SUMMARY OF INDUSTRY

The Indian plastic industry is one of the leading sectors in the country’s economy. The history of the plastic industry in India dates back to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,500 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw materials, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crores (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crores (US\$ 126 billion) in 4-5 years.

Irrigation is main consumer of fresh water and more than 90 per cent of groundwater draft in India. Growing population coupled with food security has put extra pressure on water resources. Country has reached a situation where the demand of water from various sector of economy is rapidly increasing while the supply of fresh water constant. Additionally, water overuse harms the environment by increased salinity, nutrient pollution, and the degradation and loss of flood plains and wetlands. Owing to poor water resource management system and climate change India faces a persistent water shortage.

On July 1, 2015, the Pradhan Mantri Krishi Sinchayee Yojana (Pradhan Mantri Krishi Sinchai Yojana) was launched to expand cultivated area with assured irrigation and reduce wastage of water in the country. The scheme focuses on creating sources-protective irrigation by harnessing rainwater at a micro level through ‘Jal Sanchay’ and ‘Jal Sinchan’. Micro irrigation is also incentivised through subsidies to ensure ‘Per Drop More Crop’.

To further improve the ‘quality of life’ and enhanced ‘ease of living’ in rural areas by making a provision of assured tap water supply to every rural household in the country by 2024, Hon’ble Prime Minister announced Jal Jeevan Mission (JJM) – Har Ghar Jal on 15th August, 2019. Since then, JJM is being implemented in partnership with States.

Manufacturing is emerging as an integral pillar in the country’s economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian

manufacturing industry generated 16-17% of India’s GDP pre-pandemic and is projected to be one of the fastest growing sectors.

- *Some risks may not be material individually but may be found material when considered collectively*
- *Some risks may have material impact qualitatively and not quantitatively and vice-versa*

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. INTERNAL RISK FACTORS:

1. Our business depends on our manufacturing facility and shutdown of operations of the manufacturing facility on any reasons could adversely affect our business and results of operations.

Our manufacturing facilities are subject to operating risks such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, earthquakes and other natural disasters, social unrests, industrial accidents, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries in which we operate and propose to operate on a cost-effective and timely basis and any other factors which may or may not be within our control and also we need to comply with the directives of relevant government authorities. The occurrence of any of these types of incidents could significantly affect our production, revenue and operating results.

Although we take necessary precautions to minimize the risk of any significant operational problems at our manufacturing facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our manufacturing facilities, including due to any of the factors mentioned above.

2. *We have not yet placed orders in relation to the capital expenditure to be incurred for the proposed purchase of equipment / machineries. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machineries in a timely manner, or at all, the same may result in time and cost over-runs.*

Our Company propose to utilize ₹350.00 lakhs towards purchasing capital equipment, based on our current estimates. The specific number and nature of such equipment to be purchased by our Company will depend on our business requirements and the details of our capital equipment to be purchased from the Net Proceeds which will be suitably updated at the time of filing of the Draft Red Herring Prospectus with the RoC. The orders for the machinery have not been placed and all the machines are new one.

The orders for the machinery have not been placed and all the machines are new one. and the validity quotations are for six months. We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue and subsequent change in quotation price which may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of Issue and schedule of implementation.

please refer to the chapter titled “Objects of the Issue” on page 67 of this Draft Red Herring Prospectus.

3. *We derive a significant portion of our revenues from Our top ten customers. The loss of any significant customer may have an adverse effect on our business, financial condition, results of operations, and prospects*

A significant portion of our revenues generates from top Ten (10) clients. For the Financial years ended March 31, 2024, March 31, 2023 and March 31, 2022 as follows:

(in ₹ Lakhs)

Particular	Revenue from Top Ten (10) Clients					
	FY 2023-24		FY 2022-23		FY 2021-22	
	Revenue	%	Revenue	%	Revenue	%
Top 10 Customers	7950.60	56.40	4246.62	51.50	1778.47	50.95

However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. We have not entered in to any written agreement in this regard. While we believe we have maintained good and long-term relationships with our customers but we cannot be assured that they will continue to purchase regularly from us in future. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, Loss of any of the customer or reduction in order from any of such customer will adversely affect the business of the Company and adversely affect the profitability and financial position of the Company. Furthermore, events such as adverse market conditions, any restructuring or changes in the regulatory regime, could adversely affect our clients and consequently impact our business operations and profitability.

4. *Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.*

A significant portion of our purchase from top Ten (10) suppliers. based on Restated Financial Statements for the Financial years ended March 31, 2024, March 31, 2023 and March 31, 2022 as follows:

(in ₹ Lakhs)

Particular	Purchase from Top Ten (10) suppliers					
	FY 2023-24		FY 2022-23		FY 2021-22	
	Purchase	%	Purchase	%	Purchase	%
Top 10 Suppliers	8225.03	58.35	4961.05	60.17	1892.84	54.23

Further For the past two years, we have been importing raw materials (granules) from various locations, including Dubai, Singapore, Belgium, the UK, Vietnam, Switzerland, Ajman (UAE), accounting for 54.42% in FY 2023-24 and 22.31% in FY 2022-23. The remaining raw materials are sourced domestically, with 45.58% in FY 2023-24 and 77.69% in FY 2022-23 coming from Madhya Pradesh, Gujarat, Delhi, Uttarakhand, Maharashtra, and Rajasthan.

However, our top 10 suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process and purchase from these suppliers might change as we continue to seek more cost-

effective suppliers in normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

We have not entered into any long-term supply agreements for our raw materials and procure them both from domestic sources and international suppliers. We cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these supplier, and loss of business with one or more of them may adversely affect our purchases and business operations and profitability.

Total Revenue from operation (A+B)	14,093.00	100.00	8,233.67	100.00	3,481.25	100.00

Our customers are spread over the different states of the country. Majority of supply of our product is made to the state of Northern part of India viz. 9,248.46 lakh (65.62%) in F.Y. 2023-24; 4,764.51 lakh (57.86%) in FY 2022-23 and 2,044.90 lakh (58.75%) in FY 2021-22 of total Revenue from operation. in the event of any natural or manmade calamity in the states of North India, our entire business operation comes to stand still. Under the circumstances our business, revenue and our profitability will be adversely affected.

7. Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.

We procure our raw materials from the domestic market as well as from International Market. We Import raw materials (granules) from various locations, including Dubai, Singapore, Belgium, the UK, Vietnam, Switzerland, Ajman (UAE), accounting for 54.42% in FY 2023-24 and 22.31% in FY 2022-23. The remaining raw materials are sourced domestically, with 45.58% in FY 2023-24 and 77.69% in FY 2022-23 from various states namely Madhya Pradesh, Gujarat, Delhi, Uttarakhand, Maharashtra, and Rajasthan.

We currently use polyethene polymers/resins to manufacture our products, prices of which are dependent on crude oil price movements, as well as other factors such as changes in the global demand supply scenario and import-export regulations. Since, the costs of the imported raw material are denominated in foreign currencies, any depreciation in the Rupee vis-a-vis these foreign currencies, to the extent our exposure is unhedged, would adversely affect our financial condition and results of operations. The price we pay in Rupees for our raw materials is also affected by changes in the exchange rate between the Rupee and the U.S. dollar. However, there is no conflict of interest between the suppliers of the raw materials and third-party service providers and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors.

8. We engage in foreign currency transactions, which expose us to adverse fluctuations in foreign exchange rates. Fluctuations in the exchange rate between the Rupee and other currencies may adversely affect our operating results.

