Robust Industry Fundamentals with Strong Regulatory Support - Growth to Continue

Industry Snapshot

- Massive Govt. thrust to boost financial inclusion - NBFC-MFIs (with 45mn borrowers and outstanding FY18 GLP of Rs. 889 bn) to play a key role in furthering this
- Significant opportunity to capture share from unorganized players will continue to drive MFI industry growth
- Presence across 32 states/union territories
- Yet, it is highly underpenetrated
 - Rural areas accounted for only 16% of overall o/s bank-credit while comprising of 2/3rd households and contributing ~47% of FY17 GDP in India

Low penetration of banking credit in rural areas (FY17)

NBFCs gaining market share in microfinance industry

Satin Surges Ahead Faster Than Industry

Industry is growing in last 5 years at a CAGR of ~26%

Despite the setback of demonetization, Satin growing at a healthy rate

- Data for industry is compiled from MFIN Micrometer reports and includes MFIs and SFBs
- Satin GLP is taken on a consolidated basis, since TSL was acquired during FY17

2 Excellent Management of Demonetization

Strong Recovery in Collection Efficiency

- **Collection efficiency of newly acquired clients (from 1st Jan 2017 to 30th Jun 2018) stood at 99.6%**

PAR and Expected Credit Loss (ECL)

Gradual improvement in PAR across buckets indicates that the worst is over⁽¹⁾

ECL methodology prescribed in IND AS is based on the principle of providing for expected future losses, rather than incurred losses.

Expected Credit Loss (ECL): Probability of credit losses over the expected life of the financial asset.

ECL Calculation = Exposure at Default (ED) x Probability of Default (PD) x Loss Given Default (LGD)

ECL computation is based on analysis of historical portfolio PAR trends and macro economic parameters. Given the backdrop of impact of demonetisation on portfolio quality, management has remained conservative in approach. ECL computation will evolve as portfolio quality improves and returns back to normalcy.

Conclusion

Shaping up of a Future ready Business model

While the industry was grappling with collections and significant portion of our AUM was in affected geographies, our efforts persisted on several other fronts

Focus on Product Portfolio

- Satin Housing Finance, incorporated in Apr'17, disbursed its first loan in Feb'18 – Focus is on monetization of rural assets. Satin Housing Finance had received the NHB license in Nov'17.
- Collection efficiency of newly acquired clients since Jan'17 is at 99.6%
- Tied up with IndusInd Bank in Q3FY18 for Microfinance loan products
 - To spur growth in microfinance portfolio and ease capital adequacy requirement
- MSME is scaling up well with focus on secured financing and high portfolio quality
- Recent tie up with a large NBFC – Pilot started in Q3FY18. Access to a significantly larger balance sheet (converted their OCRPS into equity in May'18)
 - With this strategic tie-up, product portfolio will expand to products other than microfinance
- All fresh JLG disbursement is Bi-weekly. Mix of monthly collections in our AUM has reduced from 33%⁽¹⁾ at the time of Demonetization (Nov'16) to ~1% today

Investor Confidence and Promoter Commitment

 - Rs. 38,879 Mn via Term Loans from banks & FIs, Non-convertible debentures, commercial paper and securitization transactions

Industry Overview -BC Operations, MSME Finance and Small Ticket Housing Finance

BC Operations

Number of BC transactions to soar given lower cost of operations

BC Transactions – Value (Rs. Bn) and Volume (Mn)

Massive growth potential for growth of BC portfolio of NBFC-MFIs

- BC portfolio to witness healthy growth as overall banking credit growth recovers, MFI industry stabilizes and competition from SFBs reduces
- Micro-lending through BCs have attracted banks due to several benefits such as:
 - Meeting of PSL targets without any direct involvement of banks as loans are sourced by MFIs, who are in direct contact with the borrower
 - Better resource utilisation for banks as rural branches get relieved from a significant part of low-ticket size micro-lending obligations
 - Improved portfolio quality - NBFC-MFIs have expertise in micro-lending as part of their core portfolio, unlike banks who primarily focus on industrial and other higher ticket-size lending

BC portfolio of NBFC-MFIs on the rise
