- Q3CY2017 actual deliveries have been far lower than scheduled. Due to bleak employment scenario owners have refrained from taking delivery. A lot of deliveries due in 2016 were pushed forward to 2017 and have not yet been delivered. Going forward slippage is expected to remain high.
- Although the activity has started to pick up in the Jack-up and OSV space, the charter rates are expected to remain at low levels till the excess supply in the market is cleared.
- In case of PSVs and AHTSVs more than half the fleet is either idle/stacked or working in spot market at a very low utilization.
