

Dated, 28th August, 2018
REF: ETL/BSE/CPQ1/18-19

The Corporate Relationship Department,
Bombay Stock Exchange Limited,
Floor 25, PJ Towers, Dalal Street, Mumbai – 400001.

Dear Sir,

Sub: Corporate Presentation

Pursuant to Regulation 30(2) of SEBI (LODR)-Regulation 2015, we submit herewith the Corporate Presentation on performance of the Company, released to Analysts and Institutional Investors.

The Presentation is also being uploaded on the website of the Company, www.easterntreads.com.

Kindly take the information on your record.

Thanking you,

Yours faithfully,

For Eastern Treads Limited

CS BAIJU T.
Company Secretary

Eastern Treads Ltd.

CIN : L25119KL1993PLC007213

Financial Performance

Q1FY19 Performance

₹ crore

Particulars	Q1FY19	Q1FY18	Y-o-Y Change (%)	Q4FY18	Q-o-Q Change (%)
Revenues from Operations	26.1	29.0	-10%	23.8	10%
Revenues (Net of Excise)	26.1	28.0	-7%	23.8	10%
Gross Profit	7.7	6.0	29%	8.1	-4%
EBITDA	1.3	-0.4	-	2.0	-33%
Profit After Tax	-0.05	-1.6	-	0.7	-

Highlights

- Revenues for Q1FY19 stood at 26.1 crore (net of Excise)
- Gross Profit improved by ~29% yoy
 - In Q1FY18, in the backdrop of GST implementation, the Company had augmented production by contract manufacturing for unorganized sector players, which was at much lower margins. As a result, gross profit (net of raw material cost) expanded significantly
- Now present across 17 states through 90 dealers servicing to 1500 plus multi branded retreaders, 40 exclusive retreaders and 35 branded Infinity Zones
- Key business drivers in FY19 – expanding franchisee network, higher business per franchisee, focus on key export markets

Chairman's Message

Commenting on Q1FY19 performance, Mr. Navas M Meeran – Chairman of Eastern Treads Ltd. said:

"We have started the year on a positive note, with volumes in our core focus area of pre-cured tread rubber expanding during Q1. In the same quarter last year, in the backdrop of GST implementation, we had augmented production by contract manufacturing for unorganized sector players, which was at much lower margins. As a result, our gross profit (net of raw material cost) has expanded significantly from 18% to 29% y-o-y. Even though we have invested in expanding the network and people infrastructure over the last year, operating profit was considerably higher.

Going forward, we see the transitioning business environment bearing strong growth visibility for quality-focused and client-centric players such as Eastern Treads, and we already see demand consolidation to organized and compliant companies. We have developed several customer segments – open market sales, franchisee network, road transport corporations and exports – and the aggregate demand augurs well for the longer term. We now have 40 exclusive retreaders nationwide and 35 branded Infinity Zones and our model allows deep customer engagement. Our recent foray into Nepal is another positive and we continue to scout for opportunities in other regions globally. However, the recent flood situation in Kerala has stopped production for a few days, although our facilities are not impacted. In addition, raw material shortages may lead to higher prices in the near term but we are well-placed to pass this on to customers. With growth visibility in the second half of the year, we expect higher volume of production driving margins with stronger contribution to emerge as a leading provider of high-quality retreading solutions to our customers."

Company Overview

Eastern Treads Ltd. (ETL)

Pioneers in Manufacturing and Marketing of Tread Rubber used for Retreading Tyres

- Over two decades of growing presence with strong customer focus
- ISO 9001-2015 certified production capacity of 12,000 tons per annum at Oonnukall, Kerala

Building Comprehensive Ecosystem across the Entire Retreading Value Chain

- Manufacturing quality tread rubber, cushion/bonding gum, black vulcanizing cement and tyre repair patches
- Creating access to high quality retreading equipment
- Providing skill enhancement/upgradation facilities within the supply chain

Extensive and Expanding Marketing Network

- Present across 17 states through 90 dealers servicing to 1,500 plus multi branded retreaders, 40 exclusive retreaders and 35 branded Infinity Zones
- 12 Company owned depots and 2 C&F's across the country for effective and aggressive servicing of all the above channels
- Company-operated, retreading experience outlets in Bengaluru and Chennai
- Working with Road Transport Corporations (RTC's) across six states

