SECTION III - RISK FACTORS

An investment in the equity shares involves a high degree of risk. You should carefully consider all information in this Letter of Offer, including the risks and uncertainties described below and “Financial Statements” on page 78 of this Letter of Offer, before making an investment in the Equity Shares. Additionally, the risks set out in this section may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future which may impair our business, cashflows, prospects, result of operations and financial condition. In order to obtain a complete understanding about us, investors should read this section in conjunction with “Industry Overview”, “Our Business” and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 55, 67 and 81 respectively, included in this Letter of Offer. If any or a combination of the following risks or other risks that are not currently known or are now deemed immaterial actually occurs, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of their investment. Unless specified in the relevant risk factor below, we are not in a position to quantify the financial implication of any of the risks mentioned below. In making an investment decision, prospective investors must rely on their own examinations and the terms of the Issue, including the merits and the risks involved. Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue.

However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors. You should consult your tax, financial and legal advisors about the consequences to you of an investment in this Issue. The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

This Letter of Offer also contains forward-looking statements which involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Letter of Offer. For further details, please see the chapter titled “Forward-Looking Statements” beginning on page 14.

Our financial year ends on March 31 of each year, so all references to a particular Fiscal are to the 12 months ended March 31 of that year. Unless otherwise stated or the context otherwise requires, the financial information used in this section is derived from our Audited Financial Statements and Unaudited Financial Results, which are included in “Financial Information” on page 78 of this Letter of Offer.

INTERNAL RISK FACTORS

- 1. Our Company failed to garner the minimum subscription of 90% of the issue size in its rights issue of 6,93,07,248 equity shares which opened for subscription by eligible equity shareholders on Wednesday, February 28, 2024, and closed on Thursday, March 7, 2024 vide Letter of Offer dated February 16, 2024 (‘Previous Rights Issue’).***

The Board of Directors of our Company *vide* their resolution dated October 6, 2023, took on record and approved the Previous Rights Issue subject to such terms as may be decided by the Board of Directors or the Rights Issue Committee. Upon filing of the Draft Letter of Offer dated December 12, 2023, our Company received the ‘in-principle’ approval from BSE Limited *vide* letter bearing reference number LOD/RIGHT/VK/FIP/1155/2023-24 dated February 8, 2024, for listing of the equity shares to be Allotted pursuant to the Previous Rights Issue. Subsequently, the Rights Issue Committee of our Board of Directors, *vide* resolution dated February 13, 2024, approved the issuance of 6,93,07,249 equity shares and determined the issue price as ₹ 5/- per equity share including a premium of ₹ 3/- per equity share.

Thereafter, our Company filed the Letter of Offer dated February 16, 2024, and the Previous Rights Issue opened for subscription by eligible equity shareholders of the Company on Wednesday, February 28, 2024, and was closed on Thursday, March 7, 2024. The Previous Rights Issue received subscriptions for an amount of ₹ 4,798.10 Lakhs (approx. 1.38 times the total issue size), however, subscriptions amounting ₹ 3,490.79 Lakhs were rejected due to technical reasons. Therefore, despite of receiving an oversubscription of approximately 1.38 times the rights issue size, on account of technical rejections, our Company was unable to garner the minimum subscription of 90% of the total issue size resulting into the failure of the Previous Rights Issue and refund of monies to respective applicants.

2. ***Our Company is a party to certain litigations, the outcome of which, if determined against us, could adversely affect our financial conditions.***

Our Company is involved in certain litigations which are pending at various levels before different forums. The outstanding matters include tax proceedings and other material pending litigations involving our Company. The brief details of such outstanding litigations are as follow:

(₹ in Lakhs)

Nature of Cases/Claim	Number of cases outstanding	Amounts involved*
<i>Litigation filed against us</i>		
i. Tax matters	1 [^]	104.87
ii. Other matters	1	-
Sub-Total (A)	2	104.87
<i>Litigation filed by us</i>		
i. Tax matters	Nil	-
ii. Other matters	Nil	-
Sub-Total (B)	Nil	
Total (A+B)	2	104.87

*To the extent quantifiable

[^]Our Company had delayed in depositing the deducted TDS amount for the A.Y. 2017-18, for which criminal prosecution was initiated against our Company. During the pendency of the case, a compounding order was passed by the CCIT (TDS) and our Company paid the compounding fee. Though the criminal case is still pending as on the date of this Letter of Offer, the CCIT (TDS) has given instructions to the Assessing Officer in the said compounding order to take necessary steps in relation to the said issue.

There can be no assurance that these legal proceedings will be decided in our favour. In addition to the expenditure and costs attached to such litigation proceedings, any adverse decision in these proceedings may have a significant effect on our financial condition and cash flows. In the event of any adverse outcome in a tax proceeding, we may be required to pay the disputed amounts along with applicable interest and penalty and may also incur additional tax incidence.

For further details of these legal proceedings, please see the chapter titled “*Outstanding Litigations and Other Defaults*” beginning on page 90.

3. ***Our Company and certain Promoters of our Company, are involved in a litigation proceedings, the outcome of which may not be in favor of the Company and may be prejudicial to your interest as a shareholder.***

Our Company and certain Promoters are involved in litigation proceeding with respect to the relevant ownership of equity shares. For further details with respect to the litigation proceedings arising out of, please refer to chapter titled ‘*Outstanding Litigations and other Defaults*’ on page 90 of this Letter of Offer. The pendency or outcome of such litigation proceeding may have an adverse effect on the reputation of our Company, and its business. Further, the same may also require substantial attention of the management of our Company resulting into reduced or lower attention towards material business and operational matters of our Company. Additionally, as our Company is impleaded as a party to the aforesaid litigation proceeding arising out of such existing disputes, we are currently incurring, and we may have to incur in the future excessive litigation costs attached with the said litigation proceeding.

We cannot guarantee that we will not experience any adverse effects, on account of such litigation proceeding and such adverse effects may have an adverse effect on our business and reputation.

4. ***We have entered into a contractual agreement with ISRO for technical know-how and our business, results of operations and financial condition may be adversely affected if we are unable to continue with our contractual agreement or if there are any material changes in the said agreement.***

We have entered into an agreement with ISRO, pursuant to which, ISRO has provided our Company the domain expertise regarding the image processing and GIS functionality, the marketing rights of the Indigenous GIS Software (“**IGiS software**”) as well as the license to utilize the know-how for production, marketing and further maintenance of the IGiS software in India and abroad. This association was an outcome of a successful bidding and an award of a technical tender issued by ISRO, in furtherance of which the first

agreement was executed on April 2, 2009, for a period of 3 (Three) years. This agreement was renewed on August 17, 2012 for a period of 5 (Five) years w.e.f. April 14, 2012, which was valid till April 13, 2017. On June 7, 2017, the said agreement was subsequently renewed for a period of 10 (Ten) years and will remain valid till June 6, 2027 which would enable us to continue our affiliation with ISRO.

Though we share a good contractual and business relationship with ISRO, there can be no assurance that we will be able to maintain this relationship in future. If our Company is unable to continue this relationship with ISRO in future, our Company would not be in a position to utilize this association with ISRO for domain expertise and for marketing strategy. Further, our Company would be required to retain in-house domain experts to fulfill the domain input requirements, which may have an adverse impact on our Company's financial condition by way of higher costs of marketing or increased manpower costs.

- 5. We operate from premises which are used and occupied on leasehold and leave & license basis. Any termination or non-renewal of these lease and/or license could have an adverse effect on our cash flows and results of operation.***

Our Company uses and occupies the Registered Office on a leasehold basis pursuant to lease agreement dated November 24, 2022 ("**Lease Agreement**") executed for an initial lease term of 5 (Five) years commencing from February 22, 2022. We cannot assure you that the Lease Agreement executed for the use and occupation of the Registered Office will be renewed on reasonable terms and in a timely manner or at all.

Further, we have taken additional premises on short term leave and license basis from a third party. While the said leave and license agreement provides for renewal with mutual consent, there can be no assurance that the same will be renewed upon expiry or on terms and conditions acceptable to us. Any failure to renew this agreement may force us to look out for alternative premises which may not be available, or which may be available at more expensive prices. Any of the aforesaid may increase our operating cost and may have an adverse effect on our cash flows and results of operations.

- 6. We are yet to obtain the requisite license under the Gujarat Shops and Establishments Act for our Registered Office. Any failure to obtain and thereafter, to maintain or renew the same in a timely manner or at all, may attract penalty under the said Act.***

Our Company is yet to file an application to obtain registration under the Gujarat Shops and Establishments Act for our Registered Office situated at D-1002-1021, 10th Floor, Swati Clover Shilaj Circle, S.P. The delay in filing the said application for our Registered Office is due to pending updation of ownership records of the concerned premises. This delay in obtaining the registration under the Gujarat Shops and Establishments Act may result in penalties being imposed on our Company under the said Act.

- 7. Our Company may be affected by changes in technology that may relate to our business.***

Our Company operates in the software technology industry which is significantly governed and affected by developments, innovation, government policies and laws pertaining to information technology and intellectual property. These factors can affect the demand, pricing and value of our products and services which have already been developed and which are in the course of being developed. Currently, we are a single point business solution provider specializing in the areas of GIS, IGIS, IP, GPS, GPR, PG and LBS. Our continued growth will depend upon our ability to sustain cutting edge software solutions, adapt to the updated / superior / modified software which may be required to use with time and to train our executives in order to utilize the technology and the talents of our human resource to their maximum potential. If we fail to adapt and match pace with the growth in technology and adoption of the same through sufficient training of our executives, the same may adversely affect our business, prospects, the results of operations and financial condition.

8. Our Company has witnessed negative cash flows from operating activities (after working capital adjustments) in the past. Sustained negative cash flows could impact our growth and business.

Our Company has witnessed negative cash flows from operating activities, the details of which as per the audited consolidated financial statements are summarized below:

Particulars	(₹ in Lakhs) March 31, 2022
Operating profit before working capital changes	504.83
Cash flow from operating activities (after working capital adjustments)	(188.11)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

9. Our Company has not availed any insurance coverage against potential losses arising from loss of assets or other risks associated with the business of our Company.

Our operations and premises are subject to inherent risks, such as defects, fire, riots, strikes, explosions, and natural disasters. Thus, in the event of any substantially large actual loss or damage, our Company may not be able to sustain the incidental liabilities, losses in revenue or increased expenses which we may have to bear on account of such large actual losses. As on date of this Letter of Offer, our Company has not availed any insurance coverage. Any large un-insured loss suffered by our Company, will have an adverse impact on our business, the results of operations and financial condition.

10. Minimum subscription criteria as prescribed under Regulation 86 of the SEBI ICDR Regulations is applicable to the Rights Issue.

Out of the Net Proceeds, the Company proposes to utilize ₹ 3,500.00 lakhs to repay, in full or in part, identified unsecured loan availed by our Company and ₹1,000.00 lakhs to meet the long-term working capital requirements of the Company. For further details, please refer to chapter 'Objects of the Issue' on page 44 of the LOF.

The Promoters and members of the Promoter Group of the Company vide their respective letters dated March 21, 2024, have given their intention to partially subscribe towards their portion of rights entitlements. Therefore, the minimum subscription criteria provided in regulation 86(1)(b) of the SEBI ICDR Regulations is applicable to the Issue. Hence, in compliance of Regulation 86(2) of the SEBI ICDR Regulations and SEBI/HO/CFD/DIL1/CIR/P/2021/47 dated March 31, 2021, read with SEBI/HO/CFD/PoD-2/P/CIR/2023/00094 dated June 21, 2023 if the Company fails to receive the minimum subscription i.e., 90% of the Issue, all application monies received by our Company shall be refunded to the Applicants forthwith, but not later than four days from the closure of the Rights Issue.

