INTERNAL RISKS

1. ***Our Company has been involved in certain legal proceedings/ received few show cause notices, which may have financial implication on the business of our Company***

Our Company is involved in a number of legal proceedings, which are classified under various legal heads, as under:

Sr. No.	Nature of Cases	No. of outstanding cases	Amount involved (in Lacs)
(I) Proceedings against the Company			
1.	Labour Related Cases	5	Not ascertainable
2.	Indirect Tax	1	Not ascertainable
(II) Proceedings by the Company			
3.	Labour cases	2	Not ascertainable

For further details, please see the section titled ***“Outstanding Litigation and Material Developments”*** on page 286 of this Draft Prospectus.

2. ***We have in the past experienced labour unrest and strikes in our factory. Any disruption in labour industry or strikes by our workforce may affect the production capability of our Company.***

Kranti Industries Limited

Our factory is located in Pirangut Pune and our manufacturing activities are labour intensive, and expose us to the risk of various labour related issues. In the year 2013, factory workers union in our factory went on strike for approximately 27 days and during such term, the operations at our factory were disturbed.

Further, our employees are part of trade unions. We have entered into memorandum of settlements with trade union, which is valid until March 31, 2016. The said agreements provides for the terms and conditions of employment including wages and allowance, increments and promotions, incentives, leave, bonus and discipline of the employees. The terms of settlement under this memorandum settlement impose certain obligations on us to provide benefits and perks to our employees, which exceed the statutory requirement imposed on us as employers. We cannot assure that such labour unrest, strikes or lock-outs may not occur in the future. Any stoppages in the operation of our factory in the future may have an adverse impact on the revenues and operations of our Company also we cannot assure you that the memorandum settlement would be renewed on such terms that are economically beneficial or favorable to our Company. Any such event, at our current facilities or at any new facilities that we may commission or acquire in the future, may adversely affect our ability to operate our business and serve our customers and impair our market reputation, which may adversely impact our business and financial condition.

3. Our products are being manufactured from our manufacturing facilities located in Pirangut, Pune Only

We manufacture our products from our manufacturing facilities in Pirangut, Pune, which substantially caters to our domestic demand. We have two manufacturing units adjacent to each other located at Gat No. 267/B/1, Post Pirangut, Pune, Maharashtra having a total area of approximately 4,100 square meters and 2,730 square meters respectively. Any disruption in the operations due to supply of power, fire outages or industrial accidents at this unit could hamper or delay our ability to continue production and servicing. Any disruption or suspension in the production process in this facility can significantly impact our ability to service customer needs and relation with our customers and have a material adverse effect on our business, revenues, reputation, results of operation and financial condition.

4. Our Company does not have any formal long-term arrangements with the suppliers and customers. Any significant variation in the supply & demand may adversely affect the operations and profitability of our Company

We do not have any formal long-term arrangements with our suppliers and customers which obliges them to maintain their business with us. Our ability to maintain close and satisfactory relationships with our suppliers & customers and to consistently provide processing services that meets customer's requirements is important to our business. However, we have entered into a long term purchase and supply agreement with one of our Customers namely New Holland Fiat (I) Pvt. Ltd which accounts for nearly 30% and 34 % of our sales in FY-2014-2015 and for the 7 months period ended October 31, 2015 respectively with respect to purchase of our products. This contract is valid up to September 9, 2016. At the end of the contract period, the same may be renewed for a further period of 3 years or as the parties may mutually decide. Although, till date our customer has not terminated the said agreement yet it cannot be assured that it will not be terminated. In the event, our customer terminates the existing contracts it may affect our Company's business, results of operations and revenues. Also, there is no assurance that the customers and suppliers will continue to supply raw materials to us and these customers will continue to purchase products from us. This could impact the financial performance of our Company and affect our financial condition.

5. We are dependent upon few customers for our business. Any reduction or interruption in the business of a key customer or a substantial decrease in orders placed by a key customer may have an adverse impact on the revenues and operations of our Company

Presently, we supply machined components to few automobile companies and our business is largely dependent on such companies. Our 10 largest customers accounted for about 98.00 % and 97.55% of our total revenue for the period ended October 31, 2015 and year ended March 31, 2015 respectively. Our major customers include John Deere India Pvt. Ltd, New Holland Fiat (I) Pvt. Ltd, Carraro India Pvt. Ltd, Meltwel Scrap Traders, Neosym Industry Limited (Sanaswadi), Meltwel Scrap Traders, Graziano Transmission India Pvt. Ltd, Brembo Brake India Pvt. Ltd, Mahindra & Mahindra Ltd. (Nagpur), Ata Impex Pvt. Ltd etc. We do not have any long term arrangements with all our customers (other than

Kranti Industries Limited

mentioned in Risk Factor No. 5) to purchase our products in the future, at the current prices or at all. The loss of a major customer and/or reduction in any of our key customers' sales, resulting in lower demand for our products and any material delay, cancellation or reduction of orders from any of our key customers would materially affect our business and financial condition. There is no assurance that we will be able to maintain historic levels of business from all the existing customers or to retain all the existing customers, or that we will be able to replace our customer base in a timely manner or at all. In the event our existing customers do not continue to purchase our products, it may affect our revenues and the financial condition of our Company.

6. Our financial condition could be affected if any of the customers of the Company does not honor the payment terms, makes any delay or default in the outstanding payments

Our Company derives a significant portion of income from a limited number of customers. The percentage of sales derived from our company's top 10 customers is 1557.88 and 3317.86 Lacs which are approximately 98.00% each respectively of our total sales for the year period October 31, 2015 and year ended March 31, 2015 respectively. Thus, we are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

7. We derive majority of our income from our customers within India. Therefore, factors that adversely affect the demand for our products in India may adversely affect our business

We have in the past derived and believe that we will continue to derive, a significant portion of our income from our customers within India. In addition, all of our employees are based in India. Consequently, factors that adversely affect the Indian economy or the demand for our products within India, may adversely affect our business and profitability.

8. Any shortage or non-availability of electricity may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition

Our manufacturing process requires a substantial amount of electricity and we depend mainly on state electricity supply for our power. While we have not been affected in the past by any major power interruptions, in the event there is disruption of power supply from the state electricity department, the same could result in an increase in the cost of power and disruption of our manufacturing process which may adversely affect our results of operations.

