Our Company has records relating to capital formation from FY 2011-12 onwards. Our Company is unable to trace such records prior to FY 2011-12. We cannot assure you that those records prior to FY 2011-12 will be available in the future or that we will not be subject to any actions by any regulatory authority in this respect.

8. ***Any disturbance in or shutdown of our Manufacturing Facilities may have a material adverse effect on our entire manufacturing operations and consequently, our business, financial condition and our results of operations.***

Our manufacturing operations are operational at Ghaziabad, Pondicherry. As on the date of this letter of offer, the manufacturing facilities are dedicated towards the manufacture of Elastomeric u PVC Pipes, Electrical Conduits Pipes, RIGID PVC pipes & HDPE piping system. For further details, see "Our Business" beginning on page 68 of this Letter of Offer. Our manufacturing operations and consequently our business is dependent upon our ability to manage the manufacturing facility, which is subject to operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents, localised social unrest and natural disasters. In the event there are any disruptions at our manufacturing facility, due to natural or man-made disasters, workforce disruptions, regulatory approval delays, fire, failure of machinery, lack of access to assured supply of electrical power and water at reasonable costs or any significant social, political or economic disturbances, our ability to manufacture our products may be adversely affected. Any contravention of or non-compliance with the terms of various regulatory approvals applicable to the manufacturing facility may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labour involved in our manufacturing facility, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

9. ***Any significant shortfall in the supply of our raw materials or an increase in our raw material costs, or other input costs, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.***

The success of our operations depends on, among other things, our ability to source raw materials at competitive prices. Raw materials are subject to supply disruptions and price volatility caused by various factors such as the quality and availability of raw materials, currency fluctuations, consumer demand, changes in domestic as well as international government policies and regulatory sanctions. We seek to source our raw materials from reputed suppliers and typically seek quotations from multiple suppliers. We do not have long-term contracts with our suppliers. We typically purchase raw materials on a purchase order basis. Consequently, we may be required to regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices. The absence of long-term supplier contracts subjects us to risks such as price volatility, unavailability of certain raw materials in the short term and failure to source critical raw materials in time, which would result in a delay in manufacturing of the final product. Further, we cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. Our suppliers may also be unable to provide us with sufficient quantity of raw materials, at prices acceptable to us, for us to meet the demand for our products. While, we typically sell our products to our customers on a purchase order basis, given that we have long term relationships with many of our customers, our ability to pass on increases in the costs of raw materials and other inputs to our customers may be limited. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. If we are unable to purchase the raw materials from such suppliers for any reason including due to cessation of operations by such suppliers, disputes with such suppliers, or if there is a substantial increase in the prices charged by such suppliers, there can be no assurance that we will be able to identify alternative suppliers for our raw materials at similar cost and other terms of purchase. Any increase in raw material prices may result in corresponding increases in our product costs. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to our customers in an efficient, reliable and timely manner, and consequently adversely affect our business, results of operations and financial condition.

- 10. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.***

Our Company has entered into agreements for our borrowings with Kotak & Mahindra Bank Limited consortium of lenders and other lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure (including this present proposed Rights Issue), formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying secured loan and unsecured loans, undertake guarantee obligations, which require our Company to obtain prior approval of the lenders for any of the above activities. We have applied to all the relevant lenders for consent/no objection certificate to undertake the Issue. As on date of this Letter of Offer, the consents has been received.

- 11. *Our ability to attract new customers is heavily dependent upon various factors including our reputation and our ability to maintain a high level of service quality. Any failure by us to retain or attract customers may impact its business and revenues.***

We believe that our strong brand reputation has helped us to attract our customers. As a result, our reputation and perception of our brands are critical to our business. Our business heavily relies on our reputation, quality and popularity of our product, our visibility and perception amongst customers. Therefore, it is important that we retain the trust placed on us by our customers. At the same time, we must also continue to attract more number of customers at a consistent rate. Though, we attempt to retain our position by maintaining and improve our product offerings yet failure on our part to maintain and enhance our reputation or product quality and services may act as an hindrance in attainment of our customers 'retention and addition objectives which in turn may adversely impact our business and revenues.

- 12. *While we are currently not subject to extensive Governmental regulation, any regulatory or legal framework introduced in the future may increase our compliance requirements and costs, which may adversely affect our business, results of operations and prospects. However, to run our business, we require certain regulatory permits and approval.***

At present, the segments in which we operate are not subject to extensive Government regulation. While we are not in a position to predict the likelihood, timing or content of any such regulation or legislation, if any such regulation or legislation is notified, we may be affected in various ways. However, we have obtained all permits and licenses, which are adequate to run our business. Further, some of these approvals are granted for fixed periods and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all.

