**2. *Termination or non-renewal of Distribution Agreements or any material modification to the existing terms under such agreements adverse to our interest will materially and adversely affect our ability to continue our business and operations and our future financial performance.***

Our Company is engaged in the business of distribution of IT products and telecom products. Our Company has partnered with certain brands for distribution of products in India specializing in IT and telecom products. Pursuant to our distribution arrangements, we have been granted the right to market and sell their products via distribution model for various licensed territories as mentioned in separate agreements entered. The Distribution Agreements with various partners may be renewed, at the discretion of partners, for successive terms as mentioned in respective agreements.

Under the Agreements entered, the partners are entitled to unilaterally terminate such agreements by providing written notice. Additionally, under certain of the Agreements, certain of the partners also have the right to unilaterally terminate such agreements with immediate effect.

In the event that our partners exercise their right to terminate these agreements whether on the occurrence of any such aforesaid events or otherwise, or, on expiry of the term of such agreements, or in the event the partners are unwilling to renew such agreements or imposes terms less favorable to us than existing terms, it may materially and adversely affect our ability to carry on our business operations and our future financial performance.

In addition, our agreements may be on a non-exclusive basis and the partners are entitled to undertake the production, distribution or sale of the products and brand either themselves or appoint other third-party franchisees for these territories and sub-territories licensed to us. Although our partners has in the past renewed such agreements in our favour, and also granted distribution for additional territories and sub-territories to us, there can be no assurance that in the future the partners will not terminate or discontinue our arrangements for cause, including any failure by us to meet performance standards or any breach by us of applicable terms and conditions under such agreements, or without cause, and undertake distribution activities directly or through other franchisees in our licensed territories and sub-territories.

**3. *We rely significantly on third parties for manufacturing products of our Company.***

We rely significantly on certain third parties for manufacturing products for our Company which we sell under our brand name "Foxin". Any decline in the quality of products manufactured or delay in delivery of products by such parties, or rise in job work charges may adversely affect our operations. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such manufacturers or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. We are also required to ensure that the manufacturer holds the requisite approvals for manufacturing the products. In case the manufacturer faults in obtaining or maintaining any requisite approvals, our production schedules may be adversely affected. Further we are also exposed indirectly to the risks these manufacturers face.

**4. *Our failure to identify and understand evolving industry trends and preferences and to develop new products to meet our customers' demands may materially adversely affect our business.***

Apart from redistribution we also develop IT products under our own brand "Foxin", changes in consumer preferences, regulatory or industry requirements or in competitive technologies may render certain of our products obsolete or less attractive. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced products on a timely basis is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to secure the necessary technological knowledge, which will allow us to develop our product portfolio in this manner. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies and our business and results of operations may be adversely affected. Moreover, we cannot assure you that we will be able to achieve the technological advances that may be necessary for us to remain competitive or that certain of our products will not become obsolete. We are also subject to the risks generally associated with new product introductions and applications, including lack of market acceptance, delays in product development and failure of products to operate properly. To compete effectively in the information technology industry, we must be able to develop and produce new products to meet our customers' demand in a timely manner. Our failure to successfully develop and produce new products, or a failure by our customers to successfully launch new programs, could materially adversely affect our results of operations.

**5. *We are mainly dependent on imports for supply of our products. Consequently, we are exposed to foreign currency fluctuations risks which may have an adverse effect on our business, result of operations and financial condition.***

We have entered into distribution agreements with partners which are situated overseas and thus mainly import our product either directly or through high seas purchase. Over dependence on imports may adversely affect our profitability in case the trade relations of India with any of these countries get strained in the future or the suppliers face any sort of problems due to internal issues of their countries. Also, the exchange rate between the Indian Rupee and currencies of the countries from where the products are imported may fluctuate and adversely affect our results of operations. Depreciation of the Indian rupee against the U.S. Dollar and other foreign currencies may adversely affect our results of operations by increasing the cost of our product coal or any future capital expenditure in foreign currencies. Volatility in the exchange rate may negatively impact our cost of operations and operating results.

**6. Heavy Dependence of our business on our suppliers.**

As an authorized distributor of IT and Telecom Products, our business is heavily dependent on the efficiency and the business capabilities of the respective suppliers of these products, with whom we have entered into distribution agreement for supplying the products. Our sales and profitability would be adversely affected in case of any mismanagement or errors from our suppliers' end.

**7. High Volume and Low Margin Business**

The Business in which we are engaged is a high volume and low margin business. Our inability to regularly grow our turnover and effectively execute our business plans and process could lead to lower profitability and may adversely affect our business results and financial conditions. Due to the nature of the product which we sale, we may not be able to charge higher margin on that, hence our business is heavily reliant on our ability to increase the turnover and manage our key processes including the procurement of traded goods, timely sales, order execution etc.

The table below gives details of our Operating Margins and Net Profit margin based on restated standalone financial statements:

Particulars	2017-18	2016-17	2015-16
Total Income (Rs in lakhs)	66,977.96	65,482.94	45,092.81
EBITDA Margins (%)	3.41	3.17	1.94
PBT Margins (%)	2.51	2.31	1.34
PAT Margins (%)	1.64	1.48	0.89

As part of our growth strategy, we aim to improve our functional efficiency and enhance our business operations. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands.

For further details regarding the discussions and explanations for our past results, please refer to the chapter titled "Management's Discussion and Analysis of Financial Condition and Results of Operation" beginning on page 178 of this Draft Red Herring Prospectus.

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “*Objects of the Issue*” beginning on page 92 of this Draft Red Herring Prospectus.

**9. *There are no alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

Our business is working capital intensive. A significant portion of the working capital is utilized towards the trade receivables. As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer chapter titled “*Objects of the Issue*” on page 92 of this Draft Red Herring Prospectus.

**10. *Our Company has not placed complete orders for plant and machinery for our proposed object, as specified in the Object of the Issue. Any delay in placing orders, procurements of plant and machinery may delay our implementation schedule and may also lead to increase in price of these plant & machinery, further affecting our revenue and profitability.***

Although we have identified the type of plant and machinery required to be bought for setting up a new manufacturing unit at owned property at Anmol South City Infra Park, Plot No.-B4 & B5, Mouza-Jagadishpur, P.S-Liluah, District-Howrah-711 205, West Bengal for Foxin brand products as on the date of DRHP, we are yet to place orders for the plant and machineries as detailed in the “*Objects of the Issue*” beginning on page 92 of this Draft Red Herring Prospectus. These are based on our estimates and on third party quotations, which are subject to a number of variables, including possible increase in cost, changes in management’s view, change in suppliers etc., which may have an adverse effect on our business and results of operations. Further we cannot assure that we would be able to procure these plant and machineries or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the project, which would have a material adverse effect on our business, results of operations and financial conditions. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 92 of this Draft Red Herring Prospectus.

**11. *Delay in schedule of the setting up of proposed Manufacturing facility may subject our Company to risks related to time and cost overrun which may have a material adverse effect on our business, results of operations and financial conditions.***

Our Company is currently proposing to set up a new integrated manufacturing facility at Anmol South City Infra Park, Howrah, West Bengal. For further details regarding to our proposed setting up a new manufacturing unit please refer the chapter titled “*Objects of the Issue*” page 92 of this Draft Red Herring Prospectus. We may face risks relating to the setting up of our new facility, complete the projects within our estimated budget, failure of our contractors and suppliers to adhere to our specifications and timelines, and changes in the general economic

and financial conditions in India. We have limited control over the timing and quality of services, equipment or other supplies from third party contractors and/or consultants appointed by us, and we may be required to incur additional unanticipated costs to remedy any defect or default in their services or products to ensure that the planned timelines are adhered to. Further as and when we complete our upgradation work, our material requirements and costs as well as our staffing requirements and employee expenses may increase and we may face other challenges in extending our financial and other controls to our unit managing our consequent growth.

In the event that the risks and uncertainties discussed above or any other unanticipated risks, uncertainties, contingencies or other events or circumstances limit or delay our efforts to use the Net Proceeds to achieve the planned growth in our business, the use of the Net Proceeds for purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of your investment in our Equity Shares.

**13. *We are subject to the risk that our inventory value may decline and protective terms under our supplier's agreement/ distribution agreements may not be adequately cover the decline in value, which may adversely affect our result of operations, business and financial condition.***

The IT products industry is subject to rapid technological change, new and enhanced product specification requirements, and evolving industry standards. These changes may cause inventory on hand to decline substantially in value or to rapidly become obsolete. Most of our vendors offer limited protection from the loss in value of inventory. The decrease or elimination of price protection could result in inventory write-downs which would affect our business, results of operation and financial condition.