9. We are subject to strict quality requirements, customer inspections and audits, and any failure to comply with quality standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and prospects

We specialize in manufacturing precision machined components for automotive & its ancillary industries based on technical specifications and designs provided by our customers. Given the nature of our products and the sector in which we operate, we believe that our customers have high standards for product quality and delivery schedules. Adherence to quality standards is a critical factor as a defect in precision machined components manufactured by our Company or failure to comply with the design specifications of our customers may, in turn, lead to the manufacture of faulty products by our OEM and other customers. This may lead to cancellation of supply orders or non-renewal of contracts by our customers. The use of our components, often under extreme conditions, carries an inherent risk of product liability claims arising from personal injury, death or property damage due to equipment failure, work accidents, fire or explosion, if our components are defective or are used incorrectly by our customers (or by their customers, who are the end-users).

Further, any failure to make timely deliveries of products as per our customers' requirements could result in cancellation or non-renewal of purchase orders. While we have put in place strict quality control procedures, we cannot assure you that our products will always be able to satisfy our customers' quality standards. Our quality control procedures may fail to test for all possible conditions of use or identify all defects in the design, engineering or specifications of the components. Any such failure to identify defects could require us to undertake service actions or component recalls. Any defect in our

Kranti Industries Limited

Company's components could also result in customer claims for damages. Any negative publicity regarding our Company, or our products could adversely affect our reputation, our operations and our results from operations.

10. Our inability to successfully diversify our product offerings may adversely affect our growth and negatively impact our profitability

Presently, we primarily manufacture precision machined components for the automotive & and its ancillary industries. We intend to diversify and expand our business operations in accordance with the evolving needs of our customers and our industry. We cannot assure you that the transition of our manufacturing facilities and resources to fulfill production under new product programs will not impact production rates or other operational efficiency measures at our facilities. Further, we cannot assure you that we will succeed in effectively implementing the new technology required in manufacturing new products or that we will be able to recover our investments. Any failure in the development or implementation of our operations is likely to adversely affect our business, results of operations and cash flows.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares and/or debentures, as the case may be.

48. Any future issuance of Equity Shares may dilute the shareholding of the Investor and sales of our Equity Shares by our Promoter or other major shareholders and dilution in net tangible book value may adversely affect the trading price of Equity Shares.

Any future issuance of our Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital held by our Promoters and other shareholders will be locked-in for a period of 1 (one) year and 20% of our post-Issue paid-up capital held by our Promoter will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. For further information relating to such Equity Shares that will be locked-in, please refer to the sub-section titled “**Notes to the Capital Structure**” under the section titled “**Capital Structure**” beginning on page 56 of this Draft Prospectus.

EXTERNAL RISKS

49. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

- The GoI has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is proposed to be effective from April 1, 2016. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.
- Further, the General Anti Avoidance Rules (“GAAR”) are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to offer our products and services at discounted rates. This may affect our business and results of operations.

50. Our failure to successfully adopt IND (AS) may have an adverse effect on the price of the Equity Shares.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”). These “IFRS based/synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India may be required to prepare annual and interim financial statements under IND (AS) in accordance with the roadmap for the convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India (“MCA”), through the press note dated January 22, 2010. The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, the Finance Minister, during the Union Budget speech, 2014, proposed the adoption of IND (AS) by Indian companies from fiscal 2016 on a voluntary basis, and from fiscal 2017 on a mandatory basis. As per the MCA notification dated February 16, 2015, NBFC’s shall not be required to apply the IND (AS) for preparation of its financial statements either voluntarily or mandatorily.

Further, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IND (AS) as applied to our financial statements. In the event that our Company voluntarily decides to adopt IND (AS), there can be no assurance that the adoption of IND (AS) will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND (AS) may have an adverse effect on the trading price of the Equity Shares.

51. Political instability or changes in the Government in India or in the government of the states where we operate could cause us significant adverse effects.

We are incorporated in India and all of our operations, assets and personnel are located in India. Consequently, our performance and the market price and liquidity of our Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The central government has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our businesses, and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in central government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive central governments have pursued policies of economic liberalization and financial sector reforms. However, there can be no assurance that such policies will be continued. A significant change in the central government's policies, in particular, those relating to the banking and finance industry in India, could adversely affect our business, financial condition and results of operations and could cause the price of our Equity Shares to decline.

52. Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

53. Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our capital expenditure plans, business and financial performance.

54. If communal disturbances or riots erupt in India, or if regional hostilities increase, this would adversely affect the Indian economy and our business

Some parts of India have experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. The Asian region has, from time to time, experienced instances of civil unrest and hostilities among neighbouring countries. Since May 1999, military confrontations between countries have occurred in Kashmir. The hostilities between India and its neighbouring countries are particularly threatening because India and certain of its neighbours possess nuclear weapons. Hostilities and tensions may occur in the future and on a wider scale. Also, since 2003, there have been military hostilities and continuing civil unrest and instability in Afghanistan. There has also recently been hostility in the Korean Peninsula. In

July 2006 and November 2008, terrorist attacks in Mumbai resulted in numerous casualties. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares.

55. *The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.*

The occurrence of natural disasters, including tsunamis, cyclones, storms, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition, including in the following respects:

- A natural or man-made disaster could result in damage to our assets or losses in our projects, or the failure of our counterparties to perform, or cause significant volatility in global financial markets.
- Pandemic disease, caused by a virus such as H5N1, the “avian flu” virus, the Ebola virus, or H1N1, the “swine flu” virus, could have a severe adverse effect on our business.
- Political tension, civil unrest, riots, acts of violence, situations of war or terrorist activities may result in disruption of services and may potentially lead to an economic recession and/or impact investor confidence

56. *Future sales of our Equity Shares may negatively affect our Equity Shares*

Future sales of substantial amounts of our Equity Shares in the public market, or even the potential for such sales, could adversely affect the price of our Equity Shares and could impair our ability to raise capital. All of the shares sold in this offering, will be freely tradable without restriction. The Equity Shares owned by our Promoters and other shareholders are subject to lock-in as detailed under the section titled "**Capital Structure**" beginning on page 56 of this Draft Prospectus. We cannot assure you that they will retain ownership of our Equity Shares after the lock-in period following this offering. Sales or distributions by our Promoters or other shareholders of substantial amounts of our Equity Shares in the public market could adversely affect prevailing market prices for our Equity Shares.

57. *Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.*

The Indian securities markets are relatively smaller than securities markets in more developed economies. Indian stock exchanges in the past have experienced substantial fluctuations in the prices of listed securities. These stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

58. *Currency exchange rate fluctuations may affect the value of the Equity Shares.*

The cross currency conversion rate has been volatile in recent years and it may fluctuate substantially in the future. Fluctuation of exchange rate between Indian rupee and other major currencies in the world may affect the value of your investment in our equity shares.

