SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our restated financial statements prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI ICDR Regulations. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;*
- Some events may have material impact qualitatively instead of quantitatively;*
- Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviation” beginning on page 2 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISKS

A. Business Related Risks

1. ***Our Company is yet to achieve scalable operations and has limited operating history and limited brand recognition, which may make it difficult for investors to evaluate our future prospects based on past results.***

Our Company was incorporated as ‘Angel Fibers Private Limited’ a private limited company under the Companies Act, 1956 pursuant to Certificate of Incorporation dated February 14, 2014 issued by the Registrar of Companies, Gujarat, Dadra and Nagar Havelli. Subsequently, our Company was converted into a public limited company and the name of our Company was changed to ‘Angel Fibers Limited’ pursuant to a Fresh Certificate of Incorporation dated December 11, 2017 issued by the Registrar of Companies, Gujarat, Dadra and Nagar Havelli. Our Company started its commercial production only in financial year 2016-16 on July 11, 2015. Given our Company’s limited operating history, we may not have sufficient experience to address the risks frequently encountered by early stage companies, including our ability to successfully complete our orders or maintain adequate control of our costs and expenses. Given the fragmented nature of the industry in which we operate, we often do not have complete information about our competitors and accordingly we may underestimate supply in the market. Further we may face risks in relation to delayed acceptance of our products due to limited brand recognition. If we are unsuccessful in addressing such risks, our business may be materially and adversely affected. Accordingly, investors should consider our business and prospects in light of the risks, losses and challenges that we face as an early-stage company and should not rely on our results of operations for any prior periods as an indication of our future performance.

2. ***Our manufacturing facility is located at Kalavad, Jamnagar District, Gujarat region and may be affected by various factors associated at such region and may affect our business, financial condition and results of operations***

Our business is relatively concentrated in Gujarat region. This concentration of our business in Gujarat region subjects us to various risks, such as regional slowdown in economic activities and consumer spend in that region, vulnerability to change of policies, laws and regulations or the political and economic environment, civil disturbances or any adverse political, social or economic conditions. While we strive to diversify across states and reduce our concentration risk, there is no guarantee that the above factors associated with Gujarat region will not continue to have a significant impact on our business. If we are not able to mitigate this concentration risk, we may not be able to develop our business as planned, and our business, financial condition and results of operations could be materially and adversely affected.

3. ***We generate our major portion of sales from our operations in certain geographical regions especially Gujarat, Maharashtra, Punjab and Rajasthan. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.***

We generate major sales situated in Gujarat, Maharashtra, Punjab and Rajasthan. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in Gujarat, Maharashtra, Punjab and Rajasthan region to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Gujarat, Maharashtra, Punjab and Rajasthan market may adversely affect our business prospects, financial conditions and results of operations. However, our Company is already supplying products in other regions such as Tamil Nadu, Union Territories, Madhya Pradesh, West Bengal, Delhi, Haryana etc. but we are yet to scale our operations in such regions. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

4. Some of our Directors are currently involved in certain tax related and other proceedings which are currently pending at various stages with relevant authorities. Any adverse decision in such proceedings may render us liable to liabilities and penalties and may adversely affect our business and results of operations.

Except as mentioned above, there are no legal proceedings by or against our Company, Promoters, Directors or Group Companies. A classification of legal proceedings is mentioned below:

5. ***Our raw material and finished products both are highly flammable commodity. The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, damage our reputation and have an adverse effect on our business, results of operations and financial condition.***

Cotton being a highly flammable commodity, every stage from procurement, processing, storage and transportation is fraught with an imminent danger of an instant fire. The risk of fire hazard is increased due to increased automation and use of large volume of machinery for material handling. Any spark generated at these places can not only generate fire but also the same could propagate to other machines through cotton conveying. We maintain standard fires and perils policies in respect of the buildings, plant and machinery, stocks of goods, raw material and office equipment in our manufacturing facilities. Any such incident at our factory, warehouse or at any other place could adversely affect our business, financial condition, cash flows and results of operations. All the products that we manufacture is subject to risks such as adulteration and product tampering during their manufacture, transport or storage. Although all our raw materials and finished products are extensively tested at our facilities, we cannot assure you that the quality tests conducted by us will be accurate at all times. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. We cannot assure you that we will not be subject to such product liability claims in the future and we currently carry no products liability insurance with respect to our products. Should any of our products be perceived or found to be contaminated, we may be subject to regulatory action, product recalls and our reputation, business, results of operations and financial condition may be adversely affected. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity

6. ***Our business is subject to seasonal volatility, which may contribute to fluctuations in our results of operations and financial condition.***

The major raw material used by our Company for the Ginning Unit is Cotton. Due to the seasonal availability of the Cotton, our industry is seasonal in nature. The period during which our business may experience higher revenues varies from season to season. During the crop season we are able to procure the cotton at reasonable terms and in large quantities. Whereas during the off season the availability of the cotton is less and also there are price variations. Accordingly, our revenue in one quarter may not accurately reflect the revenue trend for the whole Financial Year. The seasonality of our industry, and the financial services industry, may cause fluctuations in our results of operations and financial condition. Due to the seasonality of our cotton business, there can be no assurance that the estimates of demand for our products will be accurate. If our estimates materially differ from actual demand, we may experience either excess quantities of raw materials and unsold stock, which we may not be able to utilize or sell in a timely manner or at all or inadequate quantities of raw materials and consequently lower stock of finished goods to meet market demand.

7. ***The price, which we are able to obtain for the cotton yarn that we produce depend largely on prevailing market prices. Increase in costs or a shortfall in availability of our raw materials could have a material adverse effect on our Company's sales, profitability and results of operations.***

Our Company is dependent on third party suppliers for procuring our raw materials. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any long term supply agreements with our suppliers and our major requirement is met in the spot market. The cost and availability of our raw materials are subject to a variety of factors and any increase in their cost and their availability at a reasonable price or at all, could adversely affect our margins, sales and results of operations. Some of the key factors affecting the cost and availability of our raw materials include agricultural produce of cotton, seasonal production of cotton seeds and yarn. Further the prices of these raw materials are subject to price fluctuation due to various factors beyond our control, including but not limited to severe climatic conditions, outbreak of diseases and governmental regulations. Any of these and other factors may cause a shortage of raw materials or unavailability of raw materials at a reasonable price. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production cycles and delivery schedules, which may result in the loss of our customers and revenues. Any decrease in yarn prices may adversely affect our profitability. The wholesale price of cotton has a significant impact on our profits. Cotton is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any prolonged decrease in cotton prices could have a material adverse effect on our Company and our results of operations. Cotton is the main raw material used to produce cotton and cotton yarn. The price of the cotton are very volatile subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. Any adverse movement in the price of the Cotton will impact our cost of production which we may not be able to pass on to the customer which may affect our profitability of even lead to losses. Further any prolonged increase in cotton prices could have a material adverse effect on our Company over a period of time and affect all our strategies and future projections.

8. *Our Company has not entered into any supply agreement for the major raw materials required for manufacturing of our products and are exposed to risks relating to fluctuations in commodity prices and shortage of raw material.*

Raw material costs are dependent on commodity prices, which are subject to fluctuations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we experience a significant or prolonged shortage of raw materials from any of our suppliers and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules in a timely fashion, which would adversely affect our sales, margins and customer relations. In the absence of such supply agreements, we cannot assure that a particular supplier will continue to supply raw materials to us in the future. In the event the prices of such raw materials were to rise substantially or if imports were to be restricted in any manner, we may find it difficult to make alternative arrangements for supplies of our raw materials, on the terms acceptable to us, which could materially affect our business, results of operations and financial condition.

9. *Our revenues are significantly dependent upon sales of our main products that are cotton yarn.*

Our core business is the manufacture of cotton and yarn. Consequently, our income is significantly dependent on sales of the cotton and yarn and over the years, such sales have emerged as the major contributor to our revenue and business. Our continued reliance on sales of our products for a significant portion of our revenue exposes us to risks, including the potential reduction in the demand for such products in the future; increased competition from domestic and regional manufacturers; cost-effective technology; fluctuations in the price and availability of the raw materials, changes in regulations and import duties; and the cyclical nature of our customers' businesses. One or more such reasons may affect our revenues and income from sales of our products and thereby adversely affect our business, profitability, cash flows and results of operations.

