## **Varroc's Kham River CSR Project Named one of Top 5 Contender for World Resources Institute Ross Center Prize for Cities**

**Pune, 23 May 2024:** Varroc is proud to announce that its Corporate Social Responsibility (CSR) initiative, the Kham River Revitalization Project, has been selected as one of the top five contenders for the prestigious World Resources Institute (WRI) Ross Center Prize for Cities. The company has been working towards the restoration of the Kham River in Aurangabad along with the Confederation of Indian Industry (CII), Aurangabad Municipal Corporation, EcoSattva Environmental Solutions, and Aurangabad Cantonment Board.

The WRI Ross Center Prize for Cities is a prestigious award that recognizes innovative ideas, visionary leaders, and transformative projects creating more sustainable and inclusive cities worldwide. This significant recognition highlights Varroc's commitment to sustainable urban transformation and its impactful work in environmental conservation and community development.

**Speaking on the achievement, Mr. Tarang Jain, Chairman and Managing Director, said,** "We are honored to be recognized by the World Resources Institute as one of the leading innovators in urban development. This acknowledgment is a testament to the hard work and vision we had for the Kham River project. This is not just a CSR initiative; it is where innovation meets community to drive positive impact. This acknowledgment reinforces our commitment to creating a sustainable future."

The Kham River, once a seasonal river, had deteriorated into a stream of waste due to sewer leakage and improper solid waste disposal. However, an initiative launched in 2016 has successfully restored and cleaned a 1.5 km stretch of the river. This project implemented several interventions, including the creation of community-centered riverfront parks, deep ecological restoration, socially integrated waste management, and a city-wide cultural campaign. The result has been a revitalized Kham River in Aurangabad, fostering a new cultural ethic around the ecosystem.