SUMMARY OF INDUSTRY

GLOBAL ECONOMIC OVERVIEW

Global growth declined in the first half of 2015, reflecting a further slowdown in emerging markets and a weaker recovery in advanced economies. It is now projected at 3.1 percent for 2015 as a whole, slightly lower than in 2014, and 0.2 percentage point below the forecasts in the July 2015 World Economic Outlook (WEO) Update. Prospects across the main countries and regions remain uneven. Relative to last year, growth in advanced economies is expected to pick up slightly, while it is projected to decline in emerging market and developing economies. With declining commodity prices, depreciating emerging market currencies, and increasing financial market volatility, downside risks to the outlook have risen, particularly for emerging market and developing economies. Global activity is projected to gather some pace in 2016. In advanced economies, the modest recovery that started in 2014 is projected to strengthen further. In emerging market and developing economies, the outlook is projected to improve in particular, growth in countries in economic distress in 2015 (including Brazil, Russia, and some countries in Latin America and in the Middle East), while remaining weak or negative, is projected to be higher next year, more than offsetting the expected gradual slowdown in China. [*\(Source:-IMF- World Economic Outlook Update October 2015\)*](#)

Advanced Economies

Growth in advanced economies in the first half of 2015 remained modest. For most emerging market economies, external conditions are becoming more difficult. Financial market volatility rose sharply during the summer, with declining commodity prices and downward pressure on many emerging market currencies. Capital inflows have slowed, and the liftoff of U.S. policy rates from the zero lower bound is likely to herald some further tightening of external financial conditions. And while the growth slowdown in China is so far broadly in line with forecasts, its cross-border repercussions appear larger than previously envisaged. This is reflected in weakening commodity prices (especially those for metals) and weak exports to China.

Growth has fallen short of forecasts over the past four years. A comparison of output growth for advanced economies for 2011–14 with the forecast in the April 2011 WEO shows an aggregate over prediction over the horizon of about 1 percentage point. However, the over prediction of employment growth (0.3 percentage point) is much lower. And for a range of economies—including Germany, Japan, Korea, and the United Kingdom— the over prediction of output growth has instead been associated with an under prediction of employment growth. In other words, labor productivity has fallen well short of predictions. Although the recently elevated “employment intensity” of growth has helped reduce unemployment in a number of countries, the low rate of output growth implies that unemployment is still high and that output gaps are sizable in a number of advanced economies. Investments/developments

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. Some of them are as follows:

India has emerged as one of the strongest performers with respect to deals across the world in terms of mergers and acquisitions (M&A). M&A activity increased in 2014 with deals worth US\$ 38.1 billion being concluded, compared to US\$ 28.2 billion in 2013 and US\$ 35.4 billion in 2012. The total transaction value for the month of May 2015 was US\$ 3.3 billion involving a total of 115 transactions. In the M&A space, pharma continues to be the dominant sector amounting to 23 per cent of the total transaction value.

- ❖ India’s Index of Industrial Production (IIP) grew by 4.1 per cent in April 2015 compared to 2.5 per cent in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 per cent in April compared to 2.8 per cent in the previous month.
- ❖ India’s Consumer Price Index (CPI) inflation rate increased to 5.01 per cent in May 2015 compared to 4.87 per cent in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative

at 2.36 per cent for the seventh consecutive month in May 2015 as against negative 2.65 per cent in the previous month, led by low crude oil prices.

- ❖ India's consumer confidence continues to remain highest globally for the fourth quarter in a row, riding on positive economic environment and lower inflation. According to Nielsen's findings, India's consumer confidence score in the first quarter of 2015 increased by one point from the previous quarter (Q4 of 2014). With a score of 130 in the first quarter (2015), India's consumer confidence score is up by nine points from the corresponding period of the previous year (Q1 of 2014) when it stood at 121.
- ❖ India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 per cent of GDP) in the fourth quarter of 2015 compared to US\$ 8.3 billion (1.6 per cent of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 per cent quarter-on-quarter basis.
- ❖ India's foreign exchange reserve stood at a record high of US\$ 354.28 billion in the week up to June 12, 2015 – indicating an increase of US\$ 1.57 billion compared to previous week.
- ❖ Owing to increased investor confidence, net Foreign Direct Investment (FDI) inflows touched a record high of US\$ 34.9 billion in 2015 compared to US\$ 21.6 billion in the previous fiscal year, according to a Nomura report. The report indicated that the net FDI inflows reached to 1.7 per cent of the GDP in 2015 from 1.1 per cent in the previous fiscal year. Indian Automotive and Auto Component Industry

Introduction

The automotive industry in India is one of the main pillars of the economy. With strong backward and forward linkages, it is a key driver of growth. Liberalization and conscious policy interventions over the past few years created a vibrant, competitive market, and brought several new players, resulting in capacity expansion in automobile industry and generation of huge employment. (Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in)

The contribution of this sector to the National GDP rose from 2.77% in 1992-93 to about 7.1% now. It provides direct and indirect employment to over 19 million people. India is fast turning into a global automotive hub. The sector has displayed an uneven growth trajectory over the last few years, with a slow-down in 2007-08, then showing marginal recovery, both in terms of sales as well as in production next year that led to a dramatic increase of 25-27% in 2009-10 and 2010-13. However, for the last two financial years in continuation, the industry has gone into recession. Barring the scooter/two wheelers segment, each and every other vehicle segment showed negative growth in the year 2013-14, commercial vehicles being the most effected with 21%

growth in production and passenger vehicles showing a growth of 4.6% indicating reduced demand among the common people who would have aspired to buy a passenger car. Even commercial passenger carriers have shown negative growth in production to the tune of 19.86% directly impacting the growth of public transportation. After a capacity creation of ₹22 billion in 2011-12, the automotive industry is now suffering from excess capacity and suppressed demand leading to lay-offs. Some of the areas causing distress in the automotive sector are: slowdown in economic growth, high cost of vehicle finance, high interest rates, high fuel prices, high inflation and negative market sentiments, increase in the commodity prices, high customs duty on alloy steel, aluminium alloy and secondary aluminium alloy, high rate of service tax and excise duty, high and varied rate of road taxes in the states or low growth of export markets. (Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in)

Ministry of Heavy Industries and Public Enterprises has been consistently taking up the matter of providing some kind of stimulus package with prompt fiscal and other measures to put the industry back on track. As a result, in the interim budget for the year 2014-15, reduction in excise duty in case of cars, two wheelers and truck chassis was announced. Further, some other measures are urgently required to be taken, such as, removal of customs duty of raw materials such as steel or aluminium, revisit of CENVAT rules, review of import policy, duty draw back schemes, excise and customs rules, direct tax benefit to promote automotive R&D, and, above all, containing inflation and control of interest rates to make loans more affordable to the people. Immediate steps are required so that the Indian Auto Industry once again becomes the engine of growth of the Indian manufacturing sector. (Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in)

Kranti Industries Limited

The Indian auto industry is one of the largest in the world with an annual production of 23.37 million vehicles in Financial Year 2015, following a growth of 8.68% over the last year, while contributing to 7.1% of the country's gross domestic product.

