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows and working capital and capital expenditure requirements.*

Any dividends to be declared and paid in the future are required to be recommended by our Board and approved by our shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements, capital expenditure requirements. We cannot assure investors that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our shareholders in future consistent.

22. *We have entered into certain related party transactions in the Financial Years ending 2022 and the nine months ended December 31, 2022. For further information on our related party transactions, see '**Restated Financial Information – Notes to Restated Financial Information – Notes to Accounts: 26. Related Party Disclosure**' and '**Summary of Issue Document – Summary of Related Party Transactions**' on pages 151 and 23, respectively, of this Draft Prospectus.

While we believe that all such transactions have been conducted on an arm's length basis, it is likely that we will continue to enter into related party transactions in the future and we cannot assure investors that we would not achieve more favorable terms if such transactions were entered into with unrelated parties. There can be no assurance that related party transactions, individually or in the aggregate, will not have an adverse effect on our business and results of operations. Such related party

transactions may also potentially involve conflicts of interest.

23. The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price.

The average cost of acquisition of Equity Shares by the Promoters may be less than the Issue Price. The details of the average cost of acquisition of Equity Shares held by the Promoters are set out below:

Ms. Sejal Satish Kansodariya	2,66,875	₹13.2871/-
Mr. Satish Kalubhai Kansodariya	4,59,080	₹13.5487/-

24. We have in the past 12 months issued Equity Shares at a price which could be lower than the Issue Price. The price at which our Company has issued Equity Shares during the last one year from the date of this Draft Prospectus may not be indicative of the future price.

We have in the last twelve months prior to filing this Draft Prospectus, issued Equity Shares at prices that could be lower than the Offer Price. For information regarding such issuances of Equity Shares, see ‘*Capital Structure—Notes to Capital Structure*’ on page 59 of this Draft Prospectus.

As per our Restated Financial Statements, our cash flows from operating, investing, and financing activities are as set out below:

(₹ in ‘000)

Sr. No.	Particulars of Net Cash Generated/(Used) from	Restated Financial Statements for

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For details, please see chapter titled ‘*Management’s Discussion and Analysis of Financial Condition and Results of Operations*’ beginning on page 154 of this Draft Prospectus.

26. We are required to maintain various licenses and permits for our business.

Our business is subject to applicable government regulations and legislations, and we require certain statutory and regulatory approvals, licenses, registrations, and permissions for operating our business. These permits, licenses and approvals may also be tied to numerous conditions and terms, obtaining some of which may be time consuming and may incur high cost.

We cannot assure you that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant permits, licenses, registrations and approvals. There is no assurance in the future that the permits, licenses, registrations, and approvals applied for or held by us will be issued, approved or renewed in a prompt manner, or at all, under applicable laws.

Further, applications for approvals, licenses, registrations, and permissions for operating our business need to be made within certain timeframes and are often subject to the discretion of relevant authorities. If we are unable to make applications or renew or obtain necessary permits, licenses, and approvals on acceptable terms, in a timely manner, at a reasonable cost, or at all or in the event we fail to comply with the terms and conditions therein, it could materially and adversely affect our financial condition and results of operations, including cancellation, revocation or suspension of relevant permits, licenses, registrations and approvals and the imposition of penalties by relevant authorities. For details, see ‘*Government and Other Approvals*’ on page 165 of this Draft Prospectus.

27. *We may be subject to fraud, theft, employee negligence or similar incidents.*

Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking and otherwise. Our industry typically encounters some inventory loss on account of employee theft and general administrative error. We stock our inventory at all our Registered Office at all times. Though we have not reported any instances of theft or fraud in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence or loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

Additionally, in case of losses due to theft, fire, breakage, or damage that may be caused by other casualties, flood, earthquake or any other natural calamities, there can be no assurance that we will be able to recover from our Insurers the full or adequate amount of any such loss that we may suffer in a timely manner. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, if any, it could have an adverse effect on our business, results of operations and financial condition.