**14. *We have experienced growth in the past few years and if we are unable to sustain or manage our growth, our business, results of operations and financial condition may be materially adversely affected.***

We have experienced growth in the past five years. For FY 2018, we had Rs. 66,977.96 lakhs of total revenue, as compared to Rs. 30,385.33 Lakhs for the FY 2014. Our operations have also grown considerably over the last five years. We may not be able to sustain our rates of growth, due to a variety of reasons including a decline in the demand for our products, increased price competition, non-availability of raw materials, lack of management availability or a general slowdown in the economy. A failure to sustain our growth may have an adverse effect on our business, results of operations and financial condition. We cannot assure you that our future performance or growth strategy will be successful. Currently while we make no contribution to the brand marketing costs, we could be asked in future by these brand owners to share such expenses. We are under no obligation to make such contribution or maintain funding levels in future, and our ability to expand our product range would depend on product expansion strategy carried out by the brand owners. Also, we have also applied but not yet obtained Professional Tax Registration Certificate (PTRC) for the state Andhra Pradesh. However, our Company is yet to apply for renewal of Professional Tax Enrolment certificate and Professional Tax registration certificate for offices located in West Bengal and approvals required for the proposed activities as contained in the chapter titled “Objects of the Issue” beginning on page 92 of this Draft Red Herring Prospectus. For further details, please refer chapter titled “Government and other Statutory Approvals” beginning on page 208 of this Draft Red Herring Prospectus.

Any failure to apply for and obtain the required approvals, licences, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licences, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and prospects of the Company. We cannot assure you that the approvals, licences, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations. please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” at pages 138 and 208 respectively of this Draft Red Herring Prospectus.

**28. *We are dependent on third party transportation providers for delivery of raw materials/products to us from our suppliers and delivery of our products to our clients. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.***

We are engaged in the business of distribution of IT hardware products and telecom products. Our success depends on the smooth supply and transportation of the raw materials for our own brand named “FOXIN” and the products required for distribution process from the manufacturers to our unit which are subject to various uncertainties and risks. In addition, raw materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of raw materials and ensure timely delivery of products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

**29. *Our Group Entities are engaged in the same line of business similar as our Company. We cannot assure that our Promoter will not favour the interests of that company over our interest or that the said entities will not expand which may increase our competition, which may adversely affect business operations and financial condition of our Company***

Our Group Entities namely, Venkatesh International Exim Private Limited and NYK Techno Solutions Private Limited are engaged in the similar line of business, as of our Company. Further, we have not entered into any non-compete agreement with the said entity. We cannot assure that our Promoter who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Company in circumstances where our respective interests’ conflict. In cases of conflict, our Promoter may favour other companies/entities in which our Promoter has interest. There can be no assurance that our Promoter or our Group Company or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. For details regarding Group Company, please see “Our Group Companies”, on page 172 of this Draft Red Herring Prospectus.

**30. *If we are unable to raise additional capital, our business prospects could be adversely affected.***

We operate in a capital-intensive industry, which requires substantial levels of funding. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We expect our long-term capital requirements to increase significantly to fund our intended growth.

We cannot assure you that we will have sufficient capital resources for any future expansion plans that we may have. While we expect our cash on hand, cash flow from operations to be adequate to fund our existing commitments, our ability to pay these amounts is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Moreover, we cannot assure you that market conditions and other factors would permit us to obtain future financing on terms acceptable to us, or at all.

**31. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.***

Our business model is primarily a B2B model, wherein we make sales to customers who in turn sell it to the dealers or the ultimate consumer. Our customers usually are awarded such contracts through tenders. We therefore do not have long-term supply agreements with our customers and instead rely on purchase orders to govern the volume and other terms of our sales of products. However, such orders may be amended or cancelled prior to finalization, and should such an amendment or cancellation take place, it may adversely impact our production schedules. Consequently, there is no commitment on the part of the customer to continue to place new work orders with us and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences. Also, since our customers themselves do not have firm commitment agreements with their customers as their business is tender driven, we cannot expect firm orders regularly from our loyal customers. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss.

**32. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.***

The market in which our company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

**33. *Guarantees from Promoter, Directors as well as others have been taken in relation to the debt facilities provided to us.***

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee/s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee/s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 194 of this Draft Red Herring Prospectus.

**34. *We may be unable to attract and retain employees with the requisite skills, expertise and experience, which would adversely affect our operations, business growth and financial results.***

Our performance and success substantially depends on the ability to attract and retain our key employees including our management team and experienced personnel. There can be no assurance that any member of our management or other key employees will not leave us in the future.

Our success is also highly dependent on our continuous ability to identify, hire, retain and motivate highly qualified management, technical, sales and marketing personnel. We intend to attract and hire talents. However, the loss of service of one or more of our key employees, especially our technical team or our inability to attract and retain the employees with the requisite skills and expertise could harm our operational business and consequently financially.

**35. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellation or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problem we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the order placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income.

**36. *We are dependent upon few suppliers for our products. In an eventuality where our suppliers are unable to deliver us the required products in a time-bound manner it may have a material adverse effect on our business operations and profitability.***

For the year ended March 31, 2018 our top 10 suppliers contributed around 78.71 % and top 5 suppliers contributed around 63.29 % of our purchases.

Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer's requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

**37. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 176 of this Draft Red Herring Prospectus.

**38. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

**39. *Our success depends largely upon the services of our Directors, Promoter and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.***

Our success is substantially dependent on the expertise and services of our Directors, Promoter and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

**40. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Directors are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors may also be interested to the extent

of their shareholding and dividend entitlement in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on pages 69 and 155 respectively, of this Draft Red Herring Prospectus.

**41. *We may not be successful in implementing our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

**42. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.***

Modernization and technology up-gradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

**43. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidence could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

**44. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.***

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance. We did not get most of the NOC from our lenders.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” on page 194 of the Draft Red Herring Prospectus.

**45. *Our Company has a negative cash flow in its operating activities as well as investing activities in the past 5 years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external

resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

**46. *Our Company does not have any formal long-term arrangements with the suppliers and customers. Any significant variation in the supply and demand may adversely affect the operations and profitability of Our Company.***

We do not have any formal long-term arrangements with our suppliers which oblige them to maintain their business with us. Our ability to maintain close and satisfactory relationship with our suppliers may impact our supplies and affect our business operations. We also have not entered into any long-term agreements with our customers. In the event of any changes in the preference or demand schedule of the customer, our customer may terminate the orders which may affect our company's business, results of operations and revenues. Also, there is no assurance that the suppliers will continue to supply products to us and these customers will continue to purchase products from us. This could impact the financial performance of Our Company and affect our financial condition.

**47. *Insufficient cash flows to meet required payments on our debts and working capital requirements could adversely affect our Company's operations and financial results***

The business of our Company requires a significant amount of working capital to finance the payments for Man-power, day to day Expenses and term loans for establishment of office facilities and acquisition of equipment/vehicles. The working capital requirements of our Company are also affected by the credit lines that our Company extends to its customers, in line with industry practice. Moreover, our Company may need to raise further term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. There can be no assurance that our Company will continue to be successful in arranging adequate working capital and term loans for its existing or expanded operations on acceptable terms or at all, which could adversely affect our Company's operations and financial results.

**48. *Our inability to maintain an optimal level of inventory for our business may impact our operations adversely.***

Our company is required to maintain optimal level of inventory at all the time. An optimal level of inventory is important to our business as it allows us to respond to customers demand effectively. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Hence, we may incur significant legal expenses in defending against litigation. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. **69. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue price of our equity Shares has been determined by book-built method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "Basis for Issue Price" beginning on the page 105 of this Draft Red Herring prospectus.

