BUSINESS PERSPECTIVE:

The India Metal Packaging Market is expected to register a CAGR of 6.52% over the forecast period, our Company have accomplished more than the expected growth which is 8 %. Increased urbanization is one of the significant reasons that are prompting Companies to increase metal cans and container production capacity. Moreover, the penetration of organized retail is also compelling market players to ramp up their capacity.

The metal cans industry in India is coming up with some interesting and captivating packaging concepts. However, the key component is the sustainability and recyclability of the packaging material. There are contemplations of a major role of metal packaging, including metal cans and containers, in the future, as it is manufactured out of sustainable material - tinplate or tin-free steel, and follows the principles of reduce-reuse-recycle.

The Global Packaging Market is expected to register a CAGR of 3.94% during the forecast period of 2022-2027. The global packaging business has experienced consistent growth over the last decade due to substrate choice changes, expansion of new markets, and changing ownership dynamics. Traditional packaging may continue to be replaced by flexible packaging, high-barrier films, and stand-up retort pouches may challenge rigid pack formats like metal tins and glass jars for a wide range of food products.

The highlights of the industry trend, the outlook and the opportunities ahead for the Company are exhibited in detail in the **Management Discussion and Analysis Report**.

ANNEXURE – 7 TO THE BOARD'S REPORT

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Your Directors have pleasure in presenting the Management Discussion and Analysis Report for the year ended on March 31, 2023.

ECONOMY, INDUSTRY STRUCTURE AND DEVELOPMENTS IN FOOD CANS AND BATTERY SEGMENTS:

GLOBAL ECONOMIC OVERVIEW:

Global economy is projected to grow by 2.3 per cent in 2023 (+0.4 percentage points from the January forecast) and 2.5 per cent in 2024 (-0.2 percentage points), a slight uptick in the global growth forecast for 2023. A sombre picture still remains despite this uptick, the growth rate is still well below the average growth rate in the two decades before the pandemic of 3.1 per cent. For many developing countries, growth prospects have deteriorated amid tightening credit conditions and rising costs of external financing. The least developed countries are forecast to grow by 4.1 per cent in 2023 and 5.2 per cent in 2024, far below the 7 per cent growth target set in the 2030 Agenda for Sustainable Development. Global trade remains under pressure due to geopolitical tensions, weakening global demand and tighter monetary and fiscal policies. The volume of global trade in goods and services is forecast to grow by 2.3 per cent in 2023, well below the pre-pandemic trend.

The global metal cans market estimated at USD 65,369.8 million in 2022 and is expected to expand at a compounded annual growth rate (CAGR) of 6.2% from 2022 to 2030. The increasing use of metal cans for packaging food & beverage products including fruits, vegetables, soups, baby foods, poultry, carbonated soft drinks (CSD), alcoholic beverages, juices, and liquid dairy products driving the market. The benefits associated with metal packaging include reusability, recyclability, durability, as well as appearance.

The increasing consumption of packaged and processed food & beverages is the primary factor supporting the market growth. Continuously developing packaging technologies by the major players across the globe is also one of the major factors driving the metal cans' market. Additionally, developing infrastructure for the recycling of discarded metal packaging products is further bolstering the demand for metal cans across the globe.

INDIAN ECONOMIC OVERVIEW:

The United Nations has projected India's growth to decelerate to 6 per cent in 2023 from 6.6 percent in 2022. According to the UN Trade and Development Conference (UNCTAD) the global growth in 2023 is to drop to 2.1%, compared to the 2.2% projected in September 2022, assuming the financial fallout from higher interest rates is contained to the bank runs and bailouts of the first quarter.

For India, the positive effect of high public and private investment and consumption as well as rising exports was partly offset by higher energy import bills, which deepened the current account deficit and ate up reserves. The Reserve Bank of India has started tightening its policy stance during the spring of 2022 to limit damage caused by foreign capital outflows, a weakening currency and inflation risks. Higher financing cost slightly dented buoyant economic activity, and over-leveraging in the corporate sector may become a factor of financial instability. In view of financing its growth ambitions, the Indian Government has committed to massive infrastructure investment. In 2020 and 2021 and in the energy sector alone, funds amounting to USD 160 billion had been committed to fossil and non-fossil projects alike, the report noted.