- 13. *Our Company depends on its brand recognition. Its ability to retain the present number of customers serviced by it and attract new customers depends upon various factors including its reputation and its ability to maintain a high level of quality of its products and services at competitive prices. Any failure by the Company to retain or attract customers may impact our business and revenues.***

Our Company believes that brand recognition is important for its business due to relatively low barriers of entry in its market. A company's business heavily relies on its reputation as well as the quality and popularity of the products and services provided by it and its visibility and perception amongst customers. Our Company's attempt to retain its position in the industry in which it operate and further build its reputation by maintaining quality and constantly striving to improve its value proposition to customers. As the market becomes increasingly competitive, maintaining and enhancing our Company's brand will become critical to ensure that it continues to remain a competitive products and services provider relating to education solutions. Prospective clients gain awareness of our Company's services through interactions with its existing clients. While our Company still believes that considering the time period since we have started, it has achieved reasonable scale in its business, any decrease in the number of customers which avail our services or delay in its expansion plans may lead to slowdown in its growth and scale. If our clients are consistently provided with inaccurate services, or are provided with sub-standard services, they may become dissatisfied with the quality of the services provided by us which may in turn dilute the Company's branding and materially adversely affect its reputation and consequently its business. Failure to maintain and enhance the Company's reputation or any actual or perceived reasons leading to reduction of benefits from its projects and services or any negative publicity against us may adversely impact our ability to retain and attract new customers which shall consequently affect the brand reputation and consequently its business and results of operations.

14. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing agents will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

15. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the rights issue which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this rights issue, our Promoters and Promoter Group will collectively own majority of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

16. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us.*

Our Company will be severely dependent on its promoters to effectively implement its growth strategies. Our Promoters have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Financial impact of the aforesaid risk cannot be reasonably quantified.

17. *Our success depends largely on our senior management and our ability to attract and retain our key personnel.*

Our success depends on the continued services and performance of our senior management and sales agents. Competition for senior employees and sales agents in the industry is intense and we may not be able to retain our existing team members or attract and retain new team members in the future. The loss of any member of our key team may adversely affect our business, results of operations and financial condition. We do not maintain key man's life insurance for our Promoters, senior members of our management team or other key personnel.

18. *In addition to normal remuneration or benefits and reimbursement of expenses, our Promoters, our Directors and Key Managerial Personnel are interested in our Company to the extent of their shareholding, and dividend entitlements etc.*

Our Promoters, Directors and Key Management Personnel are deemed to be interested to the extent of the Equity Shares held by them, or their relatives, dividend entitlements, and benefits deriving from the directorship in Rungta Irrigation Limited. Our Promoters are interested in the transactions entered into the Company and its Promoter Group. For further information, please refer to the section titled "Capital Structure", "Our Management" beginning on pages 49, 75 respectively of this letter of offer

19. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles "Objects of the Issue".*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 51 of this offer document is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter —Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter —Objects of the Issue will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

20. *There is no monitoring agency appointed by our Company and the deployments of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

21. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

22. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations.*

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of our internal quality standards. However, we cannot assure you that our quality control processes will not fail or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence, and human error or otherwise, may damage our products and result in deficient products. It is conducive for us to set the bar for the quality of our products higher than our competitors and to ensure that the products manufactured by us would meet the quality standards which are set for our products as deviation from the same can cause our customers and distribution intermediaries to reject our products and can also damage our reputation and brand value.

As per the formal agreements which have been entered into by us with our distribution intermediaries, in the event the quality of our products or our products suffer from defects and are returned to the intermediaries due to quality complaints received from the end users, we would be bound to take back the dead stock lying with the intermediaries at our own expense and would have to reimburse the expenses or financial losses incurred by the intermediaries on such stocks. Such quality lapses could strain our relationship with our distribution intermediaries and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our intermediaries may lose faith in the quality of our products and could in turn refuse to further deal

in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers or intermediaries for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

23. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across raw material procurement, manufacturers, suppliers, warehouse management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

24. *We have significant power requirements for continuous running of our factories. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

All our manufacturing units have significant electricity requirements and any interruption in power supply may temporarily disrupt our operations.

Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There is limited number of electricity providers in area from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "Our Business" on page 68 of this Letter of Offer.

25. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. Further, we do not deal with end use customers, therefore we will have to engage distributors, dealers and other intermediaries to enter the international markets. If we are unable to make long-lasting relations with the major intermediaries in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

26. *Our industry is competitive and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The laminate industry in India is fragmented and competitive with both organized and unorganized markets. Our products compete with local retailers, non-branded products, economy brands and products of other established brands. Any increase in sale of such brands or if preference is given to such brands it may have an adverse impact on our business and results of operations. Some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market.

Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see “Our Industry” on page 58 of this Letter of Offer.

27. *Our growth and our financial results may be affected by factors affecting the real estate industry in India.*

Our financial results are influenced by the macroeconomic factors determining the growth of the Indian economy as a whole and real estate sector in particular. The interior infrastructure sector is influenced by a growth in disposable income. A buoyant economy and rising per capita income and easy availability of housing finance drive urbanization, fueling growth in housing and creating room for the interior infrastructure. The demand for interior infrastructure products is primarily dependent on the demand for real estate which influences the demand for plywood, laminates and other interior infrastructure products.

Periods of slowdown in the economic growth of India has significantly affected the real estate sector in the recent past. Any further downturn in the real estate industry and/or changes in governmental policies affecting the growth of this sector may have an adverse effect on the demand for plywood, laminates and other infrastructure products and the results of our operations. Especially, during the ongoing pandemic, the economy as a whole has withstood the worst impact of extended lockdown and reduction in the flow of income. Real estate and the interior infrastructure sector industries may see a downside in the current situation and an adverse and direct impact could fall on our business operations, demand of our products, revenue and financial condition.

28. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoter, Mahabir Prasad Rungta holds the position of managing director in our Company and therefore may be deemed to be interested in any remuneration which may be payable to her in such capacity. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the chapter titled “Capital Structure” on page 49 of this Letter of Offer.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control approximately 38% in our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

29. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

After the completion of the Issue, our Promoters and the members of the Promoter Group will hold approximately 38.27% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoters and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Equity Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters' shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

30. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2020, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group and our Group Companies relating to our operations. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the Fiscal ended March 31, 2020. For further details, please refer to the chapter titled "Financial Information on page 79 of the Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

31. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on March 31, 2022 our Company's total fund based indebtedness is Rs. 2,340.07 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

32. *Our Company has taken certain unsecured loans from our Promoters, members of our promoter group and financial institutions, which may be recalled at any time.*

As on March 31, 2022, our Company has outstanding unsecured loans aggregating to ₹ 1743.20 lakhs, which have been extended by our Promoters, members of our promoter group and financial institutions and may be recalled by them at any time. In the event, any of such lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For details of Unsecured Loan, please refer "Financial Statement" page number 87 of this letter of offer.

- 33. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

- 34. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

Our Company depends on the management skills and guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our Directors have been associated with our Company since inception and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Directors or Key Managerial Personnel are unable or unwilling to continue in his/ her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled "Our Management" on page 75 of this Letter of Offer.

- 35. *Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.***

Our manufacturing activities are subject to, among other laws, environmental laws and regulations promulgated by the Ministry of Environment and Forest of Government of India, the State Forest Policy, State Pollution Control Board and Central Empowered Committees for health & safety. These include laws and regulations about discharge of effluents, polluted emissions, hazardous substances etc.

- 36. *Our Company is highly dependent on skilled contract labour for manufacturing of our products. Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees. If we are unable to continue to hire skilled contract labour, the quality of our products being manufactured in our units can get affected.***

Our operations are significantly dependent on access to a large pool of contract laborers for operation of our manufacturing unit. As of December 31, 2021, while we had 60 permanent full-time employees, we also employed contract laborers under the Contract Labour (Regulation and Abolition) Act, 1970. The number of contract labourers employed by us varies from time to time based on the nature and extent of work in which we are involved. Our dependence on such contract labour may result in significant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract laborers during peak periods. Further, our manufacturing unit and our proposed manufacturing unit are surrounded by a number of industries, which may create a demand- supply gap in the labour industry which may impact our business operations. There can be no assurance that we will have adequate access to skilled workmen at reasonable rates. As a result, we may be required to incur additional costs to ensure timely execution of our projects. In addition to the above, in view of the ongoing pandemic and the lockdown which was imposed by several State and Central Governments, there is an acute shortage of unskilled laborers, since most of the unskilled workers have returned to their native places due to the widening income gap and lack of adequate resources to sustain their livelihood. In the event, we are unable to source adequate numbers of unskilled laborers for our manufacturing units or if we are exposed to an increased expense due to the surge in the wages of unskilled laborers, we cannot assure you that it will not impact our business operations and financial condition. Due to the increase in the wages charged by the laborers, we may have to increase the cost of our product which would directly impact our distribution intermediaries and our end use customers.

As of December 31, 2021, while we had 60 permanent full-time employees, we also employed contract laborers to carry out our manufacturing processes under the Contract Labour (Regulation and Abolition) Act, 1970. We believe our employees and unskilled labour employed in our manufacturing unit are critical to maintain our competitive position. Although we have not experienced any material labour unrest, we cannot assure you that we will not experience disruptions in work or our retail operations due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations.

37. *Our operations can be adversely affected in case of industrial accidents at our manufacturing unit.*

Our manufacturing process requires the use of heavy machines, which makes the labour employed at our manufacturing unit prone to accidents that occur during the course of our operations resulting in personal injuries causing permanent disability or even death. However, we cannot assure you that such instances would not happen in the future, leading to death or disablement of our employees. Although, we have availed workmen compensation policy, group personal accident insurance policy, group health insurance policy and public industrial liability policy, we cannot assure you that we will be able to receive a claim from these policies, failing which we will have to provide the compensation to the employees from our own resources. Our Company has adopted adequate safety measures, we cannot assure you that, in the future no such cases will be instituted against our Company, alleging that we were negligent or we did not provide adequate supervision therefore, holding us liable for injuries that were suffered during the manufacture of our products. In the event any such accidents take place in the manufacturing unit of our Company, we may get involved in litigation or other proceedings, or be held liable in any litigation or proceedings, incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations.

38. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.*

Our Company is involved in various business transaction with international clients and has to conduct the same in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularise the payment. Further, our international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

39. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Although our Company has declared dividends in the past, however there can be no assurance that our Company will declare dividends in the future also.

40. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

- 41. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.***

As the issue size shall be less than ₹10,000 lakhs, under Regulation 41 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled “Objects of the Issue” on page 51 of this Letter of Offer.

- 42. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available in the report titled “India Plywood and Laminates Market” published by “Research Nester” and such data has not been independently verified by us.***

We have not commissioned an industry report for the disclosures which need to be made in the chapter titled “Industry Overview” of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available in the report. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

ISSUE SPECIFIC RISKS

- 43. *Our Company will not distribute this Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.***

Our Company will dispatch this Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the Offering Materials) to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

- 44. *SEBI has recently, by way of circulars dated January 22, 2020 and May 6, 2020, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in the Draft Letter of Offer and this Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible equity shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible equity shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020 and May 6, 2020, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “Terms of the Issue” on page 135 of this letter of offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date i.e. December 09, 2022, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) Equity Shares held by Eligible Equity Shareholders holding Equity

Shares in physical form as on Record Date where details of demat accounts are not provided by Eligible Equity Shareholders to our Company or Registrar; or (e) credit of the Rights Entitlements returned/reversed/failed; or (f) the ownership of the Equity Shares currently under dispute, including any court proceedings.

