Re: Scrip Symbol: CENTUM/ Scrip Code: 517544

Dear Sir/ Madam,

**Sub: Investor Presentation** 

This is to inform you that pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the "Listing Regulations"), read with Part A of Schedule III of the Listing Regulations, we hereby enclose the Investor Presentation. Kindly take the same on your records.

Yours faithfully,
For Centum Electronics Limited

Indu H S

**Company Secretary & Compliance Officer** 

Encl: as above

# Snapshot

25+ years of domain expertise in Electronics Design & Manufacturing Solutions

Global Operations with strong presence in India, Europe and North

America

Concept to Commissioning capabilities

1,800 Employees 650 Designers

Flexible Engagement Models

Strong Supply Chain Network

Strong relationship with marquee global clients

Serving segments with Hi-Tech, High Entry Barriers

Healthy Order Book of ~INR 11,200 Mn\*

Single Source Supplier for ~80% of manufactured products

75% Revenues from Overseas Customers in Advanced Economies

Strong Corporate Governance

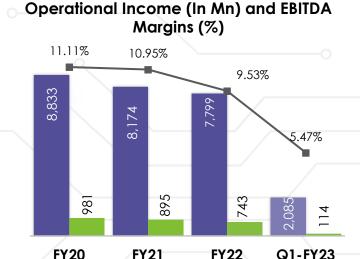

## **Company Overview**

- Founded in 1993, Centum Electronics Limited (Centum) is one of the largest Electronics System Design and Manufacturing (ESDM) companies in India.
- Competencies across product design and manufacturing of complex and critical products and supplying to marquee customers in the most advanced economies as well as in India.
- Offering entire spectrum of design services and manufacturing of systems, subsystems for mission critical products in Defence, Space, Aerospace, Industrial, Transportation and Medical sectors.
- World-class design & manufacturing facilities across North America, Europe and India, with cutting edge infrastructure as well as a global supply chain capable of delivering products with high quality and reliability anywhere in the world.

#### FY22 Key Business Segments:

- Engineering R&D (ER&D) Services (37%) Involves conceptualizing and designing of Electronic Hardware, Embedded Software, FPGA, Analog, Radio Frequency products, etc.
- Electronic Manufacturing Services (EMS) (26%) Services include manufacturing services solutions focused on a High Complexity products in high technology segment
- Build-To-Specification (37%) Services include turnkey solutions to take project from conception to mass production quickly and efficiently.

Operational Revenue EBITDA — EBITDA Margin

#### FY22 Geographical Breakup

# Defense, Space & Aerospace 44%

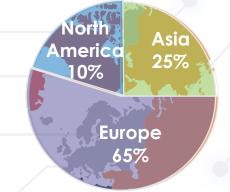

#### Industrial & Energy

#### Healthcare

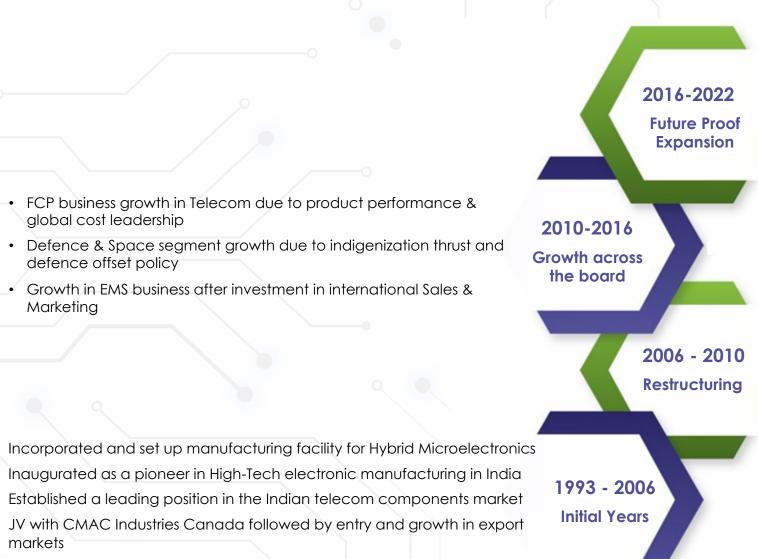

## **Key Milestones**

- FCP business growth in Telecom due to product performance & global cost leadership
- Defence & Space segment growth due to indigenization thrust and defence offset policy
- Growth in EMS business after investment in international Sales & Marketing

