Therefore, our annual and interim financial statements reported after April 1, 2016 will not be directly comparable to the Restated Financial Statements.

Pursuant to a SEBI circular dated March 31, 2016, with respect to financial information to be included in any offer document filed with SEBI on or after April 1, 2016 and until March 31, 2017, we have chosen to report our Restated Financial Statements, for the preceding five years, included in this Draft Prospectus under Indian GAAP. Further, for risk in relation to IND (AS), see “*Risk Factor*” and “*Financial Statement as Restated*” for the preceding five years, on standalone, included in this Draft Prospectus, has been prepared under IGAAP, which varies in certain respects from other accounting principles, including IND (AS), which may be material to investors’ assessment of our results of operations and financial condition on page 13 and page 138 respectively. In order to comply with requirements applicable to public companies in India, subsequent to our Equity Shares being listed on the Stock Exchanges, we will be required to prepare our annual and interim financial statements under IND (AS), as applicable. IND (AS) is different in many respects from Indian GAAP under which our audited financial statements for statutory reporting purposes under the Companies Act have been prepared until Fiscal 2016. The preparation and presentation of our financial statements after listing may be not be comparable with, or may be substantially different from, the preparation and presentation of the Restated Financial Statement is being disclosed in this Draft Prospectus.

There are significant differences between Indian GAAP and IND (AS). Accordingly, the degree to which the Restated Financial Statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices, Indian GAAP, IND (AS), the Companies Act and the SEBI ICDR Regulations, on the Restated Financial Statements presented in this Draft Prospectus should accordingly be limited. Although we have included a summary of qualitative and quantitative differences between Indian GAAP and IND (AS), our financial statements reported under IND (AS) in future accounting periods may not be directly comparable with our financial statements historically prepared in accordance with Indian GAAP, including disclosed in this Draft Prospectus. You should consult your own advisors regarding such differences and their impact on our financial data.

Unless otherwise indicated, any percentage amounts, as set forth in this Draft Prospectus, including in the sections titled ***“Risk Factors”***; ***“Our Business”***; ***“Management’s Discussion and Analysis of Financial Condition and Results of Operations”*** beginning on pages 13, page 19 and Page 168 respectively, have been calculated on the basis of the restated audited financial statements of our Company included in this Draft Prospectus.

If such claims are determined against our Promoter, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

For further details of such cases and the cases filed by and against our Promoters, please see the chapter titled ***“Outstanding Litigation and Material Developments”*** beginning on page 176 of this Draft Prospectus.

3. *We face significant competition in our industry, which may reduce our market share and adversely affect our business, financial condition, results of operations and prospects.*

Our industry is highly competitive and our results of operations and financial conditions are sensitive to, and may be materially and adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduce profit margins or loss of market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

Competition in our industry is significant. The industry in which we operate includes dealing in Stocks, shares, derivatives, Mutual Funds for our clients) which is subject to extensive regulation by the SEBI, the RBI, and other governmental regulatory authorities. We are also regulated by stock exchanges and other intermediaries, including the BSE, NSE, NSDL and CDSL. The regulatory environment in which we operate is also subject to change and we may be adversely affected, if we fail to comply, as a result of new or revised legislation or regulations imposed by the SEBI and other governmental regulatory authorities. If we fail to comply with any of the applicable regulation, administrative or judicial proceedings may be initiated against us that may result in fines and other disciplinary actions including trading bans, cancellation of registration or suspension of business licenses, the suspension or disqualification of our officers or employees, or other adverse consequences. The imposition of any of these or other penalties or restrictions could have a material adverse effect on our business, reputation, financial condition and results of operations. Some of our competitors may be larger than us in terms of business volume. In addition, our competitors that are smaller specialized companies may compete effectively against us based on price and their concentrated size and focus. For details of our competitors, see the section “Our Business” on page 90.

4. *Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s) as per the Restated Financial Statements and the same are summarized as under:*

<i>Standalone</i>		<i>(` Rs In Lakh)</i>				
Particulars	31st December 2017	31st March 2017	31st March 2016	31st March 2015	31st March 2014	31st March 2013

Net change in Cash & Cash Equivalents	-3566.92	4073.41	-688.50	3046.48	-2626.93	3087.01

5. *We are penetrated in Eastern India region only and in future if penetration to other is subject to risks associated with expansion into new geographic markets. Any inability to expand into new geographic markets or penetrate existing markets may adversely affect our growth and future prospects.*

Expansion into new geographic regions, including different states in India, subjects us to various challenges, including those relating to our lack of familiarity with the culture, consumer preferences, regulations and economic conditions of these new regions. Language barriers, difficulties in staffing and managing such operations coupled with, the lack of brand recognition and reputation in such regions may also affect our ability to expand into newer geographic regions. The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including:

- I. Substantially greater financial resources;
- II. Longer operating history than in certain of our businesses;
- III. Greater brand recognition among consumers;
- IV. Larger customer bases in and outside India; or
- V. More diversified operations which allow profits from certain operations to support others with lower profitability.
- VI. compliance with a wide range of local and municipal laws, regulations and practices, including uncertainties associated with changes in laws, regulations and practices and their interpretation; uncertainties with new local business partners including franchisees partners; and Political, economic and social instability.

Further, we may also face significant competition from other players who may already be established in such markets and may have a significant market share. We may not be able to compete with such players By expanding into new geographical regions, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

Further, we may not be able to continue to penetrate existing markets due to any of the reasons specified above. Any inability to enter into new geographic markets or penetrate existing markets could adversely affect our growth, future prospects, financial condition and results of operation.

6. Our Company has several Contingent Liability and Commitments which if materialize could affect our financial position.

As on December 31, 2017 we had Contingent Liability of Rs. 1058.14 Lakhs which has not been provided in our financial statements and which could affect our financial position. Details of Contingent Liabilities and commitments are as follows:-

Particulars	Amount (in Rs Lakhs)
Contingent Liabilities:	
Bank Guarantee issued to third parties by banks	7,45,64,360
Other Claims against the company under appeal	3,12,50,000
Total	10,58,14,360

For further details on the same please refer “Annexure U” under section “Financial Information of the Company” and chapter titled “Outstanding Litigations and Material Developments” beginning on page no 138 and 176 of this Draft Prospectus.

7. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, almost all of which our Company has received and/or applied. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Our Company is yet to make applications to respective authorities for updating each of the aforesaid certificates to reflect its current name. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company has yet to apply for the following approvals and the receipt of the same are pending as on date of this Draft Prospectus:

- (i) Registration under Contract Labour (Regulation & Abolition) Act, 1970.

We may be penalized for non-compliance with the aforementioned laws for which we have not obtained the requisite license. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Approvals” at pages 97 and pages 184 respectively of this Draft Prospectus.

8. Our growth will depend on our ability to develop our brand and failure to do so may have a negative impact on our ability to compete in the finance industry.

We believe that continuous brand building is necessary for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. Brand promotion activities may not yield increased revenues, and even if they do,

any increased revenues may not offset the expenses we incur in building our brand. If we fail to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

9. *Our company may avail unsecured loans that may be recalled by the lenders at any time.*

Our Company may avail unsecured loans which may be recalled by the lenders at any time. In the event that the lenders seeks a repayment of any such loans, our company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all.

10. *Trademark of our logo is not registered and we are in the process of seeking registration of trademark of our logo. There is no assurance that this application shall result in us being granted registration in a timely manner as the status is shown as objected in public search of trademark. Failure to protect our intellectual property may adversely affect our reputation, goodwill and business operations.*

Our corporate name and logo  has not been registered because of the same the use of the words “AKI” in the corporate and trading names by any third parties may lead consumers to confuse them with our Company and if they experience any negative publicity, it could have an adverse effect on our business, results of operations and financial condition. This confusion might also lead to our Company losing business to such competitors and might adversely affect our goodwill. However, the company has made an application for the registration of the

trademark of our logo . Maintaining the reputation of our brands, corporate name, logo and the goodwill associated with these trademarks is critical to our success. Substantial erosion in the value of our brand names could have a material adverse effect on our business, financial condition, results of operations and prospects. For further details please refer to section titled "Government and Other Approvals" beginning on page 184 of this Draft Prospectus.

11. *Downturns or disruptions in the securities markets could reduce transaction volumes, and could cause a decline in the business and impact our profitability.*

Our revenues, level of operations and, consequently, our profitability are dependent on favourable capital market conditions, regulatory and political environment, investor sentiment, price levels of securities and other factors that affect the volume of stock trading in India and the level of interest in Indian business developments. In recent years, the Indian and world securities markets have fluctuated considerably and a downturn in these markets could adversely affect our operating results. Further our company is also engaged in proprietary trading and any downward price movement in the stock market could have an adverse affect on our business and profitability. When markets are highly volatile, we run the risk of bad debts and losses and also litigation. Revenues are likely to decline during sustained periods of reduced trading volumes and our profit margins may be adversely affected if we are unable to reduce our expenses at the same pace as the decline in revenues. When trading volume is low, our profitability will be adversely affected because our revenues will be reduced and some of our operating costs are fixed. Decreases in equity prices or decreased trading activity could have an adverse effect on our business, financial condition and operating results.

12. *Our success largely depends upon the knowledge and experience of our Promoters and our Key Management Personnel as well as our ability to attract and retain skilled personnel. Any loss of our Key Management Personnel or our ability to attract and retain them and other skilled personnel could adversely affect our business, results of operations and financial condition.*

We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Management Personnel. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Management Personnel are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected.