Some of the factors which may affect our share price without limitations are as follows:

submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

## **EXTERNAL RISKS**

### **A. INDUSTRY RELATED RISKS:**

***72. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

### **B. OTHER RISKS:**

***73. The Companies (Amendment) Act, 2017 has effected significant changes to the existing Indian Company law framework, which may subject us to higher compliance requirements and increase our compliance costs.***

Companies Act, 2013 was notified in a phased manner starting from April 1, 2014. More recently Companies (Amendment) Act, 2017 has got President's assent and has been notified on January 03, 2018. A majority of the provisions and rules under the Companies Act, 2013 have been further modified. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which have been recently amended or the provisions which are yet to come into force. To ensure compliance with the requirements of the Companies Act, 2013, as amended till date, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

***74. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed Rs.1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of Rs. 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

***75. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.***

As stated in the reports of the Auditor included in this Draft Red Herring Prospectus under chapter "Financial Statements as Restated" beginning on page 177 the financial statements included in this Draft Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared

and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

**76. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

**77. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.***

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

**78. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in the Draft Red Herring Prospectus.***

While facts and other statistics in this Draft Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

**79. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

**80. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**81. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of Operations and financial condition.***

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

**82. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

**83. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

**84. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.***

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "*Key Industry Regulations and Policies*" on page 138 for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

**85. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.**

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

### THE WORLD ECONOMY

Global economic activity continues to firm up. Global output is estimated to have grown by 3.7 percent in 2017, which is 0.1 percentage point faster than projected in the fall and ½ percentage point higher than in 2016. The pickup in growth has been broad based, with notable upside surprises in Europe and Asia. Global growth forecasts for 2018 and 2019 have been revised upward by 0.2 percentage point to 3.9 percent. The revision reflects increased global growth momentum and the expected impact of the recently approved U.S. tax policy changes.

The effect of U.S. tax policy changes on U.S. growth is estimated to be positive through 2020, cumulating to 1.2 percent through that year, with a range of uncertainty around this central scenario. The cyclical upswing underway since mid-2016 has continued to strengthen. Some 120 economies, accounting for three quarters of world GDP, have seen a pickup in growth in year-on-year terms in 2017, the broadest synchronized global growth upsurge since 2010. Among advanced economies, growth in the third quarter of 2017 was higher than projected in the fall, notably in Germany, Japan, Korea, and the United States. Key emerging market and developing economies, including Brazil, China, and South Africa, also posted third-quarter growth stronger than the fall forecasts. High-frequency hard data and sentiment indicators point to a continuation of strong momentum in the fourth quarter. World trade has grown strongly in recent months, supported by a pickup in investment, particularly among advanced economies, and increased manufacturing output in Asia. Risks to the outlook are broadly balanced in the near term, but—as in the October 2017 WEO—remain skewed to the downside over the medium term. One notable threat to growth is a tightening of global financing terms from their current easy settings, either in the near term or later. Two common policy objectives tie advanced, emerging, and developing economies together. First, the need to raise potential output growth—through structural reforms to lift productivity and, especially in advanced economies with aging populations, enhance labor force participation rates—while making sure that the gains from growth are shared widely. Second, the imperative to increase resilience, including through proactive financial regulation and, where needed, balance sheet repair and strengthening fiscal buffers. Action is particularly important in a low-interest-rate, low-volatility environment with potential for disruptive portfolio adjustments and capital flow reversals.

### GLOBAL ECONOMIC OVERVIEW

According to the International Monetary Fund (IMF), the global economy is experiencing a near synchronous recovery, the most broad-based since 2010. In 2017, roughly three-quarters of countries experienced improvements in their growth rates, the highest share since 2010. The latest World Economic Outlook (WEO) of the IMF shows global GDP growth accelerated to around 3.6 percent in 2017 from 3.2 percent in 2016, and the forecast for 2018 has been upgraded by 0.2 percentage points to 3.9 percent. Although rebounding, global growth is still well below levels reached in the 2000s.

One reason why the recovery has spread around the globe is that world trade in goods and services has finally emerged from its torpor, registering 4.7 percent real volume growth in 2017 compared with 2.5 percent in 2016. Another reason is that commodity producers such as Russia, Brazil, and Saudi Arabia, which for the past few years been suffering from depressed prices, have benefitted from the upswing in demand. Commodity prices increased smartly in 2017, led by petroleum, whose price rose by 16 percent to reach \$61 per barrel by the end of the year.

Even as global growth and commodity prices have surged, inflation has remained remarkably quiescent, remaining below 2 percent in the main advanced regions. Consequently, monetary policies in the US, Eurozone and Japan

have remained highly accommodative despite a strong recovery. These unusual settings—rapid growth, ultra-low interest rates—at a late stage in the economic cycle have produced the rarest of combinations: record-high high bond prices and stock market valuations, both at the same time. The consensus forecast calls for these conditions to be sustained in 2018, as companies respond to buoyant demand conditions by stepping up investment, some governments (such as the US) embark on expansionary fiscal policies, while advanced country monetary policies remain stimulative and world trade continues to grow briskly.

What are the risks? Of course, there are the usual geo-political and geo-economic risks: war in the Korean peninsula; political upheaval in the Middle East; aggressive output cuts by Saudi Arabia (and Russia) in advance of the planned listing of the Saudi Arabian oil company, Aramco, which could force oil prices even higher; a final reckoning from China's unprecedented credit surge in the form of capital controls, slowdown in growth, and a sharply depreciating currency with consequences for the global economy (Economic Survey, 2016-17, Chapter 1); and trade tensions that could lead to skirmishes, and then spiral out of control. But perhaps the main risks lie on the macro-finance front in advanced economies. These stem from three, inter-related, sources:

- Asset valuations (price-equity ratios) tend to revert to their mean. And the faster and higher they climb, especially so late in the economic cycle, the greater the risk of sharp corrections.
- Simultaneously high valuations of both bonds and equities tend to be briefly lived because they suffer from an acute tension: if future earnings and economic growth are so bright, justifying high equity prices, interest rates cannot be forever so low.
- And if interest rates rise—or if markets even sense that central banks will need to shift their stance—both bond and equity prices could correct sharply. A plausible scenario would be the following. The IMF is now forecasting that advanced country output gaps will close in 2018 for the first time since the Global Financial Crisis. As this occurs, wages would start rising, eating into profits (which would prick equity valuations); and as inflation rises in tandem, policy makers would be forced into raising rates, deflating bond valuations and further undermining share prices.

What would happen to growth if asset prices correct? Surely, the impact would be far smaller than it was in 2007-09, because advanced countries are far less vulnerable than they were a decade ago. In particular, the leverage tied to these assets is much lower, which would minimize contagious propagation; while banks are much better buffered, with higher levels of capital and core deposits, and lower levels of risky assets.

Even so, there would be some consequences. For one, a large decline in wealth would force advanced country consumers to cut back on their spending, which in turn would lead firms to curtail their investments. And if this happens, monetary and fiscal policies would have much less room for expansionary man oeuvre since interest rates are already low while government debts are high. And the political implications of yet another decline in asset prices, the second in a decade, could also be significant, with effects that are difficult to imagine.

In sum, assessing future risks hinges on two calls: interest rate policy and asset valuations. On policy, extraordinarily low rates have, to paraphrase Paul Krugman, become “an obsession in search of a justification.” Initially justified by the dislocations caused by the Global Financial Crisis, then by large output gaps, they are now defended on the grounds that inflation remains weak, even as the slack in product and labor markets is disappearing rapidly. Will the gathering new evidence on closing output gaps and rising employment dispel that obsession?

On valuations, the prognosticator must navigate a narrow strait: steering clear of the “Cry of Wolf” trap (bond prices will finally, finally correct, having defied the prediction of correction in each of the last several years), without succumbing to the siren call of “This Time is Different” (stock valuations are sustainable this time because interest rates will remain at historic lows).

## **OUTLOOK FOR 2017-18**

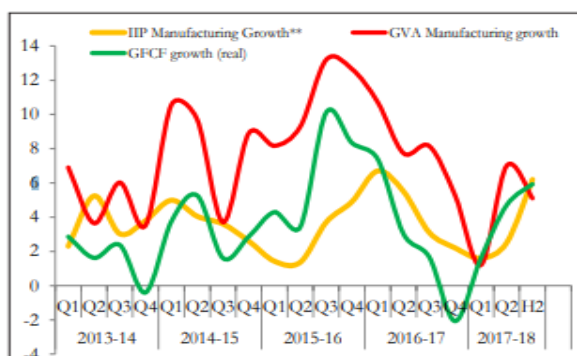

### **ECONOMIC ACTIVITY**

The key question going forward is whether the economy has troughed, and if so at what pace it will recover toward its medium-term trend. High frequency indicators do suggest that a robust recovery is taking hold as reflected in a variety of indicators, including overall GVA, manufacturing GVA, the IIP, gross capital formation (Figure 1) and exports.