- Inaugurated as a pioneer in High-Tech electronic manufacturing in India
- Established a leading position in the Indian telecom components market
- JV with CMAC Industries Canada followed by entry and growth in export markets
- Foray and growth in EMS business following Solectron's acquisition of **CMAC Industries**

- Greenfield expansion for EMS capacity
- Acquisition of Adetel Group to expand service offerings of ER&D Services, establish global footprint across Europe and North America and new customer/market access
- Exit from FCP component business through the sale of 51% stake to JV partner
- Capacity enhancement for space & defence business to support strong order book growth

- Demerger of EMS into Solectron EMS
- Buy back & Merger of EMS following Flextronics' acquisition of Solectron
- Centum Rakon JV formed for Frequency Control Products (FCP) for technology and market access to global OEMs
- Exit of domestic telecom components business for C-DOT

#### **Board of Directors**

Apparao V Mallavarapu - Chairman & MD

Apparao (Rao) V Mallavarapu founded Centum Electronics in the year 1993. Under his able leadership Centum has grown to become one of the largest electronics companies in India. He has initiated and successfully managed joint ventures with several multi-national companies. He has been recognized as "Electronics Man of the Year" and "Champion of Innovation" by a premier organization.

Nikhil Mallavarapu - Executive Director

Mr. Nikhil has been associated with Centum since 2012 has served in various leadership positions including overall business unit management and group level Corporate & Strategy Development. Prior to joining Centum, he worked at the multinational semiconductor company-Analog Devices in Boston. Mr. Nikhil holds MSc and BSc Degrees in Electrical and Computer Engineering from Carnegie Mellon University and an MBA from the INSEAD Business School in France.

Manoj Nagrath - Independent Director

Manoj Nagrath is the Managing Partner of the firm S.P. Nagrath & Co. LLP, Chartered Accountants, a highly reputed accounting advisory firm with offices in New Delhi and Bangalore. He has advised several large multinationals on a range of cross-border and domestic transactions. Mr Nagrath became a member of the Institute of Chartered Accountants of India in 1983.

Pranav Kumar N Patel - Independent Director

Mr. Pranav is the founder and CEO of MediTechSafe, USA an innovative healthcare-oriented cybersecurity company. Prior to this, he has held various senior executive roles including leading GE's Healthcare Services business in North America as well as Chief Marketing Officer at GE Aviation. Pranav has also co-authored 6 patents in the fields of Microwave integrated circuits, multi-chip module, packaging and energy storage systems

Rajiv C Mody - Independent Director

Mr. Rajiv C Mody is the Founder, Chairman, Managing Director & CEO, of Sasken Technologies Ltd. (Sasken). Under his leadership, Sasken has grown into a global powerhouse in Product Engineering and Digital Transformation services. Prior to founding Sasken, he worked with corporations like AMD, Seattle Tech Inc., and VLSI Technology Inc. Mr Mody has served as an Executive Council Member of NASSCOM (2001-2008) and is part of the Harvard Business School South Asia Advisory Board.

Dr. Swarnalatha Mallavarapu - Non-Executive Director

Dr. Swarnalatha Mallavarapu (Latha) is the Managing Director of Centum Industries Private Limited. Dr. Latha holds a Ph. D. in Physics and has worked at premier research institutes including the US Air Force Weapons Labs in Albuquerque, the Indian Institute of Science in Bangalore and the R&D division of Bharat Electronics Limited. Her research in thin films and devices for applications have been well recognized. Dr. Latha was a government nominated member of the Syndicate of Bangalore University and also served a Chairperson for FICCI Ladies Organization, Karnataka Chapter.