45. *The R-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.*

In accordance with SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/78 dated May 6, 2020, a separate web based application platform, i.e., the R-WAP facility, has been instituted for making an Application in this Issue by Original Resident Shareholders. Further, R-WAP is only an additional option and not a replacement of the ASBA process. On R-WAP, the Original Resident Shareholders can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see "Terms of the Issue" on page 135 of this letter of offer. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology
- in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users' data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, R-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that R-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through R-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the R-WAP facility.

46. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

47. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

48. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares

only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

49. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all, and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future. Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

50. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

51. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

52. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

53. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

54. *The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

55. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as USGAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our restated summary statements of assets and liabilities as at December 31, 2020 and restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2020 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with

Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

56. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

57. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

58. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (ICDS), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

1. the General Anti Avoidance Rules (GAAR) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
2. a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

59. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and

financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

60. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

61. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

63. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (GST) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR

which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2020 (Finance Act) on March 27, 2020, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (—Bill) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

GLOBAL OUTLOOK

The global economy continues to face steep challenges, shaped by the lingering effects of three powerful forces: the Russian invasion of Ukraine, a cost-of-living crisis caused by persistent and broadening inflation pressures, and the slowdown in China. Russia's invasion of Ukraine continues to powerfully destabilize the global economy. Beyond the escalating and senseless destruction of lives and livelihoods, it has led to a severe energy crisis in Europe that is sharply increasing costs of living and hampering economic activity.

Russia is a major supplier of oil, gas, and metals, and, together with Ukraine, of wheat and corn, the current and anticipated decline in the supply of these commodities has already driven their prices up sharply. Europe, Central Asia, Middle East and North Africa, and sub-Saharan Africa are most affected. The food and fuel price increases will hurt lower-income households globally, including in the Americas and Asia.

Persistent and broadening inflation pressures have triggered a rapid and synchronized tightening of monetary conditions, alongside a powerful appreciation of the US dollar against most other currencies. Tighter global monetary and financial conditions will work their way through the economy, weighing demand down and helping to gradually subjugate inflation. So far, however, price pressures are proving quite stubborn and a major source of concern for policymakers. We expect global inflation to peak in late 2022 but to remain elevated for longer than previously expected, decreasing to 4.1 percent by 2024.

The global economy is experiencing a number of turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia's invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Normalization of monetary and fiscal policies that delivered unprecedented support during the pandemic is cooling demand as policymakers aim to lower inflation back to target. But a growing share of economies are in a growth slowdown or outright contraction. The global economy's future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China.

Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation is forecast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024.

Inflation and Uncertainty

The world is in a volatile period: economic, geo-political, and ecological changes all impact the global outlook. Inflation has soared to multidecade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia's ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption.

The second quarter of 2022 saw global real GDP modestly contract (growth of –0.1 percentage point at a quarterly annualized rate), with negative growth in China, Russia, and the US, as well as sharp slowdowns in eastern European countries most directly affected by the war in Ukraine and international sanctions aimed at pressuring Russia to end

hostilities. At the same time, some major economies did not contract—euro area growth surprised on the upside in the second quarter, led by growth in tourism-dependent southern European economies. Forward-looking indicators, including new manufacturing orders and sentiment gauges, suggest a slowdown among major economies (Figure 1.1).

In some cases, however, signals conflict—with some indicators showing output weakness amid labor market strength. An important factor underpinning the slowdown in the first half of this year is the rapid removal of monetary accommodation as many central banks seek to moderate persistently high inflation (Figure 1.2)

Beyond monetary policy alone, China's COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy and Russia's invasion of Ukraine have also pulled down economic activity. China's lockdowns have imposed sizable constraints domestically and gummed up already strained global supply chains. The war in Ukraine and deepening cuts to supplies of gas to Europe have amplified preexisting stresses in global commodity markets, driving natural gas prices higher once more (Figure 1.4).

Central Banks Tackle Stubbornly High Inflation

Since 2021, inflation has risen faster and more persistently than expected. In 2022, inflation in advanced economies reached its highest rate since 1982. Although inflation is a broad phenomenon, affecting most economies across the world (Figure 1.6), it has the most severe impact on lower-income groups in developing economies. In these countries, up to half of household consumption expenditure is on food, meaning that inflation can have particularly acute impacts on human health and living standards (Figure 1.7).

The reverberations of last year's strong demand recovery and a continued rebalancing of demand toward services such as travel (Figure 1.8) have driven up inflation. Although futures prices have fallen, the delayed pass-through of past increases in food and energy prices from global commodity markets to consumer prices may continue to drive inflation yet higher in the short term.

Core goods exclude energy and food. Countries are aggregated using purchasing-power-parity weights. Advanced economies comprise Australia, Canada, the euro area, Japan, Korea, and the United States. Emerging markets comprise Brazil, Chile, Colombia, Indonesia, Malaysia, Mexico, Russia, and South

In Europe, a significant impact from war-related energy shocks compounds these effects, whereas in Asia, a more moderate impact on food prices is helping to keep inflation from rising as much as elsewhere (Figure 1.9). An important recent development is that although volatile headline shocks to items such as energy and food prices still account for much of inflation, they are no longer the overwhelmingly dominant drivers.

