International Update

- **Update from our Target Geographies**
 - South East Asia, South Asia
 - Strong pipeline in Malaysia, Vietnam, Bangladesh, Sri Lanka; New win in Hong-Kong
 - Africa, Middle East
 - Splitting of region into 4 offices is working well, with strong deal funnel in each region
 - Techno-commercials closed for multi-million \$ deals in South Africa, West Africa and MENA
 - USA, Mexico
 - 1H was slow. Expecting strong performance in 2H, based on existing customers and new wins
- **Growth strategy for each region**

 - Use local references and success stories (application wins) to win new customers
 - Focus on winning Tier-1 accounts with multi-country presence and large run-rate opportunities
 - Increase investments in marketing and branding
 - Increase focus by dividing large regions and hiring more people in sales and pre-sales
- **Financial impact**
 - Better gross margins, as compared to India
 - Better payment terms, lower DSO
 - More run-rate customer, higher stickiness
 - Geographical diversification- reduces risk of single-country or customer concentration

India Update

- **Government Accounts**

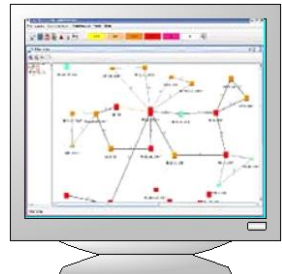

- BSNL/MTNL capex investments on hold, till their financial situation is revived by Government
- New Bharatnet projects (centrally controlled) are currently on hold.
- We are well placed in the 3 state-led fiber projects. We have won the order for Kerala (from BEL), and are well placed in Telangana (where our SI partners have won). Tamil Nadu project is also cleared for tender, but will have revenue impact next FY.
- Critical infrastructure business is healthy. We continue to win new tenders from Railways, Railtel, Metros, Smart cities, Power and Oil & Gas. Our SI partner has also won Army NFS project, for which we expect the orders soon. Expect strong order inflow for this segment, but some revenues from this segment may slip to next FY.
- Governments focus on Make-in-India and intent to build indigenous 5G eco-system will benefit us.

- **Private Accounts**

- Industry consolidation is almost complete. We are incumbent suppliers to all the players
- We expect robust capex investments in fiberization as well as fixed-broadband services to continue
- Our focus is on winning new applications (e.g., FTTX, metro capacity upgrades on OTN/DWDM etc.) to increase our wallet-share

- India Private is growing healthily (67% YoY in 1H) and is expected to deliver strong YoY growth.

- We are managing our operating costs tightly, but continue to make the required R&D & international sales investments, so as to improve our product portfolio and grow our international sales.