P. Thiruvengadam - Independent Director

Mr. Thiruvengadam was a National Director at Deloitte Touche Tohmatsu India Pvt. Ltd (DTIPL) providing leadership to the HR transformation practice. He has over 40 years of global experience in management consulting with expertise in HR Strategy & Talent Management, Business Process Improvement and Strategic Planning among other advisory services. He is a Cost Accountant from The Institute of Cost Accountants of India and a graduate from the Indian Institute of Technology, Madras.

Kavitha Dutt Chitturi - Independent Director

Mrs. Kavitha Dutt Chitturi is the Joint Managing Director at KCP Ltd., a diversified company involved in the manufacture of Cement, Heavy Engineering, Sugar and Power Generation. Under Kavitha's stewardship, KCP has also ventured into the hospitality industry. She is Chairperson FICCI, Tamil Nadu State Council and has served as Joint Managing Director of The KCP Limited, Kavitha, among other responsibilities, also holds full charge of the Human Resource functions of the Group.

# **Key Management Personnel**

K S Desikan - Chief Financial Officer

K S Desikan has been serving as CFO at Centum since 2001 and has been instrumental in the development of the strategy and growth of the company. He has an overall experience of 34 years. Prior to joining Centum, he served leading organizations like Tube Investments of India and BPL Ltd in various capacities. He is a commerce graduate, Chartered Accountant and Cost Accountant.

Eric Rouchouze - CEO - Centum Adetel

Graduated from a Business School in 1995, he spent most of his career in engineering services & technology consulting companies. Eric joined the ASSYSTEM group in 1997, where he worked for several years as a business manager for customers in the nuclear sector. He has been working in AKKA for 19 years as COO France and was a member of the group's Executive Committee. With his 25 years of experience, Eric will be leading the CENTUM ADETEL strategy and he will be in charge of accelerating the growth of our Group both in France and abroad.

Francois Sebes - Executive Vice President - Strategic Initiatives

Francois Sebes founded Adetel Group in 1990 as a provider of Engineering Services specialized in electronics products and systems in high technology sectors. Under his leadership, the company has grown into a highly reputed company with 600 employees in France, Canada and Belgium and India. He facilitated the acquisition of Adetel by Centum Electronics to benefit from the advantage of greater international presence and strong manufacturing capability. Prior to this, he worked at THALES Avionics and CISI Group.

Vinod Chippalkatti - President - SEBU

Vinod Chippalkatti is responsible for the Build to Spec business in Centum delivering mission-critical products for Satellites, Launch Vehicles, Radars, Missiles among others. He completed his Bachelor's and Master's degree. He has been with Centum for 20 years in different leadership positions including heading the design and engineering function. Prior to joining Centum 20 years ago, he spent 10 years at the Indian Space Research Organization working on India's first series of communication satellites.