An expanding middle class, a young population, and an increasing interest of the companies in exploring the rural markets have made the two wheelers segment (with 81% market share) the leader of the Indian automobile market. The overall passenger vehicle segment has 13% market share. India is also a substantial auto exporter, with solid export growth expectations for the near future. In Financial Year 2015, automobile exports grew by 5% over the last year. Various initiatives by the Government of India and the major automobile players in the Indian market is expected to make India a leader in the Two Wheeler and Four Wheeler market in the world by 2020. (Source: India Brand Equity Foundation, www.ibef.org)

AUTO- COMPONENT INDUSTRY

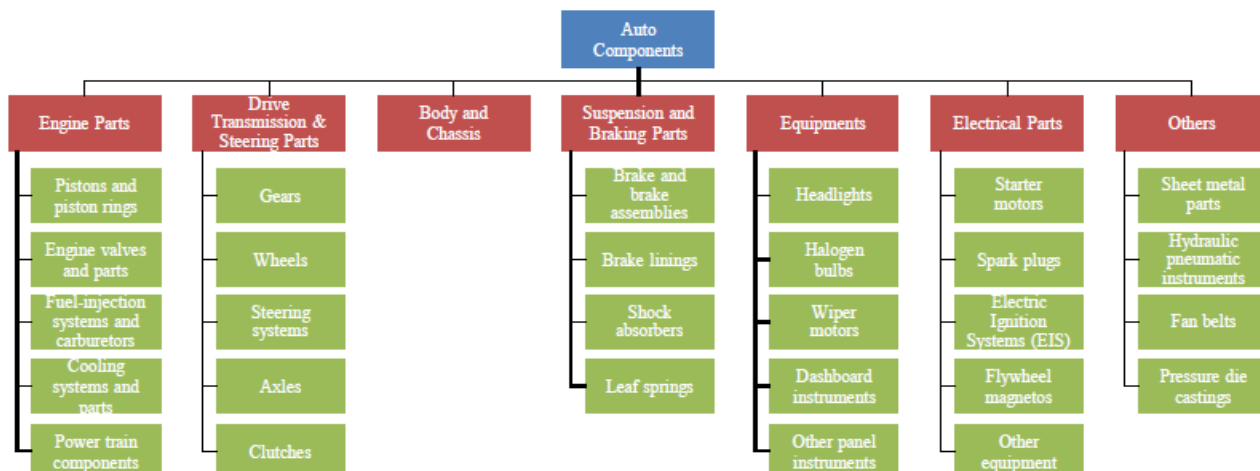

Introduction

India is becoming an emerging global hub for sourcing auto components. It is geographically closer to key automotive markets like the ASEAN, Japan, Korea and Europe and is the fourth largest producer of steel in the world and is slated to become the second largest steel producer by 2015. The cost of making steel is significantly lower than competitive nations. Several global Tier I suppliers have announced plans to increase procurement from their Indian subsidiaries.

The Indian auto-components industry has experienced healthy growth over the last few years. Some of the factors attributable to this include: a buoyant end-user market, improved consumer sentiment and return of adequate liquidity in the financial system.

The auto-components industry accounts for almost seven per cent of India's Gross Domestic Product (GDP) and employs as many as 19 million people, both directly and indirectly. A stable government framework, increased purchasing power, large domestic market, and an ever increasing development in infrastructure have made India a favorable destination for investment. (Source:- <http://www.ibef.org/industry/autocomponents-india.aspx>)

The Indian auto Industry can be broadly divided into 6 major categories (as detailed in the chart below) each category requiring different level of technical and manufacturing capabilities which differ vastly, so does the industry landscape for each product category.

GLOBAL ECONOMIC OVERVIEW

Global growth declined in the first half of 2015, reflecting a further slowdown in emerging markets and a weaker recovery in advanced economies. It is now projected at 3.1 percent for 2015 as a whole, slightly lower than in 2014, and 0.2 percentage point below the forecasts in the July 2015 World Economic Outlook (WEO) Update. Prospects across the main countries and regions remain uneven. Relative to last year, growth in advanced economies is expected to pick up slightly, while it is projected to decline in emerging market and developing economies. With declining commodity prices, depreciating emerging market currencies, and increasing financial market volatility, downside risks to the outlook have risen, particularly for emerging market and developing economies. Global activity is projected to gather some pace in 2016. In advanced economies, the modest recovery that started in 2014 is projected to strengthen further. In emerging market and developing economies, the outlook is projected to improve in particular, growth in countries in economic distress in 2015 (including Brazil, Russia, and some countries in Latin America and in the Middle East), while remaining weak or negative, is projected to be higher next year, more than offsetting the expected gradual slowdown in China. [*\(Source:-IMF- World Economic Outlook Update October 2015\)*](#)

Advanced Economies

Growth in advanced economies in the first half of 2015 remained modest. For most emerging market economies, external conditions are becoming more difficult. Financial market volatility rose sharply during the summer, with declining commodity prices and downward pressure on many emerging market currencies. Capital inflows have slowed, and the liftoff of U.S. policy rates from the zero lower bound is likely to herald some further tightening of external financial conditions. And while the growth slowdown in China is so far broadly in line with forecasts, its cross-border repercussions appear larger than previously envisaged. This is reflected in weakening commodity prices (especially those for metals) and weak exports to China.

Growth has fallen short of forecasts over the past four years. A comparison of output growth for advanced economies for 2011–14 with the forecast in the April 2011 WEO shows an aggregate over prediction over the horizon of about 1 percentage point. However, the over prediction of employment growth (0.3 percentage point) is much lower. And for a range of economies—including Germany, Japan, Korea, and the United Kingdom— the over prediction of output growth has instead been associated with an under prediction of employment growth. In other words, labor productivity has fallen well short of predictions. Although the recently elevated “employment intensity” of growth has helped reduce unemployment in a number of countries, the low rate of output growth implies that unemployment is still high and that output gaps are sizable in a number of advanced economies. [*\(Source:-IMF- World Economic Outlook Update October 2015\)*](#)

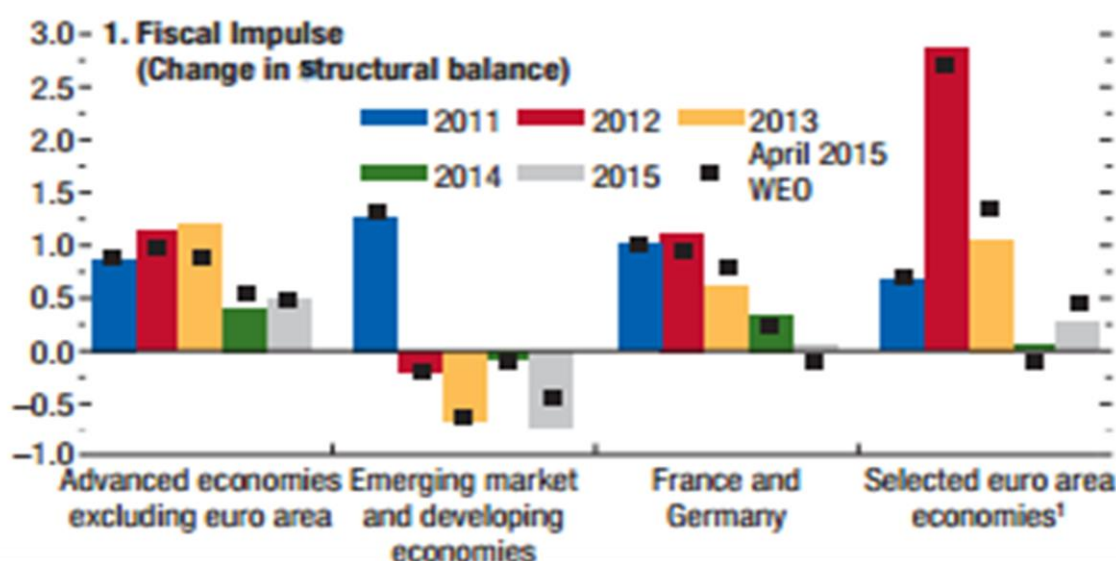

Emerging Markets and Developing Economies

After a strong rebound to almost 7½ percent after the global financial crisis, real GDP growth in emerging market and developing economies decreased from about 6.3 percent in 2011 to 4.6 percent in 2014. In 2015, it is projected to decline further to 4 percent. With this decline, growth for the entire group in 2014 was about 1 percentage point below the average growth recorded during 1995–2007.

Larger deviations from the average in the major emerging market economies heavily influenced these outcomes for the group, which are calculated using GDP weights. And among emerging market and developing economies, the slowdown has not been universal—for almost 40 percent of them; growth in 2011–14 was above the 1995–2007 average of 0.3.

Against the backdrop of such variation, it should not come as a surprise that slightly more than half of the variation in the 2011–14 change in growth in emerging market and developing economies appears to have resulted from country-specific factors.

Changes in growth in all partner countries seem to have been a more relevant factor than changes in partner advanced economies only, perhaps a reflection of increased trade within the group of emerging market and developing economies. Fiscal consolidation is projected to moderate in advanced economies over the forecast horizon Figure below. In emerging markets, the fiscal policy stance is projected to turn more expansionary to offset the slowdown. On the monetary policy front, U.S. policy rates are expected to increase beginning in late 2015. Monetary policy normalization in the United Kingdom is projected to begin in 2016 (consistent with market expectations). [\(Source: - IMF- World Economic Outlook Update October 2015\)](#)

Government Initiatives

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Currently, the manufacturing sector in India contributes over 15 per cent of the GDP. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP. Following the government's initiatives several plans for investment have been undertaken which are as follows:

Indian Automotive and Auto Component Industry

Introduction

The automotive industry in India is one of the main pillars of the economy. With strong backward and forward linkages, it is a key driver of growth. Liberalization and conscious policy interventions over the past few years created a vibrant, competitive market, and brought several new players, resulting in capacity expansion in automobile industry and generation of huge employment. (*Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in*)

The contribution of this sector to the National GDP rose from 2.77% in 1992-93 to about 7.1% now. It provides direct and indirect employment to over 19 million people. India is fast turning into a global automotive hub. The sector has displayed an uneven growth trajectory over the last few years, with a slow-down in 2007-08, then showing marginal recovery, both in terms of sales as well as in production next year that led to a dramatic increase of 25-27% in 2009-10 and 2010-13. However, for the last two financial years in continuation, the industry has gone into recession. Barring the scooter/two wheelers segment, each and every other vehicle segment showed negative growth in the year 2013-14, commercial vehicles being the most effected with 21%

growth in production and passenger vehicles showing a growth of 4.6% indicating reduced demand among the common people who would have aspired to buy a passenger car. Even commercial passenger carriers have shown negative growth in production to the tune of 19.86% directly impacting the growth of public transportation. After a capacity creation of ₹22 billion in 2011-12, the automotive industry is now suffering from excess capacity and suppressed demand leading to lay-offs. Some of the areas causing distress in the automotive sector are: slowdown in economic growth, high cost of vehicle finance, high interest rates, high fuel prices, high inflation and negative market sentiments, increase in the commodity prices, high customs duty on alloy steel, aluminium alloy and secondary aluminium alloy, high rate of service tax and excise duty, high and varied rate of road taxes in the states or low growth of export markets. (Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in)

Ministry of Heavy Industries and Public Enterprises has been consistently taking up the matter of providing some kind of stimulus package with prompt fiscal and other measures to put the industry back on track. As a result, in the interim budget for the year 2014-15, reduction in excise duty in case of cars, two wheelers and truck chassis was announced. Further, some other measures are urgently required to be taken, such as, removal of customs duty of raw materials such as steel or aluminium, revisit of CENVAT rules, review of import policy, duty draw back schemes, excise and customs rules, direct tax benefit to promote automotive R&D, and, above all, containing inflation and control of interest rates to make loans more affordable to the people. Immediate steps are required so that the Indian Auto Industry once again becomes the engine of growth of the Indian manufacturing sector. (Source: Department of Heavy Industry, Ministry of Heavy Industries & Public Enterprises, Government of India, www.dhi.nic.in)

The Indian auto industry is one of the largest in the world with an annual production of 23.37 million vehicles in Financial Year 2015, following a growth of 8.68% over the last year, while contributing to 7.1% of the country's gross domestic product.

An expanding middle class, a young population, and an increasing interest of the companies in exploring the rural markets have made the two wheelers segment (with 81% market share) the leader of the Indian automobile market. The overall passenger vehicle segment has 13% market share. India is also a substantial auto exporter, with solid export growth expectations for the near future. In Financial Year 2015, automobile exports grew by 5% over the last year. Various initiatives by the Government of India and the major automobile players in the Indian market is expected to make India a leader in the Two Wheeler and Four Wheeler market in the world by 2020. In April-July 2015, overall automobile exports increased 8.6% year-on-year. Passenger Vehicles, Commercial Vehicles, Three Wheelers and Two Wheelers reported increase of 2.94%, 24.37%, 28.96% and 6.33% respectively during the period. (Source: India Brand Equity Foundation, <http://www.ibef.org/industry/indiaautomobiles.aspx>)

Investments

To match production with demand, many automakers have started to invest heavily in various segments in the industry in the last few months. The industry has attracted foreign direct FDI worth USD 13.48 billion during the period April 2000 to June 2015, according to the data released by Department of Industrial Policy and Promotion. (Source: India Brand Equity Foundation, www.ibef.org)

Government Initiatives

The Government of India encourages foreign investment in the automobile sector and allows 100% FDI under the automatic route. Excise duty on small cars, scooters, motorcycles and commercial vehicles was reduced in February last year from 12% to 8% to boost the 'Make in India' initiative of the Indian government.

Some of the major initiatives taken by the Government of India are:

- (a) Promotion of eco-friendly cars in the country i.e. CNG based vehicle, hybrid vehicle, electric vehicle and also made mandatory of 5% ethanol blending in petrol.
- (b) The government has formulated a Scheme for Faster Adoption and Manufacturing of Electric and Hybrid Vehicles in India, under the National Electric Mobility Mission 2020 to encourage the progressive induction of reliable, affordable and efficient electric and hybrid vehicles in the country.
- (c) The Automobile Mission Plan for the period 2006–2016, designed by the government is aimed at accelerating and sustaining growth in this sector. Also, the well-established Regulatory Framework under the Ministry of Shipping, Road Transport and Highways, plays a part in providing a boost to this sector.
- (d) In the Union budget of 2015-16, the Government has announced to provide credit of ₹850,000 crores (US\$ 127.6 billion) to farmers, to boost the tractors segment. (Source: India Brand Equity Foundation, www.ibef.org)

Road Ahead

The vision of Automobile Mission Plan 2006-2016 sees India, "to emerge as the destination of choice in the world for design and manufacture of automobiles and auto components with output reaching a level of USD 145 billion; accounting for more than 10% of the GDP and providing additional employment to 25 million people by 2016." The Japanese automaker Maruti Suzuki expects the Indian passenger car market to reach four million units by 2020, up from 1.8 million units in 2013-14. (Source: India Brand Equity Foundation, www.ibef.org)

The automobile industry in India is expected to be the world's third largest by 2016, with the country currently being the world's second largest two-wheeler manufacturer. Two-wheeler production is projected to rise from 18.5 million in Financial Year 2015 to 34 million by Financial Year 2020. Furthermore, passenger vehicle production is expected to increase to 10 million in Financial Year 2020 from 3.2 million in Financial Year 2015. (Source: India Brand Equity Foundation, www.ibef.org)

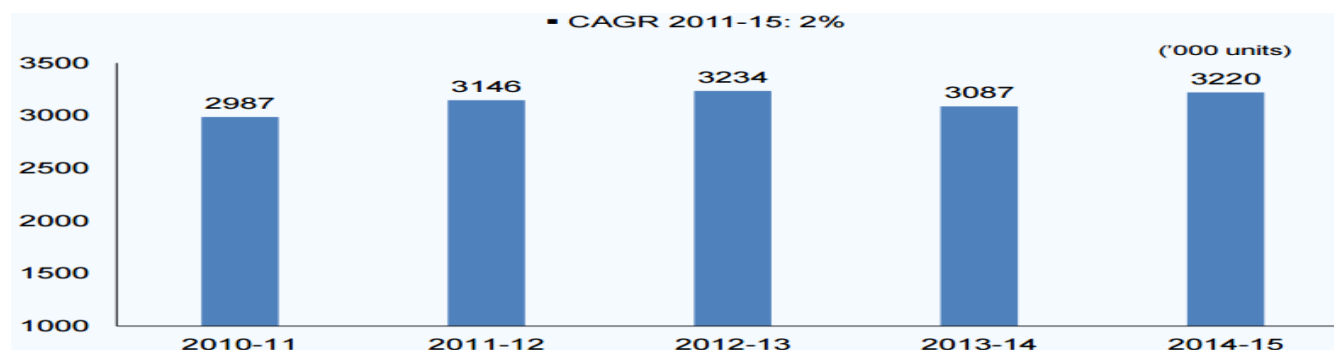

Automobile exports grew at a CAGR of 14.65% during 2010-15. Passenger Vehicles, Commercial Vehicles, Three Wheelers and Two Wheelers grew by 6.89%, 13.77%, 18.69% and 16.60% CAGR during 2010-15. Two wheelers accounted for the largest share of exports at 69.4% in Financial Year 2015. Passenger vehicles comprised a sizeable 16.7% of overall exports. Exports of three wheeler vehicles registered around 11.1% share in exports in Financial Year 2015. (Source: India Brand Equity Foundation, www.ibef.org)

The government aims to develop India as a global manufacturing as well as a R&D hub. It has set up National Automotive Testing and R&D Infrastructure Project (NATRIP) centres as well as a National Automotive Board to act as facilitator between the government and the industry. Alternative fuel has the potential to provide for the country's energy demand in the auto sector as the CNG distribution network in India is expected to rise to 250 cities in 2018 from 125 cities in 2014. Also, the luxury car market could register high growth and is expected to reach 150,000 units by 2020. (Source: India Brand Equity Foundation, www.ibef.org)

The automotive sector is expected to generate up to USD 300 billion in annual revenue by 2026, contributing over 12% to the nation's gross domestic product and creating 65 million more jobs, shows a document prepared jointly by the industry and government. The Automobile Mission Plan 2006-2016 projects India's automotive industry to grow to over 70 million units a year by 2026, taking it into the league of China and the US. The Automobile Mission Plan is aimed at mapping the progress of the country's automobile industry and setting its goals over the next decade. AUTO- COMPONENT INDUSTRY

Introduction

India is becoming an emerging global hub for sourcing auto components. It is geographically closer to key automotive markets like the ASEAN, Japan, Korea and Europe and is the fourth largest producer of steel in the world and is slated to become the second largest steel producer by 2015. The cost of making steel is significantly lower than competitive nations. Several global Tier I suppliers have announced plans to increase procurement from their Indian subsidiaries.