There is significant competition for management and other skilled personnel in the footwear industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. Further, in the event we are not able to attract and retain talented employees, as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further details, see “*Our Management*” on page 113

13. *Our business is manpower intensive and a high proportion of our total staff comprises of employees on contract. Our business may be adversely affected if we are unable to obtain employees on contract or at commercially attractive costs.*

Our success depends on our ability to attract, hire, train and retain skilled personnel. Our business is manpower intensive and our continued growth depends in part on our ability to recruit and retain suitable staff. As we expand our network, we will need experienced manpower that has knowledge of the local market and the retail industry to operate our stores. Typically, the retail industry suffers from high attrition rates especially at the store level. There can be no assurance that attrition rates for our employees, particularly our sales personnel, will not increase. Further, an increase in costs to retain such employees could also adversely affect our financial condition. A significant increase in our employee attrition rate could also result in decreased operational efficiencies and productivity, loss of market knowledge and customer relationships, and an increase in recruitment and training costs, thereby materially and adversely affecting our business, results of operations and financial condition. We cannot assure you that we will be able to find or hire personnel with the necessary experience or expertise to operate our retail stores in our existing markets or new markets that we are entering into. In the event that we are unable to hire people with the necessary knowledge or the necessary expertise, our business may be severely disrupted, financial condition and results of operations may be adversely affected. Furthermore, a high proportion of our total staff, including our sales personnel, typically comprised of employees on contract. While we believe that such a high proportion of employees on contract gives us the necessary flexibility and helps us run our business in an efficient and cost-effective manner, it also makes us more susceptible to sudden shortages and lack of skilled personnel while competing for them with our competitors in the market we operate. Additionally, we have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. We may need to increase compensation and other benefits in order to attract and retain key personnel in the future and that may materially affect our costs and profitability. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase.

14. *Credit risk exposes us to losses caused by financial or other problems experienced by third parties.*

We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. We particularly are exposed to risk attributable to our customers, counterparties, clearing agents, exchanges, clearing houses, and other financial intermediaries as well as issuers whose securities we hold. These parties may default on their obligations owed to us due to insolvency, lack of liquidity, operational failure, government or other regulatory interventions or other reasons. Significant failures by third parties to perform their obligations owed to us in a timely manner or at all could materially and adversely affect our revenues, business, financial conditions and results of operations.

15. *Our inability to identify and understand evolving industry trends, technological advancements, customer preferences and develop new products to meet our customers’ demands may adversely affect our business.*

The Indian Market is characterised by technological advancements, introduction of innovative products, price fluctuations and intense competition. Changes in consumer preferences, regulatory or industry requirements or in competitive technologies may render certain of our products less attractive or obsolete. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced products to create new or address yet unidentified needs among our current and potential customers in a timely manner, is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to secure the necessary technological knowledge, through our own research and development or through technical assistance agreements that will allow us to continue to develop our product portfolio or that we

will be able to respond to industry trends by developing and offering cost effective products. We may also be required to make significant investments in research and development, which may strain our resources and may not provide results that can be monetized. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected.

Moreover, we cannot assure you that we will be able to achieve the technological advances that may be necessary for us to remain competitive or that certain of our products will not become obsolete. Further, if we do not continue to distinguish our products through distinctive, technologically advanced features and design, as well as continue to build and strengthen our brand recognition, we could lose market share and our revenues and earnings could decline. We are also subject to the risks generally associated with new product introductions, including lack of market acceptance, delays in product development and failure of products to operate properly which may lead to increased warranty claims.

We need to identify and understand the key market trends and address our customers' evolving needs proactively and on a timely basis. As a result, we may incur, and have in the past incurred, capital expenditures for development of products to meet the demands of our customers. We cannot assure you, however, that we will be able to install and commission the equipment needed to manufacture products for our customers' in time. Our failure to successfully and timely develop and manufacture new products in order to cater to the requirements of our customers and industry trends could have a material adverse effect on our business, financial condition, results of operations and future prospects.

16. Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operations

As part of our business strategy, we use our information systems and the Internet to deliver services to and perform transactions on behalf of our customers. We have in the past not experienced disruptions of service to customers, but there can be no assurance that we will not encounter disruptions in the future due to substantially increased numbers of customers and transactions or for other reasons. If we experience system interruptions, errors or downtime which could result from a variety of causes, including changes in technological failure, changes to systems, linkages with third-party systems and power failures or are unable to develop necessary technology, our business, prospects, financial condition and results of operations could be materially adversely affected.

Our hardware and software are also subject to damage or incapacitation by human error, natural disasters, power loss, sabotage, computer viruses and similar events or the loss of support services from third parties such as Internet service providers. We may encounter delays or other difficulties incorporating new services and businesses into our information technology systems and there can be no assurance that we will realize the efficiencies and other benefits we anticipate from doing so.

17. Some of our corporate records/documents including corporate registers and forms filed with the Registrar of Companies are not traceable

Our Company does not have all supporting documents and/or ROC filings in relation to the allotment during the period from 1994 till 2005.

18. Our Company has in the past entered into related party transactions and may continue to do so in the future.

We have entered into and may in the course of our business continue to enter into transactions specified in the Restated Financial Statements contained in this Draft Prospectus with related parties that include our Promoters, Directors and Group Companies. Further, there are certain leases entered into with certain members of the Promoters and Promoter Group. For further details in relation to our related party transactions, please see the section entitled "***Related Party Transactions***" on page 136. While we believe that all such transactions have been conducted on an arm's length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable terms. Furthermore, it is likely that we may enter into related party transactions in the future.

There can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our financial condition and results of operations.

19. *We may incur significant advertising and marketing costs to promote our brand in the future.*

We believe that our future success will be partially influenced by further development of our brand our ability to communicate effectively about our products to various target consumers through consistent and focused marketing and advertising initiatives. Insufficient investments in marketing and brand building could also erode or impede the development of our brand. Accordingly, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new geographic markets where we intend to penetrate. Further, we cannot assure you that our marketing and advertising ventures will be successful and achieve their objectives or we may not be required to make further investments than anticipated. This could have an adverse effect on our prospects and growth.

20. *In case our services to the clients are not satisfactory it may cause damage to our professional reputation and legal liability.*

We are into service industry and our business is dependent mainly on how we maintain our relationship with our existing clients who helps to retain existing clients and to attract the new ones. Hence an unsatisfied client may be more damaging in our business than in other businesses. Our activities may subject us to the risk of significant legal liabilities to our clients and aggrieved third parties. In recent years, the volume of claims and amount of damages claimed in litigation and regulatory proceedings against financial intermediaries have been increasing due to strict regulations and investor awareness. These risks often may be difficult to assess or quantify and their existence and magnitude often remain unknown for substantial periods of time. Hence, we may incur significant legal expenses in defending against litigation. Substantial legal liability or significant regulatory action against us could have material financial effects on our Company or could even cause significant harm to our reputation, which could harm our business prospects.

21. *Our Promoters together with our promoter group will continue to retain majority shareholding in our company subsequent to the issue, which will allow them to exercise significant influence over our company. We cannot assure you that our promoters and /or our promoter group will always act in our company's or your best interest.*

The majority of our issued and outstanding Equity Shares are currently beneficially owned by our Promoters and our Promoter Group. Upon completion of the Issue, our Promoters and Promoter Group will own 26,59,000 Equity Shares, or 72.52 % of our post-Issue Equity Share capital (assuming full subscription of the Issue). Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board, the adoption of amendments to our memorandum and articles of association, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters and Promoter Group as our Company's controlling shareholders could conflict with our Company's interests or the interests of its other shareholders. We cannot assure you that the Promoters and Promoter Group will act to resolve any conflicts of interest in our Company's or your favour.

22. *Our Company operates in a highly competitive and fragmented market. Any failure to compete effectively could have a material adverse effect on our business, financial conditions and results of operations.*

Our Company operates in a highly competitive market and face stiff competition from other players operating both in organized and un-organized sectors. Pricing is one of the factors that play an important role. The increased competition by both traditional and new players may affect our margins. In order to protect our existing market share or capture market share, we may be required to increase expenditure on introduce and establish new products. Due to inherent risks in the market place associated with quality of products, new product introductions, including uncertainties about consumer response, increased expenditure may not prove successful in maintaining or

enhancing our market share and could result in lower profitability. Stiff competition from a variety of competitors in the un-organised sectors adversely impacts our business, financial conditions and results of operations.

23. *We often extend credit to our clients for dealing in securities and any default by a client or any downturn in the market could result in substantial losses.*

We allow some of our clients to trade in the stock market and take position on particular stocks by depositing only upfront margin amount. The client is then required to pay/ deposit with us the balance amount, before the pay-in date. In case, the said client is not able to pay the balance amount to us before the pay-in date of the exchange for the said transaction, we, at times extend credit to such clients for the pay-in of the stock exchange. Stock markets are prone to volatility. Hence, in case of highly volatile market or adverse movements in share price, it may be possible that the client may not honour their commitment. Hence, by permitting our customers to purchase securities on margin, we are subject to risks inherent in extending credit, especially during periods of rapidly declining markets in which the value of the collateral held by us could fall below the amount of a customer's indebtedness. In the event of an occurrence of any unforeseen magnitude our business may have a negative impact due to increase in Bad Debts and simultaneous increase in our losses.

24. *Our risk management policies and procedures may leave us exposed to unidentified risks or unanticipated levels of risk which could lead to material losses.*

Our risk management techniques and strategies may not be fully effective in mitigating our exposure to risks and may not cover risks that we fail to identify or anticipate. Some methods of risk management are based on the use of observed historical market behavior. We apply statistical and other tools to these observations to arrive at quantifications of our risk exposures. These tools and metrics may fail to predict future risk exposures. Our losses could therefore be significantly greater than those which the historical measures indicate. Our more qualitative approach to managing those risks could prove insufficient, exposing us to material unanticipated losses. Other risk management methods depend on evaluation of information regarding markets, clients or other matters that are publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risk requires, among other things, policies and procedures to properly record and verify a large number of transactions and events. We cannot assure you that our policies and procedures will effectively and accurately record and verify this information. We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational and legal reporting systems. Nonetheless, the effectiveness of our ability to manage risk exposure cannot be completely or accurately predicted or fully assured. For example, unexpectedly large or rapid movements or disruptions in one or more markets or other unforeseen developments could have a material adverse effect on our results of operations and financial condition. The consequences of these developments could include losses due to adverse changes in inventory values, decreases in the liquidity of trading positions, higher volatility in systemic risk.