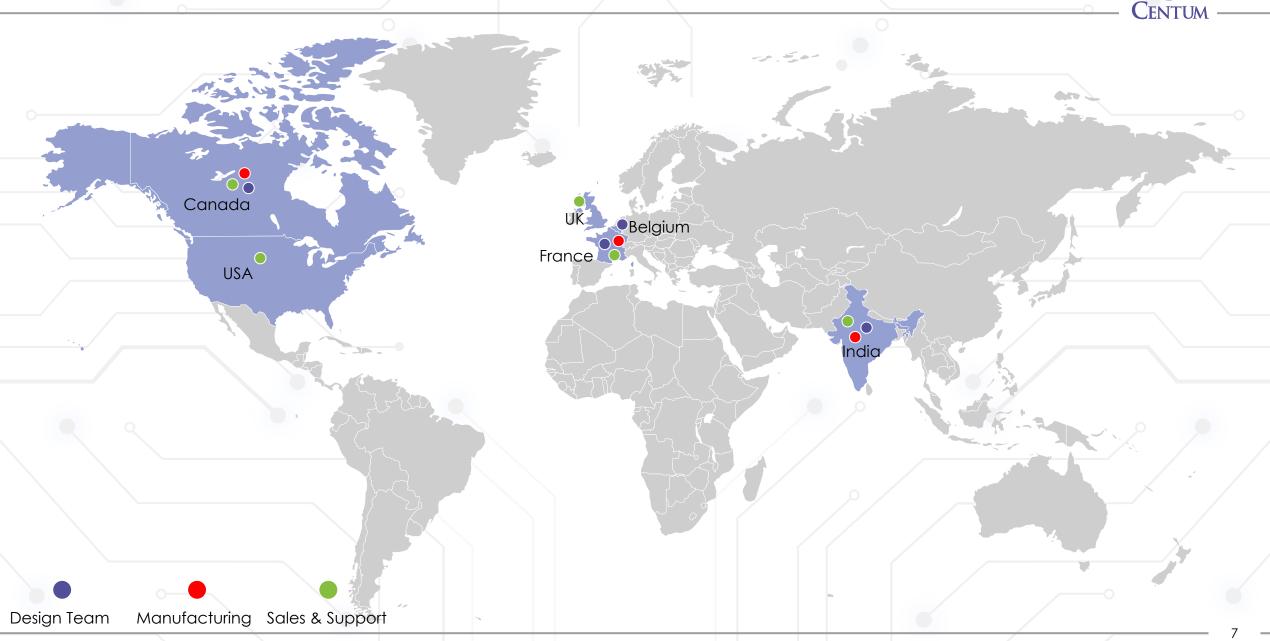

Suresh Iver - Chief Growth Officer

Suresh is a Techno-Commercial leader who comes with 25+ years of experience in Global Sales, Supply Chain Consulting and Digital Transformation. Most recently, he was President & CEO of Corbus, a Supply Chain Consulting firm and prior to that was Vice-President and Global Practice Leader for Supply Chain & Procurement Services with Genpact operating out of Cincinnati, Ohio. He has worked extensively with clients helping them with Business Transformation, Lean Digital Manufacturing and Operations Improvement Programs.

Medical ISO13485

Automotive IATF 16949

Railways IRIS - Rev 2

French R&D certification

NABCB ISMS 001

Information Security & Management system ISO 27001

Environment ISO14001

Health & Safety OHSAS 18001

ESD 20:20

Approved R&D facility by DST & GOI

<sup>\*</sup>Additional customer-specific certifications required to be qualified as a supplier

## Centum's Value Proposition

- Global Footprint close to the customers
- Uniquely positioned as a one-stop-shop solution provider with end to end capabilities.
- Flexible engagement models tailored to project-specific needs

- Competitive Engineering R&D by balancing onshore/offshore mix
- Competitive
   Manufacturing by
   leveraging Indian cost
   base and supply chain
   strengths
- Focus on "Design To Cost", & "Total cost of ownership"

- Integrated Fast New Program Management can reduce time to market, support costs
- Early implementation
   of sourcing and
   industrialization strategy
   improves quality in
   ramp-up

- Strong Domain Expertise
   to conceptualize &
   realize High-Reliability
   Electronics
- Quicker time to market through Centum industrialization/NPI framework
- Ability to manage product lifecycle challenges

CONVENIENCE & FLEXIBILITY

COST

TIME TO MARKET

PROACTIVE LIFE CYCLE MGMT.

## **Future Growth Strategy**

Clear focus towards achieving sustainable growth, while enhancing margin profile by reducing costs and deleveraging

Expand customer portfolio domestically and internationally

Leverage "Make in India" policy boosters

Enhancing customer penetration in high growth industry verticals like Healthcare, Automotive etc.