28. *If we are unable to protect credit card or debit card data or any data related to any other electronic mode of payment, or any other personal information that we collect, our reputation could be significantly harmed.*

The use of electronic payment methods and collection of other personal information both on our e-commerce platform and in our physical showrooms, exposes us to an increased risk of privacy and security breaches as well as other risks. Although we use secure private networks to transmit confidential information, third parties may have the technology or know-how to breach the security of the customer information transmitted in connection with credit and debit card sales and use of e-wallets, and our security measures and those of technology suppliers may not effectively prohibit others from obtaining improper access to this information. If a person is able to circumvent our security measures or otherwise gain access to the confidential information that we collect, they may be able to destroy or steal valuable information or otherwise disrupt our operations. We may become subject to claims for purportedly fraudulent transactions arising out of the actual or alleged theft of credit or debit card information or other confidential information, and we may also be subject to lawsuits or other proceedings relating to these types of incidents. Any such claim or proceeding could cause us to incur significant unplanned expenses, which could have an adverse impact on our financial condition, results of operations and cash flows. For further information of the proposed objects of the Offer, see '*Objects of the Issue*' on page 69 of this Draft Prospectus. We cannot currently determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions, or other factors beyond our control. In accordance with the Companies Act and the ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds from the Offer as disclosed in this Draft Prospectus without obtaining the Shareholders' approval through a special resolution. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Offer proceeds, if any, which may adversely affect our business and results of operations.

Certain non-GAAP financial measures and certain other industry measures relating to our operations and financial performance have been included in this Draft Prospectus. We compute and disclose such non-GAAP financial measures and such other industry related statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of gems and jewelry companies, many of which provide such non-GAAP financial measures and other industry related statistical and operational information. For more details, see ***‘Certain Conventions, Presentation of Financial, Industry and Market Data – Non-Generally Accepted Accounting Principles Financial Measures’*** on page 16 of this Draft Prospectus. 31. ***Our funding requirements and the proposed deployment of Net Proceeds have not been appraised and our Company has broad discretion over the use of the Net Proceeds and may use them in ways with which you do not agree and in ways that may not enhance our operating results or the price of our Equity Shares.***

We intend to utilize the Net Proceeds to augment our capital base to support solvency levels. Our proposed deployment of the Net Proceeds has not been appraised and it is based on management estimates. As stipulated in Regulation 41 of the ICDR Regulations, we are not required to appoint a monitoring agency for the use of the Net Proceeds, and we do not intend to do so. Accordingly, the deployment of the Fresh Issue proceeds will be entirely at our discretion which is especially relevant since we have proposed broad utilization of the Net Proceeds. Our board of directors and management will therefore have broad discretion over the application of the Net Proceeds. We may spend or invest these proceeds in ways with which you disagree or that do not yield a favorable or any return. Our actual use of the Net Proceeds may differ substantially from our current plans. Failure by our management to apply these funds effectively could harm our business and financial condition and cause the market price of our Equity Shares to decline. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use of the Net Proceeds to achieve profitable growth in our business. Pending their use, we may invest the Net Proceeds in a manner that does not produce income or that loses value.

32. ***The Promoters and members of the Promoter Group will continue jointly to retain majority control over the Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

Post the Issue as well, Promoter and Promoter Group will collectively own the majority of the Equity Share capital. As a result, they will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to Board, in accordance with the Companies Act, and its Articles of Association.

Such a concentration of ownership may also have the effect of delaying, preventing, or deterring a change in control of the Company. In addition, Promoters will continue to have the ability to cause to take actions that are not in, or may conflict with, the interests or the interests of some or all of the creditors or other shareholders, and the Company cannot assure that such actions will not have an adverse effect on its future financial performance or the price of Equity Shares.

33. ***We may not be successful in implementing our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to

implement our business strategies would have a material adverse effect on our business and results of operations.

34. *The future funds' requirements of the company, in the form of fresh issue of capital or securities and/or loans, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

The Company might require additional capital from time to time depending upon the requirements of the business. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase the interest burden and decrease cash flows, thus prejudicially affecting profitability and a liability to pay dividends to its shareholders.

35. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated '*Objects of the Issue*' beginning on page 69 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business and development plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

36. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators, and the public at large, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies.

38. *Investors other than Retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an application.*

According to the SEBI (ICDR) Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their application (in terms of quantity of Equity Shares or the Amount) at any stage after applying. While the company is required to complete allotment according to the issue within 6 Working Days from the Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political, or economic conditions, business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. The company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted according to the issue or cause the trading price of the Equity Shares to decline on the listing.

