Economy and Industry at glance

Financial highlights for quarter

Operational and Financial review

- Aluminium (India)
- Copper
- Novelis

Key Business Highlights

Aluminium

- Record EBITDA on the back of higher LME and steady operational performance
- In addition to GP IV/4 & GP IV/5 coal mines, Kathautia mines commenced operations in February 2017
- Prepaid Rs. 342 Crore loan in January 2017 – YTD Rs. 1,031 Crore

Novelis

- Record Q3 Adjusted EBITDA* of USD 255 Mn
- Trailing twelve months Automotive shipments at 17% increase of ~2% over FY16
- After bond refinancing, completed refinancing of long term loan – annual cash interest saving of ~ USD 80 million

Copper

- Performance in domestic market impacted due to subdued market condition and lower by-product realization

Economy and Industry

Economy

Global Economy – Gaining momentum amidst challenges

- IMF projected world economy to grow at 3.4% in CY 17 vs. 3.1% in CY 16 buoyed by Chinese stimulus and strong US growth
- Uncertainty around US policy stance, Fed interest rate hike, BREXIT negotiations and continuation of Chinese stimulus measures may impact the growth momentum

Domestic Economy

- Economic growth is estimated to slow to 7.1% for FY17 as compared to 7.6% last year
- Enhanced government focus on housing, electrification and infrastructure to drive demand in future

Aluminium Industry

Aluminium Prices Trend (USD/t)

*February'17 Aluminium LME as on 10th Feb'2017

Global demand is largely balanced in
CY16

- Environmental restrictions
 - ◇ Additional shutdowns of Alumina capacities – will increase cost push
 - ◇ Smelter shutdowns in China – impacting ~0.5 MnT capacity
- Buoyant demand outlook and lower inventory base to support price outlook
- Increased input costs may create a floor for prices
 - ◇ Crude and coal prices appear to have found a new bottom
 - ◇ Most producer country currencies have started appreciating

Aluminium Industry Drivers

- YOY - Realizations improved due to higher LME, despite lower local market premium
- Regional premium seem to have bottomed out
 - In January 2017 MJP recovered to USD 95/t
- Input cost continued to remain supportive
 - However, both energy and alumina prices have started hardening
- India demand was lackluster due to lower off take from power sector

Key macro drivers	Q3 FY16	Q3 FY17	YoY%	Q2 FY17	QoQ%
LME (US\$ /T)	1495	1710	14%	1620	6%
Premium (MJP) (US\$/T)	90	75	-17%	75	0%
Rs./US\$	65.9	67.4	2%	67.0	1%

Copper Industry

- Higher Copper LME - Stronger demand in China and expectations around higher infrastructure spending in US
- Supply uncertainties and improved demand for concentrate has resulted in decline in Benchmark TC/RC
- Indian players were further impacted due to sharp drop in Sulphuric acid & DAP realization

Key macro drivers (Q3 FY 17 vs Q3 FY 16)			
TCRC (US\$/lb)	LME (US\$/MT)	Rs./US\$	Acid Price (Rs./MT)
			DAP Realization (Rs./MT)