Identify opportunities in "New space" global supply chain

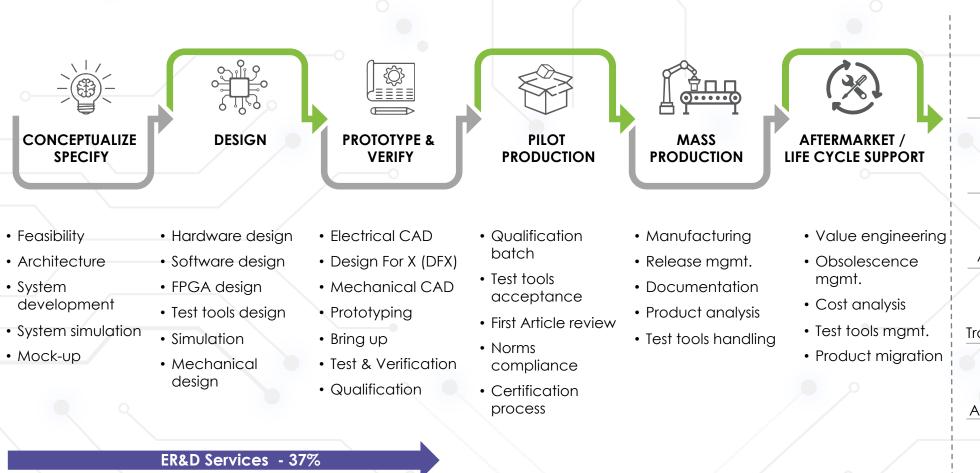

Prudent expansion in infrastructure & technical competencies to support growth

Enhance solutions towards Industry 4.0 for increased digitization and automation

BTS - 37%

**EMS - 26%** 

# **Engineering R&D Services (ER&D)**

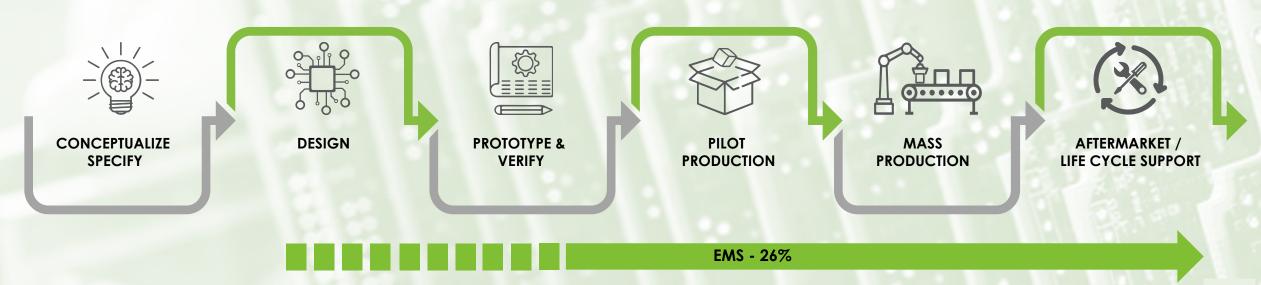

- Engineering Services involve conceptualizing, designing and certifying of Electronic Hardware, Embedded Software, FPGA, Analog, Radio Frequency products, Power Electronics, etc.
- Centum Group has a global design strength of over 650 design engineers and for the last 25 years, the company has been helping customers turn their ideas into products.
- Centum's engineers work together in multidisciplinary teams to realize customized products for mission-critical applications in high technology segments.
- The company's design centers are located in Europe, North America and India, which enable the company to work closely with international customers while bringing together the best talent from around the world to work on complex problems and provide a competitive solution by managing the optimal onshore/offshore mix for the projects.
- Centum also provides flexible engagement models depending on the specific project requirements. Customers can choose between Consulting Engagements and Fixed Price Contracts.

