## Q3 Key Highlights

- Consolidated Revenues in Q3 FY21 increased by 1.90% to Rs. 299.88 Lakhs. EBITDA surged by 527.04% to Rs. 28.34.
- Consolidated PAT grew by 470.13% to Rs. 13.52 Lakh.
- Standalone EBITDA grew to Rs. 3.86 Lakhs .

## Q3 Key Highlights

## CHEMICAL INTERMEDIATES

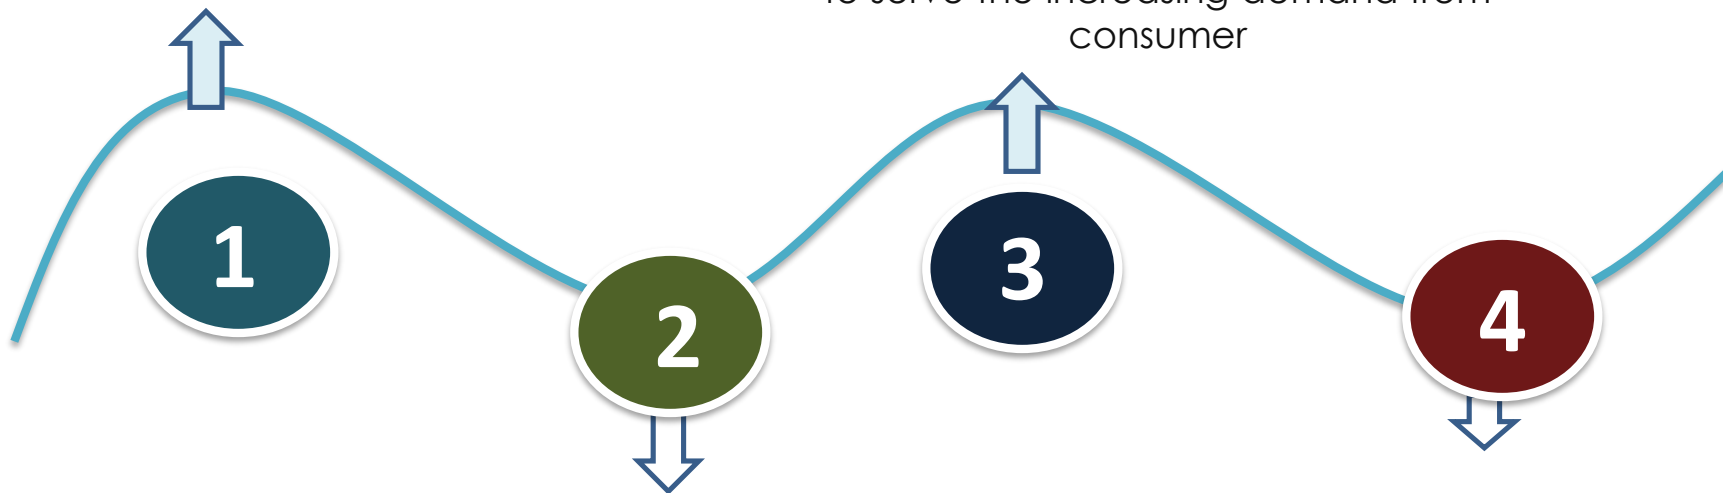

- Chemical intermediates are a part of petrochemicals, which are then processed further in order to derive chemicals of various kinds
- Intermediates are also referred to those molecules that are generated when a chemical substance is converted into a final product.
- These chemicals are used in various applications. For example, they are utilized in the manufacturing of detergents, coatings, plastics, dyes, fibers of elastic textile, and pharmaceutical & crop protections.
- The Growth of Chemical Intermediate Industry is directly proportional to the growth of its Supplementary industries such as pharmaceuticals, textiles etc.

## BRIEF ON CHEMICAL INTERMEDIATES INDUSTRY

The Global Chemical Intermediate Market is expected to grow at healthy annual increment which is driven by demand from end use industries

The industry is increasingly shifting towards Asia Pacific region in line with the shift of its key consumer industries such as automotive, electronics to leverage higher manufacturing competitiveness of emerging economies and to serve the increasing demand from consumer

The Chemical intermediate industry in India provides several building blocks and raw materials for many industries, textiles, paper, paints, soap, detergents, pharmaceuticals and agrochemicals etc.