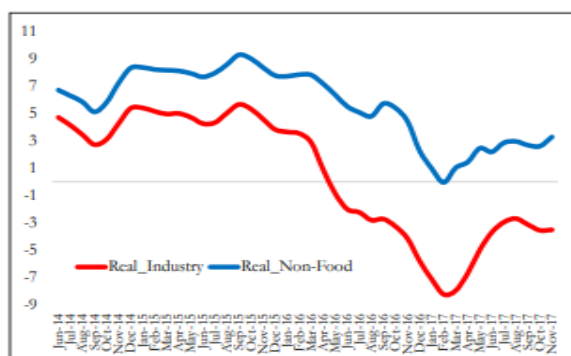

Similarly, real non-food credit growth has rebounded to 4 percent in November 2017 on a year-on-year basis, while the squeeze on real credit to industry is abating (Figure 18). Moreover, the flow of nonbank resources to the corporate sector, such as bond market borrowing and lending by NBFCs, has increased by 43 percent (April-December 2017 compared to the same period a year ago), substituting in part for weak bank credit. Rural demand, proxied by motor cycle sales, and auto sales, while not yet back to its pre-demonetization trend, are recovering. Perhaps most significantly, the behaviour of manufacturing exports and imports in the second and third quarters of this fiscal year has started to reverse. The re-acceleration of export growth to 13.6 percent in the third quarter of FY2018 and deceleration of import growth to 13.1 percent, in line with global trends, suggest that the demonetization and GST effects are receding. Services export and private remittances are also rebounding. On demonetization specifically, the cash to-GDP ratio has stabilized, suggesting a return to equilibrium. A final, important factor explaining the growth recovery is fiscal, which is providing a boost to aggregate demand. For reasons related to smoothening the transition, GST revenues will only be collected for 11 months, which is akin to a tax cut for consumers.

Meanwhile, developments in the agriculture sector bear monitoring. Three crop-specific developments are evident. Sowing has been lower in both kharif and rabi, reducing the demand for labour. The acreage for kharif and rabi for 2017-18 is estimated to have declined by 6.1 percent and 0.5 percent, respectively. Pulses and oilseeds have seen an increase in sowing, but this has translated into unusually low farm gate prices (below their minimum support price, MSP), again affecting farm revenues. The so-called TOP perishables (tomatoes, onions, and potatoes) have meanwhile fluctuated between high and low prices, engendering income uncertainty for farmers.

## OUTLOOK FOR 2018-19

The outlook for 2018-19 will be determined by economic policy in the run-up to the next national election. If macro-economic stability is kept under control, the ongoing reforms are stabilized, and the world economy remains buoyant as today, growth could start recovering towards its medium term economic potential of at least 8 percent. Consider the components of demand that will influence the growth outlook. The acceleration of global growth should in principle provide a solid boost to export demand. Certainly, it has done so in the past, particularly in the mid-2000s when the booming global economy allowed India to increase its exports by more than 26 percent per annum. This time, the export response to world growth has been in line with the long-term average, but below the response in the mid-2000s. Perhaps it is only a matter of time until exports start to grow at a healthy rate. Remittances are already perking up and may revive further due to higher oil prices.

Private investment seems poised to rebound, as many of the factors exerting a drag on growth over the past year finally ease off. Translating this potential into an actual investment rebound will depend on the resolution and recapitalization process. If this process moves ahead expeditiously, stressed firms will be put in the hands of stronger ownership, allowing them to resume spending. But if resolution is delayed, so too will the return of the

private capex cycle. And if this occurs public investment will not be able to step into the breach, since it will be constrained by the need to maintain a modicum of fiscal consolidation to head off market anxieties.

Consumption demand, meanwhile, will encounter different tugs. On the positive side, it will be helped by the likely reduction in real interest rates in 2018-19 compared to the 2017-18 average. At the same time, average oil prices are forecast by the IMF to be about 12 percent higher in 2018-19, which will crimp real incomes and spending—assuming the increase is passed on into higher prices, rather than absorbed by the budget through excise tax reductions or by the oil marketing companies. And if higher oil prices requires tighter monetary policy to meet the inflation target, real interest rates could exert a drag on consumption.

Putting all these factors together, a pick-up in growth to between 7 and 7.5 percent in 2018-19 can be forecasted, re-instating India as the world's fastest growing major economy. This forecast is subject to upside potential and downside risks. The biggest source of upside potential will be exports. If the relationship between India's exports and world growth returns to that in the boom phase, and if world growth in 2018 is as projected by the IMF, then that could add another ½ percentage point to growth.

Persistently high oil prices (at current levels) remain a key risk. They would affect inflation, the current account, the fiscal position and growth, and force macroeconomic policies to be tighter than otherwise. One eventuality to guard against is a classic emerging market “sudden stall” induced by sharp corrections to elevated stock prices. Savers, already smarting from reduced opportunities in the wake of demonetization, from depressed gold prices, and from lower nominal interest rates, would feel aggrieved, leading to calls for action. Stock price corrections could also trigger capital outflows, especially if monetary policy unwinds less hesitantly in advanced countries and if oil prices remain high. Policy might then have to respond with higher interest rates, which could choke off the nascent recovery. The classic emerging market dilemma of reconciling the trade-off between macro-stability and growth could then play itself out.

A key policy question will be the fiscal path for the coming year. Given the imperative of establishing credibility after this year, given the improved outlook for growth (and hence narrowing of the output gap), and given the resurgence of price pressures, fiscal policy should ideally have targeted a reasonable fiscal consolidation. However, setting overly ambitious targets for consolidation—especially in a pre-election year—based on optimistic forecasts that carry a high risk of not being realized will not garner credibility either. Pragmatically steering between these extremes would suggest the following: a modest consolidation that credibly signals a return to the path of gradual but steady fiscal deficit reductions. Against this overall economic and political background, economic management will be challenging in the coming year. If the obvious pitfalls (such as fiscal expansion) are avoided and the looming risks are averted that would be no mean achievement.

## **IT and ITeS Industry in India**

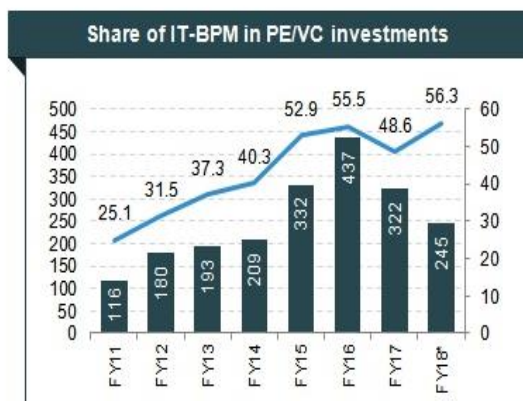

India is the world's largest sourcing destination, accounting for approximately 55 per cent of the US\$ 185-190 billion market in 2017-18. The country's cost competitiveness in providing Information Technology (IT) services, which is approximately 3-4 times cheaper than the US, continues to be its Unique Selling Proposition (USP) in the global sourcing market.

The sector ranks 3rd in India's total Foreign Direct Investment (FDI) share and has received US\$ 29.825 billion of FDI inflows between April 2000 and December 2017.

India's highly qualified talent pool of technical graduates is one of the largest in the world and is available at a cost saving of 60-70 per cent to source countries.

Revenue of India's IT industry reached US\$ 167 billion and exports stood at US\$ 126 billion in 2017-18. The Business Process Outsourcing (BPO) segment accounted for 21.20 per cent of the total IT exports during FY18. India's IT-BPM sector is expected to expand to US\$ 350 billion by 2025 and BPM is expected to account for US\$ 50-55 billion out of the total revenue. Export revenue from digital segment forms about 20 per cent of the industry's total export revenue. Total export revenue of the industry is expected to grow 7-9 per cent year-on-year to US\$ 135-137 billion in FY19.

The Government of India has extended tax holidays to the IT sector for software technology parks of India (STPI) and Special Economic Zones (SEZs). Further, the country is providing procedural ease and single window clearance for setting up facilities. Under Union Budget 2018-19, the government has announced setting up of a national level programme that will enable efforts in Artificial Intelligence (AI) and will help in leveraging AI technology for development works in the country.

## Telecom Industry in India

### Introduction

India is currently the world's second-largest telecommunications market with a subscriber base of 1.20 billion and has registered strong growth in the past decade and half. The Indian mobile economy is growing rapidly and will contribute substantially to India's Gross Domestic Product (GDP), according to report prepared by GSM Association (GSMA) in collaboration with the Boston Consulting Group (BCG). App downloads in the country grew approximately 215 per cent between 2015 and 2017.