The Indian auto-components industry has experienced healthy growth over the last few years. Some of the factors attributable to this include: a buoyant end-user market, improved consumer sentiment and return of adequate liquidity in the financial system.

The auto-components industry accounts for almost seven per cent of India's Gross Domestic Product (GDP) and employs as many as 19 million people, both directly and indirectly. A stable government framework, increased purchasing power, large domestic market, and an ever increasing development in infrastructure have made India a favorable destination for investment. (Source:- <http://www.ibef.org/industry/autocomponents-india.aspx>)

The Indian auto Industry can be broadly divided into 6 major categories (as detailed in the chart below) each category requiring different level of technical and manufacturing capabilities which differ vastly, so does the industry landscape for each product category.

(Source: India Brand Equity Foundation, www.ibef.org)

Market Size

The Indian auto-components industry can be broadly classified into the organised and unorganised sectors. The organised sector caters to the Original Equipment Manufacturers (OEMs) and consists of high-value precision instruments while the unorganised sector comprises low-valued products and caters mostly to the aftermarket category.

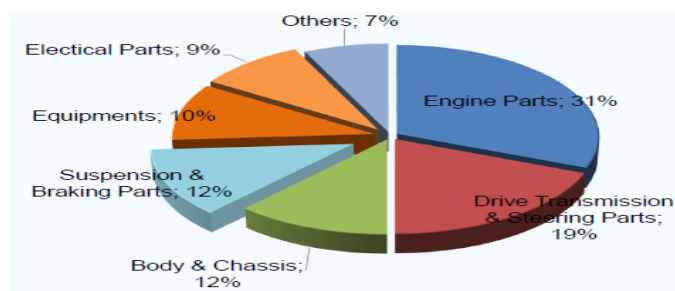

Revenues of the Indian auto-components industry grew by 11 per cent over the past year to Rs 2.34 lakh crore (US\$ 34.7 billion) in FY 14-15. This growth was primarily driven by healthy recovery for major Original Equipment Manufacturers (OEMs) in the medium and heavy commercial vehicles (M&HCV) and Passenger Vehicle (PV) segment.

According to the Automotive Component Manufacturers Association of India (ACMA), the Indian auto-components industry is expected to register a turnover of US\$ 66 billion by FY 15-16 with the likelihood to touch US\$ 115 billion by FY 20-21 and US\$ 200 billion by 2026. In addition, industry exports are projected to reach US\$ 12 billion by FY 15-16

and add up to US\$ 30 billion by FY20–21, further rising to US\$ 80 billion by 2026. The sector's contribution to manufacturing GDP is expected to double from 5 per cent in 2015 to 10 per cent in 2026. (Source:- <http://www.ibef.org/industry/autocomponents-india.aspx>)

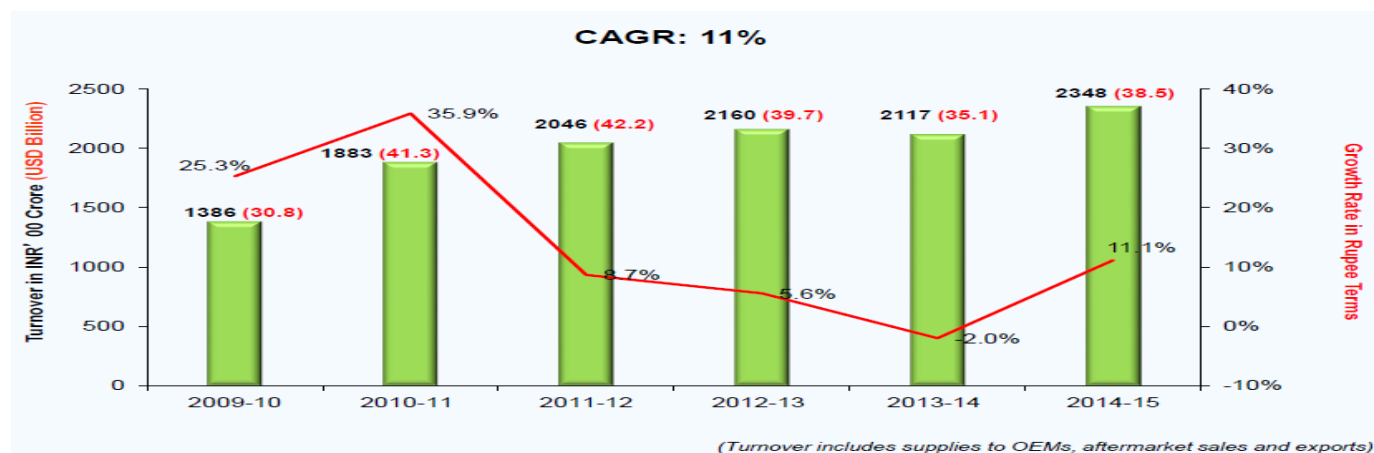

Product Range

The Indian auto components industry offers a comprehensive product range, consisting of approximately 20,000 components required for vehicle manufacturing. The entire product range is grouped into seven categories.

Challenges

(Source: - www.acma.in)

Government Initiatives

The Government of India's Automotive Mission Plan (AMP) 2006–2016 has come a long way in ensuring the growth of this sector in the global market. It is expected that this sector's contribution to the GDP will double reaching a turnover of US\$ 145 billion in 2016 due to the government's special focus on exports of small cars, multi-utility vehicles (MUVs), two and three-wheelers and auto components. Also, the deregulation of FDI in this sector has helped foreign companies to invest huge amounts in India. (Source: - <http://www.ibef.org/industry/autocomponents-india.aspx>)

Road Ahead

The rapidly globalizing world is opening new avenues for the transportation industry, generating the need for more efficient, safe and reliable modes of transportation, which is subsequently adding to the auto component industry's growing opportunities. According to a report by the Confederation of Indian Industry (CII), the Indian auto component industry is set to become the third largest in the world by 2025. Also, by that time, newer verticals and opportunities for component manufacturers will open up as the automobile market will shift towards electric, electronic and hybrid cars and newer technologies will have to be adopted via systematic research and development.

Indian auto component makers are well positioned to benefit from the globalisation of the sector as exports potential could be increased by up to four times to US\$ 40 billion by 2020. (Source:- <http://www.ibef.org/industry/autocomponents-india.aspx>)

Additionally, most of our machinery with certain modification is capable of being used interchangeably for either of our sectors, depending on the demand for such products. We have and may have dedicated production lines based on the size and frequency of the orders of our customers.