10. *Cheap Substitutes And Imports May Affect The Business.*

The textile industry is highly fragmented with a unorganized sector forming a significant portion which leads to cheaper products entering the market. Also with the reduction in trade barriers there is an increase in

imports of cheaper products which pose a competition to the existing domestic organized players. This may directly impact the Company's operations.

Management Perception: Cheaper and substandard products are prevalent in every market segment. These products cater to a different segment of the market and do not impact our market share. With growing preference of the customers for better quality products, there is an assured market for the products of our Company. Also, we are investing in technology which gives an edge over the cheaper substitutes by way of consistent better quality, flexibility and higher productivity.

11. Any changes in regulations or applicable government incentives would adversely affect the Company's operations and growth prospects.

The Central and the State Government has provided several incentives to the textile sector, from which our Company may benefit, including the TUFs interest, electricity and capital subsidies. These incentives could be modified or removed at any time, or new regulations could be introduced which may change the current regime applicable to the textile industry as a whole which will affect our Company's business, this could adversely affect our Company's operations and financial results. Our Company is also subject to various regulations and textile policies, primarily in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. Any such change could have a material adverse effect on the Company's operations and financial results. In the event there is a delay in receipt of the subsidy component, our margins for a particular period or year may be adversely affected. Further, eligibility to receive subsidies is subject to fulfillment of certain condition by the company applying for the subsidy. Such conditions include the quality of the products manufactured by such a company, the nature of the after sales service, etc. While we are in compliance with all such eligibility parameters as on date, we are unable to assure you that we shall continue to comply with such conditions in the future. In case we are unable to meet any or all of such eligibility parameters or our agreement with nodal agencies cannot be renewed for any reason, we shall be unable to market our products under the subsidy scheme which shall materially increase the cost of our products from the consumer's perspective and consequently may adversely affect our sales and results of operations.

12. Reduction or termination of tax incentives and benefits available to our Company's unit established in tax exempted areas would adversely impact our tax liabilities.

Our Company has established its manufacturing facility at Kalavad, Jamnagar. It is eligible for tax incentives/exemptions under various schemes/statutes of the Central and State Governments. Withdrawal or phasing out of any of the incentives/exemption may impact the profitability of the Company. Management Perception: Our Company does not envisage the withdrawal/phasing out of any of the subsisting schemes of incentives/exemptions in the near future. Also such schemes, in case withdrawn or phased out will impact the industry segment as a whole. Further, our Company cannot assure you that the Indian Government will not enact laws in the future that would adversely impact the tax incentives and benefits and consequently, the tax liabilities and profits of our Company.

13. Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.

Our products depend on customer's expectations and choice or demand of the customer. Any failure to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations. Introduction of new products or for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition. While, we believe that we have always introduced new products to cater to the growing demand of our customers and also endeavour regularly to update our products, our failure to anticipate or to respond adequately to changing technical, market demands and/or consumer requirements could adversely affect our business and financial results.

14. We generated a majority of our sales in Gujarat, Maharashtra, Punjab & Rajasthan and any adverse developments affecting our operations in these states could have an adverse impact on our revenue and results of operations.

For the year ended March 31, 2017, and for the period ended September 30, 2017 our sales in Gujarat, Rajasthan, Maharashtra, Punjab and Union territories together contributed 97.62 % and 93.16 % respectively of our total revenue as mentioned below:

Sr. No.	States	For the year ended March 31, 2017 (Amount in Rs.)	For the period ended September 30, 2017 (Amount in Rs.)
1.	Gujarat	5806.81	2392.23
2.	Maharashtra	447.23	1100.43
3.	Punjab	726.55	262.07
4.	Rajasthan	552.00	170.22
5.	Union Territories	586.72	111.77

We may continue to expand our sales in these states. Existing and potential competitors to our Business may increase their focus on these states, which could reduce our market share. For example, our competitors may intensify their efforts in these states to capture a larger market share. The concentration of our operations in these states heightens our exposure to adverse developments related to competition, as well as economic, political, demographic and other changes, which may adversely affect our business prospects, financial conditions and results of operations. Any adverse development that affects the performance of the sales in these states could have a material adverse effect on our business, financial condition and results of operations.

15. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in the States of Gujarat, Maharashtra, Punjab and Rajasthan. Our business is therefore significantly dependent on the general economic condition and activity in the State in which we operate along with the Central, State and Local Government policies relating to Textile industry. Although industry in which we operate is policy favoured industry by governmental agencies and different subsidies has been encouraged, there can be no assurance that this will continue. We may expand geographically, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations of different product than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to different geographic areas;
- Obtaining the necessary materials and labour in sufficient amounts and on acceptable terms;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience;
- and
- Cost of hiring new employees and absorbing increased costs.

By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected

16. We are dependent on our Top 5 and Top 10 suppliers for uninterrupted supply of raw materials. Any disruption in supply of raw materials from these suppliers will adversely affect our operations.

We are highly dependent on the suppliers of raw material for our products. We procure our raw materials from various domestic and international suppliers depending upon the price and quality of raw materials. However, our Top 5 and top 10 suppliers contribute significantly to supply of raw materials. While our company believe that we would not face difficulties in finding additional suppliers of raw materials, any disruption of supply of raw materials from these suppliers or our procurement of raw materials at terms not favourable to us can

adversely affect our operations and financial cost. The contributions of our top 5 suppliers to our total supplies are as follows:

Particulars	For the year ended March 31, 2017	For the period ended March September 30, 2017
% wise Top 5 of Total Purchase	35.10	60.00
% wise Top 10 of Total Purchase	49.76	81.00

- 17. Our top five and top ten customers contribute major portion our revenues for the year ended March 31, 2017 and for the period ended September 30, 2017. Any loss of business from one or more of them may adversely affect our revenues and profitability.**

Our top five and ten customers contribute to a substantial portion of our revenues for the year ended March 31, 2017 and for the period ended September 30, 2017. Further these customers are generally distributors who further sell to the wholesalers and retailers. However, the composition and revenue generated from these clients might change as we continue to add new customers in normal course of business. Any decline in our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We believe we have maintained good and long term relationships with our customers. However, there can be no assurance that we will continue to have such long term relationship with them also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

Particulars	For the year ended March 31, 2017	For the period ended March September 30, 2017
% wise Top 5 of Total Sale	74.87	53.49
% wise Top 10 of Total Sale	80.39	64.64

- 18. Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Further as on the date of the Draft Prospectus our Company has not received “No-objection” certificate from some of our lenders to undertake this Offer. Non receipt of such “No-Objection” certificate could lead to non compliance of the terms of loan agreements entered into by our Company with said lenders.**

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

Further, as on the date of the Draft Prospectus, we have not received “No Objection” certificates from the lenders. We cannot assure you that such lenders will grant us the “No-Objection” certificate for this Offer. Non-receipt of such “No-Objection” certificate could lead to non-compliance of the terms of loan agreements entered into by our Company with the lenders.

For further details in this regard, please refer chapter titled ‘Financial Indebtedness’ beginning on page 142 of this Draft Prospectus.

- 19. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.**

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. To maintain a lower attrition rate among the employees, we offer various in house facilities to the employees. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future.

Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

20. *Our failure to compete effectively could have an adverse effect on our business, results of operations, financial condition and future prospects.*

We operate in a highly competitive market with competitors who have been in business longer than we have, with financial and other resources that are far greater than ours. Some of our competitors may have certain other advantages over us, including established track record, superior product offerings, wide distribution tie-ups, larger product portfolio, technology, research and development capability and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing and distribution initiatives and may have more flexibility to respond to changing business and economic conditions than we do. Further, some of our competitors are large domestic and international textile or yarn spinning companies. We may not be able to compete with them to engage some of the large distributors, who may prefer to distribute products for such companies with a large portfolio of cotton yarn and other products.

21. *We face stiff competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition. Moreover, we have a limited product portfolio when compared to industry peers in the organized sector which may affect our ability to compete effectively*

The market for our products is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as the quality of products, the quality of the after sales services, the strength of the distribution network and pricing. Some of our competitors may have greater financial, technical and other resources and greater market share and goodwill which may enable them to compete effectively. We also anticipate entry by international players into the domestic market which should further increase the competition. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our sales volume and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition. While we believe we are able to compete effectively with our product portfolio, our competitors' wider product range offers them the opportunity to cater to wider customer base and develop a greater brand recall. We propose to diversify our product portfolio but are unable to assure you whether the same shall be as successful as our existing products. In the event we are unable to compete effectively with our existing product range and are unable to successfully develop and market the new product range within a definite timeline or at all, our business and results of operations shall be adversely affected.

22. *Our Company does not own the office on which our registered office is located.*

Our Company does not own the land on which our registered office is located. The office has been taken on lease from one of our promoter and selling shareholder Prafulaben Dudhagara. If we are unable to renew the lease or if the lease is not renewed on favourable conditions, it may affect our operations adversely. Also if we do not comply with certain conditions of the lease agreement, it may lead to termination of the lease. In the event of non-renewal or termination of the lease, we may have to vacate our current premises and shift to new premises. There can be no assurance that we shall be able to find a suitable location, or one at present terms and conditions. Any additional burden due to shifting of premises, or increased rental expenses, may adversely affect our business operations and financial conditions.

For details on properties taken on lease/rent by us please refer to the heading titled “Land & Property” in chapter titled “Our Business” beginning on page 94 of this Draft Prospectus.

23. Our Company requires significant amount of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive primarily on account of Inventory levels. A significant portion of our working capital is utilized towards trade receivables and inventories. Summary of our working capital position is given below:-

Our Company intend to continue growing by reaching out to newer customers and also increasing the sales in the existing customers. All these factors may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 75 of this Draft Prospectus.

24. Our Company has negative cash flows from its operating activities, investing activities and financing activities in the past years, details of which are given below. Sustained negative cash flows could impact our growth and business.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

25. Our Company has made non compliances and lapsed/made delay in certain filings under various Statutory Acts applicable to it in the past years.

Our Company has made delay in certain filings under various Statutory Acts applicable to it in the past years. Due to these delays in filings, our Company had on several occasions paid the requisite late fees. Further our Company has not complied with certain statutory provisions such as the following:

- The Company was required to appoint a Whole-time Company Secretary under Section 383A of Companies Act 1956 and Section 203 of Companies Act 2013. The Company had in the past contravened the said provision. However as on date, they have appointed a Whole-time Company Secretary and stands compliant with the said provisions.

Although they have not been furnished with any notices by the RoC/any other statutory authority with respect to this non-compliance, such non-compliance may in the future render us liable to statutory penalties and could have serious consequences on our operations. While this could be attributed to technical lapses and human errors, our Company has appointed a whole time Company Secretary and is in the process of setting up a system to ensure that requisite filings and compliances are done within the applicable timelines.

26. Our Company has lapsed /delayed/ erroneous in making the required filings under Companies Act, 2013 and under the applicable provisions of Companies Act, 1956.

Our Company is required to make filings under various rules and regulations as applicable under the Companies Act, 2013 and under the applicable provisions of the Companies Act, 1956. Some of which forms such as Form SH-7, Form MGT-14, PAS-3 and DIR 12 has not been done within the stipulated time period at some instances. Due to these delays in filings, our Company had on several occasions paid the requisite late fees. In past, our company has made erroneous filling of annual returns for certain financial years which reflects incorrect details pertaining to members of the company and transfer executed in the respective annual return. Although, we have not received any show-cause notice in respect of the above, such delay/noncompliance may in the future render us liable to statutory penalties and could have serious consequences on our operations. While this could be attributed to technical lapses and human errors, our Company is in the process of setting up a system to ensure that requisite filings are done appropriately with the requisite timeline.

27. Conflicts of interest may arise out of common business undertaken by our Entities forming part of our Promoter group.

Entities forming part of our promoter group is authorised to deal in the similar business activities as that of our Company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and Entities forming part of our promoter group, in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour entities where they have interest over our Company. There can be no assurance that our Promoters will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition. For further details please refer to the chapters titled “Our Promoters and Promoter Group” beginning on page 126 of this Draft Prospectus, respectively.

28. *We have not entered into any definitive agreements with our customers. If our customers choose not to buy their products from us, our business, financial condition and results of operations may be adversely affected and our business are on purchase order basis with our customers.*

We have not entered into any definitive agreements with our customers, and instead we majorly rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers vendor preferences. Any failure to meet our customers expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, any of which may have an adverse effect on our business, results of operations and financial condition. Our business is conducted on purchase order basis, depending on the requirements of the client preferences and demand. We do not have long-term contracts with most of our customers and there can be no assurance that we will continue to receive repeat orders from any of them, including our long-standing customers. Further, even if we were to continue receiving orders from our clients, there can be no assurance that they will be on the same terms, and the new terms may be less favourable to us than those under the present terms.

29. *We will be subject to risks arising from foreign exchange rate movements.*

Since we are exporting our products to country viz., Bangladesh we face an exchange rate risk. The exchange rate between the Indian Rupee and other currencies has been volatile in recent years and may fluctuate in the future. Therefore, changes in the exchange rate may have a material adverse effect on our product cost, thereby increasing our operating costs which may in turn have a negative impact on our business, operating results and financial conditions. Fluctuations in the exchange rates may affect the Company to the extent of cost of goods sold or purchased in foreign currency terms. Any adverse fluctuations with respect to the exchange rate of any foreign currency for Indian Rupees may affect the Company's profitability.

30. *If we do not successfully commercialise products under our Brand "Angel Fibers", or if the commercialization is delayed, our business, financial conditions and the results of operations may be adversely affected.*

Our present and future results of operations depend upon our ability to successfully develop and commercialize our products. The development process requires extensive research and results may be uncertain and we may not be successful that can ultimately be commercially viable. However, there can be no assurance that we will be able to maintain this record in the future as well, and we may face undue delays in commercializing our products. Decrease in product quality due to reasons beyond our control or allegations of product defects, misbranding, and adulteration even when false or unfounded, could tarnish the image and may cause customers to choose other brand. Further, there can be no assurance that our brand name will not be adversely affected in the future by events that are beyond our control. In the event that (i) we are unable to leverage on the brand name for any reason, (ii) our group companies' actions or incidences adversely affect the brand name, or (iii) customer complaints or adverse publicity from any other source damages our brand, our business, financial condition and results of operations may be adversely affected. We anticipate that as our business expands into new markets and as our markets become increasingly competitive, maintaining and enhancing our brand may become increasingly difficult and expensive. If we are unable to enhance the visibility of our brands, it would have an adverse effect on our business, and our financial condition.

31. *There may be delays in repayment of term loans and over utilization of working capital limits.*

We cannot assure that the monies payable to our secured lenders will be made in timely manner. We however, shall refund such monies, with the interest due and payable if applicable, thereon as prescribed under applicable statutory and/or regulatory provisions. Also sometimes, we may run over our utilization of working capital limits to serve our customers in fulfilling our timely commitments.

32. *We require a number of approvals, NOCs, licences, registrations and permits in the ordinary course of our business; some of the approvals are required to be transferred in the name of Angel Fibers Private Limited from Angel Fibers Limited pursuant to conversion and change of name of our company and any failure or*

delay in obtaining such approvals or renewal of the same in a timely manner may adversely affect our operations.

We require a number of approvals, licenses, registrations and permits in the ordinary course of our business. Additionally, we may need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. We were a private limited company in the name of “Angel Fibers Private Limited”. After complying with the relevant procedure of Companies Act, 2013, the Company was converted into a public limited company followed by a change of name of the company to “Angel Fibers Limited”. We shall be taking necessary steps for transferring the approvals in new name of our company. In case we fail to transfer/ obtain the same in name of the company, the same may adversely affect our business operations.

Any failure to apply for and obtain the required approvals, licences, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licences, registrations and permits would result in a delay in the our business operations which could otherwise adversely affect our financial condition, results of operations and prospects of the Company. We cannot assure you that the approvals, licences, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations.

For further details, please refer the Chapter “Government and other Statutory Approvals” on page 150 of this Draft Prospectus.

33. Intellectual property rights are important to our business. Our Company has made application for registration of our logo to the Registrar of Trademarks, which is awaited. We may not be able to protect our intellectual property rights and may not be allocated to us, which may harm our business.

As on date of this Draft Prospectus, we have filed application for registration of our Company trademarks and wordmark. We applied for the registration of such trademarks and logo, result of which are still pending and awaited. Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill, it is very critical for us to protect our intellectual property and trade secrets with respect to our employees who have access to such information. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India. There is no guarantee that the application for registration of our logo will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. Further in the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. In the event we are not able to obtain registration in respect of such trade mark application, we may not be able to obtain statutory protections available under the Trade Marks Act, 1999, as otherwise available for registered logos and trademarks. Consequently, we are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party. For details on the trademark applications, kindly refer to chapter titled “Government and Other Statutory Approvals” and —“Our Business” appearing on page 150 and 94 of this Draft Prospectus.