The liberal and reformist policies of the Government of India have been instrumental along with strong consumer demand in the rapid growth in the Indian telecom sector. The government has enabled easy market access to telecom equipment and a fair and proactive regulatory framework that has ensured availability of telecom services to consumer at affordable prices. The deregulation of Foreign Direct Investment (FDI) norms has made the sector one of the fastest growing and a top five employment opportunity generator in the country.

The Indian telecom sector is expected to generate four million direct and indirect jobs over the next five years according to estimates by Randstad India. The employment opportunities are expected to be created due to combination of government's efforts to increase penetration in rural areas and the rapid increase in smartphone sales and rising internet usage.

### Market Size

The mobile industry is expected to create a total economic value of Rs 14 trillion (US\$ 217.37 billion) by the year 2020. It would generate around 3 million direct job opportunities and 2 million indirect jobs during this period. India's smartphone market grew 14 per cent year-on-year to a total of 124 million shipments in 2017.

Rise in mobile-phone penetration and decline in data costs will add 500 million new internet users in India over the next five years, creating opportunities for new businesses. The monthly data usage per smartphone in India is expected to increase from 3.9 GB in 2017 to 18 GB by 2023.

### Investments/Developments

With daily increasing subscriber base, there have been a lot of investments and developments in the sector. The industry has attracted FDI worth US\$ 30.08 billion during the period April 2000 to December 2017, according to the data released by Department of Industrial Policy and Promotion (DIPP).

Some of the developments in the recent past are:

- During the first quarter of 2018, India became the world's fastest-growing market for mobile applications.
- Finnish telecommunication company Nokia, is going to collaborate with Indian telecom companies Bharti Airtel and BSNL to work on the roadmap for development of 5G technology and creating a conducive ecosystem for 5G in India.

- India telecommunication companies will be investing US\$ 20 billion over the next two years for expansion of network and operations, stated Mr Akhil Gupta, Vice Chairman, Bharti Enterprise.

### **Government Initiatives**

The government has fast-tracked reforms in the telecom sector and continues to be proactive in providing room for growth for telecom companies. Some of the other major initiatives taken by the government are as follows:

- The Government of India is soon going to come out with a new National Telecom Policy 2018 in lieu of rapid technological advancement in the sector over the past few years. The policy has envisaged attracting investments worth US\$ 100 billion in the sector by 2022.
- The Government of India is working to digitally connect the rural and remote regions in the country and has decided a new affordable tariff structure with the principle of more you use, less you pay. The changes will soon be reflected in tariff changes by service providers in the country.

### **Road Ahead**

India will emerge as a leading player in the virtual world by having 700 million internet users of the 4.7 billion global users by 2025, as per a Microsoft report. Internet economy expected to touch Rs 10 trillion (US\$ 155 billion) by 2018, contributing around 5 per cent to the country's GDP. With the government's favourable regulation policies and 4G services hitting the market, the Indian telecommunication sector is expected to witness fast growth in the next few years. The Government of India also plans to auction the 5G spectrum in bands like 3,300 MHz and 3,400 MHz to promote initiatives like Internet of Things (IoT), machine-to-machine communications, instant high definition video transfer as well as its Smart Cities initiative. The Indian mobile phone industry expects that the Government of India's boost to production of battery chargers will result in setting up of 365 factories, thereby generating 800,000 jobs by 2025.

#### Justification for "Holding Period" levels

The justifications for the holding levels mentioned in the table above are provided below:

Current Assets/ Current Liabilities	Justification for Holding Levels
Inventories	We have assumed inventories holding level of 1.20 months in the financial year 2018-19 which is almost in line with the holding level of financial year 2017-18 as, we intend to continue the same holding policy and expect the same clearance levels as maintained in past.
Trade receivables	We have assumed trade receivables credit period of 1.40 months in the financial year 2018-19 which is in line with the credit period of financial year 2017-18 as we expect to realise our receivables in the same manner as done previously to grow our operations.
Trade Payables	We have assumed trade payables credit period of 0.75 month for the financial year 2018-19 as against 1.07 months in the financial year 2017-18, as going forward, we intend to pay our creditors more quickly than past as more funds would be available with us through our proposed initial public offer which would help us in paying our liabilities quickly. This would help us in maintaining good terms with our creditors. This would help us to avail good cash discounts and negotiate with our vendors on better price to our advantage.

Our Company proposes to utilize Rs. 2,150.00 lakhs of the Net Proceeds in Fiscal 2019 towards our working capital requirements. The balance portion of our working capital requirement for the Fiscal 2019 will be arranged from existing bank loans, loans from body corporates and related parties and internal accruals/ networkth.

Pursuant to the certificate dated September 28, 2018, M/s Gupta Agarwal & Associates, Chartered Accountants, have verified the working capital requirements for the Financial Years 2017 and 2018 from the Restated Standalone Financial Information and working capital estimates for the financial year 2019 as approved by the Board pursuant to its resolution dated September 28, 2018.

### 3. Prepayment/ repayment of certain debt facilities availed by our Company

Our Company has entered into various financing arrangements with banks, financial institutions and body corporates. Further, our Company has obtained borrowings from various related parties also. The loan facilities entered into by our Company include borrowings in the form of term loans and fund based and non-fund based facilities. For further details, including indicative terms and conditions of such loan facilities, see “*Financial Indebtedness*” beginning on page 194 of this Draft Red Herring Prospectus. As at August 31, 2018, the amount outstanding under the loan facilities (all or part of which are proposed to be repaid to the extent of Rs. 1,000.00 lakhs from the Objects of the Issue) availed by our Company was Rs. 7,970.84 lakhs on a standalone basis. Our Company may avail further loans after the date of this Draft Red Herring Prospectus.

Our Company proposes to utilise an aggregate amount of Rs. 1,000.00 lakhs from the Net Proceeds towards full or partial repayment or prepayment of certain borrowings availed by our Company from various banks, financial institutions, body corporates and related parties. The selection and extent of loans proposed to be repaid from our Company’s borrowings mentioned below will be based on various commercial considerations including, among others, the costs, expenses and charges relating to the facility including interest rate of the relevant loan, the amount of the loan outstanding, the remaining tenor of the loan, presence of onerous terms and conditions under the facility, levy of any prepayment penalties and the quantum thereof, provisions of any law, rules, regulations governing such borrowings, terms of prepayment to lenders, if any and mix of credit facilities provided by lenders.

Given the nature of these borrowings and the terms of repayment, the aggregate outstanding amounts under these loans may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of its existing borrowings prior to Allotment. Accordingly, our Company may utilise the Net Proceeds for part prepayment of any such refinanced loans or repayment of any additional loan facilities obtained by it. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment or repayment of loans (including refinanced or additional loans availed, if any), in part or full, would not exceed ` 1,000.00 lakhs. The prepayment or repayment will help reduce our outstanding indebtedness and debt servicing costs, assist us in maintaining a favourable debt to equity ratio and enable utilisation of our internal accruals for further investment in business growth and expansion. In addition, we believe that the leverage capacity of our Company will improve our ability to raise further resources in the future to fund potential business development opportunities and plans to grow and expand our business in the future.

The following table provides details of loans availed by our Company as on August 31, 2018 on a standalone basis, out of which all or any of the facilities may be prepaid or repaid, in full or in part, from the Net Proceeds to the extent of an aggregate amount of Rs. 1,000.00 lakhs:

## SECTION V: ABOUT THE COMPANY AND THE INDUSTRY

### THE WORLD ECONOMY

Global economic activity continues to firm up. Global output is estimated to have grown by 3.7 percent in 2017, which is 0.1 percentage point faster than projected in the fall and ½ percentage point higher than in 2016. The pickup in growth has been broad based, with notable upside surprises in Europe and Asia. Global growth forecasts for 2018 and 2019 have been revised upward by 0.2 percentage point to 3.9 percent. The revision reflects increased global growth momentum and the expected impact of the recently approved U.S. tax policy changes.