Growth Forecast for Emerging Market and Developing Economies

In emerging and developing Asia, growth is projected to decline from 7.2 percent in 2021 to 4.4 percent in 2022 before rising to 4.9 percent in 2023, with a 0.2 percentage point and 0.1 percentage point downgrade since July for 2022 and 2023, respectively.

In emerging and developing Europe, growth is projected at 0.0 percent in 2022 and 0.6 percent in 2023, with a 1.4 percentage point upgrade for 2022 and a 0.3 percentage point downgrade for 2023, compared with the July forecast.

Growth in Latin America and the Caribbean is forecast at 3.5 percent in 2022 and 1.7 percent in 2023. Growth for 2022 is higher by 0.5 percentage point than projected in July, reflecting stronger-than-expected activity in the first half of 2022 on the back of favorable commodity prices, still-favorable external financing conditions, and the normalization of activities in contact-intensive sectors.

Growth in the Middle East and Central Asia is projected to increase to 5.0 percent in 2022, largely reflecting a favorable outlook for the region's oil exporters and an unexpectedly mild impact of the war in Ukraine on the Caucasus and Central Asia. In 2023 growth in the region is set to moderate to 3.6 percent as oil prices decline and the headwinds from the global slowdown and the war in Ukraine take hold.

In sub-Saharan Africa, the growth outlook is slightly weaker than predicted in July, with a decline from 4.7 percent in 2021 to 3.6 percent and 3.7 percent in 2022 and 2023, respectively—downward revisions of 0.2 percentage point and 0.3 percentage point, respectively. This weaker outlook reflects lower trading partner growth, tighter financial and monetary conditions, and a negative shift in the commodity terms of trade.

INDIAN ECONOMY OVERVIEW

Introduction

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritize lowering inequality while also launching growth-oriented policies to boost the economy.

Some of the important recent developments in the Indian economy are as follows:

- i. As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.
- j. Private equity-venture capital (PE-VC) sector investments stood at US\$ 34.1 billion, up 28% YoY, across 711 deals through January-June 2022.

- o. In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion)
- p. Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India.

Some of the recent initiatives and developments undertaken by the Government are listed below:

The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at Rs. 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- i) Under PM GatiShakti Master Plan, the National Highway Network will develop 25,000 km of new highways network, which will be worth Rs. 20,000 crore (US\$ 2.67 billion). In 2022-23. - n) The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated.

Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times.

According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

INDIAN MARKET OVERVIEW

India Micro Irrigation Systems Market is projected to grow at a CAGR of 10.9% during the forecast period (2020 - 2027).

- The Indian farmers have been increasingly encouraged to adopt micro-irrigation systems on open fields for efficient water usage and an increase in agricultural yield. The area under open filed micro-irrigation is higher than in greenhouses in the country. Most of the greenhouses equipped with micro-irrigation in the country are used for horticultural production with more farmers inclining towards greenhouse cultivation owing to benefits such as year-round production.
- The drip irrigation system dominated the market in 2021, owing to higher subsidies offered by the central and state government in various states. Key Market Trends

Increase in Greenhouse Cultivation is Driving the Market

In recent years, the cultivation of flowers and vegetables has emerged as a major alternative to overcome yield issues, and as greenhouses ensure year-round production, farmers are showing greater interest in it. The greenhouses in the country are, mostly, equipped with micro-irrigation systems., and under the greenhouse segment, drip irrigation is the most dominant micro-irrigation system. Major crops cultivated under greenhouses are leafy vegetables, capsicum, flowers, and tomatoes. Many state governments in the country are granting subsidies for the construction of greenhouses. Thus, increasing intervention of several state governments by providing subsidies, coupled with rising product innovation of major players is anticipated to drive the market further.

Maharashtra is Dominating the Market

The Maharashtra government urged the Centre to allocate more funds under the Pradhan Mantri Krishi Sinchai Yojana (PMKSY) to bring at least 50% of agricultural land under micro irrigation over the next five years. It also urged the Centre to promote micro irrigation to crops beyond high, water-intensive sugarcane and bananas under the ‘More Crop Per Drop’ scheme. The financial burden under micro irrigation is shared by the Centre and state in a ratio of 60:40 for 2019-2020. For instance, the proposed expenditure for micro irrigation in Maharashtra is INR 653.33 crore, of which the Centre’s share is INR 400 crore and the state’s INR 253.33 crore. Farmers are provided subsidies for the installation of drip irrigation sets and sprinklers in their fields. In terms of acreage, the physical achievement of the state was more under a drip irrigation system. For instance, the acreage covered under the drip irrigation system in 2018 was 110,363 ha, whereas the area covered under sprinkler was 49,595.54 ha.

Our Products

1. **Sprinkler Irrigation System:**

Sprinkler irrigation system allows application of water under high pressure with the help of a pump. It releases water similar to rainfall through a small diameter nozzle placed in the pipes. Water is distributed through a system of pipes, sprayed into air and irrigates in most of the soil type due to wide range of discharge capacity.