The Minister of State for Steel and Rural Development address that Metal sector can play major role toward self-reliant India and US \$ 5 Trillion Economy by 2024-25. As per ASSOCHAM the current outlook and future trends of Metal Industry has growth due to its multiple benefits in almost all walks of life. India consumption of steel and other metals in infrastructure and construction sector accounts for largest share over 65% and the balance is accounted for the sectors such as engineering, packaging and automotive which are displaying admirable increase in metal application year after year.

INDUSTRY STRUCTURE AND DEVELOPMENTS:

The India Metal Packaging Market is expected to register a CAGR of 6.52% over the forecast period. Increased urbanization is one of the significant reasons that are prompting Companies to increase metal cans and container

production capacity. Moreover, the penetration of organized retail is also compelling market players to ramp up their capacity.

The Indian metal packaging market is quite competitive. It is moderately fragmented and consists of significant individual players, such as Ball India (Ball Corporation), Oricon Enterprises Limited, Casablanca Industries Pvt Ltd, and Hindustan Tin Works Ltd. Many Companies are increasing their market presence by expanding their operations or entering into strategic mergers and acquisitions.

On February 2022, Food Safety and Standards Authority of India paved the way for packaging drinking water in non-transparent packaging solutions like aluminum beverage cans. Ball Corporation welcomed the move as it will help the Company address the issues on the sustainability front and contribute to the Government's initiative to regulate single-use plastics and provide the end consumer with an eco-friendly alternative.

OPPORTUNITIES, RISKS, THREATS AND CONCERNS:

The government of India is taking initiatives to lower the prices of raw materials and increase domestic availability. For instance, in May 2022, the Government of India waived customs duty on importing some raw materials, including ferronickel and coking coal, used by the steel industry, a development which will lower the cost for the domestic industry and reduce the prices. In addition, the duty on iron ore exports increased up to 50%, and on a few steel intermediaries to 15%. Developments like these that are undertaken by private and government organizations are drivers for metal packaging, such as metal cans and containers in India.

The change in customers' tastes and preferences in whitewashing their houses and painting their walls with different colors is propelling the demand for paints containers in a smaller size to reduce wastage and save cost. These paints come in small metal containers, providing easy handling and transportation. Additionally, the growing construction industry in India will propel the demand for paint and coating in the commercial and residential sectors. For instance, according to the Ministry of Statistics and Programme Implementation (MoSPI), India's construction industry accounted for INR 3.38 trillion in the second quarter of 2022 compared to INR 2.67 trillion in the first quarter of 2022. All this is expected to support the demand for metal cans in the forecast timeframe.

Despite the immense opportunity, the industry in India is going through one of its toughest times now. The major issue is the mandatory imposition of the BIS standard — vide steel and steel products QCO dated July 17, 2020 - issued by the Ministry of Steel.

The quality control order has mandated use of only BIS certified material like tinplate/tin-free steel for tin cans and also imposed condition of use of BIS material for manufacture of various imported components steel products like easy-open ends, peel-off ends, etc., which the industry imports from various countries in different sizes and specifications as they are virtually not manufactured in the country.

There are many reasons for the resistance of the metal packaging industry to the imposition of BIS. The QCO has been issued at a time when the entire industry is already stressed, trying to retune the business owing to the pandemic. Besides, it is practically impossible to force the international suppliers to go for BIS certifications as the process for getting BIS licence is quite cumbersome and costly.

From the perspective of international suppliers of tin plates, India is fairly a small market so they are not very keen to get into lengthy bureaucratic and cost intensive BIS certification procedures. As a result, the foreign suppliers have halted shipping tin plates to India and this has led to acute shortage in the domestic market.

OUTLOOK AND CHALLENGES:

The market is already favouring the industry in terms of demand, but now much is dependent on government policies. As soon as they become favourable, the Indian metal packaging industry will have a promising future ahead. By withdrawing the mandatory certification, the foreign suppliers will restart shipping tin plates to India; there is a huge shortage in the domestic market now. Furthermore, to make the environment more conducive and in order to promote localisation of steel products, the government should provide soft loans, payable over more than 10 years, for the packaging industry. Also, since metal packaging is 100 per cent recyclable, environment-friendly and a sustainable packaging material, the government should introduce a scheme that incentivises the user industry to make use of such packaging material.

Moreover the exorbitant price increase in tinplate, consequently cans, may compel the existing customers to move away from metal packaging to other alternative packaging options, especially in the food, beverage and paint

sectors. The industry which is mainly concentrated in the MSME sector will not be able to survive the hefty price increase of tinplate, loss of business to alternative packaging materials and an upsurge in working capital requirements.

The industry imports both prime and non-prime materials for manufacture of tin containers/various products for food and non-food segments. The industry is able to use non-prime material for manufacture of tin containers for non-edible products like paints, chemicals, etc., and various other products like stationery items, lanterns, etc. Non-prime materials are commercially cheaper and can be conveniently used in India where availability of labour is comparatively cost efficient and the cans/products are manufactured either manually or in a semi-automatic process. In case of imposition of BIS, such non-prime material will not be available to the metal packaging units in the MSME sector. It means that they will have to depend on the prime material which is around 35 per cent more expensive than the non-prime material and which is already in short-supply.

SEGMENTWISE PERFORMANCE:

The Company products constitute metal packaging and hence there is no separate disclosure on segment reporting.

ANNEXURE “A” TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of SHETRON LIMITED of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **SHETRON LIMITED** (“the Company”) as of March 31, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The date of transition to Ind AS is 1st April, 2017. Details of the exceptions and optional exemptions availed by the Company and principal adjustments along with related reconciliations are detailed in Note 36 Annexure

Basis of Preparation

The financial statements are prepared in accordance with the historical cost convention, except for certain items that are measured at fair values, as explained in the accounting policies.

Fair Value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102 - Share-based Payment, leasing transactions that are within the scope of Ind AS 116 - Leases, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 - Inventories or value in use in Ind AS 36 - Impairment of Assets.

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period; they are recognized in the period of the revision and future periods if the revision affects both current and future periods.

Operating Cycle

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1 - Presentation of Financial Statements based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

Property, Plant and Equipment - Tangible Assets

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and impairment, if any. For this purpose, cost includes deemed cost which represents the carrying value of property, plant and equipment recognized as at 1st April, 2016 measured as per the previous GAAP Cost is inclusive of inward freight, duties and taxes and incidental expenses related to acquisition.

In respect of major projects involving construction, related pre-operational expenses form part of the value of assets capitalized. Expenses capitalized also include applicable borrowing costs for qualifying assets, if any. All up gradation / enhancements are charged off as revenue expenditure unless they bring similar significant additional benefits.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

Depreciation of these assets commences when the assets are ready for their intended use which is generally on commissioning. Items of property, plant and equipment are depreciated in a manner that amortizes the cost (or other amount substituted for cost) of the assets after commissioning, less its residual value, over their useful lives as specified in Schedule II of the Companies Act, 2013 on Straight Line method basis. Land is not depreciated.

Inventories

Inventories are stated at lower of cost and net realizable value. The cost is calculated on weighted average method. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its present location and condition and includes, where applicable, appropriate overheads based on normal level of activity. Net realizable value is the estimated selling price less estimated costs for completion and sale.

Obsolete, slow moving and defective inventories are identified from time to time and, where necessary, a provision is made for such inventories.

Foreign Currency Transactions

The functional and presentation currency of the Company is Indian Rupee.

Transactions in foreign currency are accounted for at the exchange rate prevailing on the transaction date. Gains/ losses arising on settlement as also on translation of monetary items are recognized in the Statement of Profit and Loss.

Financial instruments, Financial assets, Financial liabilities and Equity instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the relevant instrument and are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit or loss) are added to or deducted from the fair value on initial recognition of financial assets or financial liabilities. Purchase or sale of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date when the Company commits to purchase or sell the asset.

Financial Assets

Recognition: Financial assets include Investments, Trade receivables, Advances, Security Deposits, Cash and cash equivalents. Such assets are initially recognized at transaction price when the Company becomes party to contractual obligations. The transaction price includes transaction costs unless the asset is being fair valued through the Statement of Profit and Loss.

Classification : Management determines the classification of an asset at initial recognition depending on the purpose for which the assets were acquired. The subsequent measurement of financial assets depends on such classification.

Financial assets are classified as those measured at:

- (a) amortised cost, where the financial assets are held solely for collection of cash flows arising from payments of principal and/or interest.
- (b) fair value through other comprehensive income (FVTOCI), where the financial assets are held not only for collection of cash flows arising from payments of principal and interest but also from the sale of such assets. Such assets are subsequently measured at fair value, with unrealised gains and losses arising from changes in the fair value being recognized in other comprehensive income.
- (c) fair value through profit or loss (FVTPL), where the assets are managed in accordance with an approved investment strategy that triggers purchase and sale decisions based on the fair value of such assets. Such assets are subsequently measured at fair value, with unrealised gains and losses arising from changes in the fair value being recognized in the Statement of Profit and Loss in the period in which they arise.

Trade receivables, Advances, Security Deposits, Cash and cash equivalents etc. are classified for measurement at amortised cost while investments may fall under any of the aforesaid classes. However, in respect of particular investments in equity instruments that would otherwise be measured at fair value through profit or loss, an irrevocable election at initial recognition may be made to present subsequent changes in fair value through other comprehensive income.

Financial Liabilities

Borrowing, trade payables and other financial liabilities are initially recognized at the value of the respective contractual obligations. They are subsequently measured at amortized cost. Any discount or premium on redemption /settlement is recognized in the Statement of Profit and Loss as finance cost over the life of the liability using the effective interest method and adjusted to the liability figure disclosed in the Balance Sheet. Deferred Tax Liability and Unsecured Loans from related parties are subsequently measured at fair value through profit or loss

Financial liabilities are derecognized when the liability is extinguished, that is, when the contractual obligation is discharged, cancelled and on expiry.

Revenue

Revenue is measured at the fair value of the consideration received or receivable for goods supplied and services rendered, net of returns and discounts to customers. Revenue from the sale of goods includes excise and other duties

which the Company pays as a principal but excludes amounts collected on behalf of third parties, such as sales tax and value added tax.

Revenue from the sale of goods is recognized when significant risks and rewards of ownership have been transferred to the customer, which is mainly upon delivery, the amount of revenue can be measured reliably and recovery of the consideration is probable. Revenue from services is recognized in the periods in which the services are rendered.

In respect of employees who are members of constituted and approved trusts, the Company recognizes contribution payable to such trusts as an expense including any shortfall in interest between the amount of interest realized by the investment and the interest payable to members at the rate declared by the Government of India. In respect of other employees, provident funds are deposited with the Government and recognized as expense.

Service costs and net interest expense or income is reflected in the Statement of Profit and Loss. Gain or Loss on account of re-measurements are recognized immediately through other comprehensive income in the period in which they occur.

The employees of the Company are entitled to compensated leave for which the Company records the liability based on actuarial valuation computed using projected unit credit method. These benefits are unfunded.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the amounts used for taxation purposes (tax base), at the tax rates and tax laws enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognized for the future tax consequences to the extent it is probable that future taxable profits will be available against which the deductible temporary differences can be utilized.

Claims against the Company not acknowledged as debts are disclosed after a careful evaluation of the facts and legal aspects of the matter involved.

Provisions

Provisions are recognized when, as a result of a past event, the Company has a legal or constructive obligation; it is probable that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated. The amount so recognized is a best estimate of the consideration required to settle the obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation.

In an event when the time value of money is material, the provision is carried at the present value of the cash flows estimated to settle the obligation.