The effect of U.S. tax policy changes on U.S. growth is estimated to be positive through 2020, cumulating to 1.2 percent through that year, with a range of uncertainty around this central scenario. The cyclical upswing underway since mid-2016 has continued to strengthen. Some 120 economies, accounting for three quarters of world GDP, have seen a pickup in growth in year-on-year terms in 2017, the broadest synchronized global growth upsurge since 2010. Among advanced economies, growth in the third quarter of 2017 was higher than projected in the fall, notably in Germany, Japan, Korea, and the United States. Key emerging market and developing economies, including Brazil, China, and South Africa, also posted third-quarter growth stronger than the fall forecasts. High-frequency hard data and sentiment indicators point to a continuation of strong momentum in the fourth quarter. World trade has grown strongly in recent months, supported by a pickup in investment, particularly among advanced economies, and increased manufacturing output in Asia. Risks to the outlook are broadly balanced in the near term, but—as in the October 2017 WEO—remain skewed to the downside over the medium term. One notable threat to growth is a tightening of global financing terms from their current easy settings, either in the near term or later. Two common policy objectives tie advanced, emerging, and developing economies together. First, the need to raise potential output growth—through structural reforms to lift productivity and, especially in advanced economies with aging populations, enhance labor force participation rates—while making sure that the gains from growth are shared widely. Second, the imperative to increase resilience, including through proactive financial regulation and, where needed, balance sheet repair and strengthening fiscal buffers. Action is particularly important in a low-interest-rate, low-volatility environment with potential for disruptive portfolio adjustments and capital flow reversals.

### GLOBAL ECONOMIC OVERVIEW

According to the International Monetary Fund (IMF), the global economy is experiencing a near synchronous recovery, the most broad-based since 2010. In 2017, roughly three-quarters of countries experienced improvements in their growth rates, the highest share since 2010. The latest World Economic Outlook (WEO) of the IMF shows global GDP growth accelerated to around 3.6 percent in 2017 from 3.2 percent in 2016, and the forecast for 2018 has been upgraded by 0.2 percentage points to 3.9 percent. Although rebounding, global growth is still well below levels reached in the 2000s.

One reason why the recovery has spread around the globe is that world trade in goods and services has finally emerged from its torpor, registering 4.7 percent real volume growth in 2017 compared with 2.5 percent in 2016. Another reason is that commodity producers such as Russia, Brazil, and Saudi Arabia, which for the past few years been suffering from depressed prices, have benefitted from the upswing in demand. Commodity prices increased smartly in 2017, led by petroleum, whose price rose by 16 percent to reach \$61 per barrel by the end of the year.

Even as global growth and commodity prices have surged, inflation has remained remarkably quiescent, remaining below 2 percent in the main advanced regions. Consequently, monetary policies in the US, Eurozone and Japan have remained highly accommodative despite a strong recovery. These unusual settings—rapid growth, ultra-low interest rates—at a late stage in the economic cycle have produced the rarest of combinations: record-high high bond prices and stock market valuations, both at the same time. The consensus forecast calls for these conditions

to be sustained in 2018, as companies respond to buoyant demand conditions by stepping up investment, some governments (such as the US) embark on expansionary fiscal policies, while advanced country monetary policies remain stimulative and world trade continues to grow briskly.

What are the risks? Of course, there are the usual geo-political and geo-economic risks: war in the Korean peninsula; political upheaval in the Middle East; aggressive output cuts by Saudi Arabia (and Russia) in advance of the planned listing of the Saudi Arabian oil company, Aramco, which could force oil prices even higher; a final reckoning from China's unprecedented credit surge in the form of capital controls, slowdown in growth, and a sharply depreciating currency with consequences for the global economy (Economic Survey, 2016-17, Chapter 1); and trade tensions that could lead to skirmishes, and then spiral out of control. But perhaps the main risks lie on the macro-finance front in advanced economies. These stem from three, inter-related, sources:

- Asset valuations (price-equity ratios) tend to revert to their mean. And the faster and higher they climb, especially so late in the economic cycle, the greater the risk of sharp corrections.
- Simultaneously high valuations of both bonds and equities tend to be briefly lived because they suffer from an acute tension: if future earnings and economic growth are so bright, justifying high equity prices, interest rates cannot be forever so low.
- And if interest rates rise—or if markets even sense that central banks will need to shift their stance—both bond and equity prices could correct sharply. A plausible scenario would be the following. The IMF is now forecasting that advanced country output gaps will close in 2018 for the first time since the Global Financial Crisis. As this occurs, wages would start rising, eating into profits (which would prick equity valuations); and as inflation rises in tandem, policy makers would be forced into raising rates, deflating bond valuations and further undermining share prices.

What would happen to growth if asset prices correct? Surely, the impact would be far smaller than it was in 2007-09, because advanced countries are far less vulnerable than they were a decade ago. In particular, the leverage tied to these assets is much lower, which would minimize contagious propagation; while banks are much better buffered, with higher levels of capital and core deposits, and lower levels of risky assets.

Even so, there would be some consequences. For one, a large decline in wealth would force advanced country consumers to cut back on their spending, which in turn would lead firms to curtail their investments. And if this happens, monetary and fiscal policies would have much less room for expansionary man oeuvre since interest rates are already low while government debts are high. And the political implications of yet another decline in asset prices, the second in a decade, could also be significant, with effects that are difficult to imagine.

In sum, assessing future risks hinges on two calls: interest rate policy and asset valuations. On policy, extraordinarily low rates have, to paraphrase Paul Krugman, become “an obsession in search of a justification.” Initially justified by the dislocations caused by the Global Financial Crisis, then by large output gaps, they are now defended on the grounds that inflation remains weak, even as the slack in product and labor markets is disappearing rapidly. Will the gathering new evidence on closing output gaps and rising employment dispel that obsession?

On valuations, the prognosticator must navigate a narrow strait: steering clear of the “Cry of Wolf” trap (bond prices will finally, finally correct, having defied the prediction of correction in each of the last several years), without succumbing to the siren call of “This Time is Different” (stock valuations are sustainable this time because interest rates will remain at historic lows).

## **OUTLOOK FOR 2017-18**

### **ECONOMIC ACTIVITY**

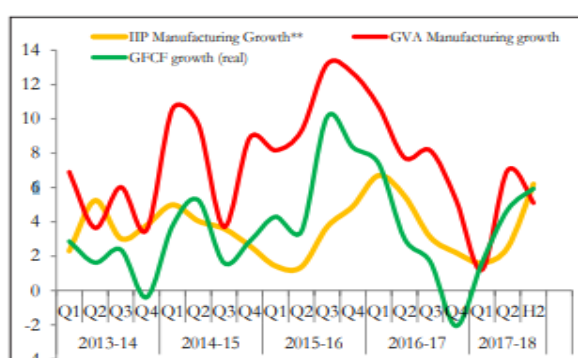

The key question going forward is whether the economy has troughed, and if so at what pace it will recover toward its medium-term trend. High frequency indicators do suggest that a robust recovery is taking hold as reflected in a variety of indicators, including overall GVA, manufacturing GVA, the IIP, gross capital formation (Figure 1) and exports.

Similarly, real non-food credit growth has rebounded to 4 percent in November 2017 on a year-on-year basis, while the squeeze on real credit to industry is abating (Figure 18). Moreover, the flow of nonbank resources to the corporate sector, such as bond market borrowing and lending by NBFCs, has increased by 43 percent (April-December 2017 compared to the same period a year ago), substituting in part for weak bank credit. Rural demand, proxied by motor cycle sales, and auto sales, while not yet back to its pre-demonetization trend, are recovering.

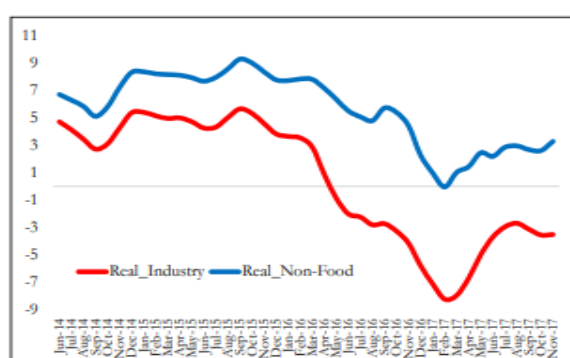

Perhaps most significantly, the behaviour of manufacturing exports and imports in the second and third quarters of this fiscal year has started to reverse. The re-acceleration of export growth to 13.6 percent in the third quarter of FY2018 and deceleration of import growth to 13.1 percent, in line with global trends, suggest that the demonetization and GST effects are receding. Services export and private remittances are also rebounding. On demonetization specifically, the cash to-GDP ratio has stabilized, suggesting a return to equilibrium. A final, important factor explaining the growth recovery is fiscal, which is providing a boost to aggregate demand. For reasons related to smoothening the transition, GST revenues will only be collected for 11 months, which is akin to a tax cut for consumers.