# Electronic Manufacturing Services (EMS)

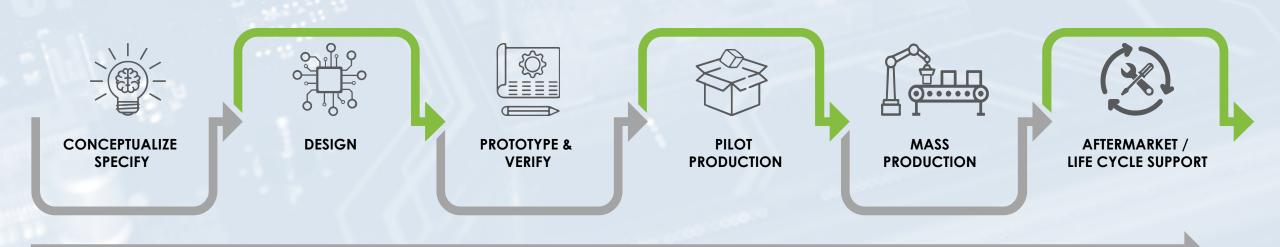

- The company's EMS Services include manufacturing solutions focused on a High reliability, High Complexity products in the high technology segment
- Centum offers a wide range of manufacturing solutions from Printed Circuit Board assemblies to Complex box builds, Line Replaceable Units (LRU) and full system integration.
- The company helps its customers realize challenging products by having customer-focused teams that leverage their streamlined processes and systems and adapt them to the specific requirements of the customer and product where necessary.
- By providing scalable manufacturing solutions and a flexible, proactive approach to managing the supply chain and lifecycle related challenges, Centum helps customers achieve their goals of lower Total Cost of Ownership and reduced time-to-market among others.

# **Build to Specification (BTS)**

- The Built to Specification services include taking a project from conceptualization to mass production quickly and efficiently. Centum's unique positioning with a full range of integrated capabilities makes it the ideal product realization partner.
- Customers choose turn-key build to spec offering due to the convenience of a Single Point of contact for Design/Engineering, Industrialization and Manufacturing which reduces the need for multiple interfaces at each stage of the project and also fastens the products time-to-market and facilitating a Design-To-Cost approach and reducing the Total Cost of Ownership. This engagement model involves higher IP and value creation opportunities for both the customer and for Centum.
- The company is also able to better the product Lifecycle management by proactively and effectively managing issues such as obsolescence, performance upgrades, market-specific localization and cost reduction.

BTS - 37%

## Aerospace, Space & Defence

#### **AEROSPACE**

- The Aerospace industry has several ongoing technological initiatives to make aircrafts more fuel-efficient, environmentally friendly and safer, which involves incorporating more electronics on board, making avionics platforms more configurable, and of course factoring in environmental issues and reducing human error to improve safety.
- Alongside products for command & control, power electronics and energy storage applications, Centum is also developing activities in ground and flight testing -- using its own test benches and simulators.
- Centum plays a key role in the global aerospace supply chain delivering critical electronics for cockpit computers, Air Traffic Management and also works closely with OEMs to design next-generation flight controls, Power solutions among various other technologies.

#### **SPACE**

- Space technology is progressing at a rapid pace driven by commercial applications such as satellite broadcasting, communication, Earth observation, geo-location, and global navigation equipment and services.
- Centum has established a credible track record since 2002 in this segment delivering complex products that address applications in launch vehicles, satellite payloads, satellite bus systems as well as ground equipment.
- The company is also a leading electronics industry partner and one of the largest private contractors for ISRO, involved in its various stages of design, development, qualification and production of electronic modules, subsystems and systems for multiple applications in satellites and launch vehicles. Keeping in mind the growing number of missions of ISRO.
- Centum has made significant investments to ensure that they can deliver products with the right quality, technology and in required quantities to be a trusted partner. It has delivered mission-critical electronics on almost all satellite programs of ISRO including the ambitious Chandrayaan and Mangalyaan projects, and also delivered 300 to 500 components for almost every Indian space mission.

#### **DEFENCE**

- Centum started its defence business in 2010 and it is today the largest industry vertical for the company. Over the years the
  company has been successful in developing and manufacturing critical systems for major Defense programs that span
  across the land, air and naval systems with applications in Missiles, Electronic Warfare, Radar, Military Communications, and
  fire control amongst many.
- For the past two decades, Centum has also been engaged in the development and manufacture of modules, subsystems for missiles, radars and military electronic warfare communication applications for DRDO laboratories, Ordnance Factories and other domestic defence PSUs, and over the past decade, Centum has become one of the select few Indian partners to international defence OFMs as well.

## **Industrial & Energy**

Industrial Equipment Diagnosis

Industrial Circuit Breaker Control System

Solar Energy Power Cabinet

HIL Test Simulator Turbo

Alternator Regulation

Electronics for Phased Array Flaw Detectors

collaborative and result in efficiencies for end-users.

solutions for railway infrastructure projects.

Smart Valve Interface

#### Industrial Automation

Industrial 2 Wire Transmitter

Distributed Control Systems

#### **Power Grid Industry**

 The digital transformation in utilities, infrastructure and manufacturing among other industrial segments is driving new products that are smart,

Centum enables its customer to realize such products for applications in

 Centum's expertise in energy conversion and storage technology has helped customers develop customized Microgrid solutions as well as new

automation, control and measurement, energy among others.

Scada System for Power Plant Automation

Teleprotection Equipment

Utility Communication
Equipment

#### Healthcare

- The field of healthcare is rapidly adopting new technologies to augment the quality of treatment and create efficiencies for healthcare providers.
- Centum has engineered a variety of medical devices and equipment for the Healthcare industry that include digital radiography systems, automated pumps for drug injection, ultrasound equipment, patient monitoring devices, customized room controls for operation theaters among others.

Electronics for Infusion
Pump

Electronics for X-ray Flat Panel Detectors

Medical Injection System

Medical Electronic Board

Medical Panel for Surgery Room

Medical Flat Panel Acquisition Board

Medical Product
Test Area

### **Transportation & Automotive**

#### **TRANSPORTATION**

- Centum is at the forefront of the Transportation sector working very closely with the leading global OEMs and rail operators on developing the next-generation technologies for rolling stock and signaling applications.
- Centum has developed proprietary technologies in two key product lines listed below, where our products have been deployed on board trains in North America, Europe, Asia and Australia for Signaling equipment and Passenger Information Systems
- In addition, Centum provides specialist engineering services and manufacturing services to help clients to meet operational, commercial and regulatory requirements.

Railway Automation System

Railway Embedded Controller

Railway Embedded Computer Board

Railway Energy Storage System (NEOSEE)

Railway Energy Module (POWERLIC)

#### **AUTOMOTIVE**

- The automotive industry is going through a dynamic transformation with new players entering the market introducing disruptive technologies incorporating electronics for applications such as autonomous driving, powertrain architecture, connectivity among others.
- Being a specialist in electronics design and manufacturing services Centum supports customers navigate this transformation by turning big ideas into reliable and performing solutions
- Centum's strong knowledge and experience of developing products to the required safety standards as well as past references in developing similar products for the aerospace and rail transport domains has positioned us well to support our customers as they develop new products and technologies to stay ahead.

Assisted Car Navigation

**Automotive** Telematic Module

## **ESDM Industry**

- The Electronics System design & manufacturing (ESDM) sector in India is predicted to reach to US\$ 220 billion by 2025, expanding at a 16.1% CAGR between 2019 and 2025.
- In a span of two years, India's export of electronic goods has grown 85% to reach USD 11.8 Bn in FY20, increasing its share in the global electronics market to 3.3%
- Indian Electronics System Design & Manufacturing (ESDM) market is valued at USD 105 Bn in FY20 and is expected to grow steadily and reach USD 220 Bn by 2025. The Electronics System Market is expected to grow 2x from USD 81 Bn in 2020 to reach USD 160 Bn by 2025. The Electronics Design Market is expected to grow from USD 24 Bn in 2020 to reach USD 60 Bn by 2025.
- With a strong network of science & technology institutions and trained manpower, India has the third largest-scientific and technical manpower in the world. This makes the country a strong base for future innovations and for the availability of a skilled workforce.
- Government of India's continued focus on Self-Reliance with specific policies to promote manufacturing in India. The Reduction of corporate taxes, announcement of schemes to incentivize manufacturing and capital investment in India combined with a large, growing domestic market and globally competitive wage rates present a very good case for Indian manufacturing.
- The US-China Trade war which triggered many US companies to revisit their supply chains in light of the tariffs levied on the import of electronic items from China.
- The Covid-19 pandemic which has accelerated industries world over to de-risk their manufacturing and supply chain footprint and to ensure business continuity plans are put in place. This is has resulted in many companies moving to a "China plus One" strategy with India being a strong contender for several companies.