39. *Industry information included in this prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial, and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

External Risk Factors

Risks Relating to India

40. *Recent global economic and political conditions have been challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.*

In the event of adverse macroeconomic conditions in India or globally, which may be characterized by higher unemployment, lower household income, lower corporate earnings, lower business investment, higher inflation and lower consumer spending, the demand for insurance products could be adversely affected. Our policyholders may opt to defer or discontinue paying insurance premiums or choose to forgo or not renew their insurance coverage. We may also experience an increase in incidence of claims and non-renewal of policies. The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of Fiscal 2008 and 2009 adversely affected market prices in the global securities markets, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India and could then adversely affect our business, financial performance and the price of our Equity Shares. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and outbreak of an infectious disease, such as the COVID-19 pandemic.

Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our equity shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

41. Changing laws, rules or regulations and legal uncertainties including taxation laws, or their interpretation, such changes may significantly affect our financial statements.

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the component industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. For further information on the laws applicable to us, see '**Key Industry Regulations and Policies**' on page 95 of this Draft Prospectus.

The Income Tax Act, 1961 was amended to provide domestic companies an option to pay corporate income tax at the effective rate of approximately 25.17% (inclusive of applicable surcharge and health and education cess), as compared to effective rate of 34.94% (inclusive of applicable surcharge and health and education cess), provided such companies do not claim certain specified deductions or exemptions. Further, where a company has opted to pay the reduced corporate tax rate, the minimum alternate tax provisions would not be applicable. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to the COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, amongst others, the Central Goods and Services Tax Act, 2017 and Customs Tariff Act, 1975.

Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. With the implementation of GST, we are obligated to pass on any benefits accruing to us as result of the transition to GST to the consumer thereby limiting our benefits. In order for us to utilise input credit under GST, the entire value chain has to be GST compliant, including us. While we are and will continue to adhere to the GST rules and regulations, there can be no assurance that our suppliers and dealers will do so. Any such failure may result in increased cost on account of non-compliance with the GST and may adversely affect our business and results of operations.

Earlier, distribution of dividends by a domestic company was subject to Dividend Distribution Tax ('**DDT**'), in the hands of the company at an effective rate of 20.56% (inclusive of applicable surcharge and health and education cess). Such dividends were generally exempt from tax in the hands of the shareholders. However, the Government of India has amended the IT Act to abolish the DDT regime. Accordingly, any dividend distributed by a domestic company is subject to tax in the hands of the investor at the applicable rate. Additionally, the Company is required to withhold tax on such dividends distributed at the applicable rate.

Further, the Government of India has notified the Finance Act, 2022 ('**Finance Act**'), which has introduced various amendments to the IT Act. As such, there is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations, and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation, or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent, may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Prospectus, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health, and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability

and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as ‘gig workers’ and ‘platform workers’ and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

42. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, United States, United Kingdom, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets.

In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares.

43. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.*

Our Restated Financial Information for Fiscal 2021 and 2022, and the nine-months period ended December 31, 2022 have been prepared and presented in conformity with IndAS. No attempt has been made to reconcile any of the information given in this Draft Prospectus to U.S. GAAP, IFRS or any other principles or to base it on any other standard. Indian GAAP differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should be limited accordingly.

Risks relating to the Equity Shares and this Issue

44. *Substantially all of our business and operations are located in India, where we are subject to regulatory, economic, social, and political uncertainties.*

We are incorporated in and our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Substantially all of our business, employees and investments are located in India, and we intend to continue to develop and expand our business in India. Consequently, our financial performance, the performance of our investments and the market price of our Equity Shares will be affected by changes in exchange rates and controls, interest rates, volatility in and actual or perceived trends in trading activity on India’s principal stock exchanges, prevailing economic conditions, inflation, changes in government policies, including taxation policies and foreign investment policies, social and civil unrest and other political, social and economic developments in or affecting India.

While the Indian economy has experienced significant growth over the past decades, growth has been uneven, both geographically and among various sectors of the economy.

The Government of India has exercised and continues to exercise significant influence over many aspects of the Indian economy. Specific laws and policies affecting insurance companies, e-commerce, data, foreign investments, currency exchange rates and other matters affecting investments in India could change as well or be subject to unfavorable changes or interpretations or uncertainty.

Other factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements; and
- subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any further slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

45. *Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the Lead Manager or any of their directors and executive officers in India respectively, except by way of a law suit in India.*

Our Company is a company incorporated under the laws of India and all of our Directors are located and/or resident in India. All of our assets, our Key Managerial Personnel and officers are also located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law.