In the event the Company does not fulfil the minimum subscription criteria as stated above and has to refund the application monies to the Applicants, the business, profitability and financial condition of the Company may be adversely affected.

11. There has been an instance of delayed filing made by our Company under the SEBI Listing Regulations.

Our Company has made all requisite filings as required under the SEBI Listing Regulations as applicable for the last one year immediately preceding the date of filing of the Letter of Offer with BSE except for 1 (one) instance of non-compliance with requirement to intimate a material event as stipulated under Regulation 31A(8)(c) of the SEBI Listing Regulations.

12. Our Company is unable to trace certain secretarial records prior to 1994 including records pertaining to allotment of Equity Shares to shareholders of our Company at the relevant point of time.

Our Company is unable to trace certain secretarial records prior to 1994, specifically the list of allottees as is required to be attached with Form 2 for allotment of Equity Shares of our Company. While our Company has made all efforts to obtain the form filing records, including by way of a physical search at the office of the Registrar of Companies, we have been unable to obtain the record of the list of allottees that were attached

with Form 2 for filings made in the years prior to 1994. While our Company believes that these secretarial forms were duly filed, there can be no assurance that these filings will be available in the future or that we will not be subject to any penalties imposed by the competent regulatory authority in connection with these filings.

13. Our contingent liabilities could adversely affect our financials if they materialize.

As per our audited consolidated financial statements for the year ended March 31, 2023, our contingent liabilities are set forth below:

Particulars	As on March 31, 2023
Claims against the Company not acknowledged as debts:	97.36
Income Tax matter in dispute under appeal	

If, for any reason, these contingent liabilities materialize, it would adversely affect our financial condition and results of operations. For further details, please see the section titled “*Financial Information*” beginning on page 78.

14. We are exposed to risks arising from exchange rate fluctuations which may have an adverse effect on the financial results of our Company.

Our Company has receivables amounting to USD 1.55 lakhs as on March 31, 2023, which are unhedged and consequently, we are exposed to exchange rate fluctuations risk. Uncertainties in the global financial markets may have an adverse impact on the exchange rate between INR and USD and other currencies. The exchange rate between INR and USD and other currencies is variable and may continue to remain volatile in the future depending upon the foreign exchange reserve position of India. Any appreciation of the INR against USD and other currencies may lead to a reduction in the realization of our revenues. Accordingly, volatility in the exchange rate may adversely affect the financial results of our Company.

15. Our financial indebtedness could adversely affect our ability to react to changes in our business, and we may be limited in our ability to use debt to fund future capital needs.

As on March 31, 2024, our Company has total outstanding borrowings (fund based as well as non-fund based) including outstanding interest of ₹ 7,037.50 lakhs. Our substantial indebtedness could:

- require us to dedicate a substantial portion of our cash flow operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds; and
- Place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

We cannot assure that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt. If we cannot obtain alternative sources of financing or our cost of borrowings become significantly more expensive, then our financial condition and results of operations will be adversely affected.

16. Any inability to protect our intellectual property or any claims that we infringe on the intellectual property rights of others could have a material adverse effect on us.

As on date of this Letter of Offer, we use ten (10) trademarks out of which eight (8) are registered. The measures we take to protect our intellectual property including initiating legal proceedings, may not be adequate to prevent any objections raised on our trademarks. Further, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that the registration is granted.

We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name, packaging material and to create counterfeit products. There may be other companies or vendors which may use our trade name or brand names. Any such activities could harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance and the market price of the Equity Shares. The measures we take to protect our intellectual property include relying on Indian laws and initiating legal proceedings, may not be adequate to prevent unauthorized use of our intellectual property by third parties.

Furthermore, the application of laws governing intellectual property rights in India is evolving and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our reputation, business, financial condition, cash flows and results of operations. While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights which may force us to alter our brand names. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, these claims could result in costly litigation, divert management's attention and resources, subject us to significant liabilities and requires to enter into potentially expensive royalty or licensing agreements or to cease usage of certain brand names. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. Any of the foregoing could have an adverse effect on our reputation, business, financial condition, cash flows and results of operations.

17. Our business prospects and continued growth depends on our ability to access financing at competitive rates and competitive terms. We may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates for our growth plans, in the future, or any increase in interest rates which could have a material adverse effect on our business, results of operations and financial condition.

Our business depends on our ability to obtain funds at competitive rates. Our secured borrowings have been availed at a floating rate of interest. Any fluctuations in interest rates may directly impact on the interest costs of such loans and could adversely affect the results of operations. A material portion of our expected cash flow may be required to be dedicated to payment of interest on our indebtedness which will also reduce the funds available to us for use in general business operations. The cost and availability of funds, amongst other factors, are also dependent on our current and future results of operations, financial conditions, and our ability to effectively manage risks. We may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates if we fail to have favourable results of operations which could lead to high borrowing costs and limit our access to lending markets, as a result, could adversely affect our business.

18. Our Company is subject to risks arising from interest rate fluctuations, which could adversely affect the financial results of our Company.

As on March 31, 2024, our Company has outstanding borrowings (including outstanding interest) of ₹7,037.50 Lakhs from the banks, NBFCs and other parties. Any increase in the interest rates could significantly raise the costs of borrowings, which may adversely affect the financial results of our Company.

19. Delays associated with the collection of receivables from our clients may adversely affect our business, prospects, results of operations and financial condition.

There may be delays associated with the collection of receivables from our clients. As on March 31, 2023, ₹789.56 Lakhs or 57.65% of our total accounts receivable were outstanding for a period of more than 6 (Six) months. Our business requires a significant amount of working capital, which varies depending upon the payment by our clients who are mainly the Government agencies. Therefore, a delay in the collection of receivables could adversely affect our business, prospects, results of operations and financial condition.

20. Our Company has entered into certain related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders

Our Company has entered into various transactions with related parties. While all such transactions have been entered into and executed on an arm's length basis, we cannot assure that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will always be in the best interest of our minority shareholders and will not have an adverse effect on our business, results of operations, financial condition, and cash flows. In the event

any conflict of interest arises between us, or to the extent that competing products offered by any of our related parties erode our market share, we may not be able to effectively manage any such conflict or competitive pressures and consequently, our business, results of operation and financial condition may be adversely affected. For further details, please see the section titled "*Financial Information*" beginning on page 78.

21. *The shareholding of our Promoters and members forming part of the Promoter Group has seen a decline.*

The shareholding of our Promoters and Promoter Group as on March 31, 2023 was 18.92% which is reduced to 18.62% as on December 31, 2023. Any further dilution in the shareholding of the Promoters and members forming part of the Promoter Group may adversely affect our stock prices and market perception about our Company and our Promoters and members forming part of the Promoter Group.

22. *The shareholding of our Promoters and members forming part of the Promoter Group has been pledged as collateral security.*

As on date of this Letter of Offer, our Promoters and Promoter Group hold 1,29,06,653 Equity Shares constituting 18.62% total equity share capital of the Company, of which 31,00,000 Equity Shares constituting 4.47% of total equity share capital of the Company have been pledged by them as a collateral security for the financial facilities availed by our Company. Any default under the terms and conditions of such transactions may result in the pledgee exercising the right to acquire, sell or otherwise dispose of these Equity Shares which shall further lead to a dilution of the holding of our Promoters and Promoter Group in our Company. Such dilution may adversely impact the trading price of the Equity Shares of our Company.

23. *Our Company and our Promoters and certain members forming part of the Promoter Group have created a charge on their assets and/or have offered guarantees in relation to the debt facilities availed by our Company, to secure the interests of our lenders.*

Our Company has availed cash credit facility from the Axis Bank Limited, the outstanding balance of which as on March 31, 2024 was ₹797.90 Lakhs and the same have been secured by way of creating a charge on certain assets of our Company and our Promoters and certain members of the Promoter Group. The amount outstanding and payable by us as a secured borrowings (fund based as well as non-fund based) were ₹1,612.94 lakhs as on March 31, 2024. In case our Company is not able to repay loans in time, the same may amount to a default under the loan documentation and the loans granted to us may be recalled with penal interest. The lender(s) may also enforce their rights over charged properties, which in turn could severely affect our business operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the lender bank prior to carrying our certain activities like change in the ownership/control/management. The lender also has the right to revoke the credit facilities at any time. Any failure to comply with any condition or covenant under loan documentation that is not waived by the lender bank may lead to the termination of our credit facilities which may adversely affect our ability to conduct our business and operations. In the event that we default in repayment of the financial facilities availed by us and any interest thereof, our lender(s) may enforce their rights over charged properties, which in turn could have significant adverse effect on our business operation and financial condition.

Further, certain of our Promoters and one of the members of the Promoter Group have offered personal and corporate guarantees in relation to the secured debt facilities availed by our Company. In case of those certain Promoters or members of the Promoter Group withdraw or terminate their guarantees or are unable to honor their respective obligations, the lender(s) for such facilities may demand substitute guarantees or immediate repayment of or acceleration of amounts outstanding under such debt facilities or terminate such facilities. In the event we are not successful in procuring guarantees to the satisfaction of the lender(s) in a timely manner or at all, we may need to repay the amounts outstanding under such loan facilities or seek alternate sources of funds, which could adversely affect our financial condition.

24. *Our Promoters and entities forming part of the Promoter Group may not have the ability to control or influence the outcome of matters submitted to shareholders for approval.*

As on December 31, 2023, our Promoters and entities forming part of the Promoter Group collectively hold 18.62% of the total equity share capital of our Company. As long as our Promoters and entities forming part of the Promoter Group do not hold the majority stake in the Company, they will not have the ability to control the outcome of matters requiring shareholders' approval, including but not limited to (i) matters relating to

sale of all or part of our business; (ii) mergers, acquisitions or disposals of assets; (iii) the declaration and distribution of dividends; and (iv) appointment or removal of our directors or officers. This may materially and adversely affect our results of operations, financial condition, and cash flows.

25. *Our agreement with our lender for financial arrangement contains negative covenants for certain activities and if we are unable to get the approval of our lender, it might restrict our scope of activities and impede our growth plans.*

Our Company has entered into a Term Loan cum Hypothecation agreement dated July 4, 2020 (the “**Agreement**”) with Axis Bank Limited for certain loan facilities, which are currently outstanding. We may incur additional indebtedness in the future and our ability to meet our debt service obligations and to repay our outstanding borrowings depends primarily on the revenue generated by our business. Any failure to make payments of interest and principal on our outstanding indebtedness within the stipulated time period may result in a decline in our creditworthiness. Additionally, during any period in which we are in default, we may be unable to raise, or face difficulties in raising further finance.

Further, our financing agreement contain certain negative covenants that limit our ability to undertake certain types of activities, which may adversely affect our business and financial condition. Negative covenants under the Term Loan cum Hypothecation agreement dated July 4, 2020 include restrictions on/to:

- Enter into any scheme of merger, amalgamation or doing a buyback of our Equity Shares;
- Make any restricted payments other than permitted under the agreement;
- Declare or pay any dividend or authorize or make any distribution to our shareholders: (i) unless our Company has paid all the dues in respect of the facility up to the date on which the dividend is proposed to be declared or paid, or has made satisfactory provisions thereof, or (ii) if an event of default has occurred and is subsisting or would occur as a result of such declaration or payment of dividend or authorization or making of distribution;
- wind up, liquidate or dissolve affairs of our Company or take any steps for voluntary winding up or liquidation or dissolution of our Company;
- agree, authorize or otherwise consent to any proposed settlement, of any litigation, arbitration or other dispute which may have a material adverse effect;
- permit any change in the general nature of the business of our Company or undertake any expansion or invest in any other entity;
- effect any change in our accounting method or policies;
- pay any commission to our Promoters / Directors/ security providers;
- Dispose our assets other than permitted by lenders in writing;
- permit any change in the ownership/control/management of our Company (including by pledge of promoter/sponsor shareholding in our Company to any third party);
- make any amendments in the constitutional documents of our Company;
- avail any further loan or facility from any person and/or stand surety or guarantor for any third party liability or obligation, save as permitted under the financing documents;
- encumber or create any security interest over the assets of our Company, save as permitted under the financing documents;
- prepayment of any principal or interest on any loans availed by our Company from our Shareholders /Directors;
- change remuneration of our Directors in any manner other than as mandated by legal or regulatory provisions;
- enter into any contract or similar arrangement whereby our business or operations are managed or controlled directly or indirectly by any other person; and
- obtain any facilities from a related party unless our Company causes such related party to submit an undertaking to the lender confirming that the financial debt extended by the related party to our Company shall not be assigned or transferred to any person other than another related party or a bank or a financial institution.

Failure to meet the conditions listed above or obtain consents from the lender, as may be required, could have significant consequences for our business and financial condition. Any default(s) under our agreement that are not waived by our lender or are not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under such facilities, and may materially and adversely affect our ability to conduct our business or implement our business plans.

- 26. Significant amount of our Company's total revenue is attributable to contracts entered into with entities or organizations owned by or set up by the Government of India which exposes us to risks, including but not limited to additional regulatory scrutiny, delayed receipt of collectibles and pricing pressure.**

Our Company has been awarded various contracts by the organizations and entities set up, controlled and owned by the Government of India ('Government') through its respective ministries and the results of operations of our Company heavily depend on the existence and effective continuation of such contracts. These contracts with the Government are subject to certain uncertainties, restrictions, profit and cost controls. As a result, the Government may terminate our contracts on account of any potential or actual non-performance of the contractual terms and such termination may result in forfeiture of the performance bank guarantee issued by our Company. Since these contracts with Government represent a significant portion of our total revenue, the loss or untimely termination of such contracts may have a material adverse impact on our financial condition as well as the results of operations.

There may be delays associated with collection of receivables, which could affect our results of operations. We may also have to abide by any further government regulations and policies implemented for these execution and performance of contracts with the Government, which may impact the manner in which we transact business as well as may lead to additional costs impacting our results of operations.

Further, any change in the present Government may lead to changes in the regulatory policies which may significantly change the nature and terms of the contracts with Government or result in termination of the same, which shall, consequently, have an adverse effect on the revenue generated by our Company.

- 27. Our projects have a long gestation period and our accounting statements reflect the financial performance of the projects undertaken and / or completed in a particular period. A comparison of our financial performance over different periods may not reflect or accurately predict the future growth and performance of our Company.**

Our projects are spread over a long period of time and our accounting statements may continue to be subject to variations depending on the stage of the projects. This may cause us to record higher revenue in certain periods compared to others. In addition, if our rate of growth slows over time, variations in our accounting statements may become more pronounced, and the results of operations and financial condition may be adversely affected.

- 28. Our R&D efforts may not succeed in enhancing the products and services offered by us resulting in significant revenue or any other financial benefits in the future.**

We have incurred substantial expenses for our R&D in the past which has been capitalized in accordance with our accounting policies. We expect to continue to dedicate a portion of our financial and other resources to our R&D efforts for new versions of the software developed by us and for enhancing current capabilities in order to maintain our competitive position. However, investing in R&D, developing new products, and enhancing existing products are expensive and time consuming, and there is no assurance that such activities will result in significant new marketable products or enhancements to our products, design improvements, cost savings, revenues, or other expected benefits. If we spend significant time and effort on R&D and are unable to generate any adequate returns on our investment, our business and the results of operations may be adversely affected.

- 29. Though our Company has an operating history in providing GIS technology since a decade, owing to the nature of the industry, we may still not have sufficient experience to address risks frequently encountered in this business.**

During FY 2007-08, our Company commenced the diversification of business activities into GIS and other information system activities and is currently one of the providers of GIS technology. In the GIS technology business, our competitors are medium as well as large sized multi-national companies, who have been in this field since last four decades. Compared to us, our competitors have a higher level of penetration in the market. We may not have sufficient marketing reach as compared to our competitors to address any risks or issues arising with regard to the successful positioning of our products in the market.

As a result, we may be unable to generate timely revenues as estimated by us and our failure to successfully position our products in the market could materially and adversely affect our business, prospects, the results of operations and financial condition.

30. *Our Company's business of providing GIS solutions and services is a highly competitive business with a number of large and medium players in the industry and hence we may require significant amount of time to effectively penetrate the market.*

In the GIS solutions and services sector, our Company competes with a number of large and medium sized service providers. Successful procurement of a tender and generating business out of it may require our Company to compromise on its margin levels. Further, we may be exposed to risks associated with the abovementioned services provided by us, such as:

- hiring and retaining skilled personnel proficient in providing the services;
- ability to change and adapt to rapidly developing technological advances;
- highly competitive environment of the technology industry in India;
- Shifting management bandwidth from product development to services.

We may also be required to incur additional expenditure to provide the relevant infrastructural facilities for provision of the services to our clients. In the event that we are unable to penetrate the market in a timely manner or at all, our business, operational efficiency, cash flows and financial position may be affected adversely.

31. *We may, at any time in the future, make further issuances or sales of our Equity Shares, and this may significantly dilute your future shareholding and affect the market price of our Equity Shares.*

Any future equity issuances by us, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sale of our Equity Shares held by our Promoters or members forming part of the Promoter Group may adversely affect the market price of our Equity Shares, which may lead to other adverse consequences for us including difficulty in raising capital through offering of our Equity Shares. In addition, any perception that such issuance or sales of Equity Shares may result in dilution of shareholding, significantly affect the trading price of our Equity Shares and our ability to raise capital through an issue of our securities. There can be no assurance that such future issuance by us will be at a price equal to or more than the Issue Price. Further, there can be no assurance that we will not issue further shares or that the Promoters, and members forming part of the Promoter Group and other shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

32. *Our Company has obtained unsecured loans which may be recalled at any time.*

Our Company has, obtained unsecured loans from certain lenders, the outstanding balance of which as on March 31, 2024 is ₹5,424.56 Lakhs of which ₹5,391.32 Lakhs are repayable on demand. In case the lenders recall them any time, our Company may be required to repay the entirety of the unsecured loans together with accrued interest and other outstanding amounts payable in relation to the said facilities. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition.

33. *Our Promoters and certain of our Directors and KMPs have interests in our Company other than the reimbursement of expenses and normal remuneration or benefits. Any such interests may result in a conflict of interest, which may have an adverse effect on our business.*

Mr. Rameshchandra Sojitra, our Promoter and certain of our Directors and KMPs are deemed to be interested in our Company, in addition to regular remuneration or benefits and reimbursements of expenses, to the extent of a) Equity Shares held by them, their relatives, their dividend or bonus entitlement, benefits arising from directorship in our Company, b) business and/or commercial transaction entered into or proposed to be entered into by our Company with any firm, LLP, company or body corporate with which they or any of them are associated as promoter, director, partner or member and c) salary and other compensations paid or payable to their relative(s) by our Company. For further details, please see the section titled "*Financial Information*"

beginning on 78. Some of the above interests may conflict with their duties and obligations as Promoter and /or Director or KMPs of our Company, which may have an adverse effect on our operations.

34. *Delays or defaults in payments from our clients could result into a constraint on our cash flows.*

The efficiency and growth of our business depends on timely payments received from our clients. In the event, our clients default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

35. *Any defects in the products or deficiency/delay in the services offered by our Company could expose us to costs and liabilities arising from claims made by our clients and may adversely affect our reputation, revenues, operations, and profitability.*

Due to our operations in the service sector, we may receive complaints and / or claims from our clients with regard to any potential deficiency in our services and products. Such complaints and / or claims may be made against us on grounds of alleged deficiency / delay in our services and products. Such complaints or claims may lead to negative publicity concerning our service standards and product quality, reduce clients' confidence and negatively impact our reputation.

As a result, our business and profitability may be adversely affected, and we may also have to incur additional costs to restore our image and reputation. In the event the complaints from our clients escalate into legal claims, our image and market reputation may be adversely affected and the same may also compel us to incur additional litigations costs.

Further, our Company is often required to customize products and services catering to the specific requirements of our clients. Due to the technical nature of our products and services, meeting the specifications of each client may be a time-consuming process requiring our Company to invest in not only research and development but also in the development of the skills of our human resource. Delay in delivering the product may result in our Company losing clients to our competitors and also facing the risk of our products and services becoming obsolete due to constant change in the technology being used in our business. This may have an adverse impact on the profitability and revenues of our Company.

36. *Our Company's success depends upon our ability to effectively implement our business and growth strategies, failing which, our growth and business may be adversely affected.*

Our Company's success depends substantially on our ability to effectively implement our business and growth strategies. Our Company may not be able to execute its strategies in a timely manner or within the budget estimates or be able to meet the expectations of our clients and other stakeholders. We believe that our Company's business and growth strategies will place significant demands on our senior management and other resources and will require us to develop and improve operational, financial, and other internal controls and capitalize existing and potential market opportunities. Any inability to manage and implement our business and growth strategies may adversely affect our Company's business, prospects, the results of operations and financial condition.

37. *Our success largely depends upon our KMPs and Senior Management. Any loss of our KMPs or senior managerial personnel could adversely affect the results of operations and our financial condition.*

Our experienced KMPs and senior management personnel have had significant contributions to our business, and our success is dependent on their continued service, expert skills, and knowledge. In the event of resignation or cessation of any individual from our KMPs or senior management playing an active role in our business and growth plans, we may find it difficult to find a substitute for the talent and skills lost by us. Opportunities for KMPs and senior management personnel in our industry are immense and it is possible that we may not be able to retain our existing KMPs and senior management personnel or may fail to attract /retain new employees at equivalent positions in the future which may adversely affect our business, the results of operations and financial condition.

38. *The present working and future success of our Company is correlated to high performing individuals and overall skill development of the employees.*

The present working and future success of our business significantly depends upon the quality of products and services provided by us. This quality is directly proportionate to the talent, knowledge and performance of the human resource hired, retained, and utilized by us. From time to time, it may be difficult to attract and retain qualified individuals with requisite expertise required for our business demands, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel. If we are unable to infuse new talent, retain talent or invest in skill development of our human resources, it may have a material adverse impact on our business, results of operations and our financial condition.

39. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success depends, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships and joint ventures across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration.

Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

40. *Certain members of our Promoters, namely Rameshchandra Sojitra and Leelavanti R Sojitra, have provided personal guarantees for the loan facilities availed by us. Further, Karnavati Infrastructure Projects Limited, being the Promotor Group of our Company, have provided corporate guarantees, to loan facilities availed by us. Such personal or corporate guarantees, if revoked, may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Certain members of our Promoters, namely Rameshchandra Sojitra and Leelavanti R Sojitra, have provided personal guarantees for the loan facilities availed by us. Further, Karnavati Infrastructure Projects Limited, being the Promotor Group of our Company, have provided corporate guarantees, to loan facilities availed by us. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactorily to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

41. *Our ability to pay dividend in the future will depend upon future earnings, financial conditions, cash flows, working capital and capital expenditure requirements.*

Our Company has not declared and paid dividend in the past. Our Company cannot give any assurance that dividend will be paid in future. The declaration and payment of any dividend in the future will be recommended by our Board of Directors, at their discretion, and will depend on several factors such as our earnings, cash generated from operations, capital requirements and overall financial condition of our Company.

42. *Industry related information included in this Letter of Offer has been derived from report titled "Geospatial Artha 22: Indian Geospatial Industry Outlook Report" ("Geospatial Artha Report 22") prepared by Geospatial World Analysis and has not been independently verified by us.*

Industry related information included in this Letter of Offer has been derived and extracted from the Geospatial Artha Report 22 prepared by Geospatial World Analysis and neither we nor any other person connected with the Issue has independently verified the information in the Geospatial Artha Report 22. Further, the Geospatial Artha Report 22 was prepared on the basis of information as of specific dates which may no longer be current or reflect current trends. Opinions in the Geospatial Artha Report 22 may be based

on estimates, projections, forecasts, and assumptions that may prove to be incorrect. Further, industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured and accordingly, investment decisions should not be based on such information.

RISK RELATING TO THE ISSUE AND OBJECTS OF THE ISSUE

1. *Failure by our Promoters or members forming part of the Promoter Group to fully subscribe towards their Rights Entitlements may result in dilution of their shareholding.*

Our Promoters and members of Promoter Group have *vide* their letter dated March 21, 2024 have undertaken to partially subscribe towards their respective portion of rights entitlements. Hence, the minimum subscription criteria provided in regulation 86(1)(b) of the SEBI ICDR Regulations is applicable to the present Rights Issue.

In the event our Promoters or members forming part of the Promoter Group do not subscribe in the Issue to the full extent of their Rights Entitlements, the same may result in dilution of their shareholding in our Company and this may have an impact on the investor sentiments.

2. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of Investor's shareholding.*

The Rights Entitlements that are not exercised prior to the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration in relation to the same. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Rights Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Rights Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 100 of this Letter of Offer.

3. *The deployment of funds raised through this Issue shall not be subject to monitoring by any monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the size of the Issue is less than ₹10,000 Lakhs, no monitoring agency is required to be appointed by our Company to oversee the deployment of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. The Board of Directors of our Company through Audit Committee will monitor the utilization of the Issue proceeds. Any inability on our part to effectively utilize the Net proceeds could adversely affect our financials.

4. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised and may be subject to change based on various factors, some of which are beyond our control.*

We intend to use the Net Proceeds for the purposes described in “*Objects of the Issue*” beginning on page 44. Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Further, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. We may have to revise funding requirements due to reasons which may not be within the control of our management. For further details, please see the chapter titled “*Objects of the Issue*” on page 44.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgement with respect to the use of proceeds. If we are unable to deploy the proceeds of the Issue in a timely or an efficient manner, it may affect our business and results of operations.

5. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholder's approval

We propose to utilise the Net Proceeds to repay, in full or in part, identified unsecured loan and long-term working capital requirement. For further details of the proposed objects of the Issue, please refer chapter titled “*Objects of the Issue*” beginning on page 44 of this Letter of Offer. In case of any exigencies arising out of business conditions, economic conditions, competition, or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure which cannot be determined with certainty as on the date of this Letter of Offer. In terms of the SEBI ICDR Regulations and the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in this Letter of Offer without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in Letter of Offer, we cannot assure that we will be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Letter of Offer, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

6. Investors shall not have the option to receive Rights Equity Shares in physical form and the Eligible Equity Shareholders holding Equity Shares in physical form will have no voting rights in respect of Rights Equity Shares Allotted to them until they provide details of their demat account and Rights Equity Shares are transferred to such demat account from the demat suspense account thereafter and such Shareholders may suffer loss in case of sale of their Rights Equity Shares by our Company at the prevailing market price.

In accordance with the SEBI ICDR Regulations, the Rights Entitlements and Rights Equity Shares shall be issued and credited only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Rights Equity Shares will be credited to a demat suspense account to be opened by our Company, in case of Allotment in respect of resident Eligible Equity Shareholders holding Equity Shares in physical form and who have not provided the details of their demat account to the Registrar or our Company at least two Working Days prior to the Issue Closing Date. Such Eligible Equity Shareholders are required to send, among others, details of their demat accounts to our Company or the Registrar within 6 (six) months from the Allotment Date. Unless and until such Eligible Equity Shareholders provide details of their demat account and the Rights Equity Shares are transferred from demat suspense account to such demat accounts thereafter, they will have no voting rights in respect of Rights Equity Shares. For details, please see the chapter titled “*Terms of the Issue*” on page 100.

Further, Our Company (with the assistance of the Registrar) shall, after verification of the details of such demat account by the Registrar, transfer the Rights Equity Shares from the demat suspense account to the demat accounts of such Eligible Equity Shareholders. In case of non-receipt of such details of demat account, our Company shall conduct a sale of such Rights Equity Shares lying in the demat suspense account on the floor of the Stock Exchange at the prevailing market price and remit the proceeds of such sale (net of brokerage, applicable taxes and administrative and incidental charges) to the bank account mentioned by the resident Eligible Equity Shareholders in their respective Application Form and from which the payment for Application Money was made. Proceeds of such sale (net of brokerage, applicable taxes and administrative and incidental charges) may be higher or lower than the Issue Price paid by such Eligible Equity Shareholders. We cannot assure you that such proceeds by way of sale of such Rights Equity Shares will be higher than the Issue Price paid by you, and that you shall not suffer a loss in this regard. Further, in case, bank accounts of the aforesaid Eligible Equity Shareholders cannot be identified due to any reason or bounce back from such bank accounts, our Company may use payment mechanisms such as cheques, demand drafts etc. to remit the proceeds of sale of the Rights Equity Shares to such Eligible Equity Shareholders. If such bank account from which Application Money was received is closed or non-operational, the sale proceeds will be transferred to IEPF in accordance with practice on Equity Shares and as per applicable law.

7. *There is no guarantee that the Rights Equity Shares issued pursuant to this Rights Issue will be listed on the Stock Exchange in a timely manner or at all.*

In accordance with applicable laws and regulations and the requirements of the Stock Exchange, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Issue will not be applied for or granted until after the Rights Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuance of Rights Equity Shares to be submitted. Accordingly, there could be a delay in listing the Rights Equity Shares on the Stock Exchange. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Issue Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted. For further information on issue procedure, please see the chapter titled “*Terms of the Issue*” on page 100.

8. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. The Income Tax Act levies taxes on such long-term capital gains exceeding ₹ 1 lakh arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such equity shares subject to specific conditions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of a securities transaction tax (STT), on the sale of any Equity Shares held for more than 12 months at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchange, the quantum of gains and any available treaty relief. STT will be levied on the seller and/or the purchaser of the Equity Shares and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

9. *The Issue Price of our Rights Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue Price of Rights Equity Share may not be indicative of the market price for our Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- (a) quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- (b) changes in revenue or earnings estimates or publication of research reports by analysts;
- (c) speculation in the press or investment community;
- (d) general market conditions; and,
- (e) Domestic and international economic, legal and regulatory factors unrelated to our performance.

In addition, the Indian equity share markets have from time to time experienced significant price and volume fluctuations that have affected the market prices for the securities of Indian companies. As a result, investors may experience a decrease in the value of the Equity Shares regardless of our operating performance or prospects.

EXTERNAL RISK FACTORS

1. *Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.*

Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

2. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional, and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

3. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, and our ability to implement our strategy.

Any slowdown in the Indian economy or in the growth of the sectors we participate in could adversely affect our business, financial performance, and the price of Equity Shares.

4. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects, and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended or changed at the discretion of the Government. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations

and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation, and implementation of any amendment to, or change to governing laws, regulation, or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

5. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe, and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition, and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the Equity Shares.

6. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial

condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

7. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

8. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

9. *General economic conditions in India and globally could adversely affect the results of operations.*

The results of operations and financial condition of our Company depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our Company's business, financial performance and operations. Our Company mainly derives revenue from operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our Company's employee costs and decrease our operating margins, which could have an adverse effect on the results of operations.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our Company's business. A slowdown in the Indian economy could adversely affect the policy of the Government of India towards the industry in which our Company operates, which may in turn, adversely affect our financial performance and ability to implement our business strategy. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business and the market price of the Equity Shares.

We fund the majority of our working capital requirements in the ordinary course of our business from our internal accruals, net worth, financing from banks and unsecured loans.

Basis of Estimation-Holding Period

		March 31, 2022	March 31, 2023	March 31, 2024	March 31, 2025
Current Assets					
Inventories	Days	-	-	-	-
Trade receivables	Days	166	287	354	165

Justification for Estimation

Particulars	Assumptions made and justification
Current Assets	
Inventories	Since the Company operates in the service industry, it does not hold any physical inventories.
Trade receivables	Trade receivables are based on the average standard payment terms across our customers. Our general credit terms vary across geographies and type of customers and our assumptions are based on past trends. The reduction in trade receivable days is primarily attributed to the increase in revenue generated from our IGIS software products and services along with a surge in project engagements from the private sector. These factors collectively enhance cash inflow and expedite the trade receivables collection process. Trade receivables for FY 2021-22, FY 2022-23 and FY 2023-24 were around 166 days, 287 days

Particulars	Assumptions made and justification
	and 354 days. Higher trade receivables days in FY 2023-24 is primarily on account of higher sales in the month of March 2024. Based on the factors mentioned above, we have assumed average trade receivables collection period of 165 days of revenue from operations for the FY 2024-2025.
Current Liabilities	
Trade payables	Trade payable days were 94 days, 46 days and 317 days of operating expenses for FY 2021-22, FY 2022-23 and FY 2023-24, respectively. Higher trade payables days in FY 2023-24 is primarily on account of higher manufacturing expenses incurred in the month of March 2024. Our Company expects a decrease in trade payable days due to concurrent reduction in trade receivable days and accordingly, expects the holding level days for the trade payables as 60 days of operating expenses for the FY 2024-25.

3. General Corporate Purposes

We intend to deploy ₹ 394.86 lakhs from the Net Proceeds towards General Corporate Purposes. Indian Economic Outlook

The Indian economy recorded the most robust GDP rebound in the G20 in 2021; the Indian economy is progressively moving to become the fourth largest economy in the world. The Indian economy, in many ways, has fully recovered to the pre-pandemic real GDP level of 2019-2020, so much that India today, with its almost seven percent real GDP growth and USD 3.12 trillion in GDP, has overtaken United Kingdom’s economy to be the fifth largest economy in the world, in 2022. These numbers are associated with stronger growth momentum, indicating increased economic demand.

As per the recent IMF estimates, India is likely to be the fastest-growing Asian economy in 2022-2023 and is one of the strongest among the largest economies. Today, India has a lower debt than the rest of the world – than the start of the global economic crisis. In addition, the country’s demography is of a young population. As per United Nations, India’s population is expected to exceed China’s by 2023, with each counting more than 1.4 billion residents in 2022. However, even with a rising population, while the world is expected to see an ‘aging’ trend, India will continue to have a higher share of working-age and young population. This increasing young population will also contribute significantly to the housing demand in the country, thereby increasing the demand for investments and consumption. Alternatively, today, India’s approximately 60 percent of the population is now connected to the internet, and India is leading the world in digital payments. At present, nearly 60 percent of all digital payments are currently UPI-based. Alternatively, the digital and IT infrastructure in the country is growing significantly with affordable internet connectivity and the widespread use of smartphones.

Key highlights

- India’s economy has overtaken UK to be the fifth largest economy in the world in 2022.
- India’s real-GDP fell from 8.90 percent in 2021 to 6.9 percent in 2022 and is forecasted to further fall down to 5.4 percent in 2023.
- India’s population size is expected to exceed China by 2023, however, with a higher share of working age population.
- India has critically improved access to basics such as affordable housing, tap water, electricity access, internet access and piped gas connections.

India's Macro-economic Progress

Agriculture, Forestry and Fishing output remained resilient and continued to show improvement from 2021-2022, while construction and manufacturing activity maintained moderate growth though the percent change fell significantly. In 2021, the quarterly GVA in Construction picked up by almost 102 percent, owing to the sector picking up immediately after the Covid-19 pandemic. In 2022, the quarterly GVA showed consistency at a growth percentage of 32 percent, however significantly less than the previous year. Trade, Hotels, Transport, and Communication across 2021 and 2022 showed a similar quarterly GVA growth year-on-year, at approximately 45 percent, as the sector starts to pick up post-pandemic. Quarterly Growth in GVA of Financial, Real-Estate, and Professional Services; Public Administration, Defense, and other Services, grew significantly much more than in 2021. All this has resulted in substantial improvements in India's rank in global indices (63 in India's Ease of Doing Business ranking, 43rd in 2021 in the World Competitive Index, and second among the BRICS countries).

Indian Geospatial Ecosystem

Geospatial Sector Governance

Geospatial governance within the Indian geospatial industry ecosystem rests on the government bodies and stakeholders responsible for the development of policies. While most policies are developed under the Department of Science and Technology, many relevant policies developed by other Ministries such as Ministry of Home Affairs, Ministry of Civil Aviation, Ministry of Defence have historically had significant implications on the development and implementation of geospatial policies. At National Level, the regulatory framework in the context of the geospatial sector comprised of 25 National level acts/policy/guidelines/rules & regulations from 10 different ministries/departments. This guiding framework is majorly responsible for the relevant use/exchange of geospatial information.

The Guidelines for Geospatial Data, the Drone Rules 2021, and the Draft Policies (Geospatial, Remote Sensing, and Satellite Navigation) aims to liberalize, democratize, and commercialize the use of geospatial data and information for planning and monitoring requirements within the country while also boosting geospatial entrepreneurship across varied technology segments. These policies, guidelines, and rules will eventually lay the foundation for knowledge and data-driven Digital India and help achieve self-reliance and a five trillion-dollar economy by 2025.

The guidelines for Geospatial Data, and the Drone Rules 2021 – both released in 2021 – are significantly relevant today as they are already in implementation and have become the base for innovation with direct innovation in mission mode projects like National Infrastructure Pipeline (NIP), National Hydrology Project (NHP), Gati Shakti National Master Plan for infrastructure, SVAMITVA scheme (Survey of Villages and Mapping with Improved Technology) and the Smart Cities Mission, among many others. Alternatively, while many of the current policies are in the consultation phase with the broader geospatial industry, user, and civil society ecosystem, the implications of these documents will be significant in the future.

Indian Geospatial Industry Ecosystem

India's geospatial industry has primarily been a services industry, with the services segment constituting approximately 75 percent of the total Indian geospatial market in FY 2017-2018. Over the years, the market share for services has significantly fallen from 75 percent to approximately 50 percent of the total market. This shift or transition in the market is due to the increasing market share of hardware, software, and solutions segments within the Indian geographic ecosystem.

Further, it is notice worthy this shift is not due to the absolute reduction in services businesses; instead the total number of services companies within the Indian ecosystem has continued to grow year-on-year and is expected to grow furthermore as opportunities within the industry will rise due to the recent democratization and liberalization of geospatial data and information.

Market Growth

- India's total geospatial market (including both domestic and export market) is estimated to be worth approximately INR 27.65 thousand crores in 2022, rising from INR 22.94 thousand crores in 2019, at a CAGR of 6.43 percent.
- The Indian geospatial export market is expected to rise at a CAGR of 6.5 percent between 2022 and 2025, i.e., from INR 11.63 thousand crores in 2022 to approximately INR 14.07 thousand crores by 2025.

This growth is attributed to –

- India’s swift and continued economic recovery to 90 percent of the pre-pandemic levels, and transition towards digitalization to drive geospatial adoption.
- Critical announcements by the Government of India for liberalization and democratization of geospatial data – particularly, the Guidelines for Geospatial Data 2021, and the Drone Rules 2021 is already seeding future of the Indian geospatial market.

Alternatively, between 2022 and 2025, the GIS Solutions market is forecasted to grow at a CAGR of 22.67 percent, i.e., by INR 220 crores. The solutions segment is forecasted to almost double up between 2022 and 2025, i.e., from INR 260 crores in 2022 to INR 480 crores in 2025.
- Many organizations are shifting towards implementing enterprise-wide GIS solutions which is aimed at solving customer’s problems in one-go. Further, with the Government of India’s Digital India initiative, many companies are focussed on implementing dynamic GIS solutions as part of their consultancy and business offerings.

The Indian Geospatial Market: By Business Offerings

The Indian geospatial industry is undergoing a transformation – a transformation from data to knowledge, and from being a services industry to a solutions industry. While India has been at the forefront of the development of geospatial applications and services globally, the Indian geospatial industry is bullish on the market demands and expectations of the Indian government, the commercial and civil industry.

Indian Geospatial Market Size and Forecast By Business Offerings

- The geospatial solutions market is also expected to showcase a positive growth rate. The liberalization and democratization of geospatial data with the announcement of the Guidelines for Geospatial Data announced in Feb 2021, the increasing awareness and understanding of geospatial solutions – will drive the market for geospatial solutions in India. The geospatial solutions market is forecasted to rise from INR

1.69 thousand crore in 2022 to INR 2.48 crore in 2025, growing at a CAGR of 13.72 percent during the forecast period.

- It is also forecasted, that the geospatial software market, across categories is going to rise significantly across all technology segments – such as GNSS and Positioning, GIS and Spatial Analytics, Earth Observation and Scanning. To process the humongous amount of data captured from different data capturing tools and technologies, geospatial software is critical. Many of the commercial businesses, and government stakeholders are looking at purchasing geospatial software to meet their specific needs. In this regard, and with high penetration of GIS software across agriculture, mining, retail and logistics, infrastructure, etc., the geospatial software market is forecasted to grow at a CAGR of 16.11 percent, i.e., from INR 2.03 thousand crore in 2022 to INR 3.17 thousand crore in 2025.

The Indian Geospatial Market: Export Market

During 2017 to 2019 – the geospatial exports market in India grew at a conservative rate of 2.35 percent, contracting to 0.07 percent during the period of the COVID – 19 pandemic (2019-20).

The sharp contraction in the geospatial exports is attributed to the macroeconomic factors of export restrictions, travel lockdowns, and supply chain disruptions. It is estimated that the geospatial export market (across both services and solutions) in 2019 was estimated to be INR 11.11 thousand crore and grew at a CAGR of 1.55 percent to touch INR 11.63 thousand crore by 2022. Alternatively, it is estimated that the geospatial export market is forecasted to be INR 14.07 thousand crore by 2025, estimated to rise at a CAGR of 7.71 percent between 2022 and 2025.

Indian Geospatial Services and Solutions Exports Market Size and Forecast (2019-2025F) (2019*-2025F)

- The geospatial solutions market is estimated to grow at an enormous CAGR of 16.03 percent from INR 1.7 thousand crore in 2022 and INR 2.53 thousand crore in 2025.
- Though, with the guidelines for Geospatial Data, it was initially expected that the domestic market for geospatial information and technology would substantially grow and the market for exports would rise slower than the potential domestic market growth.
- The commercialization and democratization of geospatial information while exciting for geospatial industry players, both old and new, to experiment, innovate and scale their business and product portfolios – the target market for most companies is not domestic but export market. In either case, this will lead to strategic geospatial ‘industrial development’ within the Indian economy wherein the geospatial industry ecosystem shall transform itself to increasingly export more geospatial solutions to the international markets instead of only services.

Indian Geospatial Market: By Sectoral Market Share

Geospatial information and technology as an empowering technology redefines the paradigms of sectoral output (GVA). It holds critical importance in all sectors of the economy, as all of them today, more than ever, require predictive analytics, modelling, and simulations to enhance productivity, efficiency, transparency, and monitoring in their workflows. It is a crucial enabler in policy planning, implementation, and engagement with citizens. Governments and businesses are increasingly relying on geospatial technology to improve services to citizens/customers – be it tracking illegal construction, ensuring compliance, minimizing environmental energy, planning energy resources, improving emergency response, or planning sustainable development.

Indian Geospatial Industry Sectoral Market Share 2022 & 2025

With respect to sectoral application areas, the geospatial market of India in 2022, and 2025 is dominated by Defense and Intelligence, Urban Development, and Utilities. Together in 2022, these sectors accounted for 38.91 percent, up from 37.98 percent in 2021 – with each sector accounting for 14.35 percent, 13.29 percent, and 11.27 percent, respectively. The other two sectors contributing significantly to the Indian geospatial market in 2022 are transport infrastructure, roads, railways, airports, and ports) and the buildings and campuses segment having an estimated market share of 9.93 percent, and 6.97 percent, respectively. Altogether, the five sectors mentioned above account for 50 percent plus of India’s total geospatial in 2022.

Alternatively, in 2025, the geospatial market is going to be dominated by the Defense and Intelligence and Urban Development, and Utilities sectors, with each sector accounting for 16.26 percent, 14.93 percent, and 12.94 percent respectively. Alternatively, the transport infrastructure sector, and the land administration sector are going to be the next two priority sectors by 2025, where in market share of these sectors is estimated to 10.70 percent, and 6.61 percent respectively.

Geospatial Adoption Landscape

Currently Used Geospatial Information and Technology

GW Consulting’s analysis shows that currently in India, across varied national programs and projects, and across private businesses and consultants, GIS and Spatial Analytics, Remote Sensing (satellite and aerial imagery) and GNSS/DGPS/GPS devices technologies are used predominantly. Since India is advancing in the maturity of technology adoption, GIS and Spatial Analytics technology (software and solution) are used for informed and better decision-making, enhanced visualization and for predictive analysis. Further, since post-pandemic, the integration of GIS with business intelligence (ERP/SAP/CRM) and engineering workflows (CAD/BIM) has gained traction, the use of GIS and Spatial Analytics has increased significantly. The workflow integration – i.e., GIS with business intelligence, has also led to a rise in the use of location data and analytics by private businesses in the retail and logistics, real-estate, and banking, financial services, and insurance sectors (BFSI).

Alternatively, remote sensing data, i.e., satellite imagery is being used for enhanced spatial visualization, and for project planning across most national mission mode projects and programs. Satellite data from the National Remote Sensing Centers (NRSC), is today easily available and is being used on an operational basis for several applications in agriculture, forestry, infrastructure, land administration and rural development, mining, and maritime sectors. Remote sensing data is one of the most well recognized and most used spatial data point to provide adequate support for carrying out national level projects.

Further, the use of Drones/UAVs has increased due to increasing reliance by the Government of India for surveying and mapping projects. The use of Drones/UAVs in the SVAMITVA project and the mandatory requirement in highway development projects, showcases the increasing adoption of Drones/UAVs in the Indian Market.

Challenges in Adoption of Geospatial Technology

GW Consulting’s analysis, highlights that the top three challenges foreseen in the adoption of geospatial information and technology are budget constraints followed by lack of initiatives by the government and lack of adequate geospatial infrastructure.