2. **MDPE Pipes (Medium Density Polyethylene Pipes) :**

We are the manufacturer of MDPE Pipes (Medium Density Polyethylene Pipes) in India, which are basically used for Gas Pipes & Fittings. MDPE pipe is a less denser version of HDPE pipes. MDPE pipes are used in both domestic and industrial establishments which require MDPE fittings for cold mains.

3. **Drip Irrigation System:**

Drip irrigation system delivers water to the crop using a network of mainlines, sub-mains and lateral lines with emission points spaced along their lengths. Each dripper/emitter, orifice supplies a measured, precisely controlled uniform application of water, nutrients, and other required growth substances directly into the root zone of the plant.

Water and nutrients enter the soil from the emitters, moving into the root zone of the plants through the combined forces of gravity and capillary. In this way, the plant's withdrawal of moisture and nutrients are replenished almost immediately, ensuring that the plant never suffers from water stress, thus enhancing quality, its ability to achieve optimum growth and high yield.

4. **Mini Sprinkler Irrigation System:**

Mini Sprinklers irrigation offers a complete line of sprinkler solutions for a wide range of crops. Mini sprinklers earned a reputation as the most reliable and durable sprinklers available with their outstanding distribution uniformity and large water passages. Mini sprinklers simplicity and modular design allows for easy accessory options making them adaptable to almost any application and crop.

5. HDPE Piping Systems:

HDPE pipe is a type of flexible plastic pipe used for fluid and gas transfer and is often used to replace ageing concrete or steel mains pipelines. Made from the thermoplastic HDPE (high-density polyethylene), its high level of impermeability and strong molecular bond make it suitable for high pressure pipelines. HDPE pipe is used across the globe for applications such as water mains, gas mains, sewer mains, slurry transfer lines, rural irrigation, fire system supply lines, electrical and communications conduit, and stormwater and drainage pipes.

6. Elastomeric U PVC Pipes:

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with Ind AS and other accounting principles generally accepted in India, including the applicable India Accounting Standard (IND AS) prescribed under section 133 of the Act, read with Companies (India Accounting Standards) Rules, 2015 as amended.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(I) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures,

and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during the audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

2.2 Classification of Assets and Liabilities

All the assets and liabilities are classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Ind-AS 1 notified under the Companies (Indian Accounting Standards) Rules, 2015. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, twelve months has been considered by the Company for the purpose of current/ non-current classification of assets and liabilities. However certain liabilities such as trade payables and some accruals for employee and other operating costs are part of the working capital used in the Company's normal operating cycle, accordingly classified as current liabilities even if they are due to be settled more than twelve months after the reporting period.

2.3 Accounting Estimates & Judgements and key sources of estimation uncertainty

Due to the nature of the Company's operations, critical accounting estimates and judgements principally relate to the:

- Tangible fixed assets (estimate useful life);
- Intangible fixed assets (estimate useful life)
- Impairment testing (if and when applicable)
- Provision inventories (obsolescence / lower net realizable value)
- Provision for doubtful debts
- Provision for employee's post-employment benefits (actuarial assumptions)

In preparing the financial statements in conformity with the accounting principles generally accepted in India, management is required to make estimates and assumptions that affect reported amounts of assets and liabilities and the disclosure of contingent liabilities as at the date of the financial statements and the amounts of revenue and expenses during the reported period. Actual results could differ from those estimates. Any revision to such estimates is recognised in the period in which the same is determined.

The management of the Company makes assumptions about the estimated useful lives, depreciation methods or residual values of items of property, plant and equipment, based on past experience and information currently available. In addition, the management assesses annually whether any indication of impairment of intangible assets and tangible assets. The management of the Company believe that on balance sheet date no impairment indications were existing.

The management of the Company believe that the inventory balances on hand could be sold to the third parties at the disclosed value taking into consideration the condition of inventories held and current conditions in the market.

Furthermore, the management believe that the net carrying amount of trade receivables is recoverable based on their past experience in the market and their assessment of the credit worthiness of debtors at 31st March 2021.

The outbreak of Coronavirus (COVID-19) pandemic globally and in India is causing significant disturbance and slowdown of economic activity. In many countries, businesses are being forced to cease or limit their operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. COVID-19 is significantly impacting business operation of the companies, by way of interruption in production, supply chain disruption, unavailability of personnel, closure/lockdown of production facilities etc. On 24th March, 2020, the Government of India ordered a nationwide lockdown for 21 days which further got extended till 3rd May, 2020 to prevent community spread of COVID-19 in India resulting in significant reduction in economic activities. In assessing the recoverability of Company's assets such as Investments, Loans, Intangible assets, Trade receivable etc. the Company has considered internal and external information. The Company's has done analysis of the assumptions used basis the internal and external information/indicators of future economic conditions, the Company's expects to recover the carrying amount of the assets.

2.4 Operating Segments

Company operates in only one reportable operating segment of manufacturing of irrigation products, in accordance with the Ind AS 108 (Operating Segments).

2.5 Inventories

Inventories are measured at lower of cost or net realisable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overheads incurred in bringing them to their respective present location and condition. Cost of raw materials, stores, packing materials are determined on FIFO basis. Finished Goods & Work in progress are valued at lower of cost and net realisable value. Non usable wastes are valued at net realizable value.

2.6 Property, Plant and Equipment

Land, buildings, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes are stated at historical cost or deemed cost less accumulated depreciation (except Land) and any accumulated impairment losses. Cost comprises of purchase price and any directly attributable cost of bringing the assets to its working condition for its intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred. Capital work-in-progress includes cost of property, plant & equipment under installation/under development as at the balance sheet date.

2.7 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at historical cost. Intangibles assets have a finite life and are subsequently carried at cost less any accumulated amortization and accumulated impairment losses if any.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization expense on intangible assets with finite lives is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit or loss when the asset is derecognized.

Amortization methods and estimated useful lives:
Software - 4-6 Years

2.8 Impairment of Assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.9 Depreciation

Depreciation is provided on a pro-rata basis on the written down value method over the estimated useful lives of asset Land and capital work in progress are not depreciated. The estimated useful lives considered for providing depreciation on other substantial assets are as follows:

Factory Buildings – 30 Years Non
Factory Buildings- 60 Years
Plant and Machinery – 10-15 Years
Furniture and Fixtures- 10 Years Office
Equipment- 5 Years
Computers- 3 Years
Vehicles- 6-8 Years

The asset's useful lives and methods of depreciation are reviewed at the end of each reporting period and adjusted prospectively, if appropriate.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing net disposal proceeds with carrying amount of the asset.

These are included in profit or loss within other income. Assets costing less than or equal to Rs. 5,000 are fully depreciated pro-rata from date of acquisition

2.10 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

a) Initial recognition and measurement:

All financial assets are recognized initially at fair value and, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

b) Subsequent measurement:

For purposes of subsequent measurement financial assets are classified in two broad categories: Financial assets at fair value Financial assets at amortized cost.

c) Classification:

The Company classifies financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of its business model for managing the financial assets and the contractual cash flows characteristics of the financial asset.

d) Financial assets measured at amortized cost:

Financial assets are measured at amortized cost when asset is held within a business model, whose objective is to hold assets for collecting contractual cash flows and contractual terms of the asset give rise on specified dates to cash flows that are solely for payments of principal and interest. Such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. The losses arising from impairment are recognized in the Statement of profit and loss. This category generally applies to trade and other receivables.

e) Financial assets measured at fair value through other comprehensive income (FVTOCI):

Financial assets under this category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income.

f) Financial assets measured at fair value through profit or loss (FVTPL):

Financial assets under this category are measured initially as well as at each reporting date at fair value with all changes recognized in profit or loss.

g) Derecognition of Financial assets:

A financial asset is primarily derecognized when the rights to receive cash flows from the asset have expired or

the Company has transferred its rights to receive cash flows from the asset, if an entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it shall recognize either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation shall be recognized at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset shall be recognized for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

h) Impairment of Financial assets:

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the financial assets that are debt instruments and trade receivables. For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition.

Financial Liabilities

(a) Initial recognition and measurement:

All financial liabilities are recognized initially at fair value and, in the case of loans, borrowings and payables, net of directly attributable transaction costs. Financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

(b) Classification & Subsequent measurement:

If a financial instrument that was previously recognized as a financial asset is measured at fair value through profit or loss and its fair value decreases below zero, it is a financial liability measured in accordance with IND AS. Financial liabilities are classified as held for trading, if they are incurred for the purpose of repurchasing in the near term.

The Company classifies all financial liabilities as subsequently measured at amortized cost, except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

(c) Financial liabilities measured at fair value through profit or loss:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading. At initial recognition, such financial liabilities are recognized at fair value. Financial liabilities at fair value through profit or loss are, at each reporting date, measured at fair value with all the changes recognized in the Statement of Profit and Loss.

(d) Derecognition of Financial Liabilities:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

Offsetting financial instruments:

2.13 Provisions

Provisions are recognised when the company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Provisions in the nature of long term are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

	<p>Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period.</p> <p>Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.</p> <p>Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.</p> <p>There are no transfers between level 1 and level 2 during the year</p>
(b)	Valuation technique used to determine fair value
	<p>Specific valuation techniques used to value financial instruments include:</p> <ul style="list-style-type: none"> - the use of quoted market prices or dealer quotes for similar instruments - the fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date - the fair value of the remaining financial instruments is determined using discounted cash flow analysis. <p>All of the resulting fair value estimates are included in level 2 or level 3, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.</p>
(c)	Fair value estimation
	<p>Estimated fair value disclosures of financial instruments are made in accordance with the requirements of Ind AS 107 "Financial Instruments: Disclosure". Fair value is defined as the amount at which the instrument could be exchanged in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in forced or liquidation sale. As no readily available market exists for a large part of the Company's financial instruments, judgment is necessary in arriving at fair value, based on current economic conditions and specific risks attributable to the instrument. The estimates presented herein are not necessarily indicative of the amounts the Company could realize in a market exchange from the sale of its full holdings of a particular instrument.</p> <p>The following summarizes the major methods and assumptions used in estimating the fair values of financial instruments.</p>
	Interest-bearing borrowings
	<p>Fair value is calculated based on discounted expected future principal and interest cash flows. The carrying amount of the Company's loans due after one year is also considered as reasonable estimate of their fair values as the nominal interest rates on the loans due after one year are variable and considered to be a reasonable approximation of the fair market rate with reference to loans with similar credit risk level and maturity period at the reporting date.</p>
	Trade and other receivables / payables
	<p>Receivables / payables typically have a remaining life of less than one year and receivables are adjusted for impairment losses. Therefore, the carrying amounts for these assets and liabilities are deemed to approximate their fair values, as the allowance for estimated irrecoverable amounts is considered a reasonable estimate of the discount required to reflect the impact of credit risk.</p>

	<p>Other long term receivables</p> <p>These receivables are regularly reviewed and adjusted for impairment losses. Therefore, management considers the carrying amount of these receivables to approximate fair value.</p>
(d)	<p>Valuation process</p> <p>The accounts & finance department of the Company includes a team that performs the valuations of financial assets and liabilities required for financial reporting purposes, including level 3 fair values. This team reports directly to the chief financial officer (CFO) and the audit committee (AC).</p> <p>Discussions of valuation processes and results are held between the CFO, AC and the valuation team at least once every three months, in line with the Company's quarterly reporting periods.</p> <p>The main level 3 inputs for unlisted equity securities, contingent considerations and indemnification assets used by the Company are derived and evaluated as follows:</p> <ul style="list-style-type: none"> Discount rates are determined using a capital asset pricing model to calculate a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the asset. Risk adjustments specific to the counterparties (including assumptions about credit default rates) are derived from credit risk grading determined by the Company's internal credit risk management group. Earnings growth factor for unlisted equity securities are estimated based on market information for similar types of companies. <p>Changes in level 2 and 3 fair values are analyzed at the end of each reporting period during the quarterly valuation discussion between the CFO, AC and the valuation team. As part of this discussion the team presents a report that explains the reason for the fair value movements.</p>
34.	<p>Financial risk management</p>
(a)	<p>Risk management framework</p> <p>In the ordinary course of business, the Company is exposed to a different extent to a variety of financial risks: foreign currency risk, interest rate risk, liquidity risk, price risk and credit risk. In order to minimize any adverse effects on the financial performance of the Company, derivative financial instruments, such as foreign exchange forward contracts, foreign currency option contracts are entered to hedge certain foreign currency risk exposures. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.</p> <p>This note explains the sources of risk which the entity is exposed to and how the entity manages the risk.</p>
(b)	<p>Credit risk</p> <p>Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investments in financial instruments.</p> <p>The carrying amount of financial assets represents the maximum credit exposure. The Company monitors credit risk very closely both in domestic and export market. The Management impact analysis shows credit risk and impact assessment as low.</p> <p>Trade and other receivables</p> <p>Credit risk is the risk that a customer may default or not meet its obligations to the company on a timely basis, leading to financial losses by the Company. The management has an advance collection /credit policy criteria in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. Before accepting a new customer, the Company uses an internal credit system to assess the potential customer's credit quality and defines credit limits separately for each individual customer. The gross carrying amount of trade receivables as at 31st March 2020 aggregates Rs 2487.87 lacs (Previous year ended 31st March 2019 Rs 2955.03 Lacs). The Company reviews for any required allowance for impairment that represents its expected credit losses in respect of trade receivables.</p>

	Investments are reviewed for any fair valuation loss on periodically basis and necessary provision/fair valuation adjustments has been made based on the valuation carried by the management to the extent available sources, the management does not expect any investment counterparty to fail to meet its obligations.
(c) Liquidity Risk	
	Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are fallen due. The Company's liquidity position is carefully monitored and managed. The Company has in place a detailed budgeting and cash forecasting process to help ensure that it has adequate cash available to meet its payment obligations.
	Further, the Company continues to maintain enough liquidity buffer to meet additional demands that may emerge on account of COVID-19 crisis.
	The following table provides details of the remaining contractual maturity of the Company's financial Liabilities. It has been drawn up based on the undiscounted cash flows and the earliest date on which the Company can be required to pay. The table includes only principal cash flows.

(d) Market risk

Note 40: Employee benefit plan

A) Defined Contribution Plans

The Company has a defined contribution plan in respect of provident fund. Contributions are made to provident fund in India for employees at the rate of 12% of basic salary as per regulations. The contributions are made to registered provident fund administered by the Government. The obligation of the group is limited to the amount contributed and it has no further contractual nor any constructive obligation.

During the year, the Company has recognized the following amounts towards defined contribution plan in the Statement of Profit and loss-

Included in 'Contribution to provident and other funds' under Employee Benefits Expense (Refer Note 27)

(B) Defined Benefit Plans

(a) Description of the employee Benefit Plan

The company has an obligation towards gratuity, unfunded defined benefit retirement plan covering eligible employees. The plan provides for lump sum payment to vested employees at retirement, death while in employment or on termination of the employment of an amount equivalent to 15 days/ one month salary, as applicable, payable for each completed year of service or part thereof in excess of six months in terms of Gratuity scheme of the company or as per payment of Gratuity Act, whichever is higher. Vesting occurs upon completion of five years of service

(b) Risk exposure

Investment Risk

The present value of the defined benefit plan liability (denominated in Indian Rupee) is calculated using a discount risk which is determined by reference to market yields at the end of the reporting period on government bonds. Currently, for the plan in India, it has relatively balanced mix of investments in Insurance related products.

Interest Rate Risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt.

Longevity Risk

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability

Salary Risk

The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

No other post-retirement benefits are provided to the employees.

In respect of the plan in India, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as at March 31,2022 by an actuary.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the “Department of Industrial Policy and Promotion”) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e. any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue. Our Company will not be responsible for any allotments made by relying on such approvals.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“**OCBs**”) have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
