International & Domestic Tailwinds

International Market

- Iron ore prices have fallen from peak of US\$ 233/t to US\$ 122/t. This sharp fall has been driven by steep cut in steel production by China. Once the production normalises post winter, iron ore prices should come up.
- Pellet prices have also fallen to US\$ 207/t CNF China, down from peak of US\$ 322/t. China is focussed on decarbonisation of the economy and this has increased demand for higher grade pellets and iron ore.

Domestic Market

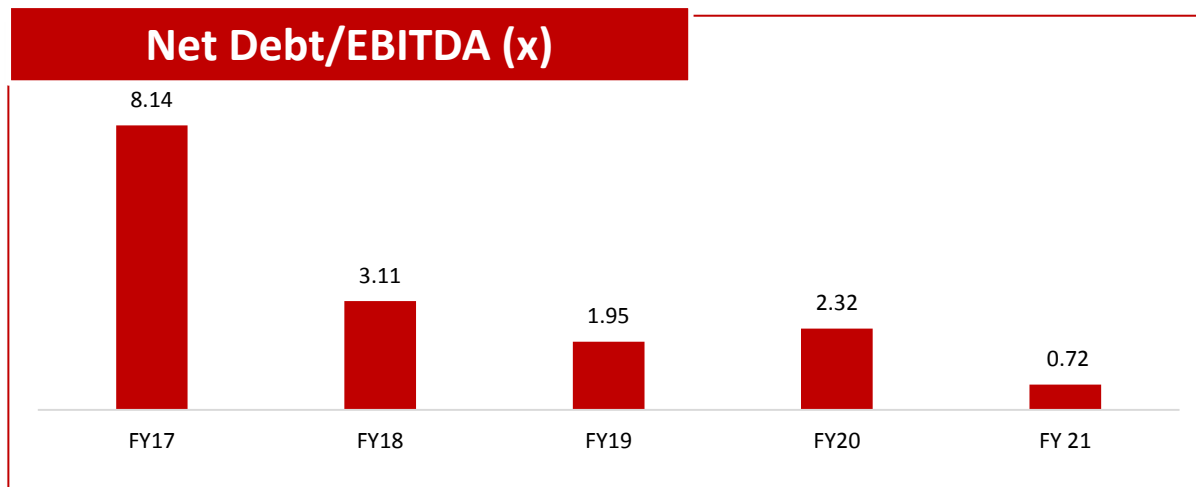

- Indian iron ore prices have fallen from the peak of Rs.9,600/t to Rs.6,200/t in last 4 months for 62% Fe (Orissa iron ore fines) following the global prices. However now, as steel demand in India improves seasonally, iron ore prices have started to recover.
- Pellet prices also corrected from the peak of around Rs.16,000/t to Rs.11,000/t but have recovered sharply back to around Rs.13,500/t – Rs.14,000/t. Over a longer term, iron ore prices are likely to remain firm as merchant iron ore capacity is reducing sharply.
- In the recent auctions of iron ore mines in Odisha, 9 blocks received active response out of 10. This round showed similar level of aggression as was seen last year. On average the premiums have inched up from 104% in 2020 auctions to 117% in 2021 auctions.