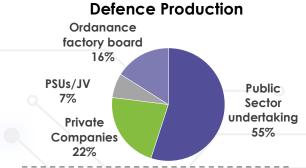

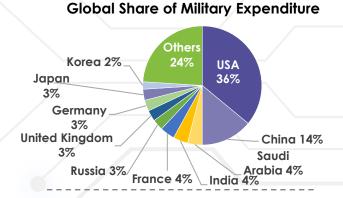

Source: Singhi Advisors ESDM Report

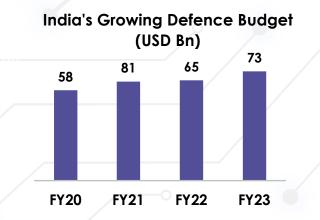

## Space, Defence, Transportation & Other Industries

- **Defence:** The Indian government has set the defence government is taking several initiatives to encourage domestic manufacturing and reduce its external dependence for defence procurement. In January 2021, Defence Research and Development Organisation (DRDO) announced that it will support at least 30 start-ups every year to develop innovative products for Indian defence forces. The government announced measures under the 'Make in India' initiative, including raising foreign direct investment (FDI) limit from 49% to 74% via the automatic route; this resulted in significant FDI inflows in the defence and aerospace sector.
- **Space:** The number of satellites and launches has steadily increased over the past 5 years for applications ranging from communications, defence, earth observation and other scientific missions. The demand for more satellites remains strong as transponder capacities need to be augmented to support increasing data/broadband and DTH requirement. ISRO's Human Space flight program, other scientific and earth observation missions as well as MoDs objective to strengthen India's space warfare capabilities, provide further impetus to the sector over the medium term.
- **Transportation:** The Transportation sector is projected to remain relatively stable despite lower ridership in the short term. Governments are expected to continue major infrastructure projects across geographies to support longer-term objectives of managing mobility more efficiently in cities and towns. Smart and Green mobility technologies will remain a focus in the years to come.
- Industrial: The Industrial Sector address a wide range of application including Oil & Gas, Industrial Automation for process industries, Electrification, Utilities etc. The sharp decline in oil price combined with the temporary reduction in capex budgets for many industrial companies is expected to have a short-term adverse impact in this segment. On the other hand, electrification and power grid infrastructure projects are expected to remain relatively stable.
- **Medical:** The Medical devices industry is a growing segment and has attracted all the more attention in the wake of the Covid-19 pandemic. There is also expected to be more investment and demand for remote monitoring and devices that enable telemedicine and predictive diagnostics. Regulation and a growing share of healthcare spending in emerging economies are also key focus themes in this segment in the near to medium term.

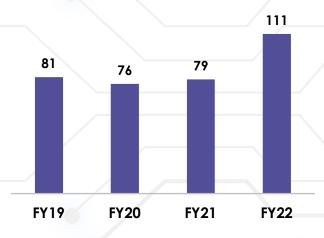

# **Engineering R&D Service Industry**

- Global engineering R&D services outsourcing market is anticipated to reach more than USD 650 billion by 2025 according to a new report published by The marker research report. The major factors which are driving this market are the access to low-cost highly skilled resources which can work towards complex tasks of not only designing and testing but also on validation, simulation and execution.
- Global Engineering R&D (ER&D) space and estimated that the Global ER&D spend by organizations worldwide stands at USD 1.4 Trillion in 2019, and is expected to grow at a CAGR of 7% to cross USD 2.2 Trillion by 2025.
- India will account for 41% of the global digital engineering services market by 2025, according to a report by consulting firm Zinnov. As of now, India accounts for \$10.6 billion of the digital engineering market share which is expected to increase four-fold in five years.
- The engineering goods export of India had a share of 27% out of the total exports during April-December 2021 from the country. During 2021-22, the total engineering goods exports of India were valued at US\$ 111 billion; a 52% increase from the previous year.
- The Indian ER&D sector already employs about 7,00,000 people in the country, which could rise to one million by 2025, if the conditions for growth become more favorable
- India's engineering R&D market will increase from US\$ 28 billion in FY18 to US\$ 42 billion by FY22F. India needs Rs 235 trillion (US\$ 3.36 trillion) of investment in infrastructure in the next decade. The export of engineering goods is expected to reach US\$ 200 billion by 2030.

#### India's Engineering Export (USD Bn)