Positive Business Outlook

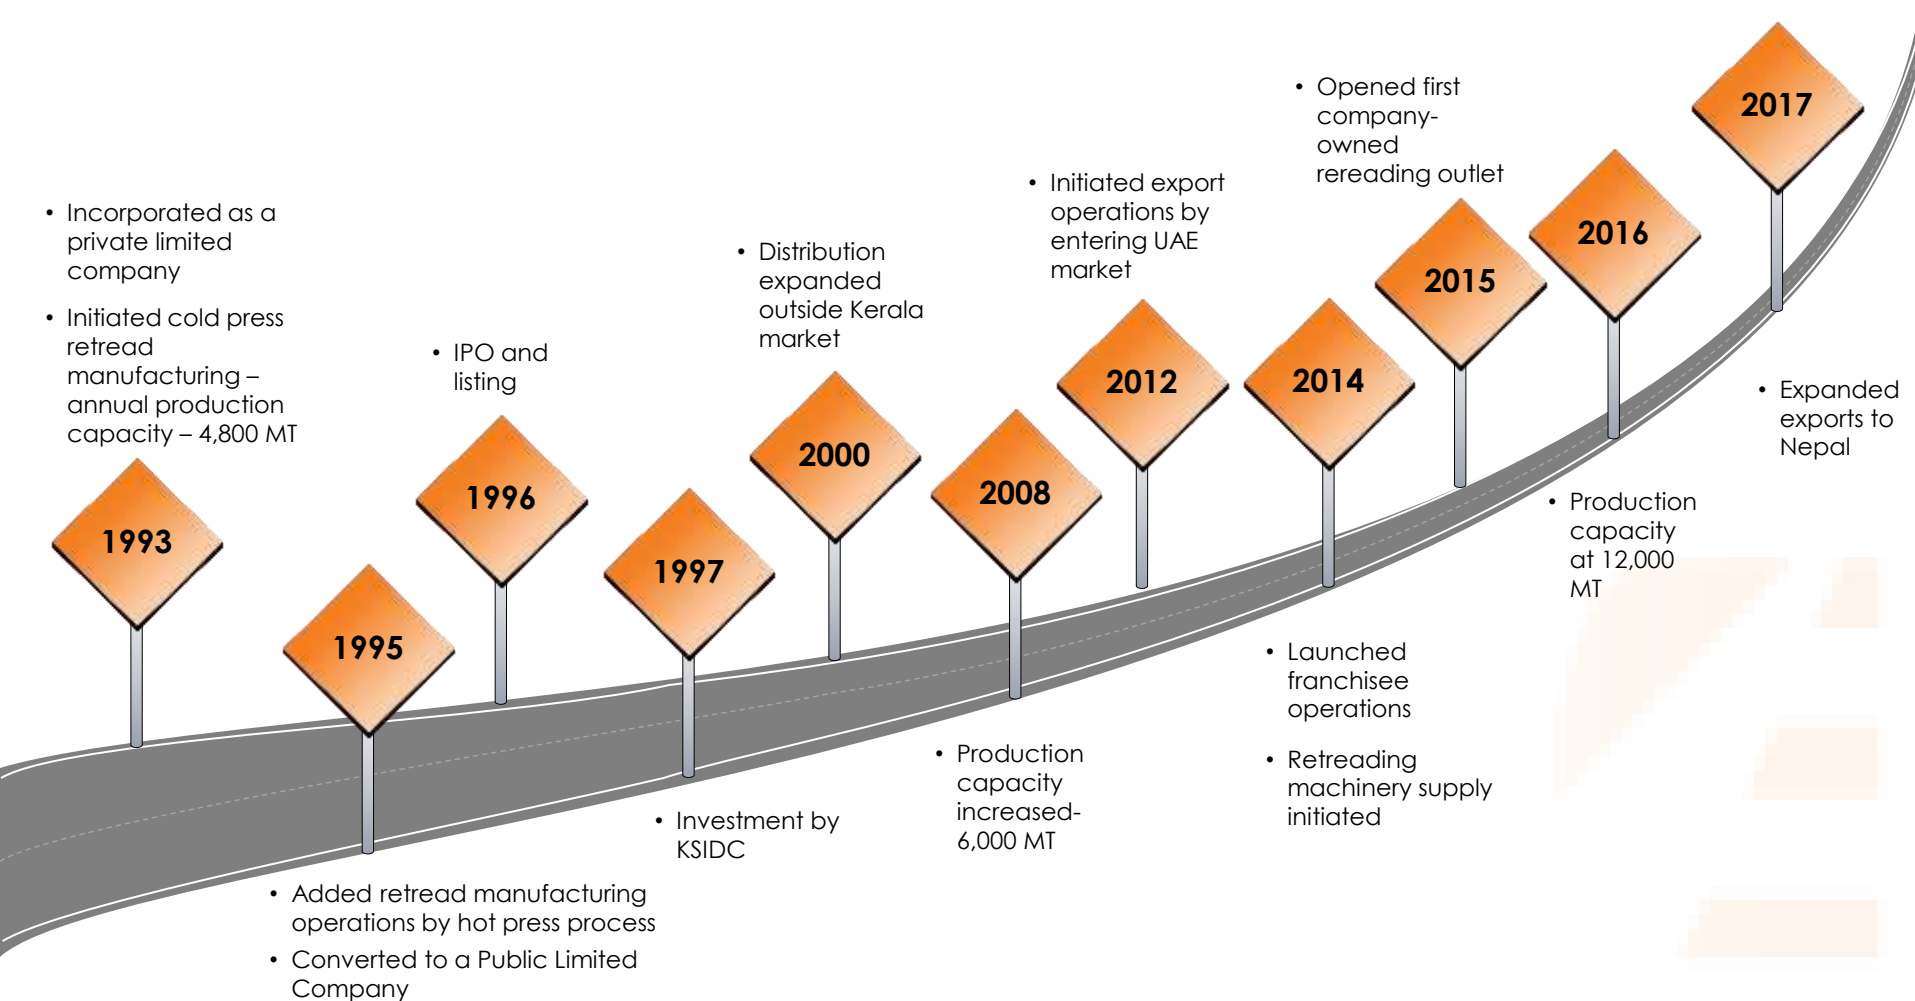

- Retreading is an established option for vehicle operators globally and becoming more mainstream in India
- Volume driven growth and value-enhancement initiatives have led to margin expansion
- Aggressive market development expected to result in medium to long term growth opportunities
- Availability of significant production capacities mean that limited capex is anticipated over next 2-3 years

Creating a Sustainable Ecosystem

- ETL is **transitioning from a tread rubber manufacturer** to a leading enabler of tyre retreading ecosystem in India.
- For retread partners, ETL enables access to **high quality tread rubber supply** and **world-class retreading equipment** with low capital deployment.
- Partner relationships are also supported by **customer/technical services** and **branding and marketing initiatives**.
- ETL is looking to create a structured system for training and **developing a sustainable workforce** for the retreading industry.
- Retreading is an established industry in key global markets. ETL is **creating comprehensive, industry leading capabilities** that would deliver long term opportunities in India and globally.

Milestones

Tyre Retreading Products

Precured Tread Rubber

- Guaranteed high mileage performance aiding reduction in operating cost
- Uniform tread wear providing good directional stability
- Consistency in quality & supply
- Product range from Auto to JCB
- Excellent grip for safety

Black Vulcanising Cement

- Ready to use solution
- Fast drying and excellent tack
- Specially formulated for both precured and conventional process
- Sufficient shelf life

Bonding Gum

- Made from 100% natural rubber
- Soft and superior tack, high bonding strength
- Compatible for 99°C, 125°C & 150°C curing operations
- Sufficient shelf life
- Can be used for splicing & nail hole/injury repair

Hot Rubber Slab & Camel Back Treads

- Both Slab & Camel Back type are available
- Good shelf life
- Available in customized sizes
- Available in different grades according to the application