For further details regarding our intellectual properties, please refer the chapter titled “Our Business” and “Government Approval” beginning on page 150 of this Draft Prospectus.

34. The shortage or non-availability of power may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high. We are mainly dependent on State Government for meeting our

electricity requirements. Further we source our water requirements from borewells. Any disruption / non availability of power or water facilities shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

35. *The loss of or shutdown of operations at our production facility may have a material adverse effect on our business, financial condition and results of operations.*

We have one manufacturing unit for undertaking the manufacture of our products which is located at Kalavad, Jamnagar. The breakdown or failure of the equipments and/ or civil structure can disrupt our production schedules, resulting in performance being below expected levels. In addition, the development or operation of our facilities may be disrupted for reasons that are beyond our control, including explosions, fires, earthquakes and other natural disasters, breakdown, failure or sub-standard performance of equipment, improper installation or operation of equipment, accidents, operational.

36. *Our Company is partially dependent on third party transportation for the delivery of raw materials/ finished products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company partially uses third party transportation for delivery of our raw materials and finished products. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. These transportation facilities may not be adequate to support our existing and future operations. In addition such goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair ability to procure raw materials or delivery of goods on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

37. *Continued operations of our manufacturing facilities are critical to our business and any disruption in the operation of our manufacturing facilities may have a material adverse effect on our business, results of operations and financial condition.*

Our manufacturing facilities are subject to operating risks, such as unavailability of machinery, break-down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

38. *Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

39. *We have in the past entered into related party transactions and may continue to do so in the future.*

Our Company has entered into certain transactions with our related parties including our Promoters, the Promoter Group, our Directors and their relatives. Further we have loans taken from directors. While we believe that all such transactions have been conducted on the arm's length basis, there can be no assurance

that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to section “Related Party Transactions” in Section “Financial Statements” beginning on page 133 of this Draft Prospectus.

40. *Our operations may be adversely affected in case of industrial accidents at any of our production facilities.*

Usage of heavy machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans, cranes, heating processes of the furnace etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further our plants and machinery are not covered under insurance and hence any such occurrence of accidents could hamper our production and consequently affect our profitability.

41. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or get manufactured by third parties on our account, we may be required to write-down our inventory or pay our suppliers without new purchases or create additional vendor financing, which could have an adverse impact on our income and cash flows.

42. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour, workplace and related laws and regulations. We are also subject to environmental, health and safety laws including but not limited to:

- a. The Environment Protection Act, 1986 (“Environment Protection Act”)
- b. Air (Prevention and Control of Pollution) Act, 1981
- c. Water (Prevention and Control of Pollution) Act, 1974
- d. Hazardous Waste Management & Handling Rules, 2008

Any failure on our part to comply with any existing or future regulations applicable to us may result in legal proceedings being initiated against us, third party claims or the levy of regulatory fines, which may adversely affect our business, results of operations and financial condition. Further amendments to such statutes may impose additional provisions to be followed by our Company and accordingly our Company may need to avoid use of certain ingredients in preparation of our products, discontinue any range of product, incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, which could adversely affect our business, prospects, financial condition and results of operations.

43. *Our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

Our Company has obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of, among others, standard fire and special perils, earthquake etc. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like loss of profits, terrorism, etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If

we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

44. We generally do business with our customers on purchase order basis and do not enter into long-term contracts with most of them.

Our business is dependent on our continuing relationships with our customers. Our Company mostly does not has any long-term contract except for customers. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

45. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution network and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

46. Negative publicity could adversely affect our revenue model and profitability.

Our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations. Further our brand may also be affected if there is any negative publicity associated with our products.

47. Some of our Promoters and Directors have given guarantees in relation to certain debt facilities provided to us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoters and members of Promoter Group have given personal guarantee and collateral security in respect of the loan availed by us. In the event that any of these guarantees/collaterals are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could significantly affect our financial condition and cash flows.

48. Our lenders have charge over our movable and immovable properties in respect of finance availed by us.

Our Company have taken secured loan from banks by creating a charge over our movable and immovable properties in respect of loans/facilities availed by us. The total amounts outstanding and payable by us for secured loans including maturities were Rs. 3899.59 lakhs as on September 30, 2017. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on our business, financial condition and results of operations. For further details please refer to “Annexure B, B(B)- Details of Long Term Borrowings as Restated” and “Annexure B(C)” - Details of Short Term Borrowings as Restated” of chapter titled “Financial Statements as Restated” beginning on page 133 and Financial Indebtedness in chapter titled “Financial Indebtedness” on page 142 of this Draft Prospectus.

49. Our Company has unsecured loans which are repayable on demand. Any demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

As on September 30, 2017, our Company has unsecured loans amounting to Rs. 575.02 lakhs from related and other parties that are repayable on demand to the relevant lender. Such loans are not repayable in accordance

with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, please refer Annexure B - Details of Long Term Borrowings as Restated of chapter titled “Financial Statements” beginning on page 133 of this Draft Prospectus.

50. *The requirements of being a listed company may strain our resources.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies. As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

51. *We have not made any alternate arrangements for meeting our capital requirements for the ‘Objects of the Offer’. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our owned funds, bank borrowings and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Offer” beginning on page 75 of this Draft Prospectus.

52. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 132 of this Draft Prospectus.

53. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and

decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 54. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.***

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

- 55. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Offer, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of the Offer, our Promoters and Promoter Group will collectively own 56.47% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 56. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company and as creditors of the Company.***

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company, for the loan given by them to the Company or as partners of the entities which are creditors of the Company. For further information, see “*Capital Structure*” and “*Our Management*” and “*Related Party Transactions*” beginning on pages 61, 115 and 131, respectively, of this Draft Prospectus.

- 57. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.***

Modernization and technology upgradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed latest technology and that the chances of a technological innovation are not very high in our sector we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the manufacturing facilities, we may be required to implement new technology or upgrade the machineries and other equipment’s employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

- 58. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

59. *Proceeds of the offer will not be available to us.*

As on the date of this Draft Prospectus, Ashok Dudhagara and Prafulaben Dudhagara have, severally and not jointly, specifically confirmed that they hold 1,70,12,320 Equity Shares and 38,54,360 Equity Shares respectively and that they have consented to offer up to 55,50,000 and 12,00,000 Equity Shares each for sale in the Offer for Sale.

For further details, please refer chapter titled “The Offer” and “Objects of the Offer” on page 53 and 75 of this Draft Prospectus. The proceeds from the Offer for Sale will be remitted to the Promoter Selling Shareholders and our Company will not benefit from such proceeds.

Offer Specific Risks

60. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The Offer Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 77 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

61. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

62. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in draft prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and

restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

63. *There is uncertainty on the impact of currency demonetization in India on our business.*

The Reserve Bank of India, or RBI, and the Ministry of Finance of the GoI withdrew the legal tender status of Rs.500 and Rs. 1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the longterm impact of this action. The RBI has also established, and continues to refine, a process for holders of affected banknotes to tender such notes for equivalent value credited into the holders' bank accounts. The short and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations and financial condition

64. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India, if securities transaction tax has been paid on the transaction. Any gain realised on the sale of shares held for more than 36 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of equity shares held for a period of 36 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, may be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

65. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.*

As stated in the reports of the Auditor included in this Draft Prospectus under chapter "Financial Statements as restated" beginning on page 133 of this Draft Prospectus, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

66. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- excise duty on certain raw materials and components;
- central and state sales tax, value added tax and other levies; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

67. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

68. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and Plastic industry contained in the Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the plastic industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled 'Our Industry' beginning on page 82 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

69. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

70. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions

referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

71. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

72. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

73. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

74. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organization (CSO) and International Monetary Fund (IMF). India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices. Demonetization is expected to have a positive impact on the Indian economy, which will help foster a clean and digitized economy in the long run, according to Ms Kristalina Georgieva, Chief Executive Officer, The World Bank. The growth momentum should rise, driven by the Government's policy initiatives in areas such as taxation (GST), foreign direct investment (FDI), and the ease of doing business, among others other major factors helping India stay as a bright spot in the global economic landscape include the lower global oil price, with positive impact on the country's import bill, a well-regulated monetary policy by the Reserve Bank to stabilize prices, and improving fiscal condition.