25. *Risks associated with our branches, sub-brokers and authorized person.*

We face several risks associated with our branches, sub-brokers and authorized person, including whether they have the experience and financial resources to be effective operators and remain aligned with us on operating, promotional and capital-intensive initiatives, especially during periods of underperformance, and the potential impact on us if they experience other operational problems or project a image inconsistent with our values, particularly if our contractual and other rights and remedies are limited, costly to exercise or subject to litigation.

26. *We depend on third party vendors and service providers.*

We rely on third parties for some of our technological infrastructure that support our capital market businesses. Failure to continue to access these third party technologies on commercially acceptable terms could limit our ability to offer competitive service offerings and adversely impact our future operating results. We also rely on several local service providers for delivering our services and any failure to continue these arrangements on commercially acceptable terms could adversely impact our future operating results.

27. *Our operations are significantly located in the Eastern India region any failure to expand our operations may restrict our growth and adversely affect our business*

Currently, we are carrying our business mainly in the eastern India region and hence our major revenues are generated from operations in these regions only. In the event that demand for equity trading activities in general reduces or stops by any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues.

28. *Our business is manpower intensive and a high proportion of our total staff comprises of employees on contract. Our business may be adversely affected if we are unable to obtain employees on contract or at commercially attractive costs.*

Our success depends on our ability to attract, hire, train and retain skilled sales personnel. Our business is manpower intensive and our continued growth depends in part on our ability to recruit and retain suitable staff. As we expand our network, we will need experienced manpower that has knowledge of the local market. There can be no assurance that attrition rates for our employees, particularly our sales personnel, will not increase. Further, an increase in costs to retain such employees could also adversely affect our financial condition. A significant increase in our employee attrition rate could also result in decreased operational efficiencies and productivity, loss of market knowledge and customer relationships, and an increase in recruitment and training costs, thereby materially and adversely affecting our business, results of operations and financial condition. We cannot assure you that we will be able to find or hire personnel with the necessary experience or expertise to operate our retail stores in our existing markets or new markets that we are entering into. In the event that we are unable to hire people with the necessary knowledge or the necessary expertise, our business may be severely disrupted, financial condition and results of operations may be adversely affected. Furthermore, a high proportion of our total staff, including our sales personnel, typically comprised of employees on contract. While we believe that such a high proportion of employees on contract gives us the necessary flexibility and helps us run our business in an efficient and cost-effective manner, it also makes us more susceptible to sudden shortages and lack of skilled personnel while competing for them with our competitors in the market we operate. Additionally, we have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. We may need to increase compensation and other benefits in order to attract and retain key personnel in the future and that may materially affect our costs and profitability. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase.

29. *We may require further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on December 31, 2017 our Company's total indebtedness is Rs Nil Lakhs. However we may require further indebtedness during the course of business. There can be no guarantee that we will be able to obtain the new facilities at favourable terms or at all. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Also we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget for our working capital requirements, in which case there may be delays in arranging the additional working capital requirements which may lead to an adverse effect on the cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements which may be entered into with our lenders could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties, enforcement of security and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations.

30. *If we fail to manage growth effectively it could have an adverse effect on our results of operations*

We believe our expansion plans will place significant demands on our managerial, operational and financial resources. Growth in our business would require us to expand, train and manage our employee base. The expansion of our Company could also cause problems related to our operational and financial systems and controls and could cause us to encounter working capital issues, as we will need increased liquidity to finance the purchase of inventory, establishment of new showrooms and the hiring of additional employees. If we fail to

manage our growth effectively it may lead to operational and financial inefficiencies that would have a negative effect on our results of operations

31. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures and the terms of our financial arrangements.

Our Company has not paid any dividends in the last four Fiscal years. The declaration of dividends in the future will be recommended by our Board of Directors, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will pay dividends in the future. Additionally, we are restricted by the terms of our debt financing from making dividend payments in the event we default in any of the debt repayment instalments.

32. Insurance coverage not obtained by us against unforeseen losses.

Our Company has not maintained insurance coverage in accordance with industry standards. In case of any unforeseen damage or loss suffered by us will affect the business adversely and could adversely affect our financial condition, cash flows and results of operations.

33. Our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees.

As at January 31, 2018, we had 51 full-time employees on our rolls and Nil personnel, on a contract basis, respectively. Although we have not experienced any major disruptions to our business operations due to any labour disputes or other problems with our work force in the past, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business, reputation and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislations that protect the interests of workers, including legislations that set forth detailed procedures for the establishment of trade unions, dispute resolution and employee removal and legislations that impose certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, demand for increase in wages, work stoppages, which may lead to diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Further, the minimum wage laws in India may be amended leading to upward revisions in the minimum wages payable in one or more states in which we currently operate or are planning to expand to. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations.

34. Insufficient cash flows to meet required working capital requirements could adversely affect our Company's operations and financial results

The business of our Company requires a significant amount of working capital to finance the payments for Man-power and day to day Expenses. The working capital requirements of our Company are also affected by the credit lines that our Company extends to its customers, in line with industry practice. Moreover, our Company may need to raise term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. There can be no assurance that our Company will continue to be successful in arranging adequate working capital and term loans for its existing or expanded operations on acceptable terms or at all, which could adversely affect our Company's operations and financial results.

35. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. We have not been sanctioned any working capital and funding the same through the internal sources only. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

36. *Our Promoters, Directors and Key Management Personnel of our Company may have other interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters are interested in us to the extent of any transactions entered into or their shareholding and dividend entitlement in us. Our Directors are also interested to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity. For further details, please see the sections entitled, “***Our Promoters and Promoter Group***”, “***Our Management***” and “***Related Party Transactions***” on pages 128, page 113 and page 136 respectively.

37. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.*

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or another independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. For further details, please see the section titled “***Objects of the offer***” beginning on page 62 of this Draft Prospectus.

38. *If we are unable to establish and maintain an effective system of internal controls and compliances our business and reputation could be adversely affected.*

We manage regulatory compliance by monitoring and evaluating our internal controls, and ensuring that we are in compliance with all relevant statutory and regulatory requirements. However, there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation.

39. *Third party industry and statistical data in this Draft Prospectus may be incomplete, incorrect or unreliable.*

Neither the LM nor the Company have independently verified the data obtained from the official and industry publications and other sources referred in this Draft Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information, please refer to section titled “***Industry Overview***” beginning on page 70 of this Draft Prospectus.

40. *We may not be able to successfully implement our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. We have successfully executed our business strategies in the past but there can be no guarantee that we can

implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

41. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market for our services is competitive because both the organized and unorganized players. Players in this industry generally compete on key attributes such as distribution network, skilled man power, pricing and timely delivery and quality of products. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector Issues their products at highly competitive prices which may not be matched by us and consequently affect our volume of revenue and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

42. Our Restated Financial Statements for the preceding five years as included in this Draft Prospectus, have been prepared under IGAAP, which varies in certain respects from other accounting principles, including IND (AS), which may be material to investors' assessment of our results of operations and financial condition

In accordance with India's roadmap for convergence of its existing standards with IFRS, referred to as IND (AS), announced by the MCA, through press notes dated January 22, 2010, read with the Companies (Indian Accounting Standards) Rules, 2015 issued by the MCA on February 16, 2015, effective April 1, 2015, our Company is required to prepare their financial statements in accordance with IND AS for periods beginning on or after April 1, 2017

Pursuant to a SEBI circular dated March 31, 2016, with respect to financial information to be included in any offer document filed with SEBI on or after April 1, 2016 and until March 31, 2017, we have chosen to report our Restated Financial Statements, included in this Draft Prospectus under Indian GAAP. In order to comply with requirements applicable to public companies in India, subsequent to our Equity Shares being listed on the Stock Exchanges, we will be required to prepare our annual and interim financial statements under IND (AS), as applicable. IND (AS) is different in many respects from Indian GAAP under which our audited financial statements for statutory reporting purposes under the Companies Act have been prepared until Fiscal 2016. The preparation and presentation of our financial statements after listing may be not be comparable with, or may be substantially different from, the preparation and presentation of the Restated Financial Statements is being disclosed in this Draft Prospectus.

Accordingly, the degree to which the Restated Financial Statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices, Indian GAAP, the Companies Act and SEBI ICDR Regulations. Any reliance by a reader not familiar with Indian accounting practices and applicable laws on the financial disclosures presented in this Draft Prospectus should accordingly be limited. Further, our Restated Financial Statements included in this Draft Prospectus may not form an accurate basis to consider the accounting policies and financial statements adopted by our Company for future periods, which may differ materially from our Restated Financial Statements. We urge you to consult your own advisors regarding differences between Indian GAAP and other accounting policies and the impact of such differences on our financial data, including the impact of our transition to, and adoption of IND (AS), for accounting periods commencing on or after April 1, 2016.

EXTERNAL RISKS

43. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit

availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

44. The Government of India had recently implemented certain currency demonetization measures, which may affect the Indian economy and our business, results of operations, financial condition and prospects.