Typically, our manufacturing process consists of machining inspection and assembly (if any). The production process may be diagrammatically explained in the following manner:

The process undergone in the manufacturing of precision machined components is briefly described hereunder:

Drawings/Enquiries

Our manufacturing activities start after receipt of Drawings / Enquiries from our customer. Initial Feasibility study is done and commercials are submitted.

Tooling

Once Process is finalized then all the necessary tooling / work holding are procured / manufactured. Machines are assigned to each component, based on process chart, process timings and the volumes required. Once all Tooling / work holding are received “Machining Cutting Program” is prepared and set on the machine for that process / operation & then tooling are checked and loaded into the machine before the production is started.

Proof Machining/ Semi Finish Machining/ Finish Machining

Machining is a combination of various processes in which a piece of raw material is cut into a desired final shape and size by a controlled material-removal process.

Once Raw material is received the parts are loaded in work holding and processed as per pre-designed process flow. Some parts may be completed in single process & some products may have to follow sequence of process. At every stage all the required parameters are controlled as per pre-defined norms.

The key to our success is continuous supervision on the process and ensure maximum productivity. Our team of experienced supervisors and managers with a backup of vast experience of our Promoters execute this activity effectively and efficiently.

Our machining setup is having a flexibility and inter-changeability to address the sudden changes in the requirements of our customers.

Inspection/ Supervision

Process inspection is carried out at a pre-defined frequency during various stages with the help of gauges and CMM (Coordinate Measuring Machine) to ensure the accuracy of the part as per the customer requirements and specifications. Parts / Components are inspected visually for visual defects and necessary actions are taken.

Various types of Audits like Dock Audit, Process Audit, and System Audits are carried out at regular intervals to have a control on the process and to ensure continuous process improvements to increase the profitability.

Pre Dispatch inspection

Before packaging the material parts are verified by our efficient Quality Assurance Team as per the pre-defined frequency and then it is approved for dispatch.

Packaging & Dispatch

Parts approved in PDI are packed as per agreed packaging norms / standards & material is dispatched as per necessary challan / invoice.

Process Innovation

In our constant endeavor to meet our customer's requirements and to improve our quality and process efficiency, innovation in the manufacturing process plays a key role. As we expand our customer base and our geographic reach, we continue to focus on operational efficiency through the effective use of technology and quality assurance. We substituted the use of a series of conventional machines to special purpose machines, which can accommodate several operations. This process innovation n eliminated multiple operations, leading to productivity improvement, reduction of man power and operational costs and most importantly, ensuring consistency in quality of the product.

We believe that using appropriate technology alongside new or modern technology for our products will improve our performance and efficiency. Our aim is to utilize present experience of the workforce; process and innovation in developing more value added components. We constantly review, re-consider and implement our ideas and innovations, which is essential for the growth of the business.

Marketing and Selling Arrangements

Since we are into customized products we do not require any dedicated marketing and selling arrangements. However, we have an internal customer correspondence team which is closely associated with our customers and take care of all day to day correspondence and requirements of existing as well as new probable customers. This team is headed by the Promoters of the Company.

Infrastructure Facilities

Raw Materials:

The principal raw materials used by us is ferrous as well as non-ferrous castings, in addition to this we also manufacture components from bars and forgings. We procure these castings from from well-known suppliers in the industry and are approved by our customers. In addition to this we require work holding fixtures and clamping fixtures to hold the parts into the machines. These fixtures are conceptually designed by us and we get these manufactured from our suppliers.

The main utilities required for our manufacturing activities are:

Power: The requirement of power for our operations is met through Maharashtra State Electricity Distribution Board Ltd. We have two different meters for both the units located at Pirangut Pune.

Electricity	Consumer No.	Sanction Load	Unit Of Measurement
MSEDCL	182859034550	700	KWH
MSEDCL	182859049880	400	KWH

In addition to above arrangement, our company has Two D.G. (Diesel Generator) sets of 250 KVA each in unit I and one D.G. (Diesel Generator) set of 250 KVA in Unit II as a standby arrangement. Our fuel requirement for running DG set is 25 Litres/ Hr and 15 Litres/ Hr respectively.

Fuel: There is no requirement of any hazardous fuel for manufacturing our products. However fuel is required only for the Generators, which is sourced from the local source available nearby.

Water: Water required for the manufacturing and allied process is procured through the existing water supply network in that area.

Effluent Treatment: Our Company does not generate any industrial effluents which is hazardous to the environment.

Sewage Treatment: We have a Sewage Treatment Plant installed inside our premises, which treats the sewage water and the same treated water is reused for gardening and other application wherever suitable.

Competition

Our Industry is fragmented consisting of large established players and small niche players. We compete with organized as well as unorganized sector on the basis of availability of product, product quality and product range. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Industry is very competitive and we expect competition to continue and likely to increase in the future.

We believe that our competitors are Precision Machine & Auto Components (P) Ltd. - Chennai, Victory Precisions Pvt. Ltd. - Chakan, Seinumero Engg.,-Shindewadi and Yash Industries – Kuruli, Chakan etc.

Capacity and Capacity Utilizations:

Due to the nature of business and industry in which the Company operates it is difficult to ascertain the exact capacity utilization since the same machineries are used to manufacture various types of products of different dimensions.

Quality control, certifications and accreditations

In the precision components manufacturing industry, adherence to quality standards is a critical factor as any defects in any of the products manufactured by us, or failure to comply with the design specifications of our customers, may lead to cancellation of the purchase order placed by our customers and further loss of reputation. In order to maintain the quality standards and comply with the design specifications provided by our customers, we follow a stringent quality control mechanism. At each stage of the manufacturing process, the components are checked by our operators, to ensure there is no defect from the previous stage operator.

As a result of our quality assurance efforts over the years, our manufacturing units have received ISO 9001:2008 certification from Kiwa Cermet Italia and ISO/TS 16949:2009 from CERMET.

Additionally, the Central Excise Tariff Act, 1985 (**CETA**) prescribes the rates of excise duties for various goods. Excise duty is imposed on goods produced or manufactured in India under the provisions of CETA. The Central Excise Rules, 2002 provides the manner of payment of the central excise duty as well as the rebate and remission provisions.

It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. “Specific performance” means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP, issued D/o IPP F. No. 5(1)/2015-FC-1 dated May 12, 2015 (“FDI Policy”), which with effect from May 12, 2015, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on May 11, 2015. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and transfer does not attract the provisions of the Takeovers Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
