role of automakers and e-commerce companies to achieve our environmental sustainability goals."

He said the government's efforts to encourage the adoption of EVs, and steps taken towards setting up infrastructure backed by policy measures will help more companies adopt e-mobility. "India's dynamic public and private sector leadership, entrepreneurial culture, ability to build world-class infrastructure, and a unique confluence of IT and manufacturing skills will enable us to take a global leadership position in advanced mobility solutions," said Gadkari.

Mahindra's Treo Zor vehicles are a range of three-wheelers that have been deployed in seven cities, including Bengaluru, New Delhi, Hyderabad, Ahmedabad, Bhopal, Indore, and Lucknow, with Amazon India's network of delivery service partners.

The government's focus on encouraging the adoption of EVs and steps towards setting up charging infrastructure with the FAME 2-policy has

helped accelerate and chart the vision for EVs in India.

"We are proud to partner with Amazon in deploying Mahindra Treo Zor EV in their delivery partners' fleet," said Mahesh Babu, managing director and CEO, Mahindra Electric Mobility. "We believe, this will redefine India's logistics and last-mile delivery needs and at the same time help Mahindra and Amazon to achieve our sustainability goals."

In September 2019, Amazon became the first signatory of the Climate Pledge, which states that the company will be net-zero carbon by 2040 across its businesses — a decade ahead of the Paris Agreement's goal of 2050.

By joining the pledge and agreeing to decarbonise quickly, signatories will play a critical role in stimulating investment in the development of low-carbon products and services that will be required to help meet the pledge. In support of this commitment, 10,000 Amazon custom EVs will be on the road delivering to customers worldwide as early as 2022 and all 100,000 by 2030.

New Gati hub to handle 100 truckloads of cargo per day

ADITI DIVEKAR
Mumbai, 23 February

Express logistics services provider Gati-KWE on Tuesday said it would launch a surface transshipment centre (STC) in Delhi, in June this year, spread over 150,000 square (sq.) feet (ft).

To build the proposed facility, Gati-KWE has taken up space at Allcargo Logistics Park's 1.8-million sq. ft in Farukh Nagar, the company said in its release.

Located on the Western Peripheral Expressway in Delhi, the technology (tech)-enabled STC will offer superior transit time, accuracy in cargo delivery, and high locational advantage of access to all major national highways.

The company also has plans to come up with four more STCs in the near future.

Apart from consolidating Gati-KWE's logistics operations on the outskirts to decongest the city, the STC adheres to the green belt requirement.

The facility has been conceptualised to achieve economy of scale and provide unparalleled customer service. It will have the capacity to process cargo for short-haul deliveries in North India and long-haul movements across the country.

"We are setting up our largest STC in Delhi because the region has been witnessing robust economic growth. The advanced express logistics infrastructure at the facility, with enhanced operational efficiency, productivity, and throughput, will emerge a key enabler of economic growth in that region.

The STC will have the capability to process and transport a massive volume of cargo, thanks to the tech integration in the operations and time-defined short-haul and long-haul connectivity," the release quoted Bala Agoramurthy, deputy managing director at Gati, as saying.