On November 8, 2016, the RBI and the Ministry of Finance of the GoI withdrew the legal tender status of ₹500 and ₹1,000 currency notes pursuant to notification dated November 8, 2016. The short-term impact of these developments has been, among other things, a decrease in liquidity of cash in India. There is uncertainty on the medium- and long-term impact of this action. The medium- and long-term effects of demonetization on the Indian economy and our business are uncertain and we cannot accurately predict its effect on our business, results of operations, financial condition and prospects.

45. Any changes in the regulatory framework could adversely affect our operations and growth prospects

Our Company is subject to various regulations and policies. For details see section titled “**Key Regulations and Policies**” beginning on page 97 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

46. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price And liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

47. Our 100% Revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

We derive 100% of our revenue from our operations in India, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

48. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Shree Bahubhali Stock Broking Pvt Ltd. as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

49. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price

The Issue Price of our Equity Shares shall be determined by Book building method. This price is based on numerous factors (For further information, please refer chapter titled “***Basis for offer Price***” beginning on page 65 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

50. There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time

51. Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

52. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI (MCA), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

53. Economic developments and volatility in securities markets in other countries may cause the price of the Equity Shares to decline.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investor's reactions to developments in one country may have adverse effects on the market price of securities of companies situated in other countries, including India. For instance, the recent financial crisis in the United States and European countries lead to a global financial and economic crisis that adversely affected the market prices in the securities markets around the world, including Indian securities markets. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

54. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in draft prospectus/ prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

55. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular

56. The nationalized goods and services tax (GST) regimes implemented by the Government of India have impact on our operations

The Government of India has from July 01, 2017 has implemented the Goods and Service Tax a comprehensive national goods and service tax (GST) regime that combines taxes and levies by the Central and State Governments into a unified rate structure. The GST imposed on the diamond industry is 5% as compare the NIL from Gujarat VAT. Since we are an SEZ unit and majorly engaged in Export Activities, the same is not affecting us significantly.

57. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange

closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE could adversely affect the trading price of the Equity Shares

58. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic, social and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices

59. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all

60. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares

61. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

Introduction

Global Economic Outlook

Global Economic activity picked up modestly towards the end of 2016-17. This was backed by cyclical recovery in investments, manufacturing and trade following a lackluster out-turn in the beginning of the financial year. Although the growth momentum in India slowed down slightly during the year partly due to external shocks and partly due to temporary repercussions resulting from a series of reforms, the GDP growth rate remained robust compared to other emerging nations. During 2016-17 India initiated a series of structural reforms with a view to achieving medium and long run gains. In its 2017 'Article IV Consultation,' the International Monetary Fund (IMF) highlighted the continued progress in reforms that brightens India's medium-term prospects.

Indian securities markets performed well amid external headwinds as indicated by soaring indices, expansion of market capitalization of the exchanges and assets under management in the mutual funds industry. Despite a setback in the third quarter of 2016-17, foreign portfolio investments for the year increased compared to the previous year. Primary market issues also increased both in number as well as in terms of the amount mobilized. On the other hand, new policy measures have been initiated to develop the commodity derivatives market.

REVIEW OF THE GENERAL ECONOMIC ENVIRONMENT AND INVESTMENT CLIMATE

I. GLOBAL ECONOMY: RECENT DEVELOPMENTS

Following a lackluster out-turn, economic activity picked up towards the end of 2016-17 especially in emerging markets and developing economies supported by a recovery in investments, manufacturing and trade. The World Economic Outlook (WEO) published by the International Monetary Fund (IMF) in April 2017 has upgraded expected world growth from 3.1 per cent in 2016 to 3.5 per cent in 2017 and 3.6 per cent in 2018. The tailwind is coming from stronger economic activities, expectations of more robust global demand, amicable inflationary conditions and optimistic financial markets. However, structural impediments to a stronger recovery appear as headwinds over the medium term.

Advanced economies are tending towards protectionism to deal with persistent structural problems such as low productivity growth and high income inequalities. This tendency might affect global economic integration between advanced economies and emerging markets and developing economies. As per WEO's forecasts, growth in advanced economies may go up from 1.7 per cent in 2016 to 2.0 per cent in 2017 and 2018. The outlook for the United States has brightened as a result of proposed fiscal policy easing by the newly elected government. Great Britain, on the other hand, recorded faster recovery fueled by increased spending after it decided to leave the European Union in June 2016. Backed by strong net exports the Japanese economy too has expanded. Meanwhile, recovery also continues in the Euro-zone supported by domestic demand, falling unemployment and recovery in peripheral economies. Nevertheless, the current high sovereign debt levels and weak banking sectors in some economies may thwart recovery.

Source: IMF, *World Economic Outlook*.

The economic performance of emerging markets and developing economies has been somewhat mixed with a number of countries expanding faster than expected, while a few are experiencing a slowdown. WEO predicts that growth rates in emerging and developing nations will improve from 4.1 per cent in 2016 to 4.5 per cent in 2017 and to 4.8 per cent in 2018. Growth in the two largest emerging market economies, India and China, has remained strong. However, growth in China is expected to decelerate from 6.7 per cent in 2016 to 6.6 per cent in 2017 and 6.5 per cent in 2018. In India, the impact of demonetization has ebbed and as per WEO, India is expected to grow at 7.2 per cent in 2017 and 7.7 per cent in 2018; this is substantially higher than the 6.8 per cent growth recorded in 2016.

Commodity prices showed an uptrend during 2016-17. As a result, headline inflation has been picking up in advanced economies, although core inflation has remained subdued. A number of emerging markets and developing economies also witnessed spiraling of headline inflation due to higher commodity prices. Looking ahead, downside risks remain heightened due to a number of factors. Firstly, protectionist policies being pursued in the US may work as a major impediment to global growth by hampering cross-border trade and capital flows. Secondly, a hike in interest rates by the Federal Reserve in the United States might further tighten international currency markets and may result in sharp Dollar appreciation, which may have adverse repercussions on importing nations. Thirdly, high leverage and economic rebalancing in the second largest economy in the world, China remains a risk for global markets. Fourthly, geopolitical issues such as increasing tension between the US and North Korea could also destabilize markets across the world.

II. THE INDIAN ECONOMY: RECENT DEVELOPMENTS

The Indian economy recorded robust expansion during 2016-17 albeit at a slightly slower pace as compared to the previous year. The strong growth was backed by private and government consumption. However, this was offset by slowing fixed investments, subdued industrial activity and sluggish exports. Lower energy costs, revision of public sector salaries and pensions and a favorable monsoon boosted urban and rural incomes which resulted in increased

consumption. Economic activity also benefitted from foreign investments and increase in public infrastructure spending. With foreign exchange reserves at around US\$ 370 billion at the end of 2016-17 external vulnerabilities are in check.

The Government of India has initiated a number of reforms that are going to benefit the economy in the medium and long run. With a view to curbing black money and tax evasion, and to deal a body blow to terrorist activities and counterfeiting, the Indian government undertook 'demonetization'¹ of large-denomination currency notes. In other major policy initiatives, a constitutional amendment was done to pave the way for the Goods and Services Tax (GST) to create a common Indian market, improving tax compliance and boosting investments. The Insolvency and Bankruptcy Code, 2016 was passed by Parliament which will help in cleaning up bank balance sheets. Besides, the government has opened up defense, civil aviation and the single-brand retail and pharmaceutical sectors to more foreign direct investments.

Considering the inflationary trend consumer price index (CPI) inflation is expected to be below 5 per cent during 2017-18. In 2016-17 CPI inflation was 4.5 per cent, which is below the Reserve Bank of India's (RBI's) target of 5 per cent. The *Economic Survey 2016-17* forecast that India may record real GDP growth in the 6.8 to 7.5 per cent range in 2017-18. Fitch Ratings in its recent update has maintained a stable outlook for India, supported by a strong medium-term growth outlook.

A. GROWTH

The Indian economy is estimated to have grown by 7.1 per cent during 2016-17 on top of a growth of 8.0 per cent in 2015-16 (Figure 1.1). Gross value added (GVA) at basic prices grew at 6.6 per cent during 2016-17 against 7.9 per cent in 2015-16 (Table 1.2). The gross national income (GNI) at constant prices rose by 7.0 per cent in 2016-17 compared to 8.0 per cent growth during 2015-16. Slowing down of the industrial and services sectors accounted for deceleration of growth during the year. The primary sector on the other hand recorded faster expansion.

B. AGRICULTURE

As per the Central Statistics Office's (CSO's) second advanced estimates, GVA at constant prices of the 'agriculture, forestry and fishing' sector grew by 4.9 per cent during 2016-17 against a 0.7 per cent growth during the previous year.

C. INDUSTRY

Growth of the industrial sector decelerated in 2016-17 from the previous year mainly due to a slowdown in mining and quarrying activities (GVA growth rate fell from 10.5 per cent in 2015-16 to 1.8 per cent in 2016-17), coupled with a weakening of manufacturing activity (GVA growth rate fell from 10.8 per cent in 2015-16 to 7.9 per cent in 2016-17). The government revised the base year for the Index of Industrial Production (IIP) to 2011-12 from 2004-05. As per the new series, IIP during 2016-17 (5.0 per cent) showed a pickup in the industrial activities compared to 2015-16 (3.4 per cent) (Table 1.4). During 2016-17, the IIP of mining registered growth of 5.3 per cent and IIP of manufacturing registered a growth rate of 4.9 per cent. On the other hand, positive impetus came from electricity, gas and water supply & other utility services as the sector witnessed mild improvement in its GVA growth rate, which rose from 5.0 per cent in 2015-16 to 7.2 per cent in 2016-17.

D. SERVICES

The services sector is a major contributor to India's GDP. This sector accounted for 61.7 per cent of the GVA in 2016-17. Growth in GVA in the services sector decelerated to 6.9 per cent in 2016-17 from 9.1 per cent in the previous year. The slowdown was mainly caused by softening of activities in the trade, hotels, transport and communication and services related to broadcasting as well as financing, real estate and professional services sectors. On the other hand, construction and public administration, defense and other services witnessed expansion during the year as compared to the previous year.

