Key points on E&P markets – Q2CY17

No signs of recovery in Offshore E&P spending in Q2CY17

Orderbook	97	133	172
% of O/B to current fleet	18%	6%	10%

- Q2CY2017 actual deliveries have been far lower than scheduled. Due to bleak employment scenario owners have refrained from taking delivery. A lot of deliveries due in 2016 were pushed forward to 2017 and have not yet been delivered. Going forward slippage is expected to remain high.
- Asset utilization levels have come off significantly. For premium Jack ups, lack of contract renewals has resulted in utilization levels coming down from around 90% at the start of 2014 to about 60% as on date.
- In case of PSVs and AHTSVs more than half the fleet is either idle/stacked or working in spot market at a very low utilization.