Meanwhile, developments in the agriculture sector bear monitoring. Three crop-specific developments are evident. Sowing has been lower in both kharif and rabi, reducing the demand for labour. The acreage for kharif and rabi for 2017-18 is estimated to have declined by 6.1 percent and 0.5 percent, respectively. Pulses and oilseeds have seen an increase in sowing, but this has translated into unusually low farm gate prices (below their minimum support price, MSP), again affecting farm revenues. The so-called TOP perishables (tomatoes, onions, and potatoes) have meanwhile fluctuated between high and low prices, engendering income uncertainty for farmers.

## MACRO ECONOMIC INDICATORS

The CSO has forecast real GDP growth for 2017-18 at 6.5 percent. However, this estimate has not fully factored in the latest developments in the third quarter, especially the greater-than-CSO forecast exports and government contributions to demand. Accordingly, real GDP growth for 2017-18 as a whole is expected to be close to 6 3/4 percent. Given real GDP growth of 6 percent in the first half, this implies that growth in the second half would rebound to 7.5 percent, aided by favourable base effects, especially in the fourth quarter. Average CPI inflation for the first nine months has averaged 3.2 percent and is projected to reach 3.7 percent for the year as a whole. This implies average CPI inflation in the last quarter of 5 percent, in line with the RBI's forecast. Therefore, the GDP deflator is expected to grow by 3.6 percent for 2017-18, somewhat higher than the CSO's forecast of 2.8 percent. Consequentially, nominal GDP growth is estimated at 10.5 percent, compared with the CSO's 9.5 percent estimate.

After 13 months of continuously undershooting the inflation target by an average of 130 basis points, headline inflation for the first time crossed the RBI's 4 percent target in November, posting a rate of 5.2 percent in December 2017. The recent upswing in inflation stems from rising global oil prices (not all of which has been passed on to consumers), unseasonal increases in the prices of fruits and vegetables, and the 7th Pay Commission housing rent allowances, which mechanically increase inflation. Stripped of all these factors, underlying inflation has been increasing at a more modest pace, reaching 4.3 percent at end-December—in part because firms are passing the incidence of GST on to final consumers only gradually.

The current account deficit has also widened in 2017-18 and is expected to average about 1.5-2 percent of GDP for the year as a whole. The current account deficit is well below the 3 percent of GDP threshold beyond which vulnerability emerges. Meanwhile, foreign exchange reserves have reached a record level of about \$432 billion (spot and forward) at end-December 2017, well above prudent norms.

**Changing face of Science, Research and Technology in India**

- Public expenditure on R&D as a percentage of GDP has remained constant between 0.6-0.7 per cent over the past two decades; however, in value terms, the gross expenditure on R&D has increased at a CAGR of 13.03 per cent from Rs 24,117 crore (US\$ 3.8 billion) in 2004-05 to Rs 104,864 crore (US\$ 16.5 billion) in 2016-17.
- The number of students enrolled in PhD programs in India has increased over the years, with 126,451 PhD enrolments in 2015-16, backed by concerted efforts by the Government of India such as increase in the number and quantum of fellowships like the Prime Minister Research Fellowships at the IITs.
- The number of annual publications in India grew 14 per cent between 2009-14, which increased India's share in global publications from 3.1 per cent in 2009 to 4.4 per cent in 2014.

- About 200,000 patents were pending for examination as there were only 132 patent examiners as of 2016-17; however, the government has hired 450 patent examiners and created an expedited filing system for Indian residents in 2017, which will improve the existing patent system.
- In order to encourage investigator-led research, the Science and Engineering research Board (SERB) was established in 2008, which has sanctioned nearly 3,500 new R&D projects to individual scientists so far.
- India can become a global leader outright in various areas with willingness to invest and focus on key areas. For this purpose, the government has chosen few missions for their strategic importance and potential for societal impact such as National Mission on Dark Matter, National Mission on Genomics, National Mission on Energy Storage Systems, National Mission on Mathematics, National Mission on Cyber Physical Systems, and National Mission on Agriculture.

## **FISCAL DEVELOPMENTS**

The fiscal deficit for the first eight months of 2017-18 reached 112 percent of the total for the year, far above the 89 percent norm (average of last 5 years), largely because of a shortfall in non-tax revenue, reflecting reduced dividends from government agencies and enterprises. Expenditure also progressed at a fast pace, reflecting the advancing of the budget cycle by a month which gave considerable leeway to the spending agencies to plan in advance and start implementation early in the financial year. Partially offsetting these trends will be disinvestment receipts which are likely to exceed budget targets.

GST revenue collections are surprisingly robust given that these are early days of such a disruptive change. Government measures to curb black money and encourage tax formalization, including demonetization and the GST, have increased personal income tax collections substantially (excluding the securities transactions tax). From about 2 percent of GDP between 2013-14 and 2015-16, they are likely to rise to 2.3 percent of GDP in 2017-18, a historic high. Precise estimates of the government's contribution to this improvement vary depending on the methodology used. An econometric exercise yields an estimate of Rs. 40,000 crores over the two fiscal years of 2016-17 and 2017-18. Another based on comparing the difference in actual tax buoyancy in 2016-17 and 2017-18 over the previous seven-years' average buoyancy, yields an estimate of about Rs. 65,000 crores (both exclude the 25,000 crores collected under the Income Disclosure Scheme and Pradhan Mantri Garib Kalyaan Yojana). Thus, the sum of all government efforts increased income tax collections, thus far, between Rs. 65,000 and Rs. 90,000 crores. These numbers imply a substantial increase in reported incomes (and hence in formalization) of about 1.5 percent to 2.3 percent of GDP.

Another factor contributing to the rise in bond yields has been stepped-up Open Market Operations (OMO) by the RBI. This amounted to a net sale of about Rs. 90,000 crores during April-December 2017-18 (compared to a net redemption of Rs. 1.1 lakh crores during the same period in 2016-17) to sterilize the impact of foreign flows, themselves induced by high interest rates.

## **OUTLOOK FOR 2018-19**

The outlook for 2018-19 will be determined by economic policy in the run-up to the next national election. If macro-economic stability is kept under control, the ongoing reforms are stabilized, and the world economy remains buoyant as today, growth could start recovering towards its medium term economic potential of at least 8 percent. Consider the components of demand that will influence the growth outlook. The acceleration of global growth should in principle provide a solid boost to export demand. Certainly, it has done so in the past, particularly in the mid-2000s when the booming global economy allowed India to increase its exports by more than 26 percent per annum. This time, the export response to world growth has been in line with the long-term average, but below the response in the mid-2000s. Perhaps it is only a matter of time until exports start to grow at a healthy rate. Remittances are already perking up and may revive further due to higher oil prices.

Private investment seems poised to rebound, as many of the factors exerting a drag on growth over the past year finally ease off. Translating this potential into an actual investment rebound will depend on the resolution and recapitalization process. If this process moves ahead expeditiously, stressed firms will be put in the hands of stronger ownership, allowing them to resume spending. But if resolution is delayed, so too will the return of the private capex cycle. And if this occurs public investment will not be able to step into the breach, since it will be constrained by the need to maintain a modicum of fiscal consolidation to head off market anxieties.

Consumption demand, meanwhile, will encounter different tugs. On the positive side, it will be helped by the likely reduction in real interest rates in 2018-19 compared to the 2017-18 average. At the same time, average oil prices are forecast by the IMF to be about 12 percent higher in 2018-19, which will crimp real incomes and spending—assuming the increase is passed on into higher prices, rather than absorbed by the budget through

excise tax reductions or by the oil marketing companies. And if higher oil prices require tighter monetary policy to meet the inflation target, real interest rates could exert a drag on consumption.

Putting all these factors together, a pick-up in growth to between 7 and 7.5 percent in 2018-19 can be forecasted, re-instating India as the world's fastest growing major economy. This forecast is subject to upside potential and downside risks. The biggest source of upside potential will be exports. If the relationship between India's exports and world growth returns to that in the boom phase, and if world growth in 2018 is as projected by the IMF, then that could add another ½ percentage point to growth.