Repair Patches

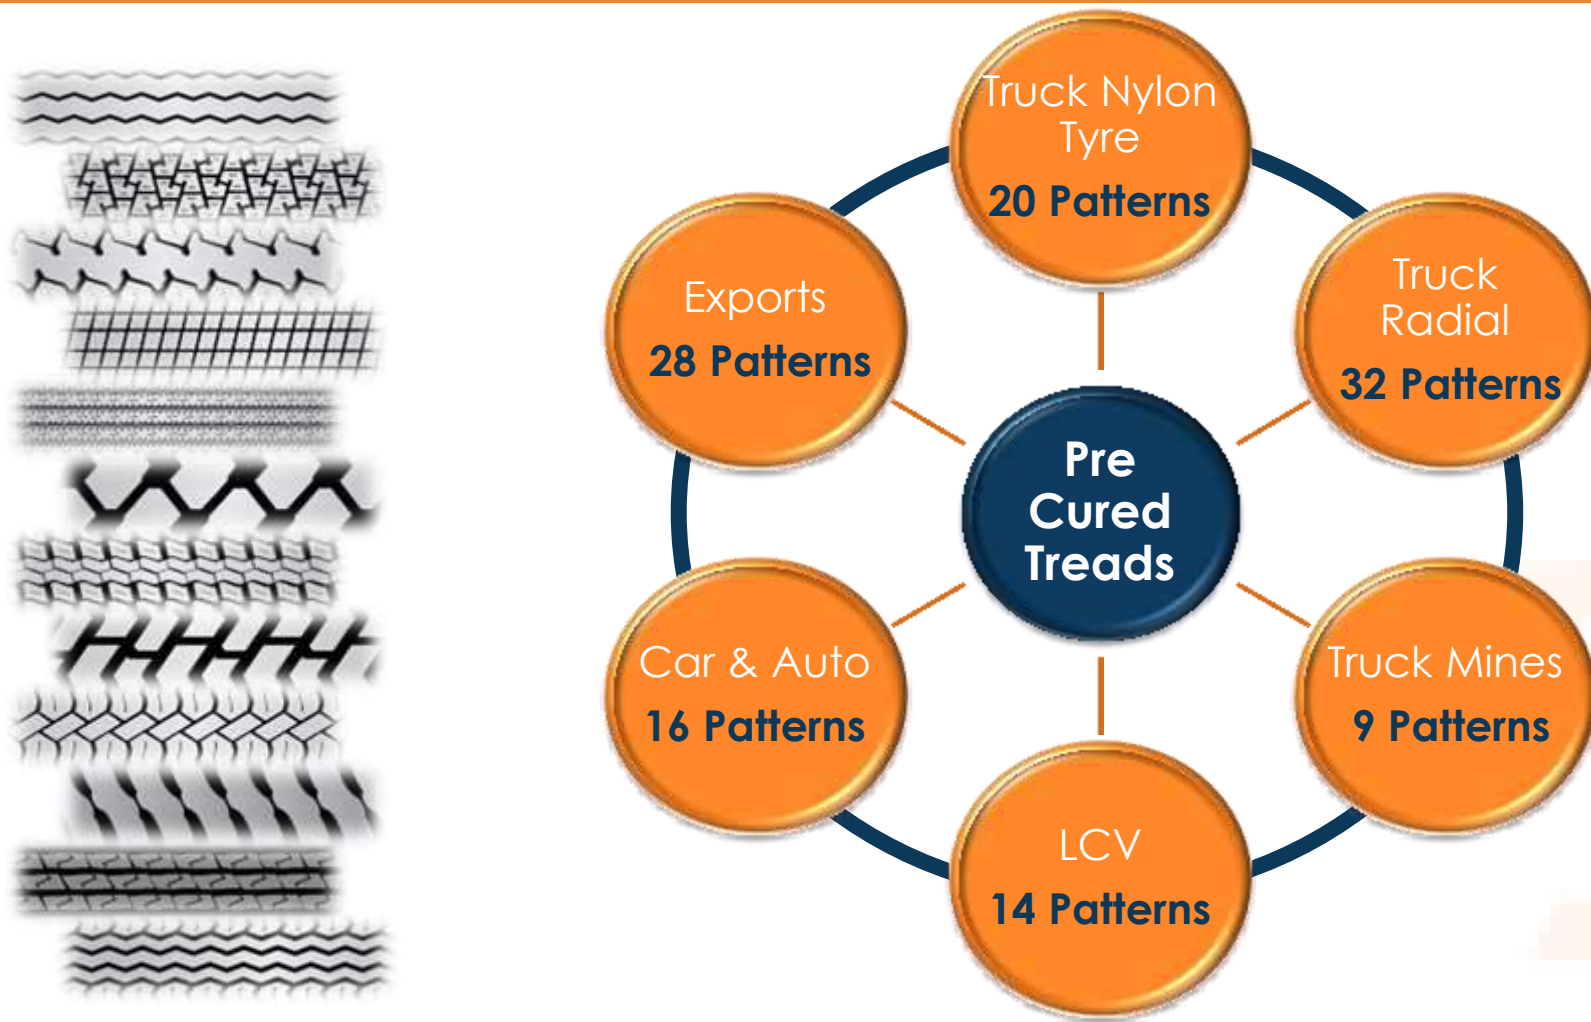

- Made from nylon fabric
- Applications available for nylon and radial tyres
- Wide range of patches for minor to major tyre injury repair
- Economic measure with safety

Production Facility

- Capacity 1,000 tons per month at Oonnukal, Kerala - Tread Rubber- 810 tons, Bonding gum- 85 tons and Black Vulcanizing Cement – 100 KL - Current utilization at ~50%
- Set up optimal manufacturing process driven by a technically proficient workforce and backed by extensive investments in R&D (having 12 member R&D team)
- Facility is on par with world standards having advanced technical hardware equipment

PreCured Treads – Extensive Product Portfolio

Distribution and Support Channels

Dealers

- **90** dealers servicing 1,500 plus multi branded retreaders across 17 states – this open market channel constitutes the traditional sales network that uses ETL's products in the retreading process on a non-exclusive basis.

Exclusive Retreaders

- **40** Exclusive Retreaders across 11 states – ETL provides a world class ecosystem for its exclusive sales channel based on access to high quality and aesthetic products, improved packaging and reliable channel support resulting in a large number of retreaders aligning with the Eastern Treads brand.

Road Transport Corporations (RTCs)

- ETL has developed strong relationships with Road Transport Corporations (RTC's) across six states namely Kerala, Tamil Nadu, Rajasthan, Karnataka, Odisha, and Maharashtra.

Company Outlets

- ETL has launched one in-house model retreading centers in Chennai (called Process Evaluation Center) to demonstrate product application processes and at the same time enhance its brand image in key usage markets.

Infinity Zone

- **35** outlets across 10 states – exclusive dealer cum service points focus on providing quality retreading services to truck, bus and other fleets, equipped with sophisticated retreading machines that use high quality material and are operated by well-trained people.

Corporate Sales Team

- Spear headed by persons having rich experience in a similar field with a team size of 46 across India.

Company Depots & C&F

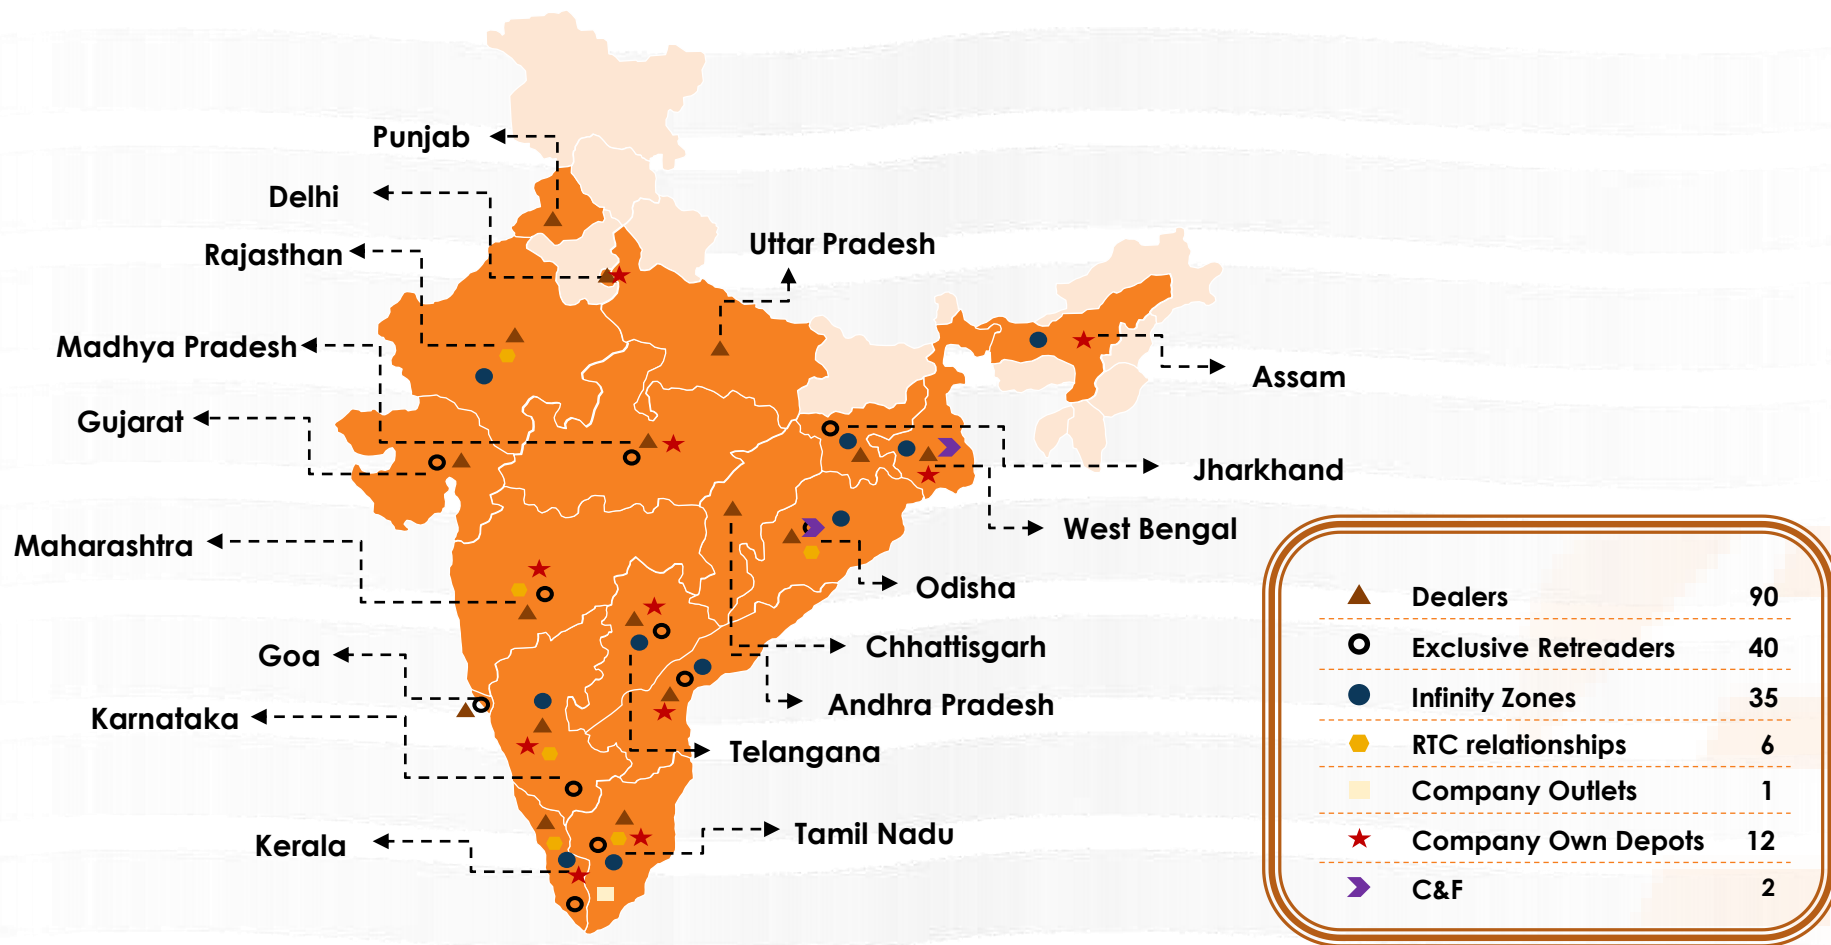

- **12** Company owned depots and two C&F across the country for effective and aggressive servicing of all the above channels.

Global Sales Network

- ETL initiated its overseas sales operations with the first consignment of tread rubber shipped to UAE in 2012. Since then, deep relationships have been developed in UAE/Middle East, Saudi Arabia, Kenya, Tanzania, Uganda, South America, Mauritius, Bangladesh, Bhutan, Nepal based on supply world class products. Many of these regions represent a strong, long-term growth opportunity for ETL.

Wide Distribution Presence

Board of Directors & Management Team

Mr. Navas M Meeran - Chairman

Chairman of Eastern Group of Companies with substantial experience in leading businesses across verticals

Previous held positions of Chairman, Southern Region Council, Confederation of Indian Industries (CII)

Received 'Kamal Patra' awarded by the Indian Junior Chamber for being an outstanding young entrepreneur of the year in 1994

Previous held positions of Deputy Chairman, CII, Southern Region Council and Chairman, Kerala Chapter

Mr. M.E Mohamed – Managing Director

Retired from Kerala State Housing Board as Executive Engineer

Vast experience in planning and implementing projects

Under his stewardship, ETL is scaling new heights, expanding operations and embarking on several new initiatives

Mrs. Shereen Navaz - Director

Actively involved in Eastern group businesses and occupying directorship in various companies

Mr. M.S Ranganathan - Independent Director

More than three decades of service in public sector banks in various capacities

Specialized in Finance and Accounts with wide expertise in finance and administration

& Management Team

Mr. K.S. Neelacanta Iyer - Independent Director

Vast experience and expertise in finance, accounts and company law matters

Practicing Chartered Accountant, Senior Partner with M/s Iyer and Cherian, Chartered Accountants, Cochin

Mr. K.V. Rajagopalan Nair - Nominee Director of KSIDC

Retired in 1996 as a Director General of Police, IPS cadre

Recipient of Indian police medal for meritorious service and President's police medal for distinguished service

During police service, was on deputation at CBI for eight years, also served as Managing Director at Travancore Titanium Products Limited, Kerala State Overseas Employment Promotion Consultants Limited and Kerala State Police Housing Corporation

CS Baiju T – Company Secretary, WKMP

Fellow Member of Institute of Company Secretaries of India.

Vast experience and expertise in Finance, Accounts, Company Law matters, Listing regulations etc

Mr. Naiju Joseph - Director

Hails from a business family of Vazhakulam engaged primarily in tyre retreading industry

Mr. Rajesh S - CEO , WKMP

Two decades of multi-functional experience across business operations, finance, planning, brand management, production, TQM, commercial, regulatory and HR.

Lead operational and financial initiatives at ETL for over five years with P&L responsibilities.

Mr. Mohamed Sherif Shah – CFO, WKMP

More than 20 years of experience in Tyre retreading industry operations. Expertise in Finance, Accounts, Procurement, Management and Administration.

Shareholding Pattern & Share Price Movement

Share price movement for 1 year

Retreading Industry

Retreading and its types

Retreading is a safe, efficient and environmentally friendly way to breathe new life into worn tyres: The "worn-out" tread of the tyre is replaced with a brand-new one and this means that the tyre can be used again!

There are two techniques for retreading:

Cold Process Retreading

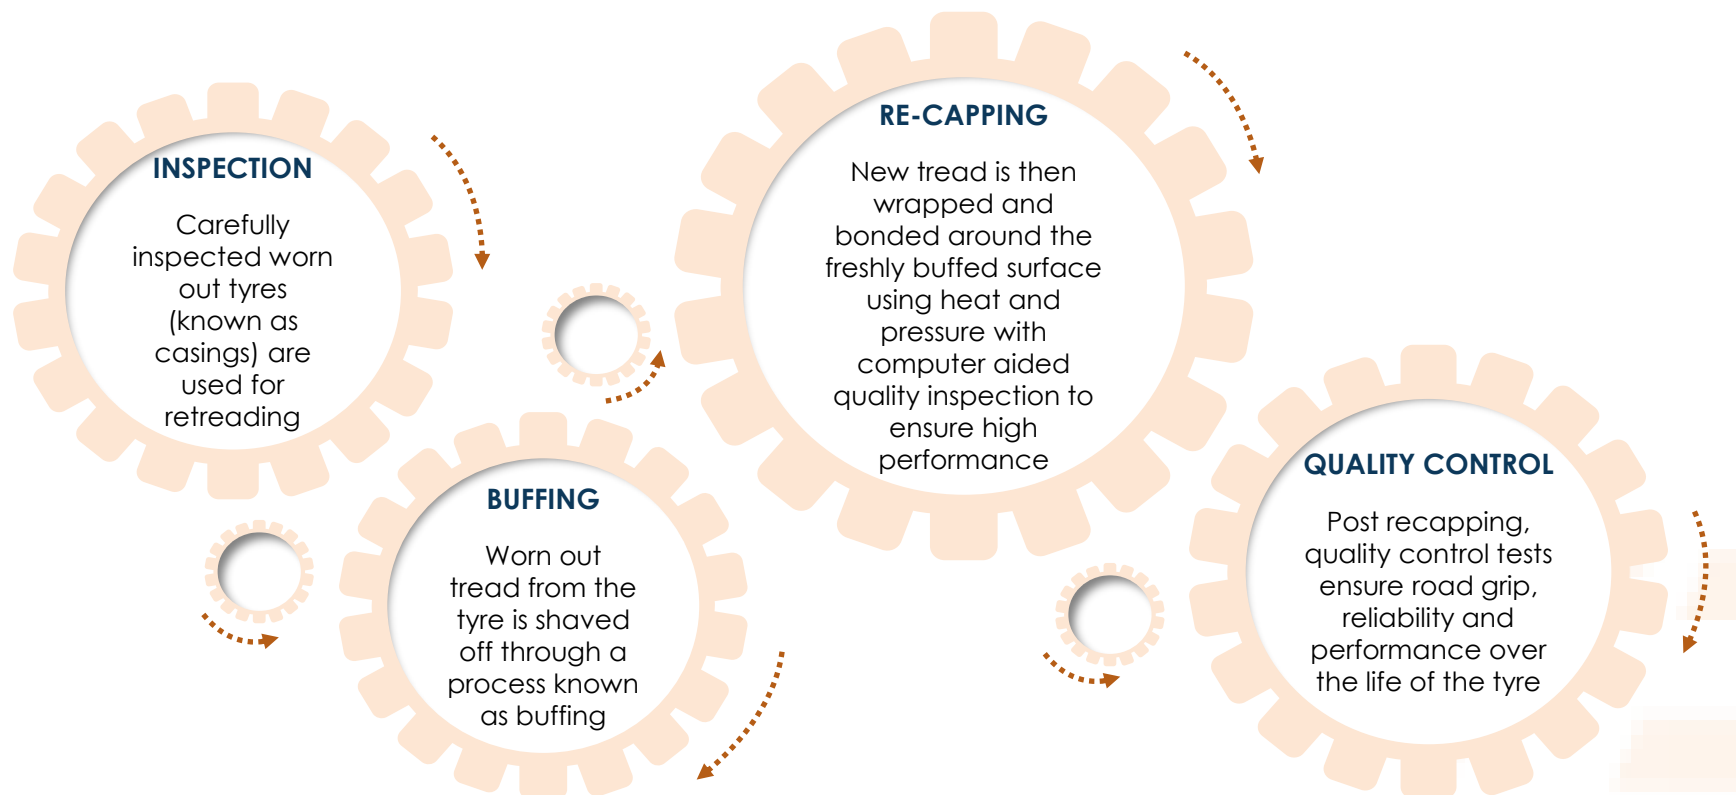

Precure or "cold" retreading involves vulcanisation **without a mould** at a temperature between 110 °C and 125 °C. The tyre is put together using a pre-vulcanised tread liner (= new tread) and a non-vulcanised bonding gum layer.

Hot Process Retreading

Hot retreading involves the vulcanisation of a tyre in a mould at a temperature of around 150 °C. The tread and the sidewall veneer of the tyre are made up of non-vulcanised rubber compounds. The shape and tread of the tyre are created in the heating press.

