Pellet Price Outlook in Domestic Market

- Vale – one of the world’s largest iron ore producer reports a supply disruption of 10-11 mnt pellets production and 40 mnt iron ore production annually due to the de-commissioning of dam. The de-commissioning of dams is expected to take place over a period of next three years.
- Vale proposes to offset Iron ore/Pellet supply disruption by increase in production from the other mining projects. However, replacing pellet supply is expected to be challenging. This may lead in increase in Pellet prices.
- Currently India account for 40% of import of Pellets in China & the Indian Pellet export prices has already shown increase recently after vale dam Collapse.
- The prices are expected to remain firm for next 2-3 years on account of :-
 - Higher pellet demand in domestic market due to Increase in production volume of finished steel over last 2 years and the firm global steel prices
 - Overall Increase in demand of Pellet from China in view of environmental restrictions on use of Sinter.
 - The expected slow down in Iron Ore mining in Odisha on account of expiry of mining leases of merchant Iron Ore mines in March 2020.
 - Vale dam collapse and subsequent disruption in production iron ore and pellets.

Outlook on Global Steel Demand

Source : CRISIL Research, JPC

Domestic Demand Outlook

- Domestic steel demand to grow by 7% to 7.5% in FY 19
- Shortage of lumps in domestic market driving demand for Iron Ore Pellets
- Affordable housing and infrastructure projects to propel demand