INDIAN TEXTILE INDUSTRY

The Indian textile industry has a significant presence in the economy as well as in the international textile economy. Its contribution to the Indian economy is manifested in terms of its contribution to the industrial production and foreign exchange earnings. With over 45 million people, the industry is one of the largest source of employment generation in the country. It contributes 14 per cent to industrial production, 9 percent of excise collections, and 18 percent of employment in the industrial sector, nearly 15 percent to the country's total export earnings and 4 percent to the Gross Domestic Product.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralized power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

GLOBAL OVERVIEW OF TEXTILE INDUSTRY

The Global Textile Industry has become very organised and impressive industry in modern times. After the exclusion of global quota scheme, the textile industry is flourishing at high speed. The world is on a new corridor of industrial revolution. High production of wool, cotton, and silk in all over the world has given boost to the textile industry in recent years. Analysts are anticipating more expansion with latest technologies in Textile Machineries. The textile machinery manufacturing hubs like China, Germany, Italy, Switzerland and India have already jumped in gigantic competition to craft and bid best technologies in textile machineries. Global Industry Analysts, Inc. (GIA) has declared that the global bazaar for textile machinery is estimated to reach US\$22.9 billion by 2017. Demand for sophisticated machines that produce high quality cloth is increasing. Key factors for dynamic growth in the textile machinery market contain economic revival

post recession, rising demand for nonwoven disposable textile products, increasing demand from promising regions, especially Asia-Pacific, and going up demand for environmentally-friendly fibers.

GLOBAL TEXTILE BUSINESS & APPAREL BUSINESS OVERVIEW

- China dominates global T&A exports with 40% share of made ups, 37% of apparel, and 39% of fabric. India, Bangladesh, Vietnam, Turkey, Pakistan etc. are the other major T&A exporters.
- The top five Textile & garment importing nations are US, China, Germany, and Turkey. China is the single largest exporter with 39 percent share while India stood at a distant second place with 5 percent share.
- The global fabric trade was worth USD 137 billion in 2013 while the global apparel trade was worth USD 428 billion. It is expected that the rate of growth of the trade in knit fabric and apparel will be higher than that for the woven counterparts.
- Asia is the leader in terms of the installed capacity of textile machinery, 86% of short-staple spindles, 45% long staple spindles, 55% rotor spinning machines, 73% of shuttle fewer looms & 85% of shuttle looms are installed in Asia alone. China, India, Pakistan, Indonesia & Thailand are among the leaders in terms of this installed capacity
- The US, EU-27 countries and Japan remain the key apparel importers. However, the appeal imports of emerging countries like Russia, China and India have registered some momentum in recent times.

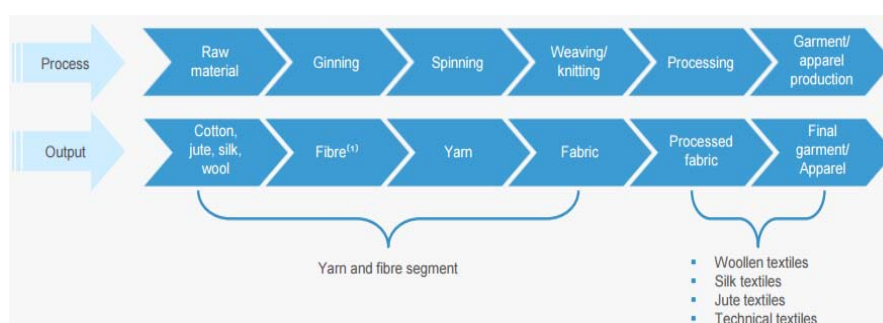

SEGMENTS IN TEXTILE & APPAREL SECTOR

The textile & apparel industry can be broadly divided into two segments:

- Yarn & fibre (include natural & man-made).

Processed fabrics (including woollen textiles, silk textiles, jute textiles, cotton textiles & technical textiles), Readymade Garments (RMGs) & apparel.

The key segments of textile industry

MARKET SIZE

The size of India's textile market in 2016 was around US\$ 137 billion, which is expected to touch US\$ 226 billion market by 2023, growing at a CAGR of 8.7 per cent between 2009-23E. As of June 2017, the central government is planning to finalize and launch the new textile policy in the next three months. The policy aims to achieve US\$ 300 billion worth of textile exports by 2024-25 and create an additional 35 million jobs.

Production of raw cotton in India grew from 28 million bales in FY07 and further increased to 35.1 million bales in FY17. During FY 07-17, raw cotton production expanded at a CAGR of 2.3 per cent. During FY16(1), of the overall amount of raw cotton produced in the country, domestic consumption totaled to 30 million bales, while in FY15(1), the domestic consumption of raw cotton stood at 30.4 million bales. Further cotton's high prices in 2016-17 will encourage farmers to grow more cotton in 2017-18. The area under cotton cultivation will increase by 7 per cent to reach 11.3 million hectares in 2017-18, due to better returns on improved crop yield in 2016-17.

Indian khadi products sales increased by 33% year-on-year to Rs. 2,005 crore (US\$ 311.31 million) in 2016-17 and is expected to exceed Rs. 5,000 crore (US\$ 776.33 million) sales target for 2018-19, as per Khadi and Village Mission (KVIC).

Production of man-made fibre has also been on an upward trend. EXPORT

India is the world's second-largest manufacturer and exporter of textiles and apparels, with a massive raw material and manufacturing base. The industry is a significant contributor to the economy, both in terms of its domestic share and exports. India took the top spot in market share in the men/boys knitwear shirts cotton' category with respect to garment exports to the US between January-June 2017. During FY17, India exported textile items worth US\$ 36.6 billion. Ready made garments had a share of 47.7 per cent in these exports and reached US\$ 17.5 billion. During the same period, fibre, yarn, fabric, and made ups exports reached US\$ 2.5 billion, US\$ 5.3 billion, US\$ 4.3 billion, and US\$ 4.7 billion, respectively. During April-June 2017, India exported cotton items worth US\$ 4.6 billion which includes cotton yarn, fiber, fabric, made ups, and readymade garments from cotton. Handicrafts reached US\$ 443.64 million during the same period and had a share of 4.53 per cent in overall textile exports. In order to boost export the government is also planning to conduct roadshows to promote the country's textiles in non-traditional markets such as South America, Russia & select countries in West Asia. To promote apparel exports 12 locations have been approved by the government to set up apparel parks for exports. As of November 2016, the Central Board of Excise and Customs extended draw back facility for textiles industries from 7.3 per cent to 7.5 per cent. This would improve the competitiveness of textile exporters based in India. The Goods and Services Tax that rolled out in July 2017 is expected to make imported garments cheaper by 5-6 per cent, as the GST regime will levy 5 per cent tax for both domestic textile manufacturers and importers.

GROWTH PROSPECTS FOR INDIAN TEXTILE AND APPAREL INDUSTRY

Expansion of Ready-to-Wear Market

The market for readymade segment is rapidly expanding in India especially in menswear section. The preference of Indian consumers has also undergone a major shift as they just prefer to go out and buy rather than opting for stitching.

Rising Urbanization

Urbanization is a trend that everyone has to contend with. The urban population is set to increase up to 42% by 2030 according to census figures. This is due to the fact that people migrate to cities to look for better job opportunities and living standards. Therefore, organized retail is set to witness a major expansion to fulfill the needs of growing population.

Demographic Structure

India is home to 17% of the world's population. Being one of the youngest countries in the world, it is tipped to have one of the largest work forces for years to come. At 24 years, it has the lowest median age of population in the world, with 50% of the population less than 25 years and 70% less than 35 years of age. Indian T & C Industry envisages to reach US

\$ 100 Billion by 2015 Also, as more and more women become part of the workforce, the demand for women wear including accessories is set for expansion.

Growing prosperity

India has the second largest working population with approx 700 million people between 20-60 years of age. In addition, corporate salaries have grown at 14% p.a. which is fastest globally. Also, the salaries for freshers have gone up by 2-3 times over the last decade. These all factors contribute to increasing disposable incomes in the hands of individuals. With a consumption rate of around 34%, the appetite for high value branded products is ever increasing.

Changing Consumer Lifestyle and Preferences

Indian consumer has become more demanding, as a result, there is a continuous shift in the demand pattern from basic necessities to spending on the lifestyle products and service, largely because of:

- Higher Income levels
- Increasing knowledge and awareness levels
- Higher adaptability to technology
- Greater participation of women and children in household decision making
- Increasing demand for better products and service experience

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

The key initiatives announced in the Union Budget 2017-18 to boost the textiles sector are listed below:

- Encourage new entrepreneurs to invest in sectors such as knitwear by increasing allocation of funds to Mudra Bank from Rs 1,36,000 crore (US\$ 20.4 billion) to Rs 2,44,000 crore (US\$ 36.6 billion).
- Upgrade labour skills by allocating Rs 2,200 crore (US\$ 330 million).

Some of initiatives taken by the government to further promote the industry are as under:

- The Government of India plans to introduce a mega package for the powerloom sector, which will include social welfare schemes, insurance cover, cluster development, and upgradation of obsolete looms, along with tax benefits and marketing support, which is expected to improve the status of power loom weavers in the country.
- The Ministry of Textiles has signed memorandum of understanding (MoU) with 20 e-commerce companies, aimed at providing a platform to artisans and weavers in different handloom and handicraft clusters across the country for selling their products directly to the consumer.
- Memorandum of Understanding (MoU) worth Rs 8,835 crore (US\$ 1.3 billion) in areas such as textile parks, textile processing, machinery, carpet development and others, were signed during the Vibrant Gujarat 2017 Summit.
- The Union Minister for Textiles inaugurated Meghalaya's first-ever apparel and garment making centre to create employment opportunities in the region. The Union Minister for Textiles also mentioned Meghalaya has been sanctioned Rs 32 crore (US\$ 4.8 million) for promotion of handlooms.
- The Government of India has announced a slew of labour-friendly reforms aimed at generating around 11.1 million jobs in apparel and made-ups sectors, and increasing textile exports to US\$ 32.8 billion and investment of Rs 80,630 crore (US\$ 12.09 billion) in the next three years.

ROAD AHEAD

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. The apparel market in India is estimated to grow at a Compound Annual Growth Rate (CAGR) of 11.8 per cent to reach US\$ 180 billion by 2025. (Source: www.ibef.com)

INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organization (CSO) and International Monetary Fund (IMF). India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices. Demonetization is expected to have a positive impact on the Indian economy, which will help foster a clean and digitized economy in the long run, according to Ms Kristalina Georgieva, Chief Executive Officer, The World Bank. The growth momentum should rise, driven by the Government's policy initiatives in areas such as taxation (GST), foreign direct investment (FDI), and the ease of doing business, among others other major factors helping India stay as a bright spot in the global economic landscape include the lower global oil price, with positive impact on the country's import bill, a well-regulated monetary policy by the Reserve Bank to stabilize prices, and improving fiscal condition.

INDIAN TEXTILE INDUSTRY

The Indian textile industry has a significant presence in the economy as well as in the international textile economy. Its contribution to the Indian economy is manifested in terms of its contribution to the industrial production and foreign exchange earnings. With over 45 million people, the industry is one of the largest source of employment generation in the country. It contributes 14 per cent to industrial production, 9 percent of excise collections, and 18 percent of employment in the industrial sector, nearly 15 percent to the country's total export earnings and 4 percent to the Gross Domestic Product.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralized power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

GLOBAL OVERVIEW OF TEXTILE INDUSTRY

The Global Textile Industry has become very organised and impressive industry in modern times. After the exclusion of global quota scheme, the textile industry is flourishing at high speed. The

world is on a new corridor of industrial revolution. High production of wool, cotton, and silk in all over the world has given boost to the textile industry in recent years. Analysts are anticipating more expansion with latest technologies in Textile Machineries. The textile machinery manufacturing hubs like China, Germany, Italy, Switzerland and India have already jumped in gigantic competition to craft and bid best technologies in textile machineries. Global Industry Analysts, Inc. (GIA) has declared that the global bazaar for textile machinery is estimated to reach US\$22.9 billion by 2017. Demand for sophisticated machines that produce high quality cloth is increasing. Key factors for dynamic growth in the textile machinery market contain economic revival post recession, rising demand for nonwoven disposable textile products, increasing demand from promising regions, especially Asia-Pacific, and going up demand for environmentally-friendly fibers.

GLOBAL TEXTILE BUSINESS AND APPAREL BUSINESS OVERVIEW

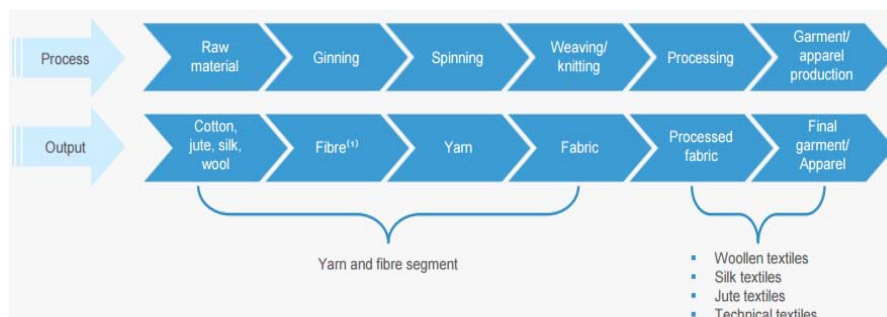

- China dominates global T&A exports with 40% share of made ups, 37% of apparel, and 39% of fabric. India, Bangladesh, Vietnam, Turkey, Pakistan etc. are the other major T&A exporters.
- The top five Textile & garment importing nations are US, China, Germany, and Turkey. China is the single largest exporter with 39 percent share while India stood at a distant second place with 5 percent share.
- The global fabric trade was worth USD 137 billion in 2013 while the global apparel trade was worth USD 428 billion. It is expected that the rate of growth of the trade in knit fabric and apparel will be higher than that for the woven counterparts.
- Asia is the leader in terms of the installed capacity of textile machinery, 86% of short-staple spindles, 45% long staple spindles, 55% rotor spinning machines, 73% of shuttle fewer looms & 85% of shuttle looms are installed in Asia alone. China, India, Pakistan, Indonesia & Thailand are among the leaders in terms of this installed capacity
- The US, EU-27 countries and Japan remain the key apparel importers. However, the appeal imports of emerging countries like Russia, China and India have registered some momentum in recent times.

SEGMENTS IN TEXTILE & APPAREL SECTOR

The textile & apparel industry can be broadly divided into two segments:

- Yarn & fibre (include natural & man-made).

Processed fabrics (including woollen textiles, silk textiles, jute textiles, cotton textiles & technical textiles), Readymade Garments (RMGs) & apparel.

KEY FACTS

- The fundamental strength of the textile industry in India is its strong production base of wide range of fibre / yarns from natural fibres like cotton, jute, silk & wool to synthetic / man-made fibres like polyester, viscose, nylon & acrylic.

- India accounts 63 per cent of the market share of textiles & garments.
- With production of 6,106 million kg, India was the largest producer of cotton in 2016-17.
- Indian textile industry accounts for about 24 per cent of the world's spindle capacity and 8 per cent of global rotor capacity.
- India has the highest loom capacity (including hand looms) with 63 per cent of the world's market share.
- India accounts for about 14 per cent of the world's production of textile fibres & yarns (largest producer of jute, 2nd largest producer of silk & cotton; & 3 rd largest in cellulosic fibre).
- India is the 2nd largest producer of Manmade Fibre & Filament, globally, with production of around 2,11 million kg in 2016- 17(1).

MARKET SIZE

The size of India's textile market in 2016 was around US\$ 137 billion, which is expected to touch US\$ 226 billion market by 2023, growing at a CAGR of 8.7 per cent between 2009-23E. As of June 2017, the central government is planning to finalize and launch the new textile policy in the next three months. The policy aims to achieve US\$ 300 billion worth of textile exports by 2024-25 and create an additional 35 million jobs.

Production of raw cotton in India grew from 28 million bales in FY07 and further increased to 35.1 million bales in FY17. During FY 07-17, raw cotton production expanded at a CAGR of 2.3 per cent. During FY16(1), of the overall amount of raw cotton produced in the country, domestic consumption totaled to 30 million bales, while in FY15(1), the domestic consumption of raw cotton stood at 30.4 million bales. Further cotton's high prices in 2016-17 will encourage farmers to grow more cotton in 2017-18. The area under cotton cultivation will increase by 7 per cent to reach 11.3 million hectares in 2017-18, due to better returns on improved crop yield in 2016-17.

Indian khadi products sales increased by 33% year-on-year to Rs. 2,005 crore (US\$ 311.31 million) in 2016-17 and is expected to exceed Rs. 5,000 crore (US\$ 776.33 million) sales target for 2018-19, as per Khadi and Village Ission (KVIC).

EXPORT

India is the world's second-largest manufacturer and exporter of textiles and apparels, with a massive raw material and manufacturing base. The industry is a significant contributor to the economy, both in terms of its domestic share and exports. India took the top spot in market share in the men/boys knitwear shirts cotton' category with respect to garment exports to the US between January-June 2017. During FY17, India exported textile items worth US\$ 36.6 billion. Ready made garments had a share of 47.7 per cent in these exports and reached US\$ 17.5 billion. During the same period, fibre, yarn, fabric, and made ups exports reached US\$ 2.5 billion, US\$ 5.3 billion, US\$ 4.3 billion, and US\$ 4.7 billion, respectively. During April-June 2017, India exported cotton items worth US\$ 4.6 billion which includes cotton yarn, fiber, fabric, made ups, and readymade garments from cotton. Handicrafts reached US\$ 443.64 million during the same period and had a share of 4.53 per cent in overall textile exports. In order to boost export the government is also planning to conduct roadshows to promote the country's textiles in non-traditional markets such as South America, Russia & select countries in West Asia. To promote apparel exports 12 locations have been approved by the government to set up apparel parks for exports. As of November 2016, the Central Board of Excise and Customs extended draw back facility for textiles industries from 7.3 per cent to 7.5 per cent. This would improve the competitiveness of textile exporters based in India. The Goods and Services Tax that rolled out in July 2017 is expected to make imported garments cheaper by 5-6 per cent, as the GST regime will levy 5 per cent tax for both domestic textile manufacturers and importers.

Increasing investment in Technology Up-gradation Fund Scheme (TUFS)	<ul style="list-style-type: none"> Ministry of Textiles is encouraging investments through increasing focus on schemes such as TUFS & cluster development activities. GROWTH DRIVERS

Strong Fundamental and policy support aiding growth

Changing demographics has also contributed significantly to the sector

- By 2014, India's population had almost doubled compared to figures 30 years before.
- India's growing population has been a key driver of textile consumption growth in the country.
- Moreover, according to World Bank, urban population accounts for 32.7 per cent of the total population of India. This also works as demand driver due to changing taste and preferences in the urban part of India.
- It has been complemented by a young population which is growing and at the same time is exposed to changing tastes and fashion.
- Complementing this factor is rising female workforce participation in the country.

Rising income and a growing middle class have been key demand drivers

- Rising incomes has been a key determinant of domestic demand for the sector; with incomes rising in the rural economy as well, the upward push on demand from the income side is set to continue.
- Rising industrial activity would support the growth in the per capita income.

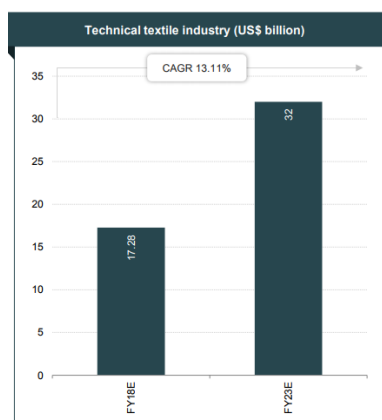

- Capacity built over years has led to low cost of production per unit in India's textile industry; this has lent a strong competitive advantage to the country's textile exporters relative to key global peers.
- The sector has also witnessed increasing outsourcing over the years as Indian players moved up the value chain from being mere converters to vendor partners of global retail giants.

- The strong performance of textile exports is reflected in the value of exports from the sector over the years. Textile exports witnessed a growth (CAGR) of 8.56 per cent over the period of FY06 to FY16.
- In the coming decades, Africa and Latin America could very well turn out to be key markets for Indian textiles.
- In April 2017, the government unveiled Textiles India 2017, its 1st ever global B2B handicrafts and textile event, in Delhi. event showcased a 1000 stalls, and saw about 1,600 buyers from more than 100 countries.

- The technical textile industry is expected to expand at a CAGR of 13.11 per cent during FY18–23 to US\$ 32 billion in FY23.
- The targeted market size would be achieved by targeting non-woven technical textiles.
- Healthcare and infrastructure sectors are major drivers of the technical textile industry.
- India is expected to be a key growth market for the technical textile sector due to cost effectiveness, durability and versatility of technical textiles.
- The government has supported the technical textile industry with an allotment of US\$ 1 billion for SMEs and an exemption in custom duty for raw materials used by the sector.

Technology Upgradation fund scheme (TUFS)

This scheme is implemented by Ministry of Textiles, Govt. of India to provide support for modernization/upgradation of Textile industries by offering incentives and to create more employment generation. The main purpose of this scheme is to upgrade & modernize the Indian Textile Industry by encouraging it to undertake & adopt modern technological process & or undertake capacity expansion. The GoI (Ministry of Textile), vide its Resolution dated January 13, 2016, has launched new variant of TUFS scheme - Amended TUFS. In order to promote ease of doing business in the Country and achieve the vision of generating employment and promoting export through “Make in India” with “Zero effect and Zero defect” in manufacturing, the government would provide additional 10% Capital Investment Subsidy (CIS) for made-up units who availed 15% CIS benefit under ATUFS. The GoI have allocated US\$0.23 billion for ATUFS scheme for FY16-17, under Union Budget 2016-17.

National Textile Policy-2000

The policy was introduced for the overall development of textile industry. Key areas of focus include technological upgrades, enhancement of productivity, product diversification & financing arrangements. New draft for this policy ensures to employ 35 million by attracting foreign investments. It also focuses on establishing a modern apparel garment manufacturing centre in every North Eastern state for which Government has invested an amount of USD3.27 million.

Foreign Direct Investment

India has most liberal and transparent policies in Foreign Direct Investment (FDI) amongst emerging countries. India is a promising destination for FDI in the textile sector. 100% FDI is allowed in the textile sector under the automatic route. FDI in sectors to the extent permitted under automatic route does not require any prior approval either by the Government of India or Reserve Bank of India (RBI). Ministry of Textiles has set up FDI Cell to attract FDI in the textile sector in the country.

Scheme for integrated Textiles parks (SITP)

The Scheme for Integrated Textile Parks (SITP) was approved in July 2005, to provide the industry with world-class infrastructure facilities for establishing their textile units by merging the erstwhile Apparel Parks for Exports Scheme (APES) and Textile Centre Infrastructure Development Scheme (TCIDS). Under SITP, 40 projects (worth USD678 million) have been sanctioned. Out of these 40 projects, 27 have started production. 16 projects has been completed in November 2014. Government has invested a total of USD21.96 million for 21 new textile parks & the remaining 13 textile parks has been given the in-principle approval under SITP. In 2015, textile parks set up under the Scheme for Integrate Textile Park (SITP) attracted an investment of USD4.58 billion.

Technical Textile Industry

Technical textile sector is one of the most emerging and inventive industries of the world. It secures fifth place in the world for being one of the sectors which has high potential of growth in the textile industry. The technical textile industry is successful because of the fact that it continuously develops innovative textiles, fabrics that can be used for various purpose, and create yarns that have multi-utility and useful in almost all types of industries. The Government of India has planned an increase in the fund outlay for technical textiles industry to more than USD117 million during the current 12th Five Year Plan (2012-17) along with an exemption in custom duty for raw materials used by the sector. The demand from infrastructure and defence sector under the “Make in India” program shall further boost the demand from this segment.

The Scheme facilitates import of capital goods at 3% concessional rate of duty with appropriate export obligation. The Foreign Trade Policy also permits EPCG license holders to opt for technological upgradation for their existing capital goods imported under the EPCG license, subject to certain prescribed conditions.