Over the past few years, Chemical Intermediate Market has witnessed healthy demand from end use industries such as pharmaceuticals textiles automobiles, paints, papers, soaps detergents.

## INDIAN CHEMICAL INTERMEDIATE INDUSTRY

Indian Chemical Intermediate Market is estimated to grow above average annual growth rate of the world market

Several initiatives taken by Government of India will support the growth of chemical industry in India

Regionally, western India has been the dominant region contributing approx. 50% to the Gross Value Added (GVA) for the Chemical Intermediate sector.

India accounts for approximately 16% of the world production of dyestuff & dye intermediates, particularly for reactive acid & direct dyes

## Growth Opportunities due to Make in India

### GOVERNMENT INITIATIVES

Several initiatives taken by Government of India will support the growth of chemical industry in India. One of such initiative is 'Make in India'.

100% FDI is allowed in the Chemical Sector which is another benefit considering the intermediate sector.

Increased custom duties leading to greater domestic production and lesser import.

### STRONG R&D

The R&D investment and facility of Indian companies have been limited traditionally, but the situation is changing slowly with more and more companies looking at R&D as a key source of staying in competitive environment of Chemical Intermediate Market in India.

### GROWING MARKET

The Chemical industry in India stands at USD 178 Bn as of 2019 which is expected to reach USD 304 Bn by 2024-25 (nearly double), at an annual growth rate of 9.3%. Further, at present the consumption of speciality chemicals is low compared to the world average, hence there is a enormous scope for growth in chemical intermediate products.

# SWOT ANALYSIS

## STRENGTHS & WEAKNESSES

- **STRENGTHS**

- Experienced Management
- Strong customer base in domestic market
- Presence in export market
- Manufacturing capacity
- Skilled work force
- Environmental clearances.
- High standards of environment, health and safety norms.

- **WEAKNESS**

- High R & D Costs
- Lack of quality raw materials in domestic market, hence incurring expenses on import of raw materials.

## OPPORRTUNITIES & THREATS

- **OPPURTUNITIES**

- **Increased domestic demand** due to slow down in Chinese Market
- Shift of focus on India due to slow down in supply of chemical products in China due to new environmental policies.
- Competitive location of the manufacturing unit.

- **THREATS**

- Unstable market
- Increased fuel charges
- Prices of petrochemicals
- Probability of environmental issues that may come up in the near future.

## KEY TO SUCCESS

Good reputation in the market

Own brand value within the industry

Skilled and experienced personnel

Consistent delivery of Quality Products

Export across the globe such as in US, Mexico, Columbia, Latin America, Turkey & South Africa.

## ONGOING PROJECT

- The Project is situated at Dahej, which is a state government promoted industrial area under the PCPIR scheme.
- The size of the acquired land is 27054 sq. mtrs.
- The benefit of having plant in such place is that, the units at Dahej Industrial Estate has locational benefit to manufacture certain chemicals in the entire state of Gujarat, manufacturing of such chemicals are prohibited at any other place except Dahej in Gujarat.
- The company has acquired environmental clearances for approx. 70 products
- Adequate affluent disposal system in Dahej will benefit the plant.
- Technical know how to undertake the operations at the plant of such size.
- Due to world-wide pandemic situation the international buyers have started to look for alternate source of Chinese manufacturer which will give direct benefit to Indian chemical manufacturers.