Challenges in adoption of Geospatial Technology

Policy Impact and Implications

Impact of Geospatial and Allied Technology Policies

The ‘Guidelines for Geospatial Data 2021’ has led to an increase in the use of geospatial data. The removal of restrictions on obtaining security clearances and licenses will increase commercial applications of such data, and more businesses will be able to freely create, collate, manage, or produce geospatial data, energizing the entire industry. The greatest stimulus is expected to be felt by start-ups and SMEs, propelling them into unrestricted innovation. It is consistent with the goal of “Atmanirbhar Bharat”, as India’s reliance on foreign resources for mapping technologies and services will be reduced significantly.

Impact of Policy to Enhance the Adoption of Geospatial Technology

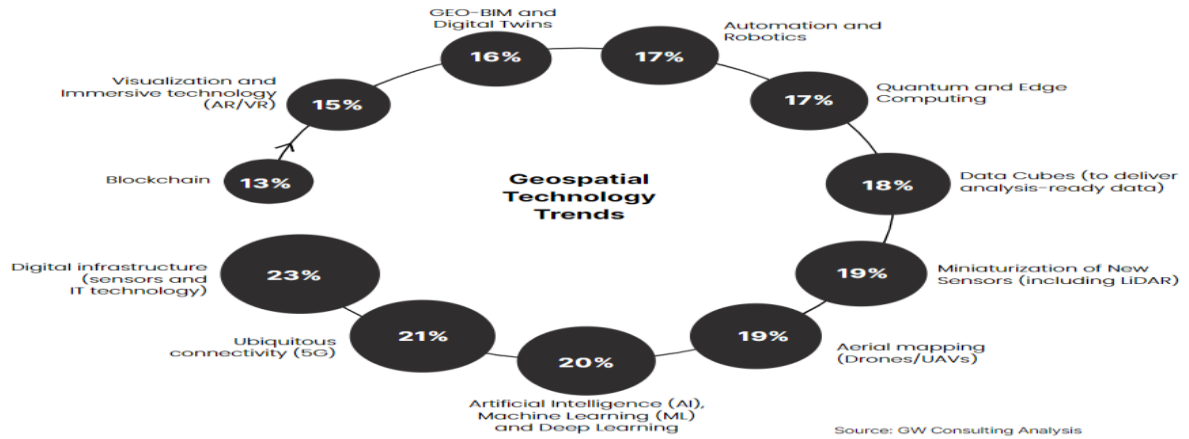

GW Consulting analysis shows that more than 80 percent of the respondents believe that there is going to be a significant impact of the Guidelines and the policy in increasing the adoption of geospatial technologies across sectoral workflows. In India, geospatial technology has made inroads into a variety of sectors, both public and private. Agriculture, telecommunications, oil and gas, environment management, forestry, public safety, infrastructure, logistics, and other industries rely heavily on geospatial technology in India. According to stakeholders, the geospatial industry will grow by leaps and bounds in the coming years as stakeholders across sectors recognize the utility and long-term cost effectiveness of using geospatial tools and technologies. Well-articulated policy mechanisms, government support, and rising domestic demand would all help to popularize geospatial technology in India and bring it into the mainstream as a tool for effective governance and development planning.

Indian Geospatial Industry Growth drivers and differentiators

Technology Trends

- As per the GW Consulting’s Analysis, Digital Infrastructure (Sensors and IT technology) is forecasted to be the most impactful technology need, driving the Indian geospatial markets growth in next 3-5 years. Many Government Initiatives such as PM Gati Shakti, Smart City, Smart Agriculture, and Smart Health, are focused on the digital infrastructure development. Plus, to deploy digital technologies across all sectors, national mission mode programs and projects, the industry believes digital infrastructure will be critical to market growth. There is also a noticeable interest seen in ubiquitous connectivity (5G) by the industry leaders and is forecasted to be the second most impactful technology trend to drive India’s Geospatial market growth. A few of the 5G use cases that will strengthen the nation’s economic and social value are smart cities, smart transportation, smart grid, and smart agriculture. Further, with the Indian government rolling out 5G, the application of geospatial data and its solutions is going to become convenient for stakeholders facing network challenges.
- Emerging technologies such as AI, ML and its integration with business intelligence platforms, and engineering workflows, along with aerial mapping techniques such as Drone/UAV, are going to play a significant role in driving growth in the Indian geospatial market. The industry players believes that these technologies are expected to bring in a connected technology era and change how people communicate and operate.

Technology trends for the growth of Indian geospatial industry

Market Drivers

- As per GW Consulting’s analysis, one of the core market drivers for the Indian geospatial industry is going to be new partnership and collaborations agreements. Post the Guidelines for Geospatial Data, the Indian geospatial ecosystem has seen significant partnership and collaborations which has enhanced technology integration and understanding in the country. More such partnerships are expected over the course of next few years to grow the Indian geospatial industry.
- Enhanced workflow integration in economic sectors is forecasted to be the third most important market driver. Today, geospatial technologies is integrated across most economic sectors. The government mandates, and the push to integrate geospatial technology as part of workflow operations is forecasted to enhance and drive the geospatial market growth in the country. For instance, the Ministry of Road, Transport and Highways (MoRTH), has mandated the use of LiDAR, and Drones/UAVs in national highway projects. This and many other such integrations are expected to drive the Indian geospatial market.

Market drivers influencing the Indian geospatial industry

Business Model Transformation

Today, the Indian geospatial sector needs a business model that connects technology innovation with user needs a business model that connects technology innovation with user needs and supports the industry’s overall growth.

GIS and Spatial Analytics

The GIS and Spatial analytics focused businesses in India currently prefer to use X-as-a-Service as their business model and foresee the same as their preferred business model for future growth. The GIS and spatial analytics technologies-based organisations are better prepared for the evolution of their business along with the technology than other geospatial technology segments and realize the potential of transitioning from traditional business models such as subscription/licencing to X-as-a-Service. Software-as-a-Service, followed by Analytics as a Service, was chosen as the preferred business model for future growth by many enterprises.

Preferred Current and Future Business Model within the Indian GIS and Spatial Analytics Technology Segment

Earth Observation

Preferred Current and Future Business Model Within the Indian Earth Observation Technology Segment

As per the GW Consulting’s survey analysis, the earth observation-based businesses in India are currently using subscription business model but doesn’t see it as their future choice for business growth. The companies in this segments prefer cooperation and partnership as their future business model for organic business growth.

Process

The Company undertakes following processes, procedures, and methodology for software development:

1. Pre-Project Initiation Activities

Pre-project initiation activities start based on creation of product road (or project award in case of project specific execution). Product roadmap is created based on compilation of various input which will be divided into multiple minor and major release plan. This is further divided into the tasks and work breakdown for each task. Product road is devised based on:

- Customer needs, business viability and market trends
- Input from Internal domain experts
- Input from sales and Marketing team
- Technology trends and technology upgrades/enhancements
- Alignment with long terms product vision

2. Project Planning

2.1 Functional and Domain R&D process

In the initial stages of product development, the functional and domain R&D Process plays a pivotal role. This phase involves a comprehensive exploration of domain-specific requirements, encompassing objective/use cases, algorithm/conditions, input parameters, expected outcomes, and performance benchmarks. The objective here is to define a clear path for development while considering various data types, sizes, and permutations that the proposed functionality must handle.

2.2 Requirement Management Process

In the Requirement Management Process, the focus shifts to defining the requirements for the project based on the insights gained from the R&D phase. This process includes preparing a detailed Software Requirement Specification (SRS) to fulfill the previously outlined objectives.

3. Design Process

The Design Process serves as the blueprint for product development. It involves translating gathered requirements into actionable design plans, meeting the objectives set in the Requirement Management Process.

4. Coding Process

With the design in hand, the Coding Process takes over. Developers write the actual code for each module or component, adhering to coding guidelines and standards, which are essential to meet the objectives of creating reliable and maintainable code.

5. Testing Process

Quality assurance is paramount in the Testing Process. Comprehensive test plans are developed to validate functional, interface, and non-functional requirements, aligning with the objectives set in the Requirement Management Process.

SGL uses different testing tools like J-Meter, Post-man, Selenium+Java for Web Application and Appium+Java for Mobile application. It also uses ZAP for security testing of final products.

None of our Directors is or was a director of any listed company during the last five years preceding the date of filing of this Letter of Offer, whose shares have been or were suspended from being traded on any of the stock exchanges during the term of their directorship in such company.

Except for Dinesh Jamnadas Shah and Mr. Kantilal Vrajlal Ladani, none of our Directors is or was, in the past ten years immediately preceding the date of filing of this Letter of Offer, a director of any listed company which has been or was delisted from any stock exchanges in India during the term of their directorship in such company. With regard to our Company, it is to be noted that we had voluntarily approached the Ahmedabad Stock Exchange Limited (“ASE”) to delist our Equity Shares from trading on the ASE due to no trading activity on the ASE. These Equity Shares were removed from the list of listed securities of ASE with effect from December 9, 2015. Our Company has not approached the ASE for relisting of the Equity Shares since then. Further, the shares of our Company were also listed on the Saurashtra Kutch Stock Exchange Limited (“SKSEL”). 2. This statement, which is the responsibility of Parent's Management and approved by the Parent's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the Circular issued by the Securities and Exchange Board of India under Regulation 33(8) of the Listing Regulations, 2015, as amended, to the extent applicable.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined depending upon the facts and circumstances of the Group and the audit, that there are no key audit matters to communicate in the Auditors Report.

Information Other than the Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the Consolidated Financial Statements, Standalone Financial Statements and our auditor's report thereon. Our opinion on the Consolidated Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, and consider whether the other information is materially inconsistent with the Consolidated Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Managements Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Consolidated Financial Statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated changes in equity of the Group in accordance with Ind AS and other accounting principles generally accepted in India including the Accounting Standards specified under section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and

presentation of the Consolidated Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the Consolidated Financial Statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group is responsible for overseeing the financial reporting process of the Group.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

We communicate with those charged with governance of the Holding Company and subsidiary included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 (the "Act")

In conjunction with our audit of the consolidated financial statements of the Group as of and for the year ended 31st March, 2023, we have audited the internal financial controls with reference to consolidated financial statements of the **SCANPOINT GEOMATICS LIMITED** (Holding Company) and its subsidiary Company, which is a company incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company and its subsidiary company incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal controls with reference to consolidated financial statements criteria established by the Holding Company and its subsidiary Company, incorporated in India considering the essential components of internal controls stated in the Guidance Note on Audit of Internal Financial Controls with reference to consolidated financial statements issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Holding Company and its subsidiary Company, incorporated in India, internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls with reference to consolidated financial statements (the "Guidance Note") issued by the ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to consolidated financial statements and their operating effectiveness.

Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Holding Company and its subsidiary Company incorporated in India, internal financial controls system with reference to consolidated financial statements.

Meaning of Internal Financial Controls with reference to Consolidated Financial Statements

A company's internal financial controls with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Consolidated Financial Statements

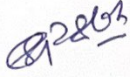

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial control with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary company, incorporated in India, have, in all material respects, an adequate internal financial controls system with reference to consolidated financial statements and such internal financial controls with reference to consolidated financial statements were operating effectively as at 31st March, 2023, based on the internal controls with reference to consolidated financial statements criteria established by the Holding Company and its subsidiary Company, incorporated in India considering the essential components of internal controls stated in the Guidance Note issued by the Institute of Chartered Accountants of India.

Fair value of financial assets and liabilities measured at amortised cost is not materially different from the amortised cost. Further, impact of time value of money is not significant for the financial instruments classified as current. Accordingly, the fair value has not been disclosed separately.

Types of inputs for determining fair value are as under:

Level 1: This level of hierarchy includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities. This category consists of investment in quoted equity shares, and mutual fund investments. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities included in level 3.

B. Measurement of fair values

Investments in unquoted equity shares included in Level 3 of the fair value hierarchy have been valued using the cost approach. For unquoted equity investments categorized under level 3, cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represent the best estimate of fair value within that range.

Level 3 fair values

Movements in the values of unquoted equity instruments for the period ended 31st March 2023 and 31st March 2022 is as below:

Movement in Level 3 valuations	Rs. (In Lakhs)

Notes on Accounts forming part of Consolidated Financial Statements

1) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk includes borrowings, investments, trade payables, trade receivables and loans.

a) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk on long term floating rate borrowings. The borrowings of the Company are principally denominated in Indian Rupees with floating rate of interest.

For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk represents management's assessment of the reasonably possible change in interest rates.

Exposure to interest rate risk

The Parent Company operates, in addition to domestic markets, significantly in international markets through its sales and services in overseas and is therefore exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD. The Parent Company does not enter into any derivative instruments for trading or speculative purposes.

The sensitivity analysis is prepared on the net unhedged exposure of the Company as at the reporting date. 5% represents management's assessment of reasonably possible change in foreign exchange rate.

A change in Foreign currency would have following Impact on profit before tax

	As at March 31, 2023		As at March 31, 2022	
	5% Increase	5% Decrease	5% Increase	5% Decrease
USD	(4.93)	4.93	(4.93)	4.93

c) Other Price Risk

Other price risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market traded price. Other price risk arises from financial assets such as investments in equity instruments. The Parent Company's investment in equity instruments recognised at FVTOCI. As at 31st March, 2023, the carrying value of such instruments recognised at FVTOCI amounts to Rs. 195.70 Lakhs (Rs. 178.99 Lakhs as at 31st March, 2022). The details of such equity instruments are given in Note 5. Investments in unquoted equity shares is not considered to be significant and hence the risk is negligible.

2) Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations resulting in a financial loss to the Group. To manage this, the Group periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets. Individual risk limits are set and periodically reviewed on the basis of such information. The Group considers Credit risk arises primarily from financial assets such as trade receivables, other balances with banks, and loans.

Credit risk arising from investment in equity instruments and other balances with banks is limited and there is no collateral held against these because the counterparties are banks and recognised financial institutions with high credit ratings assigned by the credit rating agencies.

Financial assets are written off when there is no reasonable expectations of recovery, such as a debtor failing to engage in a repayment plan with the Company. Where loan or receivables have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognized as income in the statement of profit and loss.

The Parent Company measures the expected credit loss of trade receivables and loan from individual customers based on historical trend, industry practices and the business environment in which the entity operates. Loss rates are based on actual credit loss experience and past trends. Based on the historical data, loss on collection of receivable is not material hence no provision considered.

Financial Assets are considered to be of good quality and there is no significant increase in credit risk.

3) Liquidity Risk

Liquidity risk is the risk that the Group will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of the group to manage liquidity is to ensure, as far as possible, that group will have sufficient liquidity to meet their respective liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to their reputation. The group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low.

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments.

Notes on Accounts forming part of Consolidated Financial Statements

Note 1 CORPORATE INFORMATION

The Consolidated financial statements of Scanpoint Geomatics Limited are made up of the Scanpoint Geomatics Limited together with its subsidiary Jyacad Solutions Pvt Ltd. (collectively referred to as the "Group").

The Company is engaged in the business of GIS based software development and sales. The Scanpoint Geomatics Limited is a public company incorporated under the provisions of the Companies Act, 1956. Its shares are listed on Bombay Stock Exchange.

The principal accounting policies applied in the preparation of the consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Note 2 SIGNIFICANT ACCOUNTING POLICIES

2.1 BASIS OF PREPARATION & PRESENTATION OF FINANCIAL STATEMENTS

a. Statement of Compliance

These consolidated financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as "Ind AS") as prescribed under section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules as amended from time to time

b. Basis of measurement

The consolidated financial statements have been prepared on a historical cost convention and on an accrual basis, except for certain financial instruments which are measured at fair value at end of the each reporting period, as explained in the accounting policies below.

c. Use of judgment, estimates and assumptions

The preparation of the consolidated financial statements in conformity with Ind AS requires the management to make judgments, estimates and assumptions considered in the reported amounts of assets and liabilities and disclosure relating to contingent liabilities as at the date of consolidated financial statement and the reported amounts of income and expenditure during the reported year. Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

i. Income taxes

The Company's major tax jurisdiction is India. Significant judgments are involved in determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions. In assessing the reliability of deferred income tax assets, management considers whether some portion or all of the deferred income tax assets will not be realized. The realization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which the temporary differences become deductible. Management considers the scheduled reversals of deferred income tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management believes that the company will realize the benefits of those deductible differences. The amount of the deferred income tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry forward period are reduced.

ii. Impairment testing

Investments in goodwill and intangible assets are tested for impairment annually and when events occur or changes in circumstances indicate that the recoverable amount of the asset or cash generating units to which these pertain is less than its carrying value. The recoverable amount of cash generating units is higher of value-in-use and fair value less cost to dispose. The calculation of value in use of a cash generating unit involves use of significant estimates and assumptions which includes turnover and earnings multiples, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.

iii. Depreciation and amortisation

Depreciation and amortization is based on management estimates of the future useful lives of certain class of property, plant and equipment and intangible assets. Estimates may change due to technological developments, competition, changes in market conditions and other factors and may result in changes in the estimated useful life and in the depreciation and amortization charges

iv. Other estimates

The preparation of financial statements involves estimates and assumptions that affect the reported amount of assets, liabilities, disclosure of contingent liabilities at the date of financial statements and the reported amount of revenues and expenses for the reporting period. Specifically, the Company estimates the probability of collection of accounts receivable by analyzing historical payment patterns, customer concentrations, customer credit worthiness and current economic trends. If the financial condition of a customer deteriorates, additional allowances may be required.

The stock compensation expense is determined based on the Company's estimate of equity instruments that will eventually vest.

Fair valuation of derivative hedging instruments designated as cash flow hedges involves significant estimates relating to the occurrence of forecast transaction.

2.2 Basis of Consolidation

The Consolidated Financial Statements comprise the financial statements of the Parent Company ('the Company') and its subsidiary. Control is achieved when the Company has:

- Power over the investee,
- Is exposed or has rights to variable returns from its involvement with the investee, and
- Has the ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee,
- Rights arising from other contractual arrangements,
- The Company's voting rights and potential voting rights,
- The size of the Company's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the Consolidated Financial Statements from the date the Company gains control until the date the Company ceases to control the subsidiary.

Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the Consolidated Financial Statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the Consolidated Financial Statements to ensure conformity with the Group's accounting policies.

Consolidation procedure:

(a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the Parent with its subsidiary. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognized in the Consolidated Financial Statements at the acquisition date.

(b) Offset (eliminate) the carrying amount of the Parent's investment in subsidiary and the Parent's portion of equity of subsidiary. The excess of cost to the Group of its investments in the subsidiary company over its share of equity of the subsidiary companies at the dates on which the investments in the subsidiary company were made, is recognised as 'Goodwill' being an asset in the consolidated financial statements and its tested for impairment on annual basis. The Goodwill is determined separately for each subsidiary company and such amounts are not set off between different entities.

(c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the Consolidated Financial Statements.

Profit or loss and each component of Other Comprehensive Income (OCI) are attributed to the owners of the Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiary to bring its accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

Following subsidiary has been considered in the preparation of the consolidated financial statements

Name of the Company	Country of Incorporation	Proportion of Ownership as on March 31, 2023	Proportion of Ownership as on March 31, 2022
Jyacad Solutions Pvt. Ltd.	India	99.90%	99.90%

2.3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (i.e. the "functional currency"). The financial statements are presented in Indian Rupee, the national currency of India, which is the functional currency of the Company.

b Investment In Subsidiaries, Associate And Joint Venture:

Investment in subsidiary companies, associate and joint venture companies are carried at cost less accumulated impairment losses, if any. Where an indication of Impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount. On disposal of investments in subsidiary companies, associate and joint venture companies, the difference between net disposal of proceeds and the carrying amounts are recognized in the statement of Profit and Loss.

c Property, plant and equipment

Property, plant and equipment are measured at historical cost or its deemed cost less accumulated depreciation and impairment losses, if any. Historical Cost includes expenditures directly attributable to the acquisition of the asset.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs and maintenance costs are recognized in the statement of profit and loss when incurred.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

d Capital work-in-progress

Amounts paid towards the acquisition of property, plant and equipment outstanding as of each reporting date and the cost of property, plant and equipment not ready for intended use before such date are disclosed under capital advances and capital work-in-progress respectively.

e Depreciation/ Amortisation

Depreciable amount for assets is the cost of asset less its estimated residual value.

Depreciation has been provided on all assets on the straight line method, as per the useful life prescribed in Schedule II of the Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. The Company assesses at each Balance Sheet date whether there is objective evidence that an asset or a group of assets is impaired. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

The residual values are not more than 5% of the original cost of assets.

f Leases

From April 1, 2019, Ind AS 116 'Leases' is applicable to all the listed companies. Ind AS 116 has certain exemptions from the application of Ind AS - 116:

i. Short Term Leases

A lease that at the commencement date, has a lease term of 12 months or less. However, a lease that contains an option to purchase the asset is not a short-term lease

1. The election for short-term leases shall be made by class of underlying asset to which the right of use relates and can be made on a lease-by-lease basis.

ii. Leases for low value assets

An underlying asset can be of low value only if:

1. The lessee can benefit from use of the underlying asset on its own or together with other resources that are readily available to the lessee; and

2. The underlying asset is not highly dependent on, or highly interrelated with, other assets.

Examples of low-value underlying assets can include tablet and personal computers, small items of office furniture and telephones. When new, if the asset is typically not of low value, the lease of such asset does not qualify as a lease of a low-value asset. When new, if the asset is typically not of low value, the lease of such asset does not qualify as a lease of a low-value asset. The assessment of whether an underlying asset is of low value is performed on an absolute basis. Leases of low-value assets qualify for recognition exemption regardless of whether those leases are material to the lessee. The assessment is not affected by the size, nature or circumstances of the lessee.

Accounting for short term and low value asset leases

If a lessee elects to opt for the recognition exemption for either short-term leases or leases for which the underlying asset is of low value, the lessee shall recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis. According to information and explanation provided to us, all the lease agreements of company are short term lease agreements so application of new Ind AS - 116 'Leases' is not applicable to us.

g. Financial Instruments

All financial instruments are recognized initially at fair value. Transaction costs that are attributable to the acquisition of the financial asset (other than financial assets recorded at fair value through profit or loss) are included in the fair value of the financial assets. Purchase or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trade) are recognized on trade date. While, loans and borrowings and payables are recognized as net cost of directly attributable transaction costs.

For the purpose of subsequent measurement, financial instruments of the Company are classified in the following categories: non-derivative financial assets comprising amortized cost, debt instruments at fair value through other comprehensive income (FVTOCI), equity instruments at FVTOCI or fair value through profit and loss account (FVTPL), non-derivative financial liabilities at amortized cost or FVTPL and derivative financial instruments (under the category of financial assets or financial liabilities) at FVTPL.

The classification of financial instruments depends on the objective of the business model for which it is held. Management determines the classification of its financial instruments at initial recognition.

Non-derivative financial assets

i. Financial assets at amortised cost

A financial asset shall be measured at amortized cost if both of the following conditions are met: the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Financial assets are measured initially at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest rate method, less any impairment loss.

Financial assets at amortized cost are represented by trade receivables, security deposits, cash and cash equivalents, employee and other advances and eligible current and non-current assets.

Cash and cash equivalents comprise cash on hand and in banks and demand deposits with banks which can be withdrawn at any time without prior notice or penalty on the principal.

For the purposes of the cash flow statement, cash and cash equivalents include cash on hand, in banks and demand deposits with banks, net of outstanding bank overdrafts that are repayable on demand, book overdraft and are considered part of the Company's cash management system.

ii. Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)

For assets, if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and where the company has exercised the option to classify the equity investment as at FVTOCI, all fair value changes on the investment are recognized in OCI. The accumulated gains or losses on such investments are not recycled to the Statement of Profit and Loss even on sale of such investment.

iii. Financial assets at Fair Value through Profit and loss (FVTPL)

with all changes recorded in the statement of profit and loss.

Non-derivative financial liabilities

i. Financial liabilities at amortized cost.

Financial liabilities at amortized cost represented by borrowings, trade and other payables are initially recognized at fair value, and subsequently carried at amortized cost using the effective interest rate method. For trade and other payable maturing within one year from the Balance Sheet date, the carrying value approximates fair value due to short maturity.

ii. Financial liabilities at Fair Value through Profit and loss (FVTPL)

Financial liabilities at FVTPL represented by contingent consideration are measured at fair value with all changes recognized in the statement of profit and loss.

iii. Derivative financial instruments and hedging activities

A derivative is a financial instrument which changes value in response to changes in an underlying asset and is settled at a future date. Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The Company enters into derivative contracts to hedge the risks asserted with currency fluctuations relating to firm commitments and highly probable transactions. The Company does not use derivative instruments for speculative purposes.

The Company documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Company also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivatives that are used in hedging transactions are effective in offsetting changes in cash flows of hedged items.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in Other Comprehensive Income. The ineffective portion of changes in the fair value of the derivative is recognized in the Statement of Profit and Loss.

Amounts accumulated in hedging reserve are reclassified to the Statement of Profit and Loss in the periods when the hedged item affects the Statement of Profit and Loss.

The full fair value of a hedging derivative is classified as a current/ non-current, asset or liability based on the remaining maturity of the hedged item.

When a hedging instrument expires, swapped or unwound, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in Statement of Changes in Equity is recognized in the Statement of Profit and Loss.

iv. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

v. Fair value measurement

The Company classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

Level 1 - The fair value of financial instruments quoted in active markets is based on their quoted closing price at the Balance Sheet date.

Level 2 - The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques using observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and use of comparable arm's length transactions.

Level 3 - The fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs). When the fair value of unquoted instruments cannot be measured with sufficient reliability, the Company carries such instruments at cost less impairment, if applicable.

h. Employee Benefits

i. Short term employee benefits:

Short Term benefits are recognized as an expense at the undiscounted amounts in the Statement of Profit and Loss of the year in which the related service is rendered.

ii. Post employment benefits:

Defined contribution plan:

The Employee and Company make monthly fixed Contribution to Government of India Employee's Provident Fund equal to a specified percentage of the Cover employee's salary, Provision for the same is made in the year in which service are render by employee.

Defined benefit plans:

The Liability for Gratuity to employees, which is a defined benefit plan, as at Balance Sheet date determined on the basis of actuarial Valuation based on Projected Unit Credit method and the contribution thereof paid/payable is absorbed in the accounts.

The present value of the defined benefit obligations is determined by discounting the estimated future cash flows at a predetermined rate of interest, taking into account the probability of payment. This cost is included in employee benefit expenses in the statement of profit and loss.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in balance sheet. Changes in present value of the defined benefit obligation resulting from plan amendment or curtailments are recognized immediately in profit or loss as past service cost.

iii. Other long term employee benefits:

Other long term employee benefits comprises of leave encashment towards un-availed leave and compensated absences, these are recognized based on the present value of defined obligation which is computed using the project unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. These are accounted either as current employee cost or included in cost of assets as permitted.

Re-measurement of leave encashment towards un-availed leave and compensated absences are recognized in the statement of profit and loss except those included in cost of assets as permitted in the period which they occur.

i. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset, if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions for onerous contracts are recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. Provisions for onerous contracts

j. Income Taxes

Income tax comprises current and deferred tax. Income tax expense is recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in equity or in other comprehensive income

i. Current income tax

Current income tax liability/ (asset) for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the year. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted by the reporting date and applicable for the year. The Company off sets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis or to realize the asset and liability simultaneously.

ii. Deferred tax

Deferred income tax is recognized using the Balance Sheet approach. Deferred income tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax asset is recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized. Deferred income tax liabilities are recognized for all taxable temporary differences.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date

k. Cash flow Statement:

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipt or payments and item of income or expense associated with investing or financing cash-flows. The cash flow from operating, investing and financing activities of the Company is segregated.

l. Revenue Recognition

The Company derives revenue primarily from software development and from the licensing of software products. The Company recognizes revenue when it transfers control over a product or a service to a customer. The method for recognizing revenues and costs depends on the nature of the services rendered.

The timing of revenue recognition, billings and cash collections results in receivables, unbilled revenue, and unearned revenue on the Company's Balance Sheet. Amounts are billed as work progresses in accordance with agreed-upon contractual terms, either at periodic intervals (e.g., monthly or quarterly) or upon achievement of contractual milestones.

The Company's receivables are rights to consideration that are unconditional. Unbilled revenues comprising revenues in excess of billings from time and material contracts and fixed-price maintenance contracts are classified as financial asset when the right to consideration is unconditional and is due only after a passage of time.

Invoicing to the clients for other fixed-price contracts is based on milestones as defined in the contract and therefore the timing of revenue recognition is different from the timing of invoicing to the customers. Therefore unbilled revenues for other fixed-price contracts (contract asset) are classified as "non-financial asset" because the right to consideration is dependent on completion of contractual milestones. Invoicing in excess of earnings is classified as "unearned revenue".

Remaining performance obligation disclosure:

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Company expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Company has not disclosed the remaining performance obligation-related disclosures for contracts where the revenue recognized corresponds directly with the value to the customer of the entity's performance completed to date, typically those contracts where invoicing is on time and material and unit of work-based contracts. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revaluations, and adjustment for revenue that has not materialized and adjustments for currency.

i. Time and materials contracts

Revenues from contracts priced on a time and material basis are recognized as the related services are performed and related costs are incurred.

ii. Fixed-price contracts

Revenues from fixed-price contracts are recognized using the "percentage-of-completion" method. Percentage of completion is determined based on project costs incurred to date as a percentage of total estimated project costs required to complete the project. The cost expended (or input) method has been used to measure progress towards completion as there is a direct relationship between input and productivity.

If the Company does not have a sufficient basis to measure the progress of completion or to estimate the total contract revenues and costs, revenue is recognized only to the extent of contract cost incurred for which recoverability is probable.

When total cost estimates exceed revenues in an arrangement, the estimated losses are recognized in the statement of profit and loss in the period in which such losses become probable based on the current contract estimates.

iii. Maintenance Contracts

Revenue from maintenance contracts is recognized ratably over the period of the contract using the "percentage-of-completion" method. When services are performed through an indefinite number of repetitive acts over a specified period of time, revenue is recognized on a straight line basis over the specified period or under some other method that better represents the stage of completion.

'Unbilled revenues' represent cost and earnings in excess of billings as at the end of the reporting period.

'Unearned revenues' represent billing in excess of revenue recognized. Advance payments received from customers for whom no services are rendered are presented as 'Advance from customers'.

Revenues are reported net of Sales returns, GST and applicable discounts and allowances.

m. Dividend and dividend distribution tax

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors. The Company declares and pays dividends in Indian rupees and is subject to applicable distribution taxes. The applicable distribution taxes are treated as an appropriation of profits.

n. Foreign Currency transactions and translations

Transactions in foreign currency are translated into the respective functional currencies using the exchange rates prevailing at the dates of the respective transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the exchange rates prevailing at reporting date of monetary assets and liabilities denominated in foreign currencies are recognized in the Statement of Profit and Loss and reported within foreign exchange gains/ (losses).

Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

Foreign currency gains and losses are reported on a net basis. This includes changes in the fair value of foreign exchange derivative instruments, which are accounted at fair value through profit or loss.

o. Finance Income and expense

Finance income consists of interest income on funds invested, dividend income and fair value gains on the FVTPL financial assets. Interest income is recognized as it accrues in the statement of profit and loss, using the effective interest method.

Dividend income is recognized in the statement of profit and loss on the date that the Company's right to receive payment is established.

Finance expenses consist of interest expense on loans and borrowings. Borrowing costs are recognized in the Statement of Profit and Loss using the effective interest method.

p. Impairment

i. Financial assets

In accordance with Ind AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss.

The Company assesses at each Balance Sheet date whether a financial asset or a group of financial assets is impaired. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable and unbilled revenue. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. The Company recognizes lifetime expected credit losses for all trade receivables and/or other contract assets that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

ECL allowance (or reversal) is recognized as income / expense in the Statement of Profit and Loss.

ii. Non-financial assets

The Company assesses at each reporting date whether there is any objective evidence that a non-financial asset or a group of non financial assets is impaired. If any such indication exists, the Company estimates the amount of impairment loss.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognized in Statement of Profit and Loss and reflected in an allowance account. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through Statement of Profit and Loss.

The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net off any accumulated depreciation/amortization) had no impairment loss been recognized for the asset in prior years.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assessor groups of assets (the "cash-generating unit").

q. Earnings per share

Basic earnings per equity share are computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as at the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

r. Contingent Liabilities

Contingent liabilities exist when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or nonoccurrence of one or more uncertain future events not wholly within the control of the Company, or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required or the amount cannot be reliably estimated. Contingent liabilities are appropriately disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

s. Contingent Assets

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. The Company does not recognize a contingent asset.

t. Events after the reporting period

Adjusting events are events that provide further evidence of conditions that existed at the end of the reporting period. The financial statements are adjusted for such events before authorization for issue. Non-adjusting events are events that are indicative of conditions that arose after the end of the reporting period. Non-adjusting events after the reporting date are not accounted, but disclosed.

u. Intangible Assets

Intangible assets are measured on initial recognition at cost (net of recoverable taxes, if any). Subsequently, intangible assets are carried out at cost less any accumulated amortization and accumulated impairment losses, if any.

The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between net disposal proceeds and the carrying amount of the asset and is recognized as income or expenses in the Statement of Profit and Loss in the year of disposal.

v. Borrowing Costs

Borrowing costs include interest and amortization of ancillary costs incurred to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset is added to the cost of the assets. Capitalizations of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

During the year company has not capitalized any borrowing cost.

w. Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest rupees as per the requirement of Schedule III, unless otherwise stated.

x. Goods & Service Tax:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Policy**”) by way of circular bearing number DPIIT file number 5(2)/2020-FDI Policy dated October 15, 2020, which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the nonresident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

The Rights Equity Shares purchased by non- residents shall be subject to the same conditions including restrictions in regard to the repatriation as are applicable to the original Equity Shares against which Rights Equity Shares are issued on rights basis. The above information is given for the benefit of the Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Letter of Offer.