Persistently high oil prices (at current levels) remain a key risk. They would affect inflation, the current account, the fiscal position and growth, and force macroeconomic policies to be tighter than otherwise. One eventuality to guard against is a classic emerging market "sudden stall" induced by sharp corrections to elevated stock prices. Savers, already smarting from reduced opportunities in the wake of demonetization, from depressed gold prices, and from lower nominal interest rates, would feel aggrieved, leading to calls for action. Stock price corrections could also trigger capital outflows, especially if monetary policy unwinds less hesitantly in advanced countries and if oil prices remain high. Policy might then have to respond with higher interest rates, which could choke off the nascent recovery. The classic emerging market dilemma of reconciling the trade-off between macro-stability and growth could then play itself out.

A key policy question will be the fiscal path for the coming year. Given the imperative of establishing credibility after this year, given the improved outlook for growth (and hence narrowing of the output gap), and given the resurgence of price pressures, fiscal policy should ideally have targeted a reasonable fiscal consolidation. However, setting overly ambitious targets for consolidation—especially in a pre-election year—based on optimistic forecasts that carry a high risk of not being realized will not garner credibility either. Pragmatically steering between these extremes would suggest the following: a modest consolidation that credibly signals a return to the path of gradual but steady fiscal deficit reductions. Against this overall economic and political background, economic management will be challenging in the coming year. If the obvious pitfalls (such as fiscal expansion) are avoided and the looming risks are averted that would be no mean achievement.

Further, the country is providing procedural ease and single window clearance for setting up facilities. Under Union Budget 2018-19, the government has announced setting up of a national level programme that will enable efforts in Artificial Intelligence (AI) and will help in leveraging AI technology for development works in the country.

## Introduction

The global sourcing market in India continues to grow at a higher pace compared to the IT-BPM industry. India is the leading sourcing destination across the world, accounting for approximately 55 per cent market share of the US\$ 185-190 billion global services sourcing business in 2017-18. Indian IT & ITeS companies have set up over 1,000 global delivery centres in about 80 countries across the world.

More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, cost savings of 60–70 per cent over source countries, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

India has become the digital capabilities hub of the world with around 75 per cent of global digital talent present in the country.

## Market Size

The internet industry in India is likely to double to reach US\$ 250 billion by 2020, growing to 7.5 per cent of gross domestic product (GDP). The number of internet users in India is expected to reach 730 million by 2020, supported by fast adoption of digital technology, according to a report by National Association of Software and Services Companies (NASSCOM).

Indian IT exports increased to US\$ 126 billion in FY18 while domestic revenues (including hardware) advanced to US\$ 41 billion.

The computer software and hardware sector in India attracted cumulative Foreign Direct Investment (FDI) inflows US\$ 29.825 billion from April 2000 to December 2017, according to data released by the Department of Industrial Policy and Promotion (DIPP).

Leading Indian IT firms like Infosys, Wipro, TCS and Tech Mahindra, are diversifying their offerings and showcasing leading ideas in blockchain, artificial intelligence to clients using innovation hubs, research and development centres, in order to create differentiated offerings.

Some of the major developments in the Indian IT and ITeS sector are as follows:

- Nasscom has launched an online platform which is aimed at up-skilling over 2 million technology professionals and skilling another 2 million potential employees and students.
- Revenue growth in the BFSI vertical reached nearly 9 per cent y-o-y in the fourth quarter of 2017-18.
- As of March 2018, there were over 1,140 GICs operating out of India.
- Private Equity (PE)/Venture Capital (VC) investments in India's IT & ITeS sector reached US\$ 7.6 billion during April-December 2017.

- As a part of Union Budget 2018-19, NITI Aayog is going to set up a national level programme that will enable efforts in AI\* and will help in leveraging AI\* technology for development works in the country.
- The Government of India is going to explore new opportunities in various sectors such as providing BPO service from home, digital healthcare and agriculture to achieve the target of making India a US\$ 1 trillion digital economy.

### Road Ahead

India is the topmost offshoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India. Export revenue of the industry is expected to grow 7-9 per cent year-on-year to US\$ 135-137 billion in FY19.

### Telecom Industry in India

#### Introduction

India is currently the world's second-largest telecommunications market with a subscriber base of 1.20 billion and has registered strong growth in the past decade and half. The Indian mobile economy is growing rapidly and will contribute substantially to India's Gross Domestic Product (GDP), according to report prepared by GSM Association (GSMA) in collaboration with the Boston Consulting Group (BCG). App downloads in the country grew approximately 215 per cent between 2015 and 2017.

The liberal and reformist policies of the Government of India have been instrumental along with strong consumer demand in the rapid growth in the Indian telecom sector. The government has enabled easy market access to telecom equipment and a fair and proactive regulatory framework that has ensured availability of telecom services to consumer at affordable prices. The deregulation of Foreign Direct Investment (FDI) norms has made the sector one of the fastest growing and a top five employment opportunity generator in the country.

The Indian telecom sector is expected to generate four million direct and indirect jobs over the next five years according to estimates by Randstad India. The employment opportunities are expected to be created due to combination of government's efforts to increase penetration in rural areas and the rapid increase in smartphone sales and rising internet usage.

#### **Industrial Policy of Relevant State**

##### **Investment and Industrial Policy of West Bengal, 2013**

The Investment and Industrial Policy of West Bengal aims to rapidly build and improve infrastructure, as an enabler for industrial growth, by additional 4000 kms of highway and bridges, ports, airports and water transport in Public Private Partnership (PPP). The state wants to partner with the private sector to tap its financial and technical prowess. Industry, in turn, could benefit from Bengal’s rich natural resource base, suitable agro-climatic conditions, strategic location and an exceptional human capital. At present, manufacturing contributes to about 10% of the State GDP, therefore the basic aim of the policy is to double this share in five years. With its power surplus status and rapidly expanding infrastructure and connectivity, this is a realistic target. This policy focus at increasing the growth of manufacturing from 4.7 % (2010-11) to 20% at the end of five years. The State has a low base of the manufacturing sector, as compared to the leading states on this front; hence, 20% year on year growth is achievable. Given the high population density of the state, Micro Small Scale and Medium Enterprise (MSME) stay on high priority. However, to promote the Large-Scale Industries, the aim would be to facilitate investment in the infrastructure of roads, highways, bridges and ports for maximizing the benefits of the rich mineral base and surplus power position of the state. The state has a large number of companies that have their operational base or production units in West Bengal. The state government would leverage them for business augmentation by the current industries and showcase their success to interested new investors to answer any apprehensions. The state is firmly against external interference in business and the culture of Bandhs has been reversed. This policy added

significantly to the overall discipline in the management of affairs in the state. For better management of the affairs, the state has undertaken the largest Information Technology (IT) driven reform process. This includes major steps in simplification of Tax structure and thereby creating a Tax friendly regime.

#### **4.2.2 FIELDS 4 AND 5: BID OPTIONS REVISION 'FROM' AND 'TO'**

(a) Apart from mentioning the revised number of shares in the Revision Form, the Bidder must also mention the details of shares applied/bid for given in his or her Bid cum Application Form or earlier Revision Form. For example, if a Bidder has Bid for three options in the Bid cum Application Form and such Bidder is changing only one of the options in the Revision Form, the Bidder must still fill the details of the other two options that are not being revised, in the Revision Form. The members of the Syndicate, the Registered Brokers and the Designated Branches of the SCSBs may not accept incomplete or inaccurate Revision Form.

(b) In case of revision, Bid options should be provided by Bidders in the same order as provided in the Bid cum Application Form.

(c) In case of revision of Bids by RIIs, Employees and Retail Individual Shareholders, such Bidders should ensure that the Bid Amount, subsequent to revision, does not exceed Rs.200,000. If, however, the RII does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the RII and the RII is deemed to have approved such revised Bid at Cut-off Price.

(e) In case of a downward revision in the Price Band, RIIs and Bids by Employees under the Reservation Portion, who have bid at the Cut-off Price could either revise their Bid or the excess amount paid at the time of Bidding may be unblocked in case of Bidders.

In case of Bidders specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.

b) Bidder may Issue instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Bidder had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.

If, however, the Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted downwards for the purpose of Allotment, such that additional amount is required blocked and the Bidder is deemed to have approved such revised Bid at the Cut-off Price.

#### **d) Illustration of the Book Building and Price Discovery Process**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs.24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

<b>Bid Quantity</b>	<b>Bid Amount (Rs.)</b>	<b>Cumulative Quantity</b>	<b>Subscription</b>
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100%
2,000	21	5,000	166.67%
2,500	20	7,500	250%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

## **RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government of India has from time to time made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue