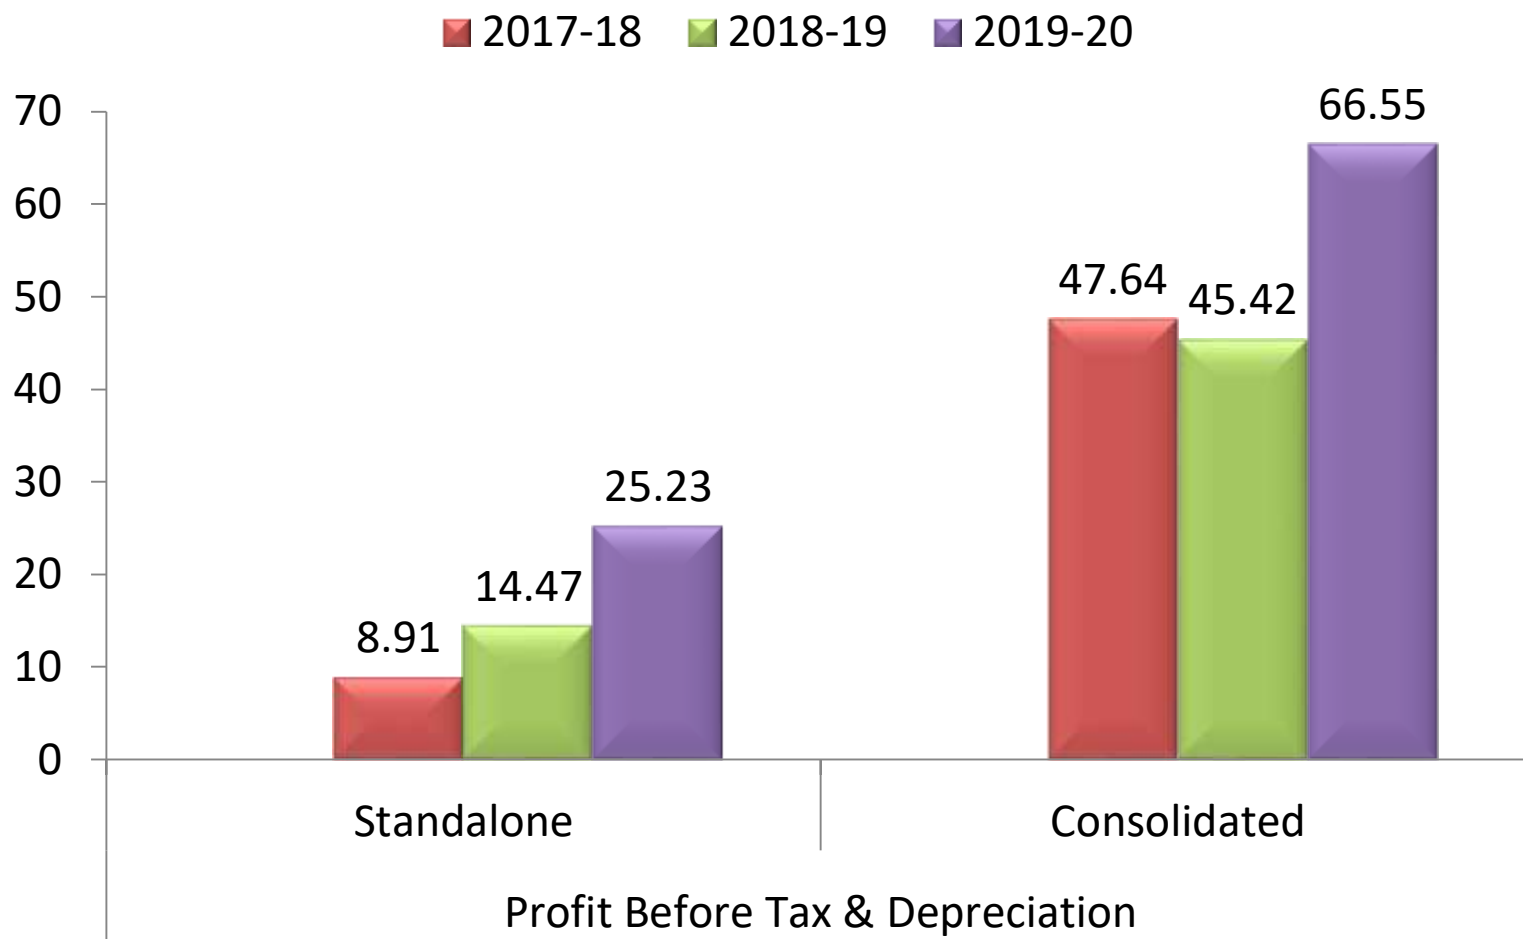

## Total Revenue (in Lakhs) – Last 3 Financial Years (Consolidated)

## PROFIT BEFORE TAX & DEPRECIATION (In Lakhs)

### Profit After Tax - Growth Rate

## Share Price of KCL

## Outlook

- ❖ The Company is hopeful to surpass the current profitability.
- ❖ The plant in Dahej has started its production, which will result into generation of revenue in increasing trend. The initial cost of operation will also rise proportionately.
- ❖ Continue to focus on increasing domestic presence and capture market share
- ❖ Company is expecting to improve quarter after quarter revenue growth to reach pre-covid levels.

Thank You
