17s/39 19th September 2017

To,

General Manager,

Listing Department,

The Bombay Stock Exchange Limited,

P.J. Towers, Dalal Street,

Mumbai - 400 001

Company code: 533333

The Manager,

Listing & Compliance Department

The National Stock Exchange of India Limited

Exchange Plaza, Bandra Kurla Complex,

Bandra East, Mumbai - 400051

Company code: FCL

Dear Sirs/Madam,

Subject:- Investor Presentation September 2017

With reference to the above caption subject, we hereby enclose Investor Presentation for the Month of September 2017, requesting you to kindly take it in your record.

Kindly acknowledge receipt of the same.

Thanking You.

Yours faithfully,

For FINEOTEX CHEMICAL LIMITED

Raina D'Silva

Company Secretary

FINEOTEX CHEMICAL LIMITED Where Dependability Counts...

Investor Presentation SEPTEMBER 2017

INDEX Executive Summary Company Overview Business Overview Industry Overview Financial Overview

EXECUTIVE SUMMARY

OVERVIEW

- Fineotex Group founded in 1979 is engaged in manufacturing of Specialty Chemicals and Enzymes.
- Mr. Surendra Kumar Tibrewala is Chairman & MD and Mr Sanjay Tibrewala Executive Director & CFO.
- The company has manufacturing facilities in Navi Mumbai and Malaysia with a combined production capacity of 22,000 MT/p.a.
- Current Market Capitalization is INR 3,436 MN as of 30th June, 2016.

BUSINESS MIX

- Fineotex is one of India's largest and most progressive speciality textile chemical manufacturers.
- The Company manufactures chemicals for the entire value chain for the textile industry including pretreatment, dyeing, printing and finishing process
- The company also manufactures other chemicals for various industries like agro, adhesives, construction, water treatment etc.
- It has more than 400 products catering to various industries.

KEY STRENGTHS

- Strong Balance Sheet with Zero Debt; High ROE and ROCE, Consistently Dividend paying
- Professionally run company with high Promoter holding. Promoter stake increased from 62% to 72% over the last 3-4 years.
- Strong Industry knowledge over three decades of operations
- Low cost high margin products with high entry barriers
- Extremely strong brand loyalty
- Strong R&D capabilities help them increase customization levels of their products

FY17 FINANCIALS

- Total Income INR 1,281 MN, 5 year CAGR of 9.93%
- EBITDA INR 299 MN, 5 year
 CAGR of 31.86%
- PAT INR 206 MN , 5 year CAGR of 27.98%

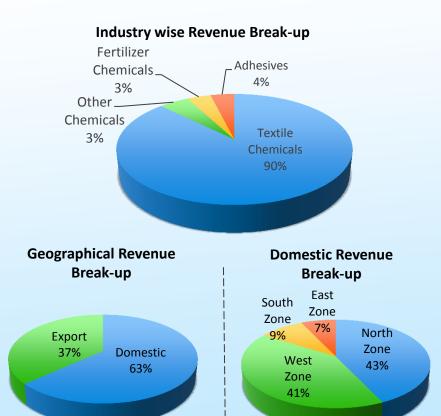

COMPANY OVERVIEW

- Fineotex Group was established in 1979 by Mr.Surendra Tibrewala
- FCL was incorporated as a public limited company in 2007. The company was listed on Bombay Stock Exchange in March 2011, and listed on the National Stock Exchange in January 2015.
- Fineotex is one of India's largest and most progressive specialty textile chemical manufacturers.
- The company manufactures over 400 specialty chemicals and enzymes to Textile, Garment, Construction, Leather, Water treatment, Agrochemicals, Adhesives and others industries.
- Headquartered in Mumbai, it has manufacturing facilities in India and Malaysia with a combined production capacity of 22,000MT/p.a.
- It has a global presence across 33 countries and caters to well known companies in India and overseas.
- FCL along with its subsidiary Biotex Malaysia, has a global presence as a reputed producer of specialty chemicals.

PROMOTER BACKGROUND

- Commerce graduate from Mumbai University & a Law graduate from Government Law College
- 4 decades of experience into manufacturing Specialty Chemicals & Enzymes for various industries namely Textiles & Garments, Construction, Water Treatment, Leather, Paper, Paint, Adhesives etc.

Mr. Sanjay Tibrewala – Executive Director & CFO

- Post Graduate, with specialization in Textile Processing and Chemicals from Sasmira University & a Commerce Graduate from Mumbai University
- Spearheading the company into Organic & Inorganic Growth by venturing into Exports & Foreign Acquisitions
- Instrumental in increasing the product basket for textile chemicals and diversifying into segments like Agro, Adhesives & others

KEY MILESTONES

1995

TM

 Incorporation of Fineotex Chemical Private Limited

2004

- Listed on BSF
- Incorporated a Wholly Owned Subsidiary in Malaysia
- Acquired major stake in Biotex Group

2011

Listed on NSF

- Incorporated a Wholly Owned Subsidiary in UAE, Fineotex Specialities FZE
- Received Star Export House Recognition

2015

2003

- Accredited with ISO 9001:2008
- Registered Trademark for 'FINEOTEX'

2007

 Acquisition of Fineotex Chemical Industries by Fineotex Chemical Limited 2014

- Bonus declared on 1:1 basis
- Accredited with ISO 14001:2004
 OHSAS 18001:2007
 certifications

2017

 Fineotex Chemical Limited came up with their first buyback

GLOBAL FOOTPRINT

- Presence in 33 countries like Australia, Germany, Turkey, Bulgaria, Argentina, South Africa, Brazil, Indonesia, Thailand, Mauritius, Vietnam, Malaysia, Singapore, UAE, Tanzania etc
- Company also got recognised as a Star Export House in 2015.

 Constantly tapping new markets, tie ups with reputed distributors with a sole selling policy to channelize its efforts in view of long term relationship

MANUFACTURING FACILITIES

- Trans Thane CreekIndustrial Area,Mahape, Navi Mumbai.
- The Current production capacity is **15,500 MT p.a.**

MALAYSIAN FACILITY AT BANDER BARU BANGI, MALAYSIA

- PLot 71, Jalan P10/21,
 Selaman Industrial Park,43650
 Bandar Baru Bangi, Selangor,
 Malaysia.
- Current production capacity of 6,500 MT p.a.

STRONG R&D CAPABILITIES

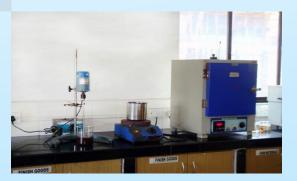

- Fineotex has state-of-the-art technology and is continuously updated with in- house R&D at 2 laboratories in Mumbai.
- Strong R&D capabilities help them increase customization levels of their products – leading to higher value addition for its customers.
- Extensive R&D is performed at the client's site. This is an important source for new developments as a lot of variables/factors like the client's plant machinery type and its speed, water quality, timing etc are

- critical for tweaking the quality and performance of the products.
- Laboratories are equipped with all kinds of modern equipment's like Brookfield Viscometers, Refractometers, Pilot Vessels and application equipment's to perform pretreatment, dyeing, printing & finishing trials.
- Product features regularly improved by incorporating the latest technology and developing new specialty and cost-effective products.

Strong focus on R&D leads to high level of product customization

TEXTILE INDUSTRY CLIENTS

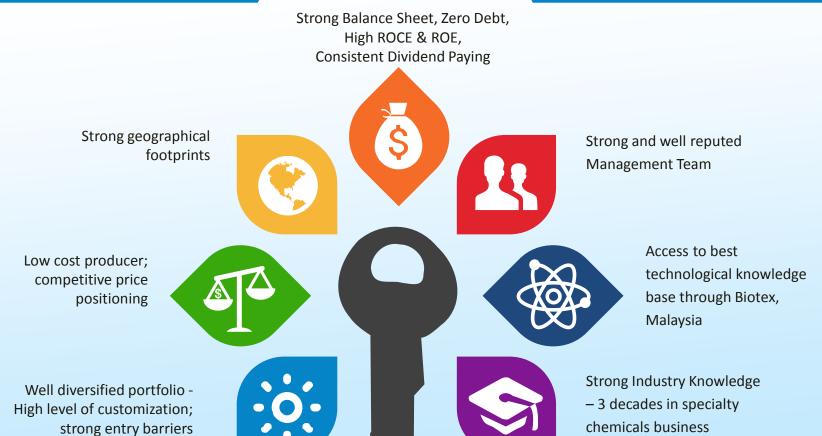

OTHER INDUSTRY CLIENTS

KEY STRENGTHS

COMPETITIVE ADVANTAGE

High Entry Barriers

- Industry dominated by few players as strong technical knowhow needed
- High level of customization
- Quality & efficiency focused products

Sticky Customer Profile

- Critical products having significant impact on end product properties
 Products with high value addition and catering to sensitive chemical processes
 - Reluctance of customers to switch easily

Pricing Power

- Cost of Products is a very small % to the end product prices.
 Highly technical products used in critical processes
- Customer don't focus on pricing but on reliability & technical superiority.

- Strong and Established Brand Presence
 The Fineotex brand is well established since 3 decades and known for its superior quality
- Leveraging Biotex to penetrate the global markets
- Network of 68 distributors pan-India, offering higher returns to them to ensure better market share

Offering Innovative Solutions to Customers

- Diversified product portfolio including 400 products
- Products catering to the entire value chain in textile manufacturing process

Lower Per Unit Cost

- **Higher Yield Products**
- Better Productivity leading to reduction of Time and Energy cost
- Lower generation of Effluent

Customized Products

- Modifying the products as per customer needs
- New products developed based on in-house R&D and continuous trials at customer's shop floor
- Unique & efficient concentrated products with low dosage, transport and storage costs

FUTURE STRATEGY

Increasing Market Share

 Increasing market share in textile chemicals segment with more product range and novel applications.

Leverage Biotex Brand

- Leverage Biotex brand in domestic markets and increasing share in export markets.
- Using technical knowledge & expertise of Biotex to further enhance our product basket and processes.

Enter New Industry

 Looking to penetrate in speciality chemicals for nontextile applications.

Enhance Production Capacity

- To Increase production capacity by adding machinery and equipment's on a regular basis.
- Currently FCL have acquired land in Wada, Khopoli and additional land in Ambernath for future expansion.

Disciplined Capital Allocation

The Company has made gradual capital allocations to increase capacities as needed and runs its facilities at optimum utilisations before planning any new capex.

TEXTILE CHEMICALS

- Global textile chemicals market is expected to grow at a CAGR of 3.7% by 2020. Global chemicals textile market to be valued at US\$25.42 billion by 2020.
- The Company manufactures chemicals for the entire value chain for the textile industry including pretreatment, dyeing , printing and finishing process

- The company is one of the strongest players in finishing chemicals segment in India, with a higher focus on dyeing and finishing chemicals which have higher applicability on textiles and are more profitable.
- The Company consumes more than 300 raw materials like DCDA, DMA, 2 Ethyl Hexanol, Maleic Anhydrite, Acrylamide, Organic Surfactants, Butyl & Styrene Acrylate, Deta, Para formaldehyde to name a few.

PRETREATMENT CHEMICALS

- Natural fibers and synthetic fibers contain primary impurities that are contained naturally, and secondary impurities that are added during spinning, knitting and weaving processes.
- Textile pre treatment is the series of cleaning operations. All impurities which causes adverse effect during dyeing and printing is removed in pre treatment process.

PRODUCT NAME	FUNCTION
De-sizing Agent	To remove the different types of sizes (Starch, waxes etc.) from the fabric/yarn
Wetting and Penetrating Agent	To reduce the surface tension of water and thus increase the absorbency of the water to the fabric
Sequestering Agent & Protective Colloid	To reduce the hardness of water and thus make ideal conditions for washing
Scouring Agent	To remove the oil , fats etc from the fabric
Silicone & Non Silicone Defoamers	To reduce the foam created during the process of treatment of fabric
Non-Silicate Peroxide stabilizer	To stabilize the peroxide of hydrogen peroxide in the pre treatment process
Peroxide Killer	To clear the residual peroxide from the fabric
Polyester Weight Reducing Catalyst	To reduce the weight of the polyester fabric during the caustic addition process
Anti-back Staining Agent	To prevent the staining of the pockets during the denim fabric treatment

DYEING CHEMICALS

Dyeing is the process of adding color to textile products like fibers, yarns, and fabrics. Dyeing is normally done in a special solution containing dyes and particular chemical material. After dyeing, dye molecules have uncut chemical bond with fiber molecules. The temperature and time controlling are two key factors in dyeing. There are mainly two classes of dye, natural and man-made.

The dyeing process includes sequestering agents, acid buffers, polyester dyeing carrier, dispering and oligomer removing agent, leveling agents, anticrease lubricants, washing off agents, dye fixing agents, soda ash substitute and reduction clearing agents.

PRODUCT NAME	FUNCTION
Sequestering Agent	To reduce the hardness of water and thus make ideal condition for processing
Silicone & Non Silicone Defoamers	To reduce the foam created during the process
Buffering Agent	To maintain the pH of dye bath throughout the dyeing process
Polyester Dyeing Carriers	To facilitate easy absorption and penetration of dyes by the polyester fabric
Dispersing Agent & Oligomer Removing Agent	To maintain the dispersion of dyes in the dyeing process and help to remove oligomers
Levelling Agent	To get even dyeing and even colour depth effect
Lubricants	To reduce the friction between fabric to fabric and fabric to machine and to reduce the creation of creases in the fabric
Washing off Agent	To remove the unfixed dyes from the fabric
Soda Ash Substitute	To substitute soda ash in the dyeing process of cotton
Dye-fixing Agent	To fix the dyes on to the fabric
Cationising Agent for Pigment Dyeing	To provide required cationic charge to the fabric in the pigment dyeing process

PRINTING CHEMICALS

Textile printing is the process of applying colour to fabric in definite patterns or designs. In properly printed fabrics the colour is bonded with the fibre, so as to resist washing and friction. Textile printing is related to dyeing but in dyeing properly the whole fabric is uniformly covered with one colour, whereas in

- printing one or more colours are applied to it in certain parts only, and in sharply defined patterns.
- This includes dispersing agents, binders acryclic, thickeners, white inks, washing off agents, softener for pigment printing.

PRODUCT NAME	FUNCTIONS
Dispersing, Penetrating, Swelling, Levelling & Defoaming Agent	To provide depth and even level printing effect, being added in the printing paste
Fixation Accelerators	To provide depth and fixation of dyes to the polyester printing fabric in loopager machine during the disperse printing process
Binders Acrylic, Self Thickening for Gold & Flock	To bind the pigment or dyes onto the fabric
Fixers in Pigment Printing	To provide fastness to the print
Thickeners	To provide viscosity to the printing paste to facilitate required printing effect
White Inks	To provide printing effect onto the fabric
Washing Off Agent	To remove the unfixed dye from the printed fabric

FINISHING CHEMICALS

- In textile manufacturing, finishing is the processes that converts the woven or knitted cloth into a usable material and more specifically to any process performed after dyeing the yarn or fabric to improve the look, performance, or "hand" (feel) of the finish textile or clothing.
- The finishing process includes stiffeners, softeners-cationic,

silicone emulsions amino, wax finishing agents, antistatic agents, water repellants, antistatic agents, water repellants and soil resisting agents, polyuthrene finishing agent, anticrease resins, anti pilling cum antislip agent, enzymatic bio polishing agent and yarn lubricants.

PRODUCT NAME	FUNCTIONS
Stiffeners	To provide stiff finish effect to the fabric
Softeners	To provide soft finish effect to the fabric
Silicone Emulsion	To provide silky and soft finish effect to the fabric
Wax Finishing Agent	To provide waxy finish to the fabric
Anti Static Agent	To reduce the static power of the fabric
Water Repellant & Soil Resisting Agent	To provide water repellency and dust repellency to the fabric
Polyurethane Finishing Agent	To provide bouncy feel to the fabric
Crease Recovery Agent	To reduce the crease and provide wrinkle free effect to the fabric
Delustering Agent	To remove the luster from the viscose fabric
Anti-pilling & Anti-Slip Agents	To remove the hairing and pilling problems from the fabric and also provide anti-slip effect
Enzymatic Bio-polishing Agent	To remove the surface protrudene fibers from the knit substrates and denim and thus improvise the surface feel

OTHER SPECIALTY CHEMICALS

 FCL also manufactures other specialty chemicals like adhesives, food additives, foundry chemicals, defoamers, elastomers, cosmetic additives, flavours and fragrances across industries like construction , water treatment , agriculture, leather, paint & paper and wood & handicraft.

INDUSTRY	PRODUCT NAME	FUNCTION
Agrochemical	Defoamers for fertilizers	To reduce the foam in the fertilizer production process
	Anticaking Agent	To avoid the caking of the powder fertilizer and thus keep it free flowing powder
Wood Working & Handicraft, Sticker and Bindi, Cigarette	Adhesives	Different kinds of adhesives for these Industries for sticking purpose
 Other Industries; Construction Water Treatment Leather Paper & Paint 	 Admixture, Water Proofing, Binders, Polymers Boiler Chemicals, Cooling tower chemicals, Coating, Softening, Shine & Texture, Finishing agents, Defoamers, Emulsions, Antisetting agents 	 To reduce water-cement ratio, provide water proofing To reduce hardness of the water To provide coating on the surface of leather To provide shining effect to the leather To reduce foam in the paper making process Helps to avoid setting the settling of pigments in the paints

CASE STUDIES

FINOCON ADA Premium – Soda Ash Substitute

Benefits

Soda ash substitute, Reduced cost of dyeing,

Single time addition in dye bath, Reduces TDS by 80%

FINOCON ECO Concentrate – Acetic Acid Substitute

Benefits

Eco Friendly,

Economical,

Sulphate free, Chloride free,

Formate free,

Viscose Safe

BIOPRINT BDT – Sodium Alginate Substitute

Benefits

Excellent viscous stability,

Anti dilution property,

Good wash off property,

Longer shelf life,

Good sharpness of prints

FINOPRET ZF – Zero Formaldehyde Resin

Benefits

Zero formaldehyde levels,

Chlorine resistant finish,

Excellent crease recovery,

Durable washing up to 100°c

FINOX XLH – TOWEL SILICONES

<u>Benefits</u>

Non yellowing silicone softener,

Super feel & shear stable,

Improves elastomeric properties,

Stretch recovery of Knitwear

CONCENTRATED PRODUCTS – Pretreatment, Dyeing, Printing & Finishing Chemicals

<u>Benefits</u>

Freight cost savings,

High efficacy,

Low dosage requirement,

BIOTEX

- BioTex was founded in 2002 in Malaysia by Dr. Cedric Veniat
- It manufactures innovative specialty chemicals using <u>French Technology</u>
- The manufacturing facilities are strategically located at an industrial hub in Selangor, Malaysia which helps it cater to key Asian and European markets
- It has a state-of-the-art manufacturing facility meeting global chemical industry standards
- It has a diverse basket of more than 50 high value products
- The unit is managed by a well known industry expert Dr. Cedric Veniat
- H sp • p
 - He is of European decent with over 25 years of experience in the specialty chemicals industries
 - Prior to founding Biotex, he was working with Thor group for more than a decade

BioTex Value Addition

- Products complementary to Fineotex
- Well established brand in Asian and European market
- Provides technological edge to Fineotex products

Biotex Shareholding (%)

Fineotex Malaysia Limited acquired 60% stake in Biotex in 2011 for USD 1.8 million, increasing the stake to 68% as on FY17.

PRODUCTS

- 1. Silicone Products
- 2. Fluorocarbon Products
- 3. Resin Auxillaries
- 4. Pretreatment Auxillaries
- Dyeing Auxillaries,
- 6. Flame Retardant Technologies
- 7. Synthetic Thickeners/Binders

BIOTEX CASE STUDIES

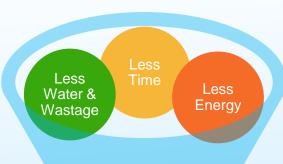

BIOTEX LTB – Low Temperature Bleaching

BENEFITS

- Low temperature bleaching agent at 75-80 degrees for 30 min
- Only caustic and peroxide required, BOD & COD levels are very low
- Less strength loss and higher DP rating
- Less weight loss

Energy saving

Specialty Biotex Products

High potential & applicability in pretreatment process across all cotton substrates

BENEFITS

- All in one multifunctional product for pretreatment process
- Minimum caustic dosage approx 0.5%
- Water, energy and time saving
- 25-30% reduction in effluent COD level as compared to the traditional process
- Eco- Friendly and readily biodegradable

BIOTEX CASE STUDIES

Aguastrike VCF- Non Toxic & Ecofriendly Mosquito Killer Liquid

- It is a non toxic, non polluting, Eco-friendly solution, produced in Malaysia with European design engineering.
- Simply poured on the water surface at a rate of 1ml per square meter, the silicon based liquid forms a molecule thick film, that doesn't stop water oxygenation (so no effect on fish, worms, snails and vegetals) but alter the water surface tension. As a result, larvae and pupae are unable to attach their breathing syphon and end up drowning.
- The adult mosquitoes while trying to lay eggs on the surface of the water, drown because of the lower surface tension.
- It doesn't kill the mosquitoes by poisoning. Aquastrike effect is physical not chemical, which eliminates the risk of mosquito developing immunity to the product as it is the case with some insecticides or even BTI.
- Approved by Ministry of Health in Malaysia and declared as Non-Pesticide by the Pesticide Board and allowed to use freely by consumers. The Singapore PUB (Public Utility Board) has approved it and even has the EU approval for shipment to Europe. NSF had also confirmed its Non Toxicity even in drinkable water. The Vietnam and Cambodia bodies have also approved and soon it will be under WHO registration application.
- The product is non smelly, invisible and to be poured/sprinkled like water instead of spraying in gases form. The handling is very simple and easy unlike in the case of BTI etc. allowing greater productivity of the personnel in charge of treatment.

INDIAN & GLOBAL SPECIALTY CHEMICALS INDUSTRY

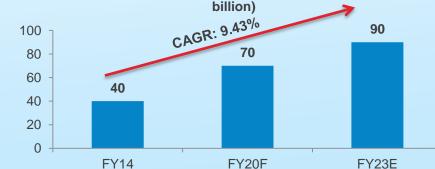

- The specialty chemicals market has witnessed a growth of 14% in the last five years; the market size is expected to reach USD 70 Billion by 2020.
- The Indian Chemical Industry which is 3% of the global market size, is pegged at approximately \$ 108 bn .
- The volume of the international textile chemical market in the year 2013 was 9230.1 kilo tons and is speculated to reach 11,462.5 kilo tons by the year 2020.
- China, Western Europe, United States of America, India, Turkey, and Japan are some of the largest consumers of textile chemicals in the world.
- The market for textile chemicals in India is highly fragmented and comprises of over 300 large and small players in India.
- The global textile chemicals market was valued at US \$ 19 billion in 2012 and is further expected to grow at a CAGR of 3.7 percent from 2014 to 2020.

Specialty chemical growth outlook by FY23 (USD billion)

GOVERNMENT INITIATIVES

- The Indian Government has taken steps to improve competitiveness in the sector. The major being:
 - Industrial licensing being abolished for most sub sectors.
 - FDI up to 100% granted in the chemicals sector
 - The government is continuously reducing the list of reserved chemical items for production in the small-scale sector, thereby promoting Greater investment in technology up gradation and modernization
 - 'Make in India' initiatives and chemical industry can play a major role in this campaign by making India a manufacturing hub for chemicals, especially knowledge and specialty chemicals.
 - The Government has launched the Draft National Chemical Policy, which aims to increase chemical sector's share in country's GDP.
 - Policies initiated to set up Chemicals & Petrochemicals investment regions which will be a region spread across 250 kms for manufacturing of domestic and export-related products of Chemicals and petrochemicals.

SAFE HARBOUR

This presentation and the accompanying slides (the "Presentation"), which have been prepared by Fineotex Chemical Limited (the "Company"), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the tire industry in India and world-wide, competition, the company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.