We import some of our raw material in foreign currency accounting for 54.42% in FY 2023-24 and 22.31% in FY 2022-23 of total purchase. While our principal revenues are in Rupees, since the costs of the imported raw material are denominated in foreign currencies, any depreciation in the Rupee vis-a-vis these foreign currencies, to the extent our exposure is unhedged, would adversely affect our financial condition and results of operations.

In addition, a depreciation in the rate of exchange of the Rupee and the foreign currencies would lead to increases in the prices of the domestic raw materials required to manufacture our products. If we were unable to pass on increases in the costs of raw materials to customers in the form of higher prices for our products, it would adversely affect our financial condition and results of operations.

Please refer to the section titled “Restated Financial Statements” Note no. AE, beginning on page 142 of this Draft Red Hearing Prospectus.

9. We have experienced negative cash flows from operating activities and may do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

The Company has reported negative cash flow from operating activities in previous years as per the Restated Financial Statements as given below:

Particulars	Fiscal		
	2024	2023	2022
Net cash flow from operating activities (A)	(559.35)	(565.28)	46.15

(₹ In Lakhs)

For details, see “Restated Financial Statement – Restated Cash flow Statement” on page 142.

Though, our cash flow from operating activities were positive for the Financial Year 2022-23, we are not sure about maintaining of Positive Cash Flow from operating activities. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. We may continue to have negative operating cash flows in future. If our Company is not able to generate sufficient operating cash flows, it may

adversely affect our business and financial operations. For further details, see “*Restated Financial Statement*” on page 142 of this Draft Red Herring Prospectus.

10. The unsecured loan availed by our Company from Directors may be recalled at any given point of time.

Our Company has availed unsecured loans from Directors from time to time. The outstanding payable to them as on March 31, 2024 amounts to Rs. 537.00 Lakhs as per Restated Financials Statement. Although there are no terms and condition prescribed for repayment of unsecured loan from our Directors, Promoters and Promoter Group which can be recalled at any given point of time during ordinary course of business and thus may affect the business operations and financial performance of our Company.

For further details regarding loans availed by our Company, please refer “Restated Financial Statements” on page 142 of this Draft Red Herring Prospectus.

11. *We are dependent on third party transportation service providers for delivery of raw material to us from our suppliers and delivery of our products to our customers.*

We are significantly dependent on third party transportation service providers for the delivery of raw material to us from our suppliers and delivery of our finished products to the customers. Uncertainties and risks such as transportation strikes, failure to book parcel/vehicle or delay in supply of raw materials due to non-availability of transport services or vehicle breakdown could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw material may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. Any failure to procure or transport the raw material or to deliver the finished products to our customers in a timely, efficient and reliable manner could adversely affect our business, results of operations, financial condition and operation.

Further, we have not entered into any agreements or contracts with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transporters services will be always timely available at reasonable rates, non-availability transport services at reasonable rate and in timely manner may adversely affect our business, results of operations and financial condition.

12. *We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business and our manufacturing facility, and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approvals could result in an adverse effect on our results of operations.*

Although, we have obtained all material approvals required to carry on our business activities as on the date of this Draft Red Herring Prospectus, most of these approvals are granted for a fixed period of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any or all such permits or approvals in the time-frame anticipated by us or at all. We have made or are in the process of making applications to the relevant authorities to reflect the change in our name from ‘Malpani Pipes and Fittings Private Limited’ to ‘Malpani Pipes and Fittings Limited’. For details, see “Government and Other Approvals” on – of the Draft Red Herring Prospectus.

Further, certain permits, licenses and approvals obtained by our Company are conditional in nature. While the Company endeavors to meet such conditions, we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals.

Any failure by us to apply in time, renew, maintain or obtain the required permits, licenses or approvals, or revocation, cancellation or suspension of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. There can be no assurance that the relevant authorities will issue such approvals in the time limit anticipated by us. Non-receipt of the aforesaid license would result in payment of fines under the respective laws. We are also required to make certain payments to various statutory authorities from time to time, including but not limited to payments pertaining to employee provident fund, employee state insurance, income tax and excise duty. Any failure or delay in payment of such statutory dues may expose us to statutory and regulatory action, as well as significant penalties, and may adversely impact our business, results of operations and financial condition.

13. Intense competition in the market of Pipes Industry could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

We operate in a competitive industry that experiences rapid technological developments, and changes in customer requirements. We face competition from other players in the plastic pipes segment as well as from manufacturers of alternative products to plastic pipes and fittings. Our competitors include the big, mid-sized, and several smaller local competitors in the geographic markets in which we operate. We may face competition from companies that grow in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, and lowering our gross margin percentage. If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to produce products similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their products. If we are unable to provide our clients with superior products at competitive prices or successfully market those products to current and prospective clients, our business, results of operations and financial condition may suffer.

For further details of our Business, please refer to chapter titled “Business Overview” beginning on page 91 of this Draft Red Herring Prospectus.

14. Our inability to maintain and protect our brand and business reputation could adversely affect our business, prospects and financial performance. We may be unable to adequately protect our intellectual property and may be subject to risks of infringement claims.

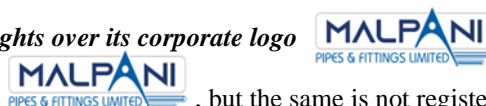

As on the date of this Draft Red Herring Prospectus, our Company has  and other seven registered trademarks.

Our products come under the brand name of “VOLSTAR”. Our business reputation and brand are important to the success of our business. Various factors, some of which are beyond our control, are critical for maintaining and enhancing our brand. These include our ability to effectively manage the quality of our products and address grievances, increase brand awareness among existing and potential customers, adopt new technologies or adapt our systems to customer requirements or emerging industry standards, and protect the intellectual property related to our brand. Our brand could also be harmed if we fail to maintain our established standards or if we become the subject of any negative media coverage. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers, and in turn adversely affect our business, financial condition and results of operations

There can be no assurance that we will be able to register our trademark and the logo or that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation, and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Accordingly, we may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

For details in relation to registered trademarks of our Company, see “Government and Other Approvals-Intellectual Property” on page 201

15. Our Company does not have intellectual property rights over its corporate logo

We have our corporate logo in the name and style of , but the same is not registered with the Trade Marks Act, 1999. We have applied for registration of the same with the Trade Marks Authority under class 17 and 35. Currently, our logo is not Registered with the Authority, we have applied for its registration with Trade Marks and patents Authority. In absence of our Registered Logo or Trademark there are chances of getting damage to our business prospects, reputation and goodwill and misuse of our designs and logo also. For further details on Intellectual Properties, please see page 201 in the chapter “Government and other Statutory Approval” of this Draft Red Herring Prospectus.

16. If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.

We have experienced sustainable growth in recent years and expect our businesses to continue to grow significantly. Set forth below are details of our revenue from operations and profit after tax in the corresponding periods:

(₹ in Lakhs)

Particular	Fiscal		
	2024	2023	2022
Revenue from Operations	14,096.18	8,245.09	3,490.58
Restated profit for the year	739.72	208.04	89.06

Our future growth is subject to risks arising from a rapid increase in volume, and inability to retain and recruit skilled staff. We may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit. Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Company. In particular, continued expansion may pose challenges in:

- maintaining high levels of quality control and cost-effective manufacturing, and customer satisfaction;
- Recruiting, training and retaining sufficient skilled management and technical personnel for our service process;
- Operational, communications, internal control and other internal systems;
- making accurate assessments of the resources;
- adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- Managing relationships with customers, suppliers and lenders.

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

17. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past, we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

18. Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.

Our manufacturing facility situated at Ratlam, Madhya Pradesh is ISO 9001:2015 certified for quality management system. Also, our company have certification marks licenses from the Bureau of Indian Standards ("BIS") for our range of Piping products that adhere to ISO standards. Quality control is vital element for our sector. If we are not able to maintain the quality of our products or we fail to match the specification for the product which are to be supplied to the Government by the test from outside agencies then our business, result of operation and financial conditions will be affected on account of rejection of material. However, we have not such faced any situation of rejection of material.

19. Two of our group companies are into similar line of business which can affect our company because of the Potential Conflict of Interest.

As of the date of this Draft Red Herring Prospectus, our group companies Terex Industries Private Limited and Malpani Plastic Private Limited are engaged in businesses similar to ours. The Terex industries Private Limited engaged in the recycling of plastic scraps into granules and Malpani Plastic Private Limited is engaged in the business of trading of plastic items such as HDPE Pipes, Sprinkler etc which is our final Products. We have entered into related party transaction with the Malpanai Plastic Private Limited and Terex Industries Private Limited. Though there is non compete agreements among these entities for preventing these companies from competing directly with us in our market segments., but potential conflicts of interest when distributing business opportunities may arise. This situation could become particularly problematic if and

when our interests diverge. For details, see, “Our Promoter and Promoter Group - Entities forming part of our Promoter Group” at page 137.

20. *We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.*

We have entered into certain transactions with related parties which are in compliance with Company Law and Other Applicable Laws with our Promoter, Promoter Group, Directors, Key managerial personal, Material Group Companies and may continue to do so in future. Our Company has entered into such transactions due to easy proximity and quick execution. The correspondence purchase and sale price from third party is not available/provided by the company, however, there is no assurance that we could have obtained better and more favorable terms than from transaction with related parties. Additionally, our company belief that all our related party transactions have been conducted on an arm’s length basis, but we cannot provide assurance that we could have achieved more favorable terms had such transactions been entered with third parties. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse effect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the Listing Regulations, the same related party transactions may potentially involve conflicts of interest and there can be no assurance that we will be able to address such conflict of interest in future. For details of transactions, please refer to “Note – AA” *Related Party Transactions*” on page 173 of Restated Financial Information.

21. *Our insurance policies may not be adequate to cover all losses incurred in our business. Our inability to maintain adequate insurance cover to protect us from material adverse incidents in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to certain hazards such as work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions, including hazards that may cause destruction of property and inventory. Our principal types of insurance coverage include coverage for our stocks that includes all normal risks associated with our business, including fire, burglary We typically maintain standard fire and burglary insurance policies for our stocks, building, plant and machineries and marine insurance policies for transit of goods. These insurance policies are generally valid for a year and are renewed annually. Our insurance may not be adequate to completely cover any or all of our risks and liabilities. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our inability to maintain adequate insurance cover in connection with our business could adversely affect our operations and profitability. To the extent that we suffer loss or damage as a result of such events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further information on our insurance arrangements, see “Business Overview – Insurance” beginning on page 91.

22. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 67 of this Draft Red Herring Prospectus.

23. *We are dependent upon the experience and skill of our promoter, management team and key managerial personnel and senior management personnel. Loss of our Promoter or our inability to attract or retain such qualified personnel, this could adversely affect our business, results of operations and financial condition.*

We believe that our Promoters have played a key role in the development of our business and we benefit from their industry knowledge, expertise, vision and leadership. Our Promoters have strong operational knowledge, good relationships with our clients and a successful track record of executing infrastructure projects. In addition to our Promoter, our key management and senior management team includes qualified, experienced

and skilled professionals who possess requisite experience across various division of our business. We believe the stability of our management team and the industry experience brought on by our individual Promoters enables us to continue to take advantage of future market opportunities. We believe that our senior management team is well qualified to leverage our market position with their collective experience and knowledge in the infrastructure construction industry, to execute our business strategies and drive our future growth.

Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects.

If we are unable to hire additional qualified personnel or retain existing personnel, our ability to expand our business may be adversely affected. Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce. As we intend to continue to expand our operations and develop new projects, we will be required to continue to attract and retain experienced personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting suitable employees. There can be no assurance that our competitors will not offer better compensation incentives and other perquisites to such skilled personnel.

24. Our Promoters and members of the Promoter Group have provided personal guarantees and may in the future provide additional guarantees. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal guarantees provided by our Promoters and members of the Promoter Group.

According to the terms and conditions of Bank sanction letter, our Promoters and their Relatives have provided personal guarantees to secure our existing borrowings and may post listing continue to provide such guarantees and other collateral securities. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter may be invoked, which could negatively impact the reputation and net worth of the Promoter. Accordingly, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We may also not be successful in procuring alternate guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

25. The average cost of acquisition of Equity Shares held by our Promoters is lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is, lower than the Issue Price which is proposed to be determined on a fixed price basis. The Average cost of Acquisition of equity shares acquired by the promoters is set out below.

Promoters	Average cost of acquisition per Equity Share (in ₹)
Harsh Malpani	3.12
Mohit Malpani	7.37
Rohit Malpani	4.35

For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "Capital Structure" on page 52 of this Draft Red Herring Prospectus.

26. There have been instances of delay in filing of Goods and Service Tax (GST) returns, Employee State Insurance (ESI) Returns, return of Tax Deducted at Source (TDS) dues and in payment of Provident Fund dues.

There have been instances of delay in filing of GST returns in the past which were due to initial technological issue with GST portal, limited time frame for staff to align with the amendments in the initial years and multiple clarifications issued by the GST authorities. A wrong filing of GST return can lead to huge penalties and interest. Therefore, reconciliation and checking of returns before submitting them is necessary as there is

no opportunity to make any changes afterward. Hence, there were delays in filing of GST returns in order to include correct inputs from all stakeholders involved and make them error free. There were also some delays in payment of EPF primarily due to technical glitches on the portal. Although, we have undertaken certain steps to avoid future delays, there can be no assurance that such delays may not arise in future. There is a possibility of financial penalties being imposed on us by the relevant Government authorities, which may have a material adverse impact on our cash flows and financial condition.

27. The requirements of being a public listed company have many restrictions and may strain on our resources.

Our Company is going in to public for the first time and lists its shares on the recognized stock exchange. As a listed company, we have to face increase scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted public company. Our Company will also be subject to the provisions of the listing related compliances which require us to file unaudited financial results on a half yearly basis. In order to meet our Company's financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

28. All of our directors do not have any prior experience of being a director in any other listed company in India.

Our Board of Directors currently consists of six (6) members, including the Chairman and Managing Director. Of these, three (3) are an Executive Director, One (1) is Non-Executive Directors, and two (2) are Non-Executive Independent Directors. While our Board members bring significant expertise in their respective fields, none of them have prior experience serving as directors in any other listed company in India. This lack of experience may present potential challenges in aligning with the best practices of corporate governance and effectively implementing these norms. Additionally, the absence of such experience could influence the company's credibility and reputation among investors and other key stakeholders. For further details, please refer to the chapter titled "Our Management" on page 124.

29. We may not be able to manage successfully our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.

As a part of Business strategy, we have to concentrate on our growth and growth strategy. As a part of growth strategy, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective management information system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. In addition to these, we have to maintain cordial relationship with our clients, suppliers, service providers, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not face liquidity constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

30. Our operations are subject to environmental, health and safety laws and regulations

We are executing the projects of the Government and Semi-government authority for their infrastructure projects, we are required to comply with various laws and regulations relating to the environment, health and safety. Our project operations are subject to local environmental laws and regulations. There can be no assurance that compliance with such environmental laws and regulations will not result in a stoppage of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Though, we have not faced any environment legal action, however, we cannot assure you that we may not any such situation and legal proceedings in the course of our business. Such legal proceedings could divert management time and attention and consume financial resources

in defence or prosecution of such legal proceedings or cause delays in the construction, development or commencement of operations of our projects. We cannot give any assurance that we will be successful in all, or any, of such proceedings.