E. SAVINGS AND INVESTMENTS

During 2015-16, gross saving is estimated at ` 44.05 lakh crore as compared to ` 40.98 lakh crore during 2014-15. The rate of gross saving to GDP stood at 32.2 per cent for 2015-16, as compared to 32.9 per cent in 2014-15 (Table 1.5). Even with a decline in its share, the household sector continued to be the highest contributor to gross savings with a share of 59.2 per cent in 2015-16. A decline in household savings in physical assets resulted in the share of the household sector in gross savings falling to 59.2 per cent in 2015-16 (62.0 per cent in 2014-15). The share of non-financial corporations increased from 34.3 per cent in 2014-15 to 37.3 per cent in 2015-16. The share of saving of the financial corporations in the gross savings decreased from 8.3 per cent in 2014-15 to 6.5 per cent in 2015-16. The dis-saving of the general government decreased from 4.6 per cent of gross savings in 2014-15 to 3.1 per cent in 2015-16.

The gross capital formation (GCF) at current prices is estimated at ` 45.45 lakh crore for 2015-16 as compared to ` 42.58 lakh crore during 2014-15. The rate of GCF to GDP declined from 34.2 per cent during 2014-15 to 33.2 per cent in 2015-16. The rate of capital formation in 2011-12 to 2015-16 was marginally higher than the rate of savings because of net capital inflow from the rest of the world (RoW).

F. BALANCE OF PAYMENTS

India's trade deficit narrowed to US\$ 82.8 billion in April-December 2016 from US\$ 105.3 billion during the same period in 2015-16. Aided by a contraction in the trade deficit, the current account deficit (CAD) on a cumulative basis narrowed to 0.7 per cent of GDP in 2016 (April-December) from 1.4 per cent in the corresponding period of 2015-16. Net FDI inflows during April-December 2015 rose sharply by 12.3 per cent over those in the corresponding period in the previous year. However, nationalistic and protectionist policies adopted by the new US government may diminish export revenue from the United States which may be a cause for concern in the medium and long term. Foreign portfolio investments, however, witnessed a net outflow of US\$ 3.2 billion during April-December 2016 as compared to US\$ 3.7 billion outflow a year ago. During April-December 2016, the level of foreign exchange reserves (on a BoP basis) went up by US\$ 14.2 billion. IMF, in its *Staff Report for the 2017 Article IV Consultation*, observed that on a positive side India's external vulnerability were in check and the current account deficit was expected to remain contained. Forex reserves were also robust which covers around 8 months of imports. On a downside, weak external demand continues to constrain India's exports.

G. FISCAL DEFICIT

The Government of India has placed added emphasis on bringing down the fiscal deficit to 3.0 per cent of GDP by 2018-19. In the backdrop of higher public expenditure and subdued private investments, the government is following the principle of gradual adjustments for improving the fiscal condition. The Union Budget 2017-18 declared that in 2016-17 the fiscal deficit was 3.5 per cent of GDP (Revised Estimates). As per Budget Estimates, fiscal deficit for 2017-18 is 3.2 per cent of GDP, that is, ₹ 5,46,531 crore. Revenue deficit, which needs to be contained at 2.0 per cent under the existing Fiscal Responsibility and Budget Management (FRBM) Act's provisions, was estimated at 1.9 per cent of GDP, that is, ₹ 3,21,163 crore (Budget Estimates) in 2017-18 against 2.1 per cent of GDP in 2016-17 (Revised Estimates).

H. EXCHANGE RATE

Volatility in the USD-INR exchange rate remained contained during the first half of 2016-17. However, there was an uptick in volatility during the second half owing to various factors. The Indian Rupee depreciated sharply vis-à-vis the US Dollar during November 8-28, 2016 in the aftermath of the US presidential election results. However, since end of January 2017, there has been a steady appreciation of the Rupee, mainly due to strong capital inflows which include portfolio inflows into equities as well as into debt markets in February and March 2017. During 2016-17, the Indian Rupee touched a low of 68.7 (November 28, 2016) against the US Dollar and a high of 62.2 (April 04, 2016) against the US Dollar. The Indian Rupee closed at 64.8 against the US Dollar on March 31, 2017. During the year, forex reserves increased considerably by about US\$ 9.8 billion from US\$ 359.8 billion as of April 01, 2016 to US\$ 369.9 billion as on March 31, 2017.

Introduction

Global Economic Outlook

Global Economic activity picked up modestly towards the end of 2016-17. This was backed by cyclical recovery in investments, manufacturing and trade following a lackluster out-turn in the beginning of the financial year. Although the growth momentum in India slowed down slightly during the year partly due to external shocks and partly due to temporary repercussions resulting from a series of reforms, the GDP growth rate remained robust compared to other emerging nations. During 2016-17 India initiated a series of structural reforms with a view to achieving medium and long run gains. In its 2017 'Article IV Consultation,' the International Monetary Fund (IMF) highlighted the continued progress in reforms that brightens India's medium-term prospects.

Indian securities markets performed well amid external headwinds as indicated by soaring indices, expansion of market capitalization of the exchanges and assets under management in the mutual funds industry. Despite a setback in the third quarter of 2016-17, foreign portfolio investments for the year increased compared to the previous year. Primary market issues also increased both in number as well as in terms of the amount mobilized. On the other hand, new policy measures have been initiated to develop the commodity derivatives market.

REVIEW OF THE GENERAL ECONOMIC ENVIRONMENT AND INVESTMENT CLIMATE

III. GLOBAL ECONOMY: RECENT DEVELOPMENTS

Following a lackluster out-turn, economic activity picked up towards the end of 2016-17 especially in emerging markets and developing economies supported by a recovery in investments, manufacturing and trade. The World Economic Outlook (WEO) published by the International Monetary Fund (IMF) in April 2017 has upgraded expected world growth from 3.1 per cent in 2016 to 3.5 per cent in 2017 and 3.6 per cent in 2018. The tailwind is coming from stronger economic activities, expectations of more robust global demand, amicable inflationary conditions and optimistic financial markets. However, structural impediments to a stronger recovery appear as headwinds over the medium term.

Advanced economies are tending towards protectionism to deal with persistent structural problems such as low productivity growth and high income inequalities. This tendency might affect global economic integration between advanced economies and emerging markets and developing economies. As per WEO's forecasts, growth in advanced economies may go up from 1.7 per cent in 2016 to 2.0 per cent in 2017 and 2018. The outlook for the United States has brightened as a result of proposed fiscal policy easing by the newly elected government. Great Britain, on the other hand, recorded faster recovery fuelled by increased spending after it decided to leave the European Union in June 2016. Backed by strong net exports the Japanese economy too has expanded. Meanwhile, recovery also continues in the Euro-zone supported by domestic demand, falling unemployment and recovery in peripheral economies. Nevertheless, the current high sovereign debt levels and weak banking sectors in some economies may thwart recovery.

Source: IMF, *World Economic Outlook*.

The economic performance of emerging markets and developing economies has been somewhat mixed with a number of countries expanding faster than expected, while a few are experiencing a slowdown. WEO predicts that growth rates in emerging and developing nations will improve from 4.1 per cent in 2016 to 4.5 per cent in 2017 and to 4.8 per cent in 2018. Growth in the two largest emerging market economies, India and China, has remained strong. However, growth in China is expected to decelerate from 6.7 per cent in 2016 to 6.6 per cent in 2017 and 6.5 per cent in 2018. In India, the impact of demonetization has ebbed and as per WEO, India is expected to grow at 7.2 per cent in 2017 and 7.7 per cent in 2018; this is substantially higher than the 6.8 per cent growth recorded in 2016.

Commodity prices showed an uptrend during 2016-17. As a result, headline inflation has been picking up in advanced economies, although core inflation has remained subdued. A number of emerging markets and developing economies also witnessed spiraling of headline inflation due to higher commodity prices. Looking ahead, downside risks remain heightened due to a number of factors. Firstly, protectionist policies being pursued in the US may work as a major impediment to global growth by hampering cross-border trade and capital flows. Secondly, a hike in interest rates by the Federal Reserve in the United States might further tighten international currency markets and may result in sharp Dollar appreciation, which may have adverse repercussions on importing nations. Thirdly, high leverage and economic rebalancing in the second largest economy in the world, China remains a risk for global markets. Fourthly, geopolitical issues such as increasing tension between the US and North Korea could also destabilize markets across the world.

IV. THE INDIAN ECONOMY: RECENT DEVELOPMENTS

The Indian economy recorded robust expansion during 2016-17 albeit at a slightly slower pace as compared to the previous year. The strong growth was backed by private and government consumption. However, this was offset by slowing fixed investments, subdued industrial activity and sluggish exports. Lower energy costs, revision of public sector salaries and pensions and a favorable monsoon boosted urban and rural incomes which resulted in increased consumption. Economic activity also benefitted from foreign investments and increase in public infrastructure spending. With foreign exchange reserves at around US\$ 370 billion at the end of 2016-17 external vulnerabilities are in check.

The Government of India has initiated a number of reforms that are going to benefit the economy in the medium and long run. With a view to curbing black money and tax evasion, and to deal a body blow to terrorist activities and counterfeiting, the Indian government undertook 'demonetization'¹ of large-denomination currency notes. In other major policy initiatives, a constitutional amendment was done to pave the way for the Goods and Services Tax (GST) to create a common Indian market, improving tax compliance and boosting investments. The Insolvency and Bankruptcy Code, 2016 was passed by Parliament which will help in cleaning up bank balance sheets. Besides, the government has opened up defense, civil aviation and the single-brand retail and pharmaceutical sectors to more foreign direct investments.