Retreading Process

High mileage

Efficient heat dispersion

Stable road traction

Retreading - Global Usage

United States

- Retreading saves \$ 3 billion annually for the US trucking industry
- In 2013, there were 14.9 million truck tyre retreads vs 15.7 million replacements (almost half the replacement demand was met by retreads)
- Average cost of retread was \$ 250 vs \$ 401 for a replacement

Source: Modern Tire Dealer

Europe

- 4.7 million truck tyres were retreaded in the European Union in 2014
- Truck tyres are designed to be retreaded 3-5 times, aircraft tyres upto 10 times
- 40-45% of truck tyres in the EU market are retreaded tyres

Source: European Tyre and Rubber Manufacturers' Association

India

- 2014 Market Size: ₹ 3,200 crore
- Domestic growth is likely to be robust with double digit CV sales for coming years

Source: Company

Industry Trends

Expanding Road Networks

- Strong development momentum of road infrastructure in India – robust demand/traffic growth, committed investments and policy support has changed the face of road transportation
- Indian road network is the second largest in the world at 5.4 million kms – carries over 60% of all goods and 85% passenger traffic in the country
- National Highways Authority of India (NHAI) plans to expand the national highway network by 84,000 kms, investing approx. ₹ 700,000 crore

CV Sales

- Rail freight rates have increased more than road freight rates in recent years
- Tyre replacement demand lags vehicle sales, lag is shorter in case of commercial vehicles
- The overall Commercial Vehicles segment grew by 19.9% in April-March 2018 as compared to the same period last year
- Medium & Heavy Commercial Vehicles (M&HCVs) grew by 12.5 % and
- Light Commercial Vehicles grew by 25.4% in April-March 2018 over the same period last year
- Demand outlook for FY19 seems healthy across segments

Industry Trends

More Radialization of Tyres in India

- Improving highway & city road conditions are leading to more radialization of truck tyres
- CVs have seen about 45-50 per cent radialization and this level is expected to double over five years
- Radial tyres have 20% longer life and provide better riding comfort
- Retreading a radial tyre consumes 10% more tread rubber and needs more sophisticated capability
- With about 31 radial patterns already in production , ETL is well equipped for future demand for radial tyres.
- More patterns are in R&D and will be introduced with time

Greater Usage of Synthetic Rubber

- Demand from Indian tyre industry currently skewed 65% to natural rubber compared to 45% globally but trend is towards synthetic rubber
- Radial tyres use 70% synthetic rubber compared to 50% in conventional tyres

Industry Trends

GST Implementation

- Following GST implementation, inter-state check-posts are dismantled and long-haul trucks cover 300-325 kms on Indian highways vs 225 kms previously, reducing freight transit time: based on study conducted by Ministry of Road Transport & Highways
- One-third of the Indian retreading market is unorganized and can now potentially consolidate following GST implementation
- Tax avoidance previously allowed unorganized players to offer 20% lower cost – however, quality and safety preferences are already moving customers to industry leaders
- More radial tyres and larger share of market with large fleet owners also leads to consolidation to organized retreaders

Benefits of Retreading

- Retreaded popular truck tyres cost 30%-50% of the price of new tyre
- During a 3 tyre run (1,80,000 km) cycle, about ₹43,000 can be saved by a popular size truck
- Conserves natural resources –Rubber and Oil
- Reduces environmental pressure from elongating useful life 30kgs of rubber saved per tyre
- Requires ~7 gallons of crude oil to produce a retread as opposed to 22 gallons of oil to manufacture a new tyre
- Globally, regulations around tyre retreading process have standardized quality; Studies have inferred that retreaded tyres fitted accordingly perform inline with new tyres

Cost Efficiency

Environment Friendly

Quality Performance

Safety

Low Capital Investment

- Globally commercial airline and jet aircrafts use retreaded tyres. 80% of aircraft tyres in the US are retreaded
- Organised retreaded follows stringent industry practiced backed by quality control and technical expertise
- Capital expenditure in setting up a retreading manufacturing facility is comparatively very low

Going
Forward

Outlook

Retreading gaining prominence in the domestic market

- Monetary advantages and environmental considerations are aiding popularity of retreaded tyres
- Improving road network, increased economic activity, higher radialisation and implementation of GST are all positives for long term growth of the sector
- Rebounding CV sales will leading to expanding market size over the next few years translating to robust medium to long term growth opportunities

ETL aims to be the leading retreading player in India and exports to key markets worldwide

- At the forefront of building a comprehensive ecosystem across the entire retreading value chain
- Extensive and expanding marketing network to penetrate further and establish a pan India presence
- Limited capex for expansion over next 2-3 years, as sizeable production capacities available currently
- To tap and further expand presence in key lucrative markets globally

About Eastern Treads Limited (ETL)

ETL, a brand from the bouquet of the Eastern Group, focuses on manufacturing and marketing tyre-retreading materials like pre-cured rubber, bonding gum, vulcanizing solutions and many other accessories. The Company has a national presence across 17 States having tie-ups with 90 Dealers, 40 Exclusive Retreaders, 35 Infinity Zones and 1 own retreading units which being serviced through 12 depots and 2 C&F's across India. The Company has also a presence in overseas markets of UAE/Middle East, Saudi Arabia, Kenya, Tanzania, Uganda, South America, Mauritius, Bangladesh, Bhutan, Nepal to cater to the heightened demand in the world market for tread rubber.