31. We have certain contingent liabilities that have not been provided for in our Company's financials which if materialised, could adversely affect our financial condition.

The following table sets forth our contingent liabilities as of March 31, 2024 and March 31, 2023, as per the Restated Financial Statement:

Particulars		March 31, 2024	March 31, 2023	March 31, 2022
Contingent liabilities in respect of:				
1	Claims against the company not acknowledged as debts (TDS Defaults) *	6.26	5.58	-
2	Other commitments**	23.00	-	-

The contingent liability amounts with respect to claims not acknowledged as debts disclosed in our Restated Financial Statements represent estimates and assumptions of our management based on advice received. If, for any reason, these contingent liabilities materialize, it would adversely affect our financial condition and results of operations.

32. Changes in Government Regulation for the use of Plastic Products may affect our business operations, revenue and profitability adversely.

Environment and safety considerations are an important part of our operations. We are subject to environmental laws and regulations, including regulations relating to the protection of the environmental and human health in relation use of plastics and our manufacturing facility. We have to comply with the stringent environment regulations for manufacturing and dealing in the plastics products. Violation of any of the Environment regulations will leads company to strict disciplinary actions including penalty, closure of our units etc. However, in future, due to any change in Government Environment policy in respect of use and supply of plastics products in which we deal, will adversely affect our business operations, revenue and profitability.

33. We are exposed to the risks of disruptions of information technology systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.

We have implemented various information technology solutions to cover key areas of our operations including sourcing, planning, manufacturing, supply chain, accounting and data security. However, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result in a material adverse effect on our operations. A largescale information technology malfunction could disrupt our business or lead to disclosure of, and unauthorized access to, sensitive Company information. Our ability to keep our business operating depends on the proper and efficient operation and functioning of various information technology systems, which are susceptible to malfunctions and interruptions (including those due to equipment damage, power outages, computer viruses and a range of other hardware, software and network problems). Such malfunction or disruptions could interrupt our business operations and result in economic losses. Any failure of our information technology systems could also cause damage to our reputation which could harm our business. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition, results of operations and cash flows. There is no assurance that we will not experience disruption in our information technology systems in the future and we will be able to remedy such disruption in timely manner, or at all. Any such disruption of our information technology systems could have a material adverse effect on our business, results of operation and financial condition. Further, unavailability of, or failure to retain, well trained employees capable of constantly servicing our information technology systems may lead to inefficiency or disruption of our information technology systems, thereby adversely affecting our ability to operate efficiently. Any failure in overhauling or updating our information technology systems in a timely manner could cause our operations to be vulnerable to external attacks and inefficient. Hence, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to conduct our normal business operations, which may materially adversely affect our business, financial condition, results of operations, cash flows and

prospects. In addition, technological advances from time to time may result in our systems, methods or processing facilities becoming obsolete. Further, we are dependent on various external vendors for certain elements of our operations and are exposed to the contractual risks and operational risks of these external vendors. Their failure to perform their contractual obligations could materially and adversely affect our business, results of operations and cash flows.

34. *Our Promoters, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred or remuneration.*

Our Promoters and Directors and Key Managerial Personnel may be deemed to be interested to the extent of the Equity Shares held by them and benefits deriving from their shareholding in our Company. Our Promoters are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled “Business Overview” and “Our Promoters and Promoter Group”, beginning on page 91 and 137 respectively and the chapter titled “Note AA – Related Party Transactions” on page 173 under chapter titled “Restated Financial Statements” beginning on page 142 of this Draft Red Herring Prospectus

35. *There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

In terms of Regulation 41 of SEBI (ICDR) (Amendment) Regulations, 2022, as amended, appointment of monitoring agency is required only for Issue size above Rs. 100 cr. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the National Stock Exchange of India Limited.

36. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations. We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, please refer the section titled ‘Dividend Policy’ beginning on page 141 of this Draft Red Herring Prospectus.

37. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoter and Promoter Group will collectively own [●] of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

38. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding our working capital requirements, primarily, as detailed in the chapter titled “Objects of the Issue” beginning on page 67 is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

39. *We have not independently verified certain data in this Draft Red Herring Prospectus.*

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

40. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.*

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or another independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be changed subject to the approval of shareholders by passing special resolution pursuant to section 27 of Companies Act, 2013 through postal ballot or subject to an authority given by the Company in general meeting by way of special resolution and based on various factors which are beyond our control. For further details, please see the section titled “Objects of the Issue” beginning on page no. 67 of this Draft Red Herring Prospectus.

41. *Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “Capital Structure” beginning on page 52 of the Draft Red Herring Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

42. *The issue price of the Equity Shares may not be indicative of market price of our equity shares after the issue and the market price of our Equity shares may decline below the issue price.*

The issue price of our Equity shares is decided on the basis of both qualitative and quantitative factors. The Company had made good progress in establishing its name in EPC Contract Business. All such points have been considered in deciding the issue price of the Equity Shares. Please refer chapter titled “Basis for Issue Price” beginning on the page no 74 of the Draft Red Herring Prospectus. The market price of our equity shares could be subject to change after the issue and may decline the below the issue price.

43. *Sale of shares by our promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

The sale of shares by the promoters or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoters. However, the closing of trading windows during the period of financial results may restrict the promoters from selling the shares in the open market.

44. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

45. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

46. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. *Our 100% Revenue is derived from business in India and a decrease in economic growth in India could materially affect and cause our business to suffer.*

We derive 100% of our revenue from our operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed [●] as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market,

performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20.00 to ₹24.00 per share, Issue size of [●] Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription
500	24.00	500	16.67 %
1000	23.00	1500	50.00 %
1500	22.00	3000	100.00 %
2000	21.00	5000	166.67 %
2500	20.00	7500	250.00 %

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

16. In case of termination of the above-mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Book Running Lead Manager to arrange for another Market Make in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of SEBI (ICDR) Regulations, 2018, as amended. According to the Economic Survey 2019-20, micro-irrigation had proven to be a technology that gained popularity among farmers in India. A stronger push and appropriate fund allocation towards the Pradhan Mantri Krishi Sinchayee Yojana has helped the government achieve a coverage of 84.45 lakh hectares under the micro irrigation and 10.52 lakh hectares under other interventions (SWMA) during 2015-2023. Additionally, the government has also set up an online portal for the entire process execution and visibility, encouraging more investments by prospective competitors.

INDIAN PLASTICS INDUSTRY AND EXPORTS

Introduction

The Indian plastic industry is one of the leading sectors in the country's economy. The history of the plastic industry in India dates back to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,500 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw materials, etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics, and tarpaulin. The Government of India intends to take the plastic industry from a current level of Rs. 3 lakh crores (US\$ 37.8 billion) of economic activity to Rs. 10 lakh crores (US\$ 126 billion) in 4-5 years.

10 Plastic Parks have been approved in the country by The Department of Chemicals and Petrochemicals. Among these, six plastic parks have received final approval from the following states –Madhya Pradesh (two parks), Assam (one park), Tamilnadu (one park), Odisha (one park), and Jharkhand (one park). These parks are intended to boost employment and attain environmentally sustainable growth.

EXPORT TREND

In FY24 (Until February 2024), India's plastic exports stood at US\$ 10.43 billion. During this period, the exports of human hair & related products, medical items, plastic pipes and FRP & composites grew by 12.7%, 8.9%, and 13.8%, respectively, over the same period last year.

