Ready-mixed Concrete Industry

- Started in mid-90s; Penetration increasing
- ~ 10% of total cement used for concrete in India is sold through RMC Channel
 - Metros / tier 1 (~35%) and tier 2 (~20%)
 - In developed countries: 50% - 70%
- Several benefits such as assured quality, speed, saving of site space, reduced labor, reduced wastage, safety etc
- Industry volume: ~ 30 million m³ per annum
 - Residential 45% ; Commercial 35% ; Infrastructure 20%
- Steady-state Industry growth rate > 20% per annum due to:
 - ❖ Growth of cement consumption in India
 - ❖ Conversion from site-mix to ready-mix

RMC Readymix (India)

- 2nd largest player in India with national footprint

Performance Review and key developments

The quarter ended September 2015 saw improvement in Cement EBITDA at Rs329/ton as compared to Rs276/ton in the corresponding quarter in FY15,

despite lower realizations. During the quarter provision was made towards District Mineral Foundation and National Mineral Exploration Trust including for prior period. This impacted EBITDA to the extent of ~₹33/ton.

For the quarter ended September 30, 2015, the Company sold 13.45 lac tons of cement and clinker as against 12.92 lac tons for the quarter ended September 30, 2014, growth of 4%. The cement volumes were flat as compared to the same period last year. Both the premium brands "Hitech" (launched last year) and "Duratech" (launched in Q1FY16) have been well received by the markets. Together they contributed ~6% of sales during Q2FY16 vis-a-vis 3% of total volume in FY15.

The company had taken various cost rationalization measures in FY15 such as resorting to imported coal, increase in imported pet-coke consumption, reduction in power consumption amongst others.

H & R Johnson (India) (HRJ) Division operates in the TBK (Tile Bath Kitchen) Segment. The Division's sales revenues during the quarter were ₹564 Crores, there by growing by 8% when compared to the corresponding quarter in FY15. The Division continued to scale-up its marketing activities through various initiatives like strengthening of distribution network, merchandising and also taken various initiatives to optimize the costs. The Division is making efforts to improve the product mix by upgrading the plants to produce more value added products which will help to improve the realizations.

The RMC Readymix (India) (RMC) Division's sales turnover increased by 4% as compared to the corresponding quarter in FY15. Profitability of the Division improved during the year as compared to the corresponding period last year. The division posted EBIT of ₹2.8cr as compared to loss of ₹4.3cr on a y-on-y basis. During the quarter under review, few plants were demobilized. The Division is in the process of identifying new locations where it plans to relocate unused / underutilized assets.

During the quarter the Company has agreed, in principle, to sell 23% of its holding in the paid-up capital of Raheja QBE General Insurance Company Limited (Raheja QBE), the general insurance subsidiary, to its existing partner in Raheja QBE, namely the QBE Group, Australia, for a consideration of approximately AUD 21,500,000 (equivalent to approximately ₹103cr).

The proposed transaction is subject to requisite approvals. Once the proposed transaction is consummated, the Company's shareholding in Raheja QBE shall stand reduced from 74% to 51%.

Industry Scenario / Future Outlook

The government has taken several initiatives such as Make in India, Swachh Bharat Mission, Housing for All, development of Smart Cities and renewed thrust for Infrastructure development amongst others. This apart stable inflation and recent interest rate cut augur well for all the businesses in medium to long term, though near term challenges remain.

The long term drivers for cement demand remain intact. Higher government spending on infrastructure particularly roads, growth in rural housing and rising per capita incomes are likely to augur well for the cement industry. The cement division is on strong footing with several cost rationalization exercise done in recent quarters.

The robust distribution network, strong brand equity, wide-spread manufacturing locations, and a comprehensive product portfolio of tiles, baths, and kitchens enable H & R Johnson (India) Division to enjoy a distinct competitive advantage over others in the market. Moreover, with the successful completion of initiatives last year to reduce power and fuel cost, the Division is enhancing its capacity utilization.

The Ready-mixed Concrete Industry in India is over 20 years old and was growing at a healthy rate till three years back. However, due to paucity of new construction projects taking off, volume growth for the industry in the last few quarters has been under pressure. The markets in most of the metros are expected to see a turnaround in the medium term as economy picks up and construction activities resume. With the Mega Projects Vertical, RMC Division is focusing on infrastructure segment as well. The markets in tier 2 & tier 3 cities have also been showing maturity which will help the industry's growth.