Recognition and enforcement of foreign judgments is provided for under Sections 13, 14, and Section 44A of the Code of Civil Procedure, 1908. India is not party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the Indian Code of Civil Procedure, 1908. The Code of Civil Procedure, 1908, only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties and does not apply to arbitration awards (even if such awards are enforceable as a decree or judgment). Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favor a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on

the final judgment within three years of obtaining such final judgment in the same manner as any other suit filed to enforce a civil liability in India.

However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India. Further, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approval would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

46. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- fluctuations in stock market prices and volume;
- general economic and stock market conditions; and
- Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

47. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

48. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ('STT') is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months

immediately preceding the date of transfer may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, investors may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less immediately preceding the date of transfer will also be subject to short-term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose a tax on capital gains arising from the sale of shares of an Indian company.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders, both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

Similarly, any business income realised from the transfer of equity shares held as trading assets is taxable at the applicable tax rates subject to any treaty relief, if applicable, to a non-resident seller. Additionally, in terms of the Finance Act, 2018, which has been notified on March 29, 2018 with effect from April 1, 2018, taxes payable by an assessee on the capital gains arising from transfer of long-term capital assets (introduced as Section 112A of the Income-Tax Act, 1961) shall be calculated on such long-term capital gains at the rate of 10%, where the long-term capital gains exceed ₹1 Lakh, subject to certain exceptions in case of resident individuals and Hindu Undivided Families.

The Indian Stamp Act, 1899 was amended to provide that the sale, transfer and issue of certain securities through exchanges, depositories, or otherwise shall be charged with stamp duty. In the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of certain securities through stock exchanges is on the buyer, while in other cases of transfer for consideration through a depository, the onus is on the transferor. The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

The Government of India announced the union budget for Fiscal 2023, following which the Finance Bill, 2022 ('**Finance Bill**') was introduced in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 ('**Finance Act**'). There is no certainty on the impact of Finance Act on tax laws or other regulations, which may adversely affect the Company's business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

49. *There is no guarantee that our Equity Shares will be listed on the stock exchanges in a timely manner or at all.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately 5 Working Days from the Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within 6 Working Days of the Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

50. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Issue Price, or at all. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors,

variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchange and securities markets elsewhere in the world.

51. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within 1 working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately 5 Working Days from the Issue Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within 6 Working Days of the Issue Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

52. *Any downgrading of India's sovereign debt rating by an international rating agency could have a negative impact on our business and results of operations.*

Any adverse revisions to India's credit ratings by international rating agencies may adversely affect our ratings, our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business, cash flows and financial performance and the price of the Equity Shares.

53. *Any future issuance of Equity Shares, or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by shareholders with significant shareholding may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us, including to comply with minimum public shareholding norms applicable to listed companies in India or sales of our Equity Shares by our shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of the Equity Shares (in accordance with applicable law including procuring regulatory approvals, as required) by any of our significant shareholders, or the perception that such transactions may occur, may affect the trading price of the Equity Shares. There can be no assurance that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares (in accordance with applicable law including procuring regulatory approvals, as required) in the future.

54. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Further, this conversion is subject to the shares being held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or relevant regulatory approval having been obtained for sale of shares and the corresponding remittance of sale proceeds.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. These investment restrictions shall also apply to subscribers of offshore derivative instruments. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

For further information, see '*Restrictions on Foreign Ownership of Indian Securities*' on page 218 of this Draft Prospectus.

55. *The determination of the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.*

The determination of the Issue Band is based on various factors and assumptions and will be determined by our Company in consultation with the Lead Manager. These will be based on numerous factors, including factors as described under '*Basis of Issue Price*' on page 216 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure investors that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

56. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

57. *A third-party could be prevented from acquiring control of us post this Offer, because of anti-takeover provisions under Indian law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Offer. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

58. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

Global Economic Overview

Introduction

Global activity is forecast to expand 4 percent in 2021, below previous expectations amid a sharp resurgence of new COVID-19 cases. Global growth is expected to strengthen over the forecast horizon as pandemic-related disruptions fade and as vaccination continues. In emerging market and developing economies (EMDEs), the recovery will be uneven, with a strong rebound in China and softer-than-expected growth across most other economies as the pandemic's lingering effects continue to weigh on consumption and investment. The recovery could be even weaker than envisioned if downside risks materialize, which could exacerbate the losses in per capita income and increase in poverty. Policy makers can raise the likelihood of better outcomes while warding off worse ones through effective pandemic control and structural reforms that boost both productivity and environmental sustainability.

Global activity: Slower-than-expected recovery amid sharp resurgence of virus. Following a collapse last year caused by the COVID-19 pandemic, global activity is forecast to expand 4 percent in 2021. The global recovery, however, has been dampened in the near term by a resurgence of new COVID-19 cases, and the majority of country forecasts have been downgraded in the last six months. Global economic activity is expected to firm over the forecast horizon as confidence, consumption, and trade gradually improve, supported by ongoing vaccination. The materialization of a number of downside risks—including a worsening of the virus, delays in vaccine procurement and distribution, and financial stress amid high debt levels—could derail the projected global recovery. Even if the recovery proceeds as envisioned in the baseline scenario, global output is expected to remain 4.4 percent below pre-pandemic projections by 2022.

EMDE growth: Uneven near-term recovery, subdued outlook. Although aggregate EMDE growth is envisioned to firm to 5 percent in 2021 and to moderate to 4.2 percent in 2022, the improvement largely reflects China's expected rebound. Absent China, the recovery across EMDEs is anticipated to be far more muted, averaging 3.5 percent in 2021-22, as the pandemic's lingering effects continue to weigh on consumption and investment. The pandemic has also caused per capita incomes to fall in more than 90 percent of EMDEs, tipping millions back into poverty. For more than a quarter of EMDEs, the pandemic is expected to erase at least 10 years of per capita income gains—and, in about two-thirds of EMDEs, per capita incomes are projected to be lower in 2022 than they were in 2019. The pandemic has impeded future prospects for poverty reduction by adversely affecting longer-term productivity growth—the deterioration in confidence has dampened investment, and the loss in learning-adjusted school years and prolonged spells of unemployment have eroded earlier gains in human capital.

Indian Economy Overview

Introduction

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the

pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's nominal gross domestic product (GDP) at current prices is estimated to be at ₹232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of

improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Gems And Jewellery Industry In India

Introduction

As of February 2021, India's gold and diamond trade contributed ~7.5% to India's Gross Domestic Product (GDP) and 14% to India's total merchandise exports. The gems and jewellery sector is likely to employ ~8.23 million persons by 2022, from ~5 million in 2020. Based on its potential for growth and value addition, the Government declared the gems and jewellery sector as a focus area for export promotion.

The Government has undertaken various measures recently to promote investment and upgrade technology and skills to promote 'Brand India' in the international market. The Government has permitted 100% FDI in the sector under the automatic route, wherein the foreign investor or the Indian company do not require any prior approval from the Reserve Bank or the Government of India. The Indian Government also signed a Comprehensive Economic Partnership Agreement (CEPA) with the United Arab Emirates (UAE) in March 2022, this will allow the Indian Gems and Jewellery industry to further boost exports. Market size

India's gems and jewellery market size was at US\$ 78.50 billion in FY21. Growth in exports is mainly due to revived import demand in the export market of the US and fulfilment of orders received by numerous Indian exhibitors during the Virtual Buyer-Seller Meets (VBSMs) conducted by GJEPC.

India's gems and jewellery exports reached US\$ 39.14 billion in 2021-22, a 54.13% rise from the previous year. In October 2022, India's gems and jewellery exports was at US\$ 1.48 billion. - In December 2020, the Finance Ministry notified that the amendment under Prevention of Money Laundering Act (PMLA), notifying dealers in precious metals and stones, will maintain records of cash transactions worth ₹10 lakh (US\$ 13.61 Thousands) or more cumulatively with a single customer.

Road Ahead

In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Online sales are expected to account for 1–2% of the fine jewellery segment by 2021–22. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry.

The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India's gems and jewellery industry is expected to reach US\$ 70 billion by 2025.

2. ***Increase our business development appetite by augmenting our available working capital resources.***

We operate in a working capital-intensive industry. The working capital financing ability is a key competitive trait in the polished and cut diamond business because of the commodity nature of the product. We need working capital for raw material as well as finished goods stock and also for supporting our clients with reasonable lines of credit. Presently, the threat that may be imposed to our Company might be arising out of the highly working capital-intensive nature of our operations and the need to ensure quick asset turnover which is critical to maintain growth and profitability. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all-industry rate or duty drawback rate, or where the all-industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.</p>
f.	PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS
	(i) Tangible Assets
	<p>Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.</p> <p>Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.</p> <p>An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.</p>
g.	DEPRECIATION AND AMORTISATION
	Depreciation is calculated using the Written Down Value Method over their estimated useful lives.
h.	INVENTORIES:
	Items of inventories are measured at lower of cost or net realisable value. Cost of inventories comprises of all cost of purchase, cost of conversion and other costs incurred in bringing them to their respective present location and condition. Cost of raw materials, stores and spares, packing material and fuel are determined on weighted average basis. Cost of WIP is determined on absorption costing method. Valuation of FG is cost or NRV, whichever is less.
i.	IMPAIRMENT OF ASSETS:
	<p>The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.</p> <p>The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.</p> <p>Impairment losses of continuing operations are recognised in the statement of profit and loss.</p> <p>An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.</p>
j.	RETIREMENT BENEFITS:
	<p>(i) Short-term employee benefits: Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service.</p> <p>(ii) Post-employment benefits: Defined Contribution Plan: Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before</p>

	<p>the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.</p> <p>"The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.</p>

Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.</p>

Basis of Allotment

Allotment will be made in consultation with BSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

The total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category x number of Shares applied for).

For applications where the proportionate allotment works out to less than [●] equity shares the allotment will be made as follows:

Each successful applicant shall be allotted [●] equity shares; and

The successful applicants out of the total applicants for that category shall be determined by the draw of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.

If the proportionate allotment to an applicant works out to a number that is not a multiple of [●] equity shares, the applicant would be allotted Shares by rounding off to the lower nearest multiple of [●] equity shares subject to a minimum allotment of [●] equity shares.

If the Shares allocated on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares.

Since present issue is a fixed price issue, the allocation in the net issue to the public category in terms of Regulation 253 of the SEBI (ICDR) Regulations, 2018 shall be made as follows:

Minimum of 50% of the net issue of shares to the Public (i.e. 1,98,000 Equity Shares) shall be made available for allotment to retail individual investors; and

The balance net issue of shares to the public (i.e. 1,98,000 Equity Shares) shall be made available for allotment to Non-Institutional Investors, including Qualified Institution Buyers, Corporate Bodies/ Institutions.

The unsubscribed portion in either of the categories specified in (a) or (b) above may be allocated to the applicants in the other category.

Explanation: If the retails individual investor category is entitled to more than allocated portion on proportionate basis, the retails individual investors shall be allocated that higher percentage.

Our Company shall ensure that out of total allocated shares to the Category 'Non-Institutional Investors, including Qualified Institution Buyers, Corporate Bodies/ Institutions', at least 15% of net issue of shares to the public shall be allocated to Non- Institutional Bidders will be made at the Issue Price.

The Net Issue size less Allotment to Retail Investors shall be available for Allotment to Non- Institutional Bidders who have Bid in the Issue at a price that is equal to or greater than the Issue Price. If the aggregate demand in this category is less than or equal to [●] Equity Shares at or above the Issue Price, full Allotment shall be made to Non- Institutional Bidders to the extent of their demand.

In case the aggregate demand in this category is greater than [●] Equity Shares at or above the Issue Price, Allotment shall be made on a proportionate basis up to a minimum of [●] Equity Shares and in multiples of [●] Equity Shares thereafter. For the method of proportionate Basis of Allotment refer below.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industry Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment ('FDI') through press notes and press releases.

The DPIIT issued the Consolidated FDI Policy, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular. Pursuant to Press Note 2 (2021 Series) issued by DPIIT, the FDI Policy was amended to reflect the increase in FDI limit up to 74% foreign investment under the automatic route.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government, OCBs cannot participate in the Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to 'qualified institutional buyers' (as defined in Rule 144A under the Securities Act and referred to in this Draft Prospectus as 'U.S. QIBs') in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in 'offshore transactions' in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur. For the avoidance of doubt, the term 'U.S. QIBs' does not refer to a category of institutional investors defined under applicable Indian regulations and referred to in this Draft Prospectus as 'QIBs'.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Applications may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Applicants. Applicants are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.