In February 2024, the exports of Floorcoverings, leathercloth & Laminates witnessed a growth of 19.7%.

The cumulative exports of plastics and related materials during 2022-23 were valued at US\$ 11.96 billion. This was a 10.4% decrease from the 2021-22 exports valued at US\$ 13.35 billion. Plastic raw materials were the largest exported category and constituted 27.76% of the total exports in 2022-23; it recorded a growth of 21.5% over the previous year. Plastic films and sheets were the second largest category, comprising 15.13% of the total exports, but declined by 10.6% over the previous year.

EXPORT DESTINATIONS

India exports plastic to more than 200 countries in the world. The top five consumer and houseware product importing countries are the USA, Germany Japan, the UK, and France. India largely exports plastic and related products to the USA, China, the UAE, the UK, Germany, Italy, Bangladesh, etc. The total value of exports to the USA, the largest consumer of the Indian plastic industry, stood at US\$ 2.31 billion in 2022-23, a decrease of 4.71% YoY. China was the second largest consumer of plastic export products from India and the total value of exports stood at US\$ 690.95 million. The total plastic exports from India to France during 2022-23 was around US\$ 211.4 million. In order to boost exports to France and Europe, PLEXCONCIL collaborated with the Indo-French Chamber in the first quarter of 2021-22. The Minister for Commerce and Industry, Mr. Piyush Goyal, recently urged industry to adopt international standards to help it expand its global footprint. India has recently signed a free-trade agreement with UAE and Australia, which will give the plastics industry new opportunities.

IRRIGATION IN INDIA

Efficient utilization of available water resources is crucial for a country like, India, which shares 17% of the global population with only 2.4% of land and 4% of the water resources. Further, per capita availability in terms of average utilizable water resources, which was 5247 m³ in 1951 (presently 1453 m³) is expected to dwindle down to 1170 m³ by 2050 (CWC, 2015). Agricultural sector alone consumes 80% of the ground water (Harsha, 2017). The declining trend of groundwater level in all parts of the country also indicates that the assured supply of good quality water will become a concern for country's development (Manivannan et al., 2017). The overall efficiency of the flood irrigation

system range between 25-40% (Amarasinghe, 2007). Overall, micro irrigation shows superiority over other traditional irrigation methods in term of water use efficiency, energy saving, yield increase and net return per unit volume of groundwater (Kumar and Palanisami, 2010; Chandrakanth et al., 2013). To meet the food security, income and nutritional needs of the projected population in 2050, the food production in India will have to be almost doubled. The groundwater table can be improved with construction of various artificial conservation practices and improve crop productivity (Paul and Panigarhi, 2016). All these emphasize the need for water conservation and improvement in water-use efficiency to achieve More Crops per Drop. The paper is organized as follows. Firstly, the

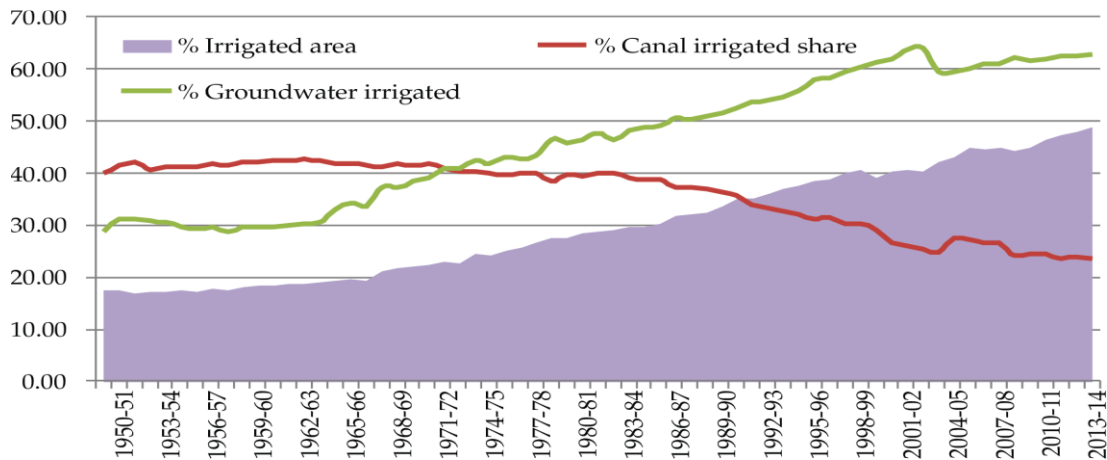

paper presents status of irrigation in India followed by challenges of irrigation systems in India. The paper also highlights various schemes of irrigation and availability of surface and ground water. Lastly, we discuss various options to overcome these challenges, government initiations for efficient water management in agriculture followed by conclusion.

Irrigation is main consumer of fresh water and more than 90 per cent of groundwater draft in India. Growing population coupled with food security has put extra pressure on water resources. Country has reached a situation where the demand of water from various sector of economy is rapidly increasing while the supply of fresh water constant. Additionally, water overuse harms the environment by increased salinity, nutrient pollution, and the degradation and loss of flood plains and wetlands. Owing to poor water resource management system and climate change India faces a persistent water shortage.

Spatial and temporal variation of precipitation has been boundless varying maximum in Cherrapunji (>11000mm) to lowest western Rajasthan (<100 mm). In India, annual precipitation is nearly 4000 BCM and average flow of rivers is estimated to be 1869 BCM. But nearly 75% of rainfall occurs during monsoon season (June-Sept), which restricted utilizable quantum of surface water to 690 BCM. Total annual replenishable groundwater potential in the country estimated to be 433 BCM in which rainfall contribute 74% in groundwater recharge and the rest is contributed by canal, pond and other water conservation practices. With an annual groundwater draft of 253 BCM, irrigation alone consumes nearly 91% of total draft irrigating 62% of total irrigated area of the country (CGWB, 2017). But groundwater development is not uniform across the country.

Net irrigated area (%) of India has increased from nearly 18 to 48% in recent times due to government interventions at various levels (Fig. 1). Although government has given much emphasis on improving canal system in various five-year plans but it has declined over years (Fig. 1). People have identified groundwater irrigation as much reliable and independent source of irrigation. Groundwater irrigation has taken quantum jump since 1965.

Fig. 1

➤ **Government Initiatives on Irrigation Management**

Water Management organizations like Central Water Commission (CWC) for promoting integrated and sustainable development for management of water resources and Central Ground Water Board (CGWB) for management of ground water resources were established. CWC and CGWB have formulated “General Guidelines for Water Audit and Water Conservation”. These guidelines have been circulated to all the state governments, concerned central ministries, and other utilities for framing their own specific guidelines. Following these guidelines, some of the state governments such as Punjab, Gujarat and Maharashtra are offering subsidy on irrigation related aspects.

PRADHAN MANTRI KRISHI SINCHAYEE YOJANA (PMKSY)

Brief Introduction of The Policy

On July 1, 2015, the Pradhan Mantri Krishi Sinchayee Yojana (Pradhan Mantri Krishi Sinchai Yojana) was launched to expand cultivated area with assured irrigation and reduce wastage of water in the country. The scheme focuses on creating sources-protective irrigation by harnessing rainwater at a micro level through 'Jal Sanchay' and 'Jal Sinchan'. Micro irrigation is also incentivised through subsidies to ensure 'Per Drop More Crop'.