Considering the inflationary trend consumer price index (CPI) inflation is expected to be below 5 per cent during 2017-18. In 2016-17 CPI inflation was 4.5 per cent, which is below the Reserve Bank of India's (RBI's) target of 5 per cent. The *Economic Survey 2016-17* forecast that India may record real GDP growth in the 6.8 to 7.5 per cent range in 2017-18. Fitch Ratings in its recent update has maintained a stable outlook for India, supported by a strong medium-term growth outlook.

I. GROWTH

The Indian economy is estimated to have grown by 7.1 per cent during 2016-17 on top of a growth of 8.0 per cent in 2015-16 (Figure 1.1). Gross value added (GVA) at basic prices grew at 6.6 per cent during 2016-17 against 7.9 per cent in 2015-16 (Table 1.2). The gross national income (GNI) at constant prices rose by 7.0 per cent in 2016-17 compared to 8.0 per cent growth during 2015-16. Slowing down of the industrial and services sectors accounted for deceleration of growth during the year. The primary sector on the other hand recorded faster expansion.

As per the Central Statistics Office's (CSO's) second advanced estimates, GVA at constant prices of the 'agriculture, forestry and fishing' sector grew by 4.9 per cent during 2016-17 against a 0.7 per cent growth during the previous year.

K. INDUSTRY

Growth of the industrial sector decelerated in 2016-17 from the previous year mainly due to a slowdown in mining and quarrying activities (GVA growth rate fell from 10.5 per cent in 2015-16 to 1.8 per cent in 2016-17), coupled with a weakening of manufacturing activity (GVA growth rate fell from 10.8 per cent in 2015-16 to 7.9 per cent in 2016-17). The government revised the base year for the Index of Industrial Production (IIP) to 2011-12 from 2004-05. As per the new series, IIP during 2016-17 (5.0 per cent) showed a pickup in the industrial activities compared to 2015-16 (3.4 per cent) (Table 1.4). During 2016-17, the IIP of mining registered growth of 5.3 per cent and IIP of manufacturing registered a growth rate of 4.9 per cent. On the other hand, positive impetus came from electricity, gas and water supply & other utility services as the sector witnessed mild improvement in its GVA growth rate, which rose from 5.0 per cent in 2015-16 to 7.2 per cent in 2016-17.

L. SERVICES

The services sector is a major contributor to India's GDP. This sector accounted for 61.7 per cent of the GVA in 2016-17. Growth in GVA in the services sector decelerated to 6.9 per cent in 2016-17 from 9.1 per cent in the previous year. The slowdown was mainly caused by softening of activities in the trade, hotels, transport and communication and services related to broadcasting as well as financing, real estate and professional services sectors. On the other hand, construction and public administration, defense and other services witnessed expansion during the year as compared to the previous year.

M. SAVINGS AND INVESTMENTS

During 2015-16, gross saving is estimated at ` 44.05 lakh crore as compared to ` 40.98 lakh crore during 2014-15. The rate of gross saving to GDP stood at 32.2 per cent for 2015-16, as compared to 32.9 per cent in 2014-15 (Table 1.5). Even with a decline in its share, the household sector continued to be the highest contributor to gross savings with a share of 59.2 per cent in 2015-16. A decline in household savings in physical assets resulted in the share of the household sector in gross savings falling to 59.2 per cent in 2015-16 (62.0 per cent in 2014-15). The share of non-financial corporations increased from 34.3 per cent in 2014-15 to 37.3 per cent in 2015-16. The share of saving of the financial corporations in the gross savings decreased from 8.3 per cent in 2014-15 to 6.5 per cent in 2015-16. The dis-saving of the general government decreased from 4.6 per cent of gross savings in 2014-15 to 3.1 per cent in 2015-16.

The gross capital formation (GCF) at current prices is estimated at ` 45.45 lakh crore for 2015-16 as compared to ` 42.58 lakh crore during 2014-15. The rate of GCF to GDP declined from 34.2 per cent during 2014-15 to 33.2 per cent in 2015-16. The rate of capital formation in 2011-12 to 2015-16 was marginally higher than the rate of savings because of net capital inflow from the rest of the world (RoW).

N. BALANCE OF PAYMENTS

India's trade deficit narrowed to US\$ 82.8 billion in April-December 2016 from US\$ 105.3 billion during the same period in 2015-16. Aided by a contraction in the trade deficit, the current account deficit (CAD) on a cumulative basis narrowed to 0.7 per cent of GDP in 2016 (April-December) from 1.4 per cent in the corresponding period of 2015-16. Net FDI inflows during April-December 2015 rose sharply by 12.3 per cent over those in the corresponding period in the previous year. However, nationalistic and protectionist policies adopted by the new US government may diminish export revenue from the United States which may be a cause for concern in the medium and long term. Foreign portfolio investments, however, witnessed a net outflow of US\$ 3.2 billion during April-December 2016 as compared to US\$ 3.7 billion outflow a year ago. During April-December 2016, the level of foreign exchange reserves (on a BoP basis) went up by US\$ 14.2 billion. IMF, in its *Staff Report for the 2017 Article IV Consultation*, observed that on a positive side India's external vulnerability were in check and the current account deficit was expected to remain contained. Forex reserves were also robust which covers around 8 months of imports. On a downside, weak external demand continues to constrain India's exports.

O. FISCAL DEFICIT

The Government of India has placed added emphasis on bringing down the fiscal deficit to 3.0 per cent of GDP by 2018-19. In the backdrop of higher public expenditure and subdued private investments, the government is following the principle of gradual adjustments for improving the fiscal condition. The Union Budget 2017-18 declared that in 2016-17 the fiscal deficit was 3.5 per cent of GDP (Revised Estimates). As per Budget Estimates, fiscal deficit for 2017-18 is 3.2 per cent of GDP, that is, ₹ 5,46,531 crore. Revenue deficit, which needs to be contained at 2.0 per cent under the existing Fiscal Responsibility and Budget Management (FRBM) Act's provisions, was estimated at 1.9 per cent of GDP, that is, ₹ 3,21,163 crore (Budget Estimates) in 2017-18 against 2.1 per cent of GDP in 2016-17 (Revised Estimates).

P. EXCHANGE RATE

Volatility in the USD-INR exchange rate remained contained during the first half of 2016-17. However, there was an uptick in volatility during the second half owing to various factors. The Indian Rupee depreciated sharply vis-à-vis the US Dollar during November 8-28, 2016 in the aftermath of the US presidential election results. However, since end of January 2017, there has been a steady appreciation of the Rupee, mainly due to strong capital inflows which include portfolio inflows into equities as well as into debt markets in February and March 2017. During 2016-17, the Indian Rupee touched a low of 68.7 (November 28, 2016) against the US Dollar and a high of 62.2 (April 04, 2016) against the US Dollar. The Indian Rupee closed at 64.8 against the US Dollar on March 31, 2017. During the year, forex reserves increased considerably by about US\$ 9.8 billion from US\$ 359.8 billion as of April 01, 2016 to US\$ 369.9 billion as on March 31, 2017.

TRENDS AND OPERATIONS IN THE SECURITIES MARKET

THE PRIMARY SECURITIES MARKET

The Primary market was characterized by heightened activities in 2016-17 with the initial Public offering (IPO) revival gathering momentum. A positive investment climate supported by robust macroeconomic performance, easing inflationary pressures, stable FDI inflows, continuous regulatory reforms and structural reforms by the government improved the business confidence and attracted investors to the primary market. Several mega issues apart, a number of small companies from diverse growth sectors of the economy entered the market. There was an

overwhelming response to a majority of the public issues from foreign portfolio investors (FPIs), other institutional investors and the retail investors. A large number of the issues were over-subscribed indicating the quality of issues and the appetite for public issues by the investors. Globally, trends in IPO statistics indicate that Asia- Pacific was the epicenter of IPO activity in the 2016 calendar year with India being the key highlight.

I. Resource Mobilization through Public and Rights' Issues

During 2016-17, ` 62,067 crore was mobilized through 122 public and 12 rights issues as against ` 57,866 crore raised in 2015-16 through 94 public and 13 rights issues (Table 2.1); 2016-17 was the year of the IPO market as there was a quantum jump in the number of IPOs and the amount mobilized by them. Of the 106 IPOs in 2016-17, 77 were listed on the SME platform. The companies which came out with IPOs were from diverse and unconventional sectors in contrast to the trend of dominance by companies from a few sectors like banking, finance and IT in the IPO market since 2000. While this indicates the gradual rise of capital market as a mode of finance among large and small corporates, it also provides an enormous opportunity for investors to invest in a cross-section of firms which represent the growth economy. The amount raised through IPOs in 2016-17 nearly doubled by 96.4 per cent to ` 29,104 crore as compared to ` 14,815 crore during 2015-16. As in the previous year, there was no follow on public offer (FPO) in 2016-17.

The share of public issues in the total resources mobilized increased to 94.5 per cent in 2016-17 from 84.0 per cent in 2015-16, while the share of rights' issues decreased from 16.0 per cent to 5.5 per cent during the same period. The share of debt issues in total resource mobilization stood at 47.6 per cent in 2016-17 as compared to 58.4 per cent in the previous year. During 2016-17, `18,038 crore was mobilized through offers for sale by existing shareholders as against `7,712 crore in 2015-16.

Notes: 1. The primary market resource mobilization is inclusive of the amount raised on the SME platform.