OPPORTUNITIES

- The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand.
- The sector is expected to reach USD226 billion by FY2023.
- Population is expected to reach to 1.34 billion by FY2019.
- Urbanisation is expected to support higher growth due to change in fashion & trends.
- The Central Silk Board sets targets for raw silk production & encourages farmers & private players to grow silk.
- To achieve these targets, alliances with the private sector, especially major agro-based industries in pre-cocoon & post-cocoon segments has been encouraged.
- For the textile industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers.
- It will also bring in greater investments along the entire value chain – from agricultural production to final manufactured goods.
- With global retail brands assured of a domestic foothold, outsourcing will also rise significantly.
- With consumerism & disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with several international players like Marks & Spencer, Guess & Next having entered Indian market.
- The organised apparel segment is expected to grow at a Compound Annual Growth Rate of more than 13 per cent over a 10-year period.
- India & Bangladesh plans to increase their cooperation in order to increase promote the investment & trade of jute & fabrics.
- Future Group plans to expand with 80 stores in order to reach the target sales of 80 million units. This would add to their portfolio of 300 stores spread across the country.
- The CoEs are aimed at creating testing & evaluation facilities as well as developing resource centres & training facilities.
- Existing 4 CoEs, BTRA for Geotech, SITRA for Meditech, NITRA for Protech & SASMIRA for Agrotech, would be upgraded in terms of development of incubation centre

& support for development of prototypes. Fund support would be provided for appointing experts to develop these facilities.

- The government is taking initiatives to attract foreign investments in the textile sector through promotional visits to countries such as Japan, Germany, Italy & France.
- According to the new Draft of the National Textile Policy, the government is planning to attract foreign investments thereby creating employment opportunities to 35 million people.
- FDI inflows in textiles sector, inclusive of dyed & printed textile, stood at USD2.41 billion from April 2000 to December 2016.

THREATS

- The size of the Indian apparel market and its inherent long-term growth potential makes it extremely attractive to branded players across the world. With the Government allowing 100% Foreign Direct Investment (FDI) in retail, several foreign brands and fashion retailers continue to enter India thereby enhancing the fashion culture and raising fashion consciousness in the country. This would lead to great deal of competition among the organised players to grab the largest share of the pie.
- The absence of significant entry barriers leads to an increase in the number of players, especially the unorganized players. This can escalate the degree of competition, making market penetration and sustaining of higher margins even tougher.
- Rainfall plays an important role in the apparel industry. Absence of adequate rainfall can lead to a significant decline in the availability of cotton, besides having an adverse impact on the economy, and consequently, the consumer demand. This can adversely impact the top line and margins. Shorter and less intense winters can also adversely impact sales of the woolen segment.

The market for readymade segment is rapidly expanding in India especially in menswear section. The preference of Indian consumers has also undergone a major shift as they just prefer to go out and buy rather than opting for stitching.

Urbanization is a trend that everyone has to contend with. The urban population is set to increase up to 42% by 2030 according to census figures. This is due to the fact that people migrate to cities to look for better job opportunities and living standards. Therefore, organized retail is set to witness a major expansion to fulfill the needs of growing population.

India is home to 17% of the world's population. Being one of the youngest countries in the world, it is tipped to have one of the largest work forces for years to come. At 24 years, it has the lowest median age of population in the world, with 50% of the population less than 25 years and 70% less than 35 years of age. Indian T & C Industry envisages to reach US

\$ 100 Billion by 2015 Also, as more and more women become part of the workforce, the demand for women wear including accessories is set for expansion.

GROWING PROSPERITY

India has the second largest working population with approx 700 million people between 20-60 years of age. In addition, corporate salaries have grown at 14% p.a. which is fastest globally. Also, the salaries for freshers have gone up by 2-3 times over the last decade. These all factors contribute to increasing disposable incomes in the hands of individuals. With a consumption rate of around 34%, the appetite for high value branded products is ever increasing.

Changing Consumer Lifestyle and Preferences

Indian consumer has become more demanding, as a result, there is a continuous shift in the demand pattern from basic necessities to spending on the lifestyle products and service, largely because of:

- Higher Income levels
- Increasing knowledge and awareness levels
- Higher adaptability to technology
- Greater participation of women and children in household decision making
- Increasing demand for better products and service experience

INVESTMENTS

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 2.55 billion during April 2000 to June 2017.

Some of the major investments in the Indian textiles industry are as follows:

- Raymond has partnered with Khadi and Village Industries Commission (KVIC) to sell Khadi-marked readymade garments and fabric in KVIC and Raymond outlets across India.
- Max Fashion, a part of Dubai based Landmark Group, plans to expand its sales network to 400 stores in 120 cities by investing Rs 400 crore (US\$ 60 million) in the next 4 years.
- Future Group is planning to open 80 new stores under its affordable fashion format, Fashion at Big Bazar (FBB), and is targeting sales of 230 million units of garments by March, 2018, which is expected to grow to 800 million units by 2021.

GOVERNMENT INITIATIVES

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

The key initiatives announced in the Union Budget 2017-18 to boost the textiles sector are listed below:

- Encourage new entrepreneurs to invest in sectors such as knitwear by increasing allocation of funds to Mudra Bank from Rs 1,36,000 crore (US\$ 20.4 billion) to Rs 2,44,000 crore (US\$ 36.6 billion).

OUR BUSINESS PROCESS

We manufacture cotton yarn by using latest technology for which various processes/operations are described below.

This technology comprises of the following stages.

Blow room: This is the first process of cleaning the cotton. The raw cotton pressed in to the bales is in very compact form and contains a lot of agro impurities and foreign particles. In this process the cotton is opened up for further cleaning. There is homogeneous mixing of cotton. The opening itself liberates some heavy impurities which is sucked away in to waste collection bags. Cotton is further cleaned by beating and saw tooth type combing points

Carding: Carding opens and cleans the cotton further to fine web which then takes shape of sliver and collected in a can.

Drawing: 12 or 14 or 16 ends of card slivers are drawn together so that they are mixed and fed into the drawing machine. The output of this machine is a single sliver of homogenous mixing of 12 /14/ 16 card slivers. According to the required count of yarn the draft is provided in such slivers so that spinning is smooth. Drawing is done at two stages, the first one is called breaker drawing and the other is called finisher drawing.

Lap forming & Combing: After breaker drawing the sliver passes through lap former which prepares feed butt (Lap) for comber. These laps are fed into the combers. The fibers of each sliver are parallelized and short and immature fibers are removed. The out put is extra fine and clean slivers. This process ensures clean fabric without any dots of dust/ trash and immature fibers.

Roving: Drawn slivers are fed in to speed frames, which give suitable draft and spin. The out put of this machine is inter-yarn which is thick and has low twist. This stage facilitates further spinning.

Ring Spinning: Roving inter-yarn is fed into the ring frames wherein further draft and spin is provided so as to produce yarn of the required count. The out put of this machine is wound on bobbins. Slub attachment may be installed to get fancy yarns.

Winders: Ring bobbins contain small qty of yarn and the yarn is unchecked. Autowinders rewind such yarns and splices (joins) the ends of various bobbins to make a large yarn package.

Doubling: For bottom weight 2 /3 ply yarns are often required to enhance yarn properties in terms of strength and appearance. 2/3 threads of the output of winders is assembled and wound together on parallel winding machine. Such packages are then fed to Two – For – One (TFO) twisters. Here twist is imparted to the parallel wound yarns.

Inspection & Packing: Each package of yarn is inspected and packed. Random samples are tested in laboratory.

Computerised Panel: This computerized machine electronically checks the yarn very minutely and discards the yarns beyond the pre set range of parameters. This machine also ensures exact length of the yarn. Print out of various parameters of the yarn from each position can be taken from the machine.

Our machineries are equipped with latest advanced technologies, online quality control system, auto doffing with link cover, bobbins transfer system, in-house R&D, HVJ, AFIS Uster, etc. This will ensure manufacturing of international quality of yarn.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2016 (“**FDI Policy 2016**”), which with effect from June 7, 2016, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. Further, DIPP has issued Press note 5, dated June 24, 2016 which introduces few changes in FDI Policy. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2016 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (“**RBI**”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2016, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company

Further, no offer to the public (as defined under Directive 20003/71/EC, together with any amendments) and

implementing measures thereto, (the “Prospectus Directive”) has been or will be made in respect of the Draft Prospectus or otherwise in respect of the Bonds, in any member State of the European Economic Area which has implemented the Prospectus Directive except for any such offer made under exemptions available under the Prospectus Directive, provided that no such offer shall result in a requirement to publish or supplement a prospectus pursuant to the Prospectus Directive, in respect of the Draft Prospectus or otherwise in respect of the Bonds.