Need for the policy

Water or irrigation is the most essential part of agriculture as it determines crop yield and farmer livelihood. Prior to the Pradhan Mantri Krishi Sinchayee Yojana, 54% of the agricultural land in India was unirrigated and farmers depended on rainwater (which is sporadic) for irrigation. Keeping this in mind, Prime Minister Mr. Narendra Modi launched the Pradhan Mantri Krishi Sinchayee Yojana to solve irrigation problems of farmers in the country. The motive of the scheme is to take irrigation water to every agricultural field in the country.

Policy Details

Pradhan Mantri Krishi Sinchayee Yojana has been formed by amalgamating ongoing schemes such as the Accelerated Irrigation Benefit Programme (AIBP), River Development & Ganga Rejuvenation, Integrated Watershed Management Programme (IWMP) and On-farm Water Management (OFWM).

Pradhan Mantri Krishi Sinchayee Yojana is supervised and monitored by an Inter-ministerial National Steering Committee (NSC), which was constituted under the Prime Minister and some Union Ministers. A National Executive Committee (NEC) was constituted under the Vice Chairman of NITI Aayog to oversee programme implementation, resource allocation, inter-ministerial coordination, monitoring & performance assessment, administrative issues, etc.

Objectives of the Pradhan Mantri Krishi Sinchayee Yojana includes the following:

- Achieve convergence of investments in irrigation at the field level (preparation of district-level and if required, subdistrict-level water use plans)
- Enhance physical access of water on the farm and expand cultivable area under assured irrigation (Har Khet ko Pani)
- Integrate water source, distribution, and its efficient use to make the best use of water through appropriate technologies and practices

Accelerated Irrigation Benefits Programme (AIBP)

The AIBP was launched by the central government in 1996 to aid major and mid-sized irrigation projects in India. The objective was to accelerate implementation of projects beyond the resource capability of states or in the advanced stages of completion. After 2015, the AIBP became a part of the Pradhan Mantri Krishi Sinchayee Yojana. Since its inception, 297 irrigation/multi-purpose projects have been included for funding under AIBP. Out of this, 143 projects have been completed and 5 projects were foreclosed. Completion of 60 ongoing major/medium projects

under AIBP and 85 under CAD&WM, has been targeted during 2021-26. Also, funding of two national projects, Lakhwar and Renuka, has also been approved. Through these projects, creation of 13.88 lakh hectare irrigation potential under AIBP and 30.23 lakh cultivable command area coverage under CAD&WM has been anticipated during 2021-26.

Command Area Development & Water Management Programme (CAD&WM)

The main objective of the Command Area Development & Water Management Programme is to enhance utilisation of irrigation potential created and improve agriculture productivity and production on a sustainable basis through integrated and coordinated approach involving multidisciplinary teams. The programme has been restricted to the projects prioritised under the AIBP.

Surface Minor Irrigation (SMI)

Surface Minor Irrigation (SMI) schemes with irrigation potential less than 2,000 hectares are included under the AIBP for providing central assistance. The scheme has been extended to an area covering drought-prone areas, flood-prone areas, tribal, left-wing extremist and the Koraput, Bolangir and Kalahandi (KBK) region of Odisha.

Repair, Renovation & Restoration (RRR) Programme

In India, tanks, ponds, and lakes play an important role in conserving water to meet the various needs of communities. The Ministry of Water Resources launched the Repair, Renovation & Restoration (RRR) scheme for water bodies in 2005. The scheme was sanctioned in respect of 1098 water bodies in 26 districts of 15 States with a target to create 0.78 lakh ha. of additional irrigation potential. Under the programme, 3,341 water bodies have been covered at an estimated cost of Rs. 1,309.16 crore (~US\$ 174.69 million) with culturable command area (CCA) of 3.094 lakh ha. Under the scheme of RRR of water bodies with external assistance, 10887 water bodies have been covered at an estimated cost of Rs. 3,700 crore (~US\$ 493.72 million) with CCA of 8.25 lakh ha. in four states viz. Odisha, Karnataka, Andhra Pradesh, and Tamil Nadu.

Har Khet ko Pani

The Har Khet ko Pani scheme includes creation of new water sources through minor irrigation repair, restoration, and renovation of water bodies; strengthening of the carrying capacity of traditional water sources; construction of rainwater harvesting structures (Jal Sanchay); development of ground water; and improvement of the water management and distribution systems.

Per Drop More Crop

The Per Drop More Crop (PDMC) scheme includes promoting efficient water conveyance and precision water application devices such as drips, sprinklers, pivots and rain guns in farms, constructing micro irrigation structures to supplement source-creation activities including tube wells and dug wells, installing water lifting devices such as diesel/electric/solar pump sets, building capacity training and awareness campaigns including low-cost publications, empowering extension workers to disseminate relevant technologies under the PMKSY only after requisite training is provided to them, especially in the area of promotion of scientific moisture conservation and agronomic measures and information communication technology (ICT) interventions. An area of 83.06 lakh hectare has been covered under micro irrigation in the country under PDMC from 2015-16 to 2023-24 (till December 2023), with an amount of Rs. 18,714.69 crore (~US\$ 2.24 billion) released as a central assistance to the states.

Watershed Development

Watershed development includes management of runoff water and improved soil and moisture- conservation activities such as ridge area treatment, drainage line five treatment, rainwater harvesting, in-situ moisture conservation and other allied activities on watershed basis. During 2015-2023, under Watershed Development component of PMKSY, 14,966 water harvesting structures have been created/ rejuvenated, and an additional area of about 18,033 hectares has been brought under irrigation in West Bengal.

Pradhan Mantri Krishi Sinchayee Yojana - Key Developments

- In October 2020, the Union Minister of State for Waterpower and Social Justice and Empowerment launched a mobile application including information about the work being done under the Pradhan Mantri Krishi Sinchayee Scheme.
- In October 2020, the Assam state government launched the Kisan Rath (fruits & vegetables) mobile application to facilitate timely selling of agricultural products by promoting the buyer-seller network.

Pradhan Mantri Krishi Sinchayee Yojana – Key Investments

- In October 2023, the Cabinet Committee on Economic Affairs, chaired by Prime Minister Mr. Narendra Modi, approved the inclusion of the Jamrani Dam Multipurpose Project in Uttarakhand under the Pradhan Mantri Krishi Sinchayee Yojana-Accelerated Irrigation Benefit Programme (PMKSY-AIBP). The project is estimated to cost Rs. 2,584.10 crore (~US\$ 310.7 million) and will receive central support of Rs. 1,557.18 crore (~US\$ 187.2 million) for completion by March 2028. The project involves constructing a dam across the river Gola, a tributary of the river Ram Ganga, situated in Nainital district. It aims to augment irrigation across 57,065 hectares in Uttarakhand and Uttar Pradesh, along with generating 14 MW of hydro power and providing 42.70 million cubic meters of drinking water to Haldwani and nearby areas.
- In March 2021, the Maharashtra state government allocated Rs. 400 crore (~US\$ 53.37 million) for various irrigation development corporations for completing various irrigation projects under the Pradhan Mantri Krishi Sinchayee Yojana and Baliraja Sanjeevani Yojana.
- In February 2021, the Agriculture and Farmers' Welfare Ministry announced plan to spend half of the budget allocation of Rs. 1,31,531 crore (~US\$ 17.55 billion) on the Pradhan Mantri Krishi Sinchayee Yojana for FY 2021-22.
- In November 2020, the Union Ministry of Agriculture & Farmers Welfare approved subsidised loans worth Rs. 3,971.31 crore (~US\$ 529.93 million) for implementing micro-irrigation projects.
- In June 2020, the Department of Agriculture Cooperation and Farmer's Welfare announced an allotment of Rs. 4,000 crore (~US\$ 533.76 million) to the state government to implement the 'Per Drop More Crop' component under the Pradhan Mantri Krishi Sinchayee Yojana for FY 2020-21.

CONCLUSION

Planning and implementation of irrigation projects to enhance physical access of water on farms lies in the domain of the state governments while central government provides technical and financial assistance for the identified irrigation projects to supplement their efforts under its ongoing schemes. The quantum of central grants released to the states from 2016 to 2023 under different components of PMKSY include:

- Rs. 18,727.78 crore (~US\$ 2.25 billion) under Accelerated Irrigation Benefit Programme (AIBP), which focuses on the simultaneous implementation of Command Area Development (CAD) and Water Management (WM) initiatives.
- Rs. 4,010.32 crore (~US\$ 481.7 million) under Har Khet Ko Pani initiative, which involves the surface minor irrigation and repair, renovation, and restoration of water bodies.
- Rs. 764.89 crore (~US\$ 91.9 million) for the promotion of groundwater development.
- Rs. 18,714.69 crore (US\$ 2.24 billion) under the Per Drop More Crop component, focusing on efficient water usage in agriculture.
- Rs. 9,559.07 crore (~US\$ 1.15 billion) under the watershed development component, essential for sustainable water resource management.

According to the Economic Survey 2019-20, micro-irrigation had proven to be a technology that gained popularity among farmers in India. A stronger push and appropriate fund allocation towards the Pradhan Mantri Krishi Sinchayee Yojana has helped the government achieve a coverage of 84.45 lakh hectares under the micro irrigation

and 10.52 lakh hectares under other interventions (SWMA) during 2015-2023. Additionally, the government has also set up an online portal for the entire process execution and visibility, encouraging more investments by prospective competitors.

HAR GAR JAL SCHEME BY INDIAN GOVERNMENT

To further improve the 'quality of life' and enhanced 'ease of living' in rural areas by making a provision of assured tap water supply to every rural household in the country by 2024, Hon'ble Prime Minister announced Jal Jeevan Mission (JJM) – Har Ghar Jal on 15th August, 2019. Since then, JJM is being implemented in partnership with States.

It is all about assured service delivery in terms of potable tap water supply to every home and public institution like schools, AWCs, ashramshalas, PHC, CHC, community centres, wellness centres, GP building, etc. JJM aims at developing the capacity of local village community to achieve long-term drinking water security.

Given the implementation of the high impact Jal Shakti Schemes across villages, it is planned to launch a campaign to get testimonials from beneficiaries and citizens about these schemes and ways in which they have benefited from them.

MANUFACTURING SECTOR IN INDIA

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub. With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

Market Size

Manufacturing exports have registered their highest ever annual exports of US\$ 447.46 billion with 6.03% growth during FY23 surpassing the previous year (FY22) record exports of US\$ 422 billion. By 2030, Indian middle class is expected to have the second-largest share in global consumption at 17%.

India's gross value added (GVA) at current prices was estimated at US\$ 770.08 billion as per the quarterly estimates of the first quarter of FY24.

India's e-commerce exports are projected to grow from US\$ 1 billion to US\$ 400 billion annually by 2030, aiding in achieving US\$ 2 trillion in total exports.

India's GDP surged by 8.4% in the October-December quarter, surpassing expectations. GDP growth was driven by robust performances in the manufacturing and construction sectors, with the manufacturing sector expanding by 11.6% annually and the construction sector growing by 9.5%.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025-26.

India has potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy.

As per the economic survey reports, estimated employment in manufacturing sector in India was 5.7 crore in 2017-18, 6.12 crore in 2018-19 which was further increased to 6.24 crore in 2019-20. India's display panel market is estimated to grow from ~US\$ 7 billion in 2021 to US\$ 15 billion in 2025.

The manufacturing GVA at current prices was estimated at US\$ 110.48 billion in the first quarter of FY24.

Road Ahead

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury, and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country. The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 3.4 trillion along with a population of 1.48 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH Advanced Manufacturing and Rapid Transformation Hubs. This is expected to increase competitiveness of the manufacturing sector in the capital goods market. With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation.

The corridors would further assist in integrating, monitoring, and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

INDUSTRIAL

HDPE, MDPE and LLDPE are three types of polyethylene pipes, each with distinct properties and applications. Here's a breakdown of their differences:

❖ HDPE Pipes:

- **Density and Structure:** HDPE pipes are made from high-density polyethylene, which has a linear structure with minimal branching. This results in a high-density arrangement of polymer chains.
- **Strength and Durability:** HDPE pipes are known for their strength, durability, and resistance to impact and abrasion. They can withstand high pressure and are resistant to many chemicals.
- **Applications:** Commonly used for water supply, sewage systems, gas distribution, and industrial applications. Due to their robustness, they are also used in mining and civil construction.
- **Temperature Resistance:** Generally suitable for temperatures up to 60°C (140°F).
- **Diameters:** HDPE pipes are available in diameters from 20 mm to 500 mm. This range also includes Sprinkler Pipes specifically designed for agricultural and drip irrigation systems, which come in diameters from 63 mm to 110 mm.

❖ MDPE Pipes:

- **Density and Structure:** MDPE pipes have a density between HDPE and LDPE, with a slightly branched molecular structure. This makes them less dense and more flexible than HDPE but not as strong.
- **Strength and Durability:** MDPE pipes offer good impact resistance and are less rigid compared to HDPE. They are more resistant to stress cracking than LDPE but less so than HDPE.
- **Applications:** Often used for gas distribution and water mains where flexibility and impact resistance are important. They are also used in situations where pipes need to be less rigid.
- **Temperature Resistance:** Suitable for temperatures up to around 60°C (140°F).
- **Diameters:** Available in diameters ranging from 20 mm to 500 mm.

❖ LLDPE Pipes:

- **Density and Structure:** LLDPE pipes have a lower density compared to HDPE, with a more branched molecular structure. This gives them greater flexibility and elongation properties.

- **Strength and Durability:** LLDPE pipes are highly flexible and have good impact resistance, but they are generally not as strong or rigid as HDPE pipes. They also have a good resistance to environmental stress cracking.
- **Applications:** Commonly used for irrigation, drainage, and other applications where flexibility and resistance to punctures are important. They are not typically used for high-pressure applications.
- **Temperature Resistance:** Usually suitable for temperatures up to 50°C (122°F).
- **Diameters:** Includes Lateral Pipes with diameters ranging from 16 mm to 32 mm and Drip Pipes ranging from 12 mm to 16 mm.

KEY STRATEGIES

Expansion of manufacturing facility in Ratlam, Madhya Pradesh:

We are preparing to expand our manufacturing operations at our Ratlam facility by adding two HDPE machines, which will increase our installed capacity by approximately 3400 Metric Tons Per Annum (M.T.P.A.) and one PVC machine with our installed capacity of about 1700 M.T.P.A. We have made the provision of capital expenditure as one of the objects of the present issue.

This enhancement is a strategic move to bolster our production and meet the demand for high-quality, durable pipes. By increasing our output, we aim to effectively cater to the important sectors like agriculture, construction, and infrastructure. This move will not only improve our market position but also show our commitment to providing reliable and efficient piping solutions on a larger scale.

Strategically Expansion:

We are strategically enhancing our production capabilities by adding a total installed capacity of about 1700 M.T.P.A for PVC pipes. By incorporating PVC pipes into our product range, we aim to diversify our portfolio and better address the evolving needs of the market. This initiative not only aligns with our commitment to innovation and growth but also positions us to capture new opportunities in the construction and infrastructure sectors. The new capacity will enable us to deliver high-quality, durable piping solutions to our customers, thereby reinforcing our competitive edge and driving long-term business success.

Expand the Volstar brand to new geographies

We plan to increase sales of our Malpani Pipes products by increasing the number of wholesalers & retailers who stock our products. We plan to expand the sale of our piping products into cities where our products are not currently sold as well as consolidating our position in areas where we already have a strong presence. Our strategy is to focus on increasing the width and depth of our distribution network by increasing the number of wholesalers & retailers.

Our salespersons meet with prospective wholesalers and retailers who do not currently stock our products to encourage them to do so. Our sales persons also meet with wholesalers & retailers in areas where we do not exist to encourage them to stock our products.

Raw Material

For the past two years, we have been importing raw materials (granules) from various locations, including Dubai, Singapore, Belgium, the UK, Vietnam, Switzerland, Ajman (UAE), accounting for 54.42% in FY 2023-24 and 22.31% in FY 2022-23. The remaining raw materials are sourced domestically, with 45.58% in FY 2023-24 and 77.69% in FY 2022-23 coming from Madhya Pradesh, Gujarat, Delhi, Uttarakhand, Maharashtra, and Rajasthan. We use polyethylene polymers/resins to manufacture our products, with prices influenced by fluctuations in crude oil prices, global supply and demand, and import-export regulations. Additionally, the cost in Rupees is impacted by changes in the exchange rate between the Rupee and the U.S. dollar.

Though, there is no conflict of interest between the suppliers of the raw materials and third party service providers and our Company, Promoters, Promoter Group, Key Managerial Personnel, Directors and the Subsidiary/ Group Companies and its directors. We do not have long-term supply agreements for our raw materials and procure them both from domestic sources and international suppliers.

COMPETITION

We face competition from other players in the plastic pipes segment as well as from manufacturers of alternative products to plastic pipes and fittings. The organised segment accounts for a 60-65% share of India's plastic piping industry. However, depending on the plastic piping category, the share of organised players fluctuates accordingly. The success of players in the industry depends on: (i) pan-India presence; (ii) distribution network; (iii) product portfolio; (iv) end-use sectors they cater to and (v) presence in the pipes and fittings segment. Further, organised players' focus on marketing and distribution network expansion and launching innovative and branded products will see their revenue grow faster vis-à-vis the unorganised segment.

Factors such as well-established brand presence, improving operating efficiency, expanding reach and distribution network (and thereby managing selling and distribution expenses) helps determine the profitability of the players. Moreover, raw material cost accounts for 65-70% of operating income. PE, PP and PVC are the key raw materials used, prices of which are dependent on crude oil prices. Therefore, management of raw material cost is also important. Organised players are able to better manage their cost components versus unorganised players and have greater ability to pass on the increase in raw material costs.

Owing to intense competition because of a large number of unorganised players, there has been pressure on revenues and margins of organised players. To mitigate this pressure, one of the strategies adopted by organised players is to expand their fittings capacity. Manufacture of fittings requires higher precision, thereby constraining the unorganised players to enter this space. Because of the specialised product nature, the fittings segment enjoys higher margins. This provides the opportunity for branded players to increase their revenues and margins. Hence, many branded players have aggressively expanded their fittings capacity and launched new products over the years to cater.

Power

Currently, the total power requirement is being met from the M.P. Paschim Kshetra Vidyut Vitaran CO. LTD. from which the Company has a sanctioned load 33 KW.

Water

We require water for manufacturing operations which is extracted from the borewell installed at Company's factory and through tankers by local suppliers.

Transportation

Our products are transported by trucks, though we do not own any vehicles and rely on third-party transporters for logistics. Our logistics team is responsible for selecting transporters and negotiating freight rates. These transporters operate under annual fixed-rate contracts or work orders with specified terms and conditions. Freight rates may fluctuate due to changes in fuel prices. To minimize risk and prevent monopolies, each delivery route typically involves at least two transporters. The use of a sole transporter for any route is subject to the approval of the Head of Department and on a case-by-case basis.

A) BASIS OF PREPARATION OF FINANCIAL STATEMENT

The Restated Statement of Assets and Liabilities (Annexure I) of the company as at March 31, 2024, March 31, 2023 and March 31, 2022, the Restated Statements of Profit and Loss (Annexure II), the Restated Cash Flow Statement (Annexure III) for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 (hereinafter collectively referred to as “**Restated Financial Information**”) have been extracted by the management from the audited financial statements for the March 31, 2024, 2023 and 2022, approved by the respective Board of Directors of the companies.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B) USE OF ESTIMATES

The preparation of financial statements in conformity with Accounting Standards requires the management to make judgments, estimates and assumptions that affect the reported amounts, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Difference between the actual result and estimates are recognized in the period in which they are known/ materialized.

C) ACCOUNTING CONVENTION

The group follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. REVENUE RECOGNITION

Revenue is recognized only when all the significant risks and rewards incident to ownership to the customer, it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operation includes Sales of Goods net of Goods and Services Tax, adjusted for discounts (net) and gain / Loss on corresponding hedged contracts.

Revenue/ Loss from bargain settlement of goods is recognized at the time of settlement of transactions.

Dividend income is recognized when the right to receive payment is established.

Interest Income is recognized on a time proportion basis taking into account the amount outstanding and the interest rate applicable.

All other income and Expenditure are recognized and accounted for on accrual basis.

2. PROPERTY, PLANT & EQUIPMENT'S (TANGIBLE FIXED ASSETS AND DEPRECIATION)

Tangible Assets are stated at cost net of recoverable taxes, trade discounts and rebates and include amounts added on revaluation, less accumulated depreciation and impairment loss, if any. The cost of Tangible Assets comprises its purchase price, borrowing cost and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent expenditures related to an item of Tangible Asset are added to its book value. only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Assets which are not ready for their intended use are disclosed under Capital Work-in- Progress and all the cost relating to such assets are shown under work-in-progress.

Identification of the components of Property, Plant & Equipment's as required under revised AS10 is under process.

DEPRECIATION:

Depreciation on tangible fixed assets is provided on the straight line value Method over the useful lives of assets as prescribed in the schedule II of the Companies Act, 2013. Depreciation for assets purchased sold during a period is proportionately charged. Intangible assets are amortized over their respective individual estimated useful lives on a written down value, commencing from the date the asset is available to the Company for its use.

Depreciation and Amortization methods, useful lives and residual values are reviewed periodically, at each financial year end.

Pursuant to the enactment of Companies Act 2013, the Company has applied the estimated useful lives as specified in Schedule II.

3. IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials and Packing Material - Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- b) Work-in-Progress is valued at raw material cost plus proportionate conversion cost.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale, however due to the nature of the company the own manufactured goods are valued at a Retail Method basis on a consistent basis, however the Trading Goods are valued at the lower of Cost or Net Realizable Value.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

In the restated financial statements, The Company has made provision for payment of Gratuity to its employees, based on the actuarial valuation report obtained from actuarial Valuer.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non- cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such

deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Contingent liabilities are disclosed in the financial statement unless the possibility of outflow is remote. Contingent Liabilities are not provided for and are disclosed by way of notes. Contingent Assets are neither recognized nor disclosed in the financial statements.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. SEGMENT REPORTING

The company operates in a single segment i.e. "Pipes Manufacturing" and hence does not have any additional disclosures to be made under AS - 17 Segment Reporting.

14. EMPLOYEE BENEFITS

The Company has adopted the Accounting Standard 15 (revised 2005) on Employee Benefits during the restated financials period. The disclosure as envisaged under the Accounting Standard is provided hereunder:
