Field Implementation

New Projects & Initiatives – Repayment via AePS

What it is?

Aadhaar Enabled Payment System (AePS) is a bank led payment method which can facilitate financial transactions at POS (Point of Sales) through Aadhaar authentication. Presently, we have deployed the same at 250+ branches via 1400+ devices

Safety

One of the safest methods for clients among digital transaction. It will also eliminate the risk of cash from operations, resulting in robbery, frauds etc.

Cost Efficient & Productive

It will save the time and cost involved in cash collection and depositing in the bank. Hence, the reconciliation will be faster. Also, the loan officer will devote more time to business generation, with reduced centre meeting time.

Overcoming Challenges

Biometrics not mapped at client's bank account: Clients are being made aware to get the Aadhaar mapped on their bank accounts or update the KYC details

Maintaining sufficient funds in account: Clients are being encouraged to keep the instalments ready in their bank accounts. Process is being evaluated for other possible challenges while scaling up