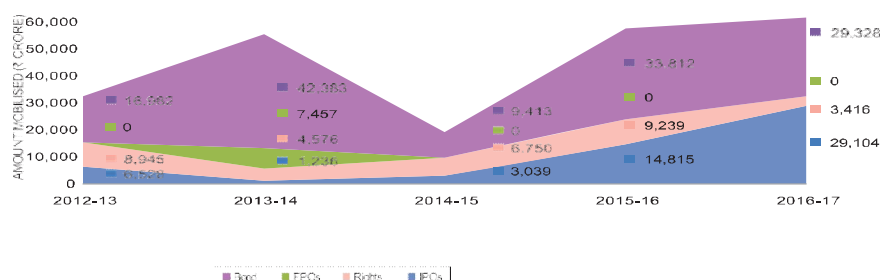

1. All offers for sale are already counted under the head of IPOs/FPOs.

2. Debt issues have been taken on the basis of their opening date.

Figure 2.1 gives the relative share of the four modes of resource mobilization - IPOs, FPOs, bonds and rights issues - since 2012-13. The share of IPOs has gone up significantly from 15.8 per cent in 2014-15 and 25.6 per cent in

2015-16 to 46.9 per cent in 2016-17. While FPOs have had a scant presence in the primary market since 2012-13 except in 2013-14, the share of debt and rights' issues declined during 2016-17 vis-à-vis 2015-16.

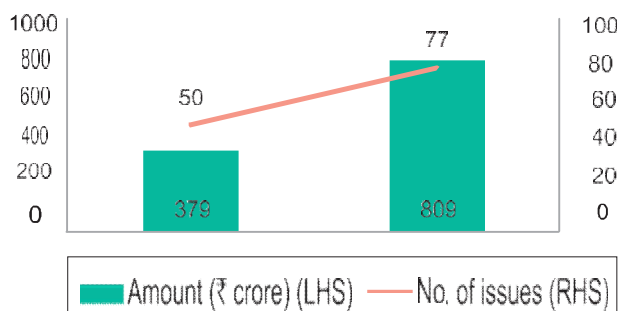

Figure 2.1: Share of broad categories of issues in resource mobilization (` crore)

A. Resource Mobilization via SME Platform

The SME platforms of the exchanges are intended for small and medium sized companies with high growth potential and whose post-issue paid up capital is less than or equal to ` 25 crore. In 2016-17, 77 companies were listed on the SME platforms raising ` 809 crore as compared to ` 379 crore raised through 50 issues in 2015-16, registering an increase of 113.5 per cent in resource mobilization (**Figure 2.2**).

Figure 2.2: Resource mobilization through the SME Platform

B. SECTOR-WISE RESOURCE MOBILIZATION

Sector-wise classification of the resources mobilization shows that the private sector dominated resource mobilization efforts in 2016-17 with a 98.2 per cent share in the total resources mobilized (Figure 2.3). Of the 134 issues, 133 were from the private sector which raised ` 60,943 crore compared to 96 issues which raised ` 26,768 crore in 2015-16. The single public sector issue garnered ` 1,124 crore compared to 11 public sector issues raising ` 31,098 crore in 2015-16. The dominance of the private sector in the mobilization of resources from the primary market can be attributed to several factors including, *inter-alia*, resurgence of industrial activity, buoyancy in the secondary market and corporate and investor confidence in the capital market and its regulatory environment.

C. SIZE-WISE RESOURCE MOBILIZATION

The size-wise distribution of capital raised is presented in Table 2.2. While there were more issues for issue sizes up to ₹ 100 crore, the amount mobilized continued to remain high in the cluster between ₹ 100 crore and ₹ 500 crore. In 2016-17, issues above ₹ 500 crore had a share of 90.1 per cent in the resources mobilized, as compared to 85.5 per cent in 2015-16. There were 29 issues of size equal to or greater than ₹ 500 crore in 2016-17 compared to 25 such issues in 2015-16.

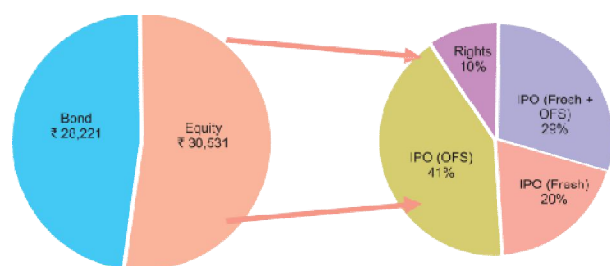

The average size of an issue (including public and rights' issues) which accessed the primary market in 2016-17 was ₹ 463.2 crore as compared to ₹ 540.8 crore in 2015-16. In 2016-17, the mean public issue size declined to ₹ 481 crore as compared to ₹ 517 crore in 2015-16. However, the mean IPO size increased to ₹ 275 crore in 2016-17 from ₹ 200 crore in 2015-16.

Total	107	57,866	134	62,067	100.0	100.0

There were 36 large issues in 2016-17 within the cluster of the issue size of above ₹ 300 crore. The amount raised by the 36 large issues constituted 95.0 per cent of the total resource mobilization through public and rights issues. Out of the total ₹ 58,752 crore mega issues raised during 2016-17, nearly 52 per cent were raised through equity. Figure 2.4 gives a further classification of equity mega issues and it can be seen from the figure that IPOs (through offer for sale (OFS)) constituted 41 per cent. The largest issue raised during 2016-17 was Dewan Housing Finance Corporation Limited's debt issue (₹ 10,000 crore), which was followed by India Bulls Housing Finance Limited's debt issue (₹ 7,000 crore) and ICICI Prudential Life Insurance Company Limited's IPO (₹ 6,057 crore).

Figure 2.4: Types of issues in resource mobilization (₹ crore and per cent)

D. INDUSTRY-WISE RESOURCE MOBILIZATION

During 2016-17, bank/financial institutions/finance industry raised the largest amount in the industry-wise classification of resource mobilization and contributed 65.2 per cent to the total resources mobilized through 26 issues, as compared to a contribution of 32.4 per cent through 22 issues in 2015-16 (Table 2.3). The food processing industry accounted for 3.1 per cent of the total resources mobilized through six issues, followed by the healthcare industry which contributed 3.0 per cent to the total amount mobilized through six issues.

II. Resource Mobilization through QIP

A. QUALIFIED INSTITUTIONS' PLACEMENT (QIP)

QIP is an alternative mechanism introduced in 2006 to facilitate listed companies to raise capital in the Indian securities market. QIP enables a listed company to issue equity shares, full or/and partly convertible debentures or any securities other than warrants to a qualified institutional buyers (QIBs). During 2016-17, 20 issues garnered a total of ` 8,464 crore through the QIP route as compared to ` 14,588 crore raised in 2015-16 (Table 2.4).

B. Offer for Sale through the Stock Exchange Mechanism

In 2016-17, 23 companies used the OFS route through BSE and NSE to conform to public shareholding norms as compared to 24 companies in 2015-16. These 23 companies came out with 29 OFS issues during 2016-17. The total resources mobilization through OFS declined by 60.4 per cent to ₹ 7,843 crore in 2016-17 from ₹ 19,817 crore in 2015-16 (Table 2.5).

III. Resource Mobilization through Preferential Allotment

Preferential allotments are covered under Chapter VII of SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009. This mode of resource mobilization is used by a listed company to issue equity shares/fully convertible debentures (FCDs)/partly convertible debentures (PCDs) or any other financial instruments which will be converted to or exchanged with equity shares at a later date. The allotments are done on a preferential basis to a select group of investors under Section 81(1A) of the Companies Act, 2013. Further, the issuer is required to take the shareholders' permission and should comply with various provisions as specified in the SEBI (ICDR) Regulations, 2009 vis-à-vis the Companies Act, 2013.

During 2016-17, ₹ 44,250 crore was raised through 410 preferential issues as compared to ₹ 50,514 crore raised through 353 preferential issues in 2015-16 (Table 2.6).

THE SECONDARY SECURITIES MARKET

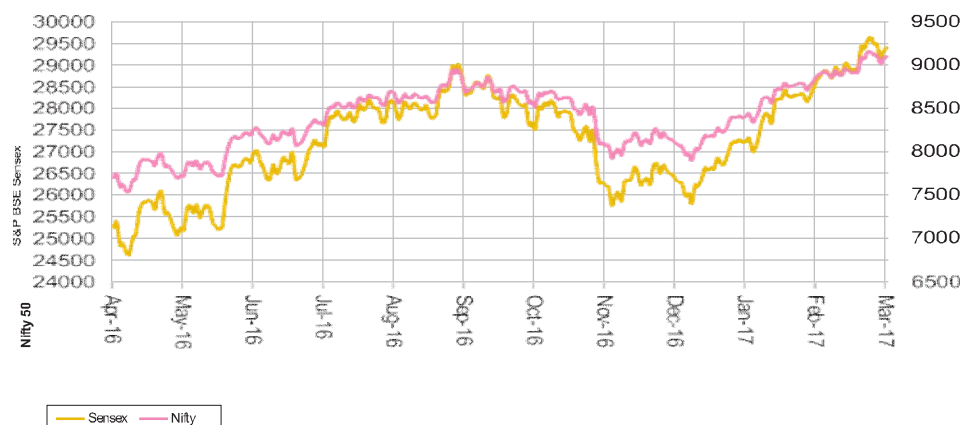

Q. EQUITY MARKETS IN INDIA

2016-17 witnessed the benchmark indices rising significantly backed by resurgence post the demonetization, political outcomes in state elections and rising foreign inflows even as the international developments were not very encouraging. There were a multitude of global events in 2016-17 which influenced the markets including the slowdown in Chinese economy, weak global trade growth, the Brexit, US presidential elections, policy normalization by the Federal Reserve and the attendant uncertainties around each of these events. Nonetheless, the domestic macro-economic and political conditions remained favorable. Strong growth rates, benign inflation and contained twin deficits despite the recovery of global crude oil prices, positive policy actions including implementation of key structural reforms like demonetization, progress on the GST, Aadhar linked public policy initiatives, return to a normal monsoon rainfall, and reduced external vulnerabilities were vital for institutional investors' confidence in the India growth story and also in its markets.

At the end of 2016-17, the benchmark indices S&P BSE Sensex (henceforth referred to as Sensex) and NIFTY 50 (henceforth referred to as NIFTY) increased by a significant 16.9 per cent and 18.5 per cent respectively over March 31, 2016 (Figure 2.5). The Sensex closed at 29,621 on March 31, 2017, recording an increase of 4,279 points over

25,342 as on March 31, 2016. The Nifty registered an increase of 1,435 points to close at 9,174 on March 31, 2017 over 7,738 at the end of March 31, 2016.

Figure 2.5: Movement of benchmark stock market indices

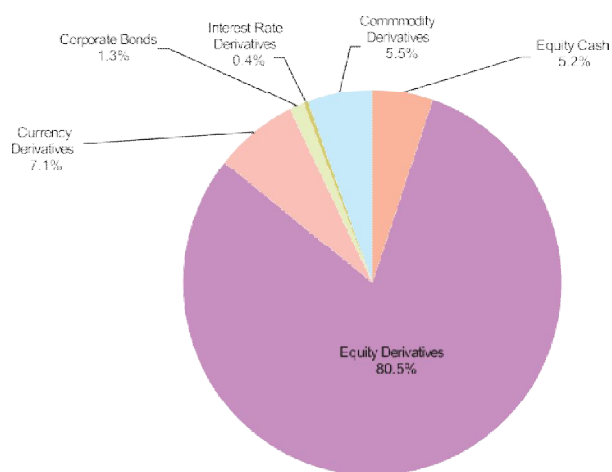

The Sensex reached its highest level on March 17, 2017, touching 29,649 while the NIFTY attained its highest level of 9,174 on March 31, 2017. The lowest level attained by the Sensex was 24,674 on April 08, 2016 while the NIFTY recorded its lowest level of 7,546 on April 07, 2016. The biggest gains in benchmark indices were observed on May 25, 2016 when the Sensex appreciated by 2.3 per cent while the NIFTY increased by 2.4 per cent. Subsequent to the demonetization of currency notes of higher denominations of ` 500 and ` 1,000 on November 08, 2016, both the indices recorded their biggest fall on the next trading day, November 11, 2016 with the Sensex falling by 2.5 per cent and the NIFTY by 2.7 per cent.

In the cash segment, the turnovers at BSE and NSE recorded substantial improvements of 34.9 and 19.3 per cent, respectively, during 2016- 17 as compared to a decline of 13.4 per cent and 2.1 per cent respectively during the previous financial year. In the equity derivatives segment, BSE's turnover declined by 99.8 per cent while NSE's turnover increased by 45.6 per cent during 2016-17 as compared to a decrease of 78.0 per cent at BSE and an increase of 16.6 per cent at NSE during 2015-16. MSEI recorded insignificant volumes in the cash segment and no trading was observed in its equity derivatives segment (Table 2.8).

The segment-wise composition of the value traded in the secondary market is shown in Figure 2.6. In the Indian secondary market, the highest share in terms of traded turnover was held by equity derivatives at 80.5 per cent, followed by currency derivatives (7.1 per cent), commodity derivatives (5.5 per cent), the equity cash segment (5.2 per cent), corporate bonds (1.3 per cent) and interest rate derivatives (0.4 per cent). Reflecting buoyant markets, the market capitalization of BSE and NSE indicated an upturn with an increase of 28.3 and 28.7 per cent respectively in 2016-17. There was sharp increase in P/E ratios over the past year and Indian markets were overpriced compared to other emerging and developed markets. The annualized volatility of the Sensex decreased to 12.1 in 2016-17 compared to 16.9 in 2015-16. For NIFTY, the volatility went down to 12.3 in 2016-17 as compared to 17.1 in 2015-16. With divergent growth patterns across developed and emerging market economies, global economic growth slowed down in 2016. Weak economic growth in major advanced economies such as the United States, Japan and in Euro-area, dragged

down overall global growth. While capital inflows to emerging market economies improved in 2016, appreciation in the US Dollar following the presidential election led to tight financial conditions in some emerging markets. An increase in the US government bond yields increased long term inflation expectations and prospects of higher interest rates. Among major emerging markets, economic growth in China, India, Brazil, Mexico and Argentina weakened during 2016, while Bangladesh, Pakistan, Indonesia and Thailand recorded higher economic growth during the year. Amid weak investment and global trade, commodity prices recovered from the declining trend witnessed in the past two years. During 2016-17, there was a sharp increase in energy and metal prices with moderate growth in food prices. The oil market witnessed a steady, broad-based growth in demand, while coal prices increased on strong demand and supply constraints in China.

Global equity markets across the world recorded an uptrend during 2016-17. Among the emerging markets, the year-on-year index change was 69.9 per cent for Egypt's HERMES index, followed by Argentina's IBG Index (58.9 per cent) and Brazil's IBOV Index (29.8 per cent) (Figure 2.7). Among developed equity markets, the year-on-year index change for Germany's DAX Index was 23.6 per cent, followed by US NASDAQ (21.4 per cent) and the UK FTSE 100 Index (18.6 per cent). Among the markets analyzed, only South Africa recorded a negative return (0.4 per cent).

B. STATUTORY AND COMMERCIAL LAWS THE COMPANIES ACT, 2013

The Companies Act, 2013, has replaced the Companies Act, 1956 in a phased manner. The Act received the assent of President of India on 29th August 2013. At present almost all the provisions of this law have been made effective except a very few. The Ministry of Corporate Affairs, has also issued rules complementary to the Companies Act, 2013 establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Companies Act, 2013.

The Companies Act primarily regulates the formation, financing, functioning and restructuring of separate legal entity as companies. The Act provides regulatory and compliance mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies. The provisions of the Act state the eligibility, procedure and execution for various functions of the company, the relation and action of the management and that of the shareholders. The law laid down transparency, corporate governance and protection of shareholders & creditors. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

The Competition Act, 2002

The Competition Act, 2002 “prohibits anti competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (the “CCI”) as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on March 4, 2011 and came into effect on June 1, 2011. Combinations which are likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as Individuals and Group. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is Likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an

agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. The obligation to notify a combination to the CCI falls upon the acquirer in case of an acquisition, and on all parties to the combination jointly in case of a merger or amalgamation.

Indian Contract Act, 1872

Indian Contract Act codifies the way we enter into a contract, execute a contract, and implement provisions of a contract and effects of breach of a contract. The Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced as amended from time to time. It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties.

The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honoured and that legal remedies are made available to those who are affected.

The Specific Relief Act, 1963

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Negotiable Instruments Act, 1881

In India, cheques are governed by the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honoured by their bankers and returned unpaid. The Goods and Services Tax Act, 2017

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer.

Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India – Arun Jaitley. This Act has been made applicable with effect from 1st July 2017. With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax; therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Following laws which have been subsumed in GST Acts were applicable to the Company till 30th June 2017 and shall remain applicable here after as stated in the GST Acts:

i) Service Tax, (the Finance Act, 1994)

I. Earning Per Share:

Basic earning per share is computed by dividing the net profit after tax for the year after prior period adjustments attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

J. Taxation & Deferred Tax:

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961. Deferred Income Tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

The Deferred Tax for timing differences between the book and tax profit for the year is accounted for using the tax rates and laws that have been substantively enacted as of the Balance Sheet date. Deferred tax asset is recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

The carrying amount of deferred tax asset is reviewed at each Balance Sheet date. The Company writes down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

At each Balance Sheet date, the Company recognizes the unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax asset can be realized.

K. Contingent Liabilities / Provisions:

A provision is created when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent assets are neither recognised nor disclosed in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

L. Impairment of Assets:

An asset is considered as impaired in accordance with Accounting Standard 28 on Impairment of Assets when at the balance sheet date there are indications of impairment and the carrying amount of the assets, or where applicable the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the asset's net selling price and value in use).

M. Investments:

Long term investments are valued at cost with an appropriate provision for permanent diminution in value, if any. Investment that is readily realizable and is intended to be held for not more than one year is valued at lower of cost or realizable value.

Presentation and disclosure of financial statements

During the year ended 31 March 2012, the Revised Schedule VI notified under the Act, had become applicable to the Company, for preparation and presentation of its financial statements. Accordingly, the Company has prepared the financial statements for the year ended March 31, 2012 onwards in accordance with Revised Schedule VI of the Act. - The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category x number of Shares applied for).
- The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- For applications where the proportionate allotment works out to less than 160 Equity Shares the allotment will be made as follows:
 - Each successful applicant shall be allotted 160 Equity Shares;

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("**DIPP**"), issued the Consolidated FDI Policy, which with effect from May 12, 2015, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on May 12, 2015. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

As per the existing policy of the GoI, OCBs cannot participate in the Issue.

The Equity Shares have not been and will not be registered under the Securities Act or any state securities laws in the United States, and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws.

Accordingly, the Equity Shares are being offered and sold (a) in the United States only to persons reasonably believed to be "qualified institutional buyers" (as defined in Rule 144A under the Securities Act and referred to in this Draft Prospectus as "U.S. QIBs" pursuant to the private placement exemption set out in Section 4(a)(2) of the Securities Act; for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Draft Prospectus as "QIBs"), in transactions exempt from the registration requirements of the Securities Act and (b) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

The above information is given for the benefit of the Bidders. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.

26. A person becoming entitled to a share by reason of the death or insolvency of the holder shall be entitled to the same dividends and other advantages to which he would be entitled if he were the registered holder of the share, except that he shall not, before being registered as a member in respect of the share, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the company:
