

October 30, 2021

National Stock Exchange of India Ltd. Exchange Plaza, Plot no. C/1, G Block, Bandra-Kurla Complex, Bandra (E), Mumbai - 400 051.

(NSE Symbol: GENUSPOWER)

BSE Limited P.J. Towers, Dalal Street, Fort, Mumbai – 400001

(BSE Code: 530343)

Dear Sir/Madam,

Sub: Investor Presentation

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we enclose herewith the Investor Presentation - October 2021.

We request to kindly take the same on record.

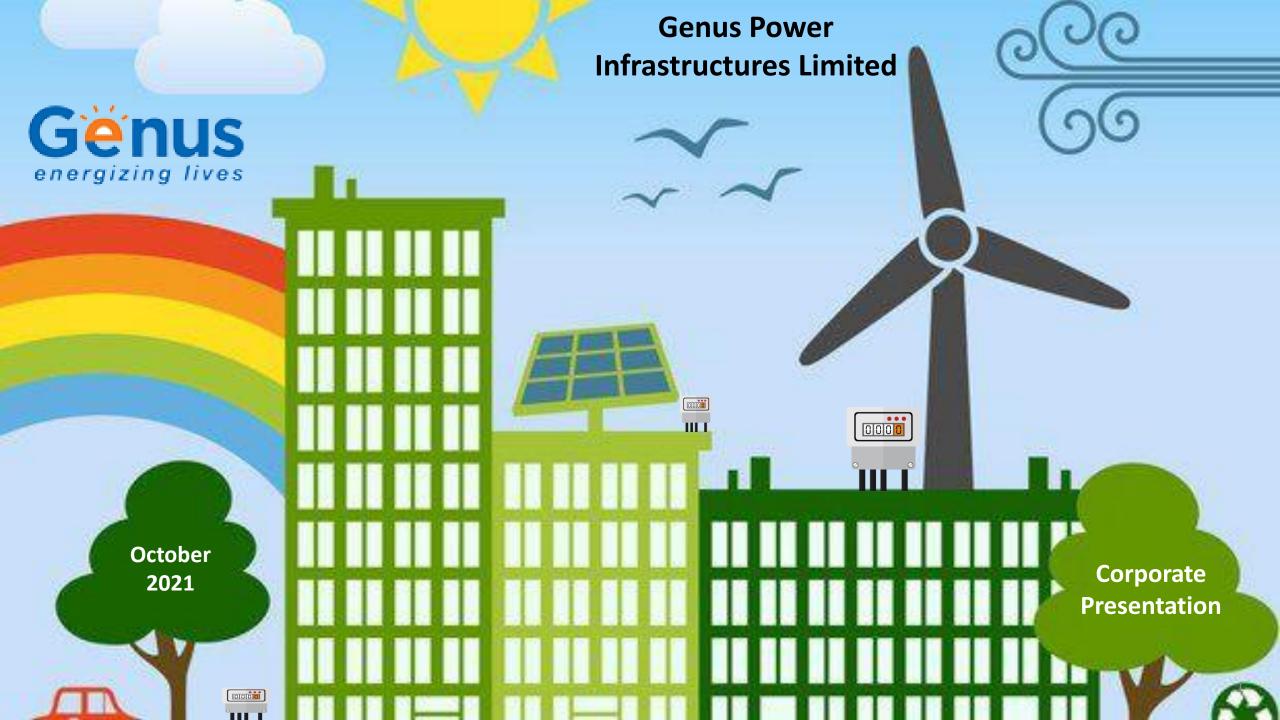

Thanking you,

Yours truly,

For Genus Power Infrastructures Limited

Ankit Jhanjhari Company Secretary

Encl. as above

Safe Harbour

This presentation and the accompanying slides (the "Presentation"), by **Genus Power Infrastructures Limited** (the "Company"), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment what so ever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.

Genus Q2 FY22: Performance Highlights

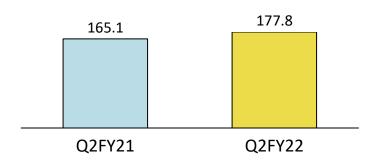

Key Highlights

Revenue for Q2Y22 was impacted as operations were severely hampered due to acute shortages of semi-conductors since the month of June 2021

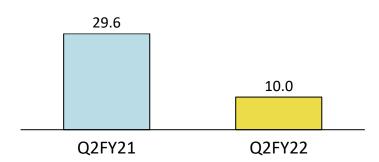

Higher raw material prices and lack of operating leverage due to lower capacity utilization resulted in lower operating margins

- · Became the First company in Asia Pacific to supply 1.5 million Smart Meters
- Indigenously developed Vending Software Agrim[™] accredited with **STS** certification
- In FY21, our team had won 7 Gold and 2 Silver awards at the "Quality Circle Forum of India" Haridwar Chapter, Delhi **Chapter and Guwahati Chapter**

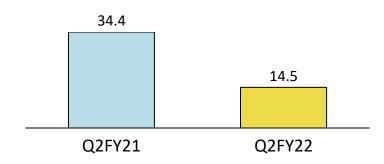

Revenue (Rs. Crores)

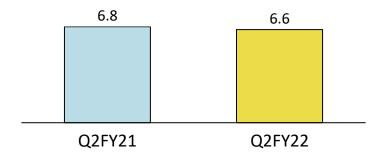

PBT (Rs. Crores)

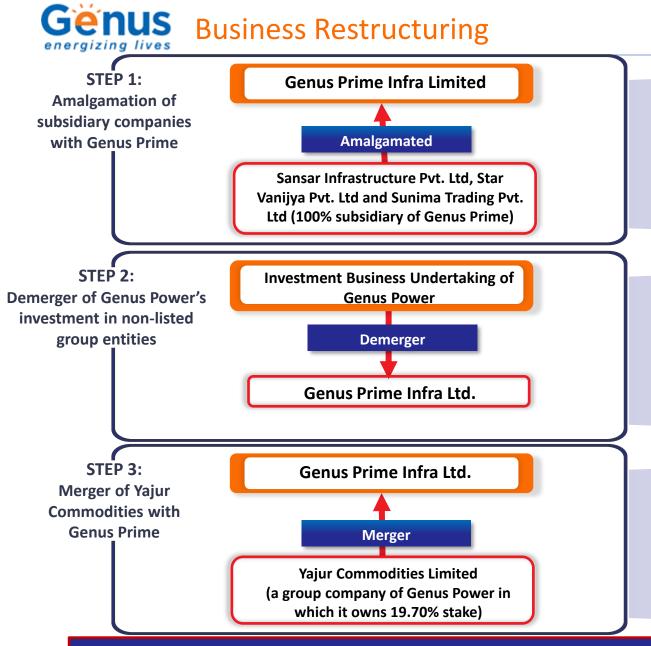

EBITDA (Rs. Crores)

PAT (Rs. Crores)

Post Amalgamation subsidiary companies will cease to exist

Genus Prime Infra Limited

✓ No consideration shall be paid to subsidiary companies as they are 100% owned by Genus Prime

Post the scheme of Arrangement – 2 listed entities

Genus Power Genus Prime Infra

✓ Shareholders of the Genus Power will get shares of Genus Prime Infra Limited in ratio of 6:1

Post Merger Yajur Commodities Ltd. will cease to exist

Genus Prime Infra Limited

✓ Shareholders of the Yajur Commodities Limited will get shares of Genus Prime Infra Limited in ratio of 5:3

Strengthening of Board of Directors

Mr. Subhash Chandra Garg

(Independent Director)

- He was an IAS officer from the 1983 batch in Rajasthan cadre. He has served as Economic Affairs Secretary (July 2017-July 2019) and Finance Secretary of India in the Ministry of Finance and as Secretary, Ministry of Power (July 2019-October 2019)
- His appointment provides an important layer of oversight which will help us further strengthen our internal controls, corporate governance and prepare for our next stage of growth
- His appointment will strengthen our board and fortify our corporate policies with a commitment to maximize value for our shareholders.

- He is an established and highly respected professional with over 25 years of global experience in the field of Smart Metering Technology and Product Development
- He brings strong domain knowledge of smart metering businesses combined with a deep understanding of how new digital technologies are evolving
- He will play a key role in building new platforms of growth, developing new product capabilities, expanding our international footprint and securing our long-term growth

Dr. Keith Mario Torpy
(Non-Executive,
Non-Independent Director)

Strong Demand for various types of Meter across State Electricity Boards & Private **Players**

Genus uniquely positioned to suffice needs of the rising demand of Meters

Management Commentary

"Due to COVID-19, the meter installation programme across all state electricity boards (SEBs) had got delayed. However, just as we were expecting significant pick up in execution, acute shortage of semi-conductors globally has severely dampened the operational effectiveness of the smart metering industry. On account of the same, our capacity utilization in Q2FY22 stood at meagre 35-40%. Steep rise in raw material prices as well as inadequate operating leverage led to erosion of our operating margins. Escalation in raw material prices will lead to margin pressure on all orders that are in hand as on date.

We expect the availability of semi-conductors to normalize in about 4 to 5 months from now. We have already drawn-out plans for procurement of semi-conductors for the entire next year of FY23, assuming our capacity utilization breaches 90% mark.

Post the announcement of 'Reforms-Based, Result-Linked Power Distribution Sector Scheme' the central government have been undertaking a lot of joint meetings with all stakeholders including state governments, state utilities and DISCOMs. All the stakeholders are pretty clear that the smart metering is the only way forward for the revival of the power sector. Though the objective under the Revamped Distribution Sector Scheme to achieve installation of 10 crore meters by December 2023 in the first phrase looks very aggressive, even if the industry is able to achieve the same by December 2024 or mid of 2025, it would be huge opportunity as well as achievement for Indian smart metering industry.

The process of drafting Standard Bidding Documents (SBDs) is reaching the final stage and should be completed by 31st October 2021. The SBDs which are being drafted this time around are very practical as the inputs from all stakeholders are being taken into consideration. The SEBs are working extensively and are likely to submit their Detailed Project Reports (DPRs) by the end of December 2021, post which we expect a very healthy order inflow in Q4FY22, starting from January 2022 onwards. The execution of these new orders should commence by April 2022 onwards.

SEBs are being pursued to accept TOTEX model, whereby they will not have to undertake any capex for smart meters and undertake monthly payments (which are secured) to AMISP (Advanced Metering Infrastructure Service Provider) under 'pay-as-you-save model'. We as a company will play dual roles of being AMISP (as per our limited appetite) as well as being smart metering vendors to other AMISPs in ratio of about 30:70. The TOTEX model will lead to increased cash flow for SEBs, which should result in significant reduction of working capital cycle from the current levels. The payment for meters supplied to other AMISPs will be on LC basis. As we venture into smart metering business as system integrators in role of an AMISP, servicing and maintenance of smart meters over period of 6 to 8 years will also come into consideration which is bound to improve our operating margins.

Considering the specialized nature of smart meter industry in India and an enormous market, we expect price realizations to remain healthy and the forthcoming period of 5 to 6 years to remain very favourable. Also, as a strategy we have designed our building and manufacturing infrastructure in a way, which will enable us to easily double our manufacturing capacity in short period of 6 months, whenever required."

Business Overview

Genus Power Sector Leadership

- Incorporated in 1992, Part of \$400 mn Kailash Group
- Over 2 decades of experience in electricity metering solutions industry

- Largest player in India's electricity meter industry
- ~27% market share in Meter Industry
- ~70% market share in Smart Meters
- Share of Metering Projects increasing

- Empanelled with 40+ different utilities across the country
- 65 mn+ Meters installed
- Capability to undertake turnkey power projects up to 400 KV

- Top-notch In-house R&D recognized by Govt of India
- 25,000 Sq. Mtrs of Integrated Manufacturing
- Annual Production capacity of 10 mn+ meters

- Production of **Electronic Energy** Meters
- Established Single & Three Phase **Electronic Energy** Meters
- Multi-functional & Multi-tariff Meters launched

1996 - 1999

- AMR / Prepayment Meter/ DT Meter launched
- Ventured into Power Distribution Management **Projects**
- Manufacturing facility at Haridwar commissioned

2005 - 2009

- Deployed Smart Metering Solution at Shapur (Junagarh) PGVCL - India's First Smart Village Project
- Implemented India's first End to End Smart Metering Solution at Kala Amb HPSEB's **Smart Grid Pilot Project** with Alstom

2014 - 2016

- India's First Narrowband - IOT setup for AMI with Vodafone Idea
- Among the Top 10 Global AMI Companies as per IHS Markit's **Electricity Meters Report** - Edition 2018
- Smart Meter Integrated line getting operational

2018 - 2019

1992 - 1995

- Company founded for manufacturing Thick Film Hybrid Microcircuits & SMT **PCB** Assemblies
- First Production facility set up in Sitapura, Jaipur

2000 - 2004

- R&D recognized by Government of India
- Lean Manufacturing with help of TBM consultants, USA
- Increased product range of electronic energy meters

2010 - 2013

Launched meter with integrated APFC, Smart Meters, smart street light management system, Group Metering etc

2017 - 2018

- Intelligent Group Metering systems deployed at BSES
- Smart Meters order from EESL for supply of 13.5 lakh meters
- Only Indian company to receive BIS certification for **Smart Meters**
- Set up and Commenced production at Assam plant

2020 - 2021

- Became the First company in Asia Pacific to supply 1.5 million Smart Meters
- Indigenously developed Vending Software Agrim[™] accredited with STS certification

Meter Installed

Dr. Giriraj Nyati **COO** - Metering Solution

Mr. R Viswanathan **Chief Management** Representative

Mr. N L Nama **Chief Financial Officer**

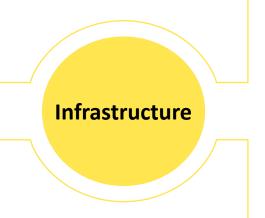

Dr. Anukram Mishra **Chief Technical Officer**

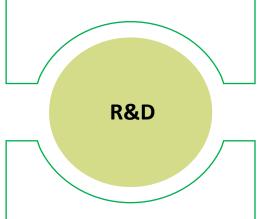

Mr. Ranvir Singh Rathore Senior VP – Domestic Marketing and Sales

CAD, Dies and Mold designs, Molding, Automated SMT lines, Lean Assembly techniques and the state-ofthe-art manufacturing facilities with complete forward and backward integration

In-house R&D Centre, recognised by Ministry of Science and Technology, the Government of India and accredited by National Accreditation Body for **Testing Labs**

Certifications

CMMI level 3 Company Accredited with - ISI, KEMA, SGS, STS, ZIGBEE, UL, DLMS etc., which is amongst the highest in Indian Metering **Solutions Industry**

Armed with long-term, highly-experienced and best-in-class technologist, engineers and executives

US Business Verticals

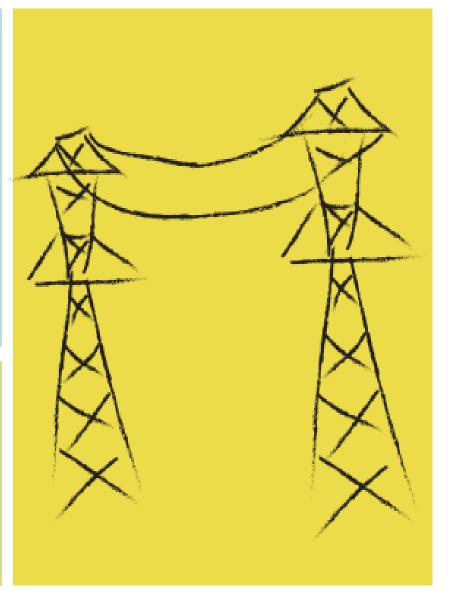

SMART METERING SOLUTIONS

Offers a wide spectrum of Smart Metering Solutions, that includes High End Multifunction Single Phase and Three Phase Meters, CT Operated Meters & HES (Head End System), ABT & Grid Meters, Distribution Transformer (DT Meters), Pre-payment Meters, Group Metering, Smart Street Light Management Solution, Net- Metering Solution for rooftop Solar, Data Concentrator, Energy Management solution for Building Management and DC Metering Solution, Gas Meter etc

Genus specializes in providing end-to-end metering solutions (AMI) with communication modules and software under its Smart Energy Management Solution

ENGINEERING, CONSTRUCTIONS AND CONTRACTS (ECC)

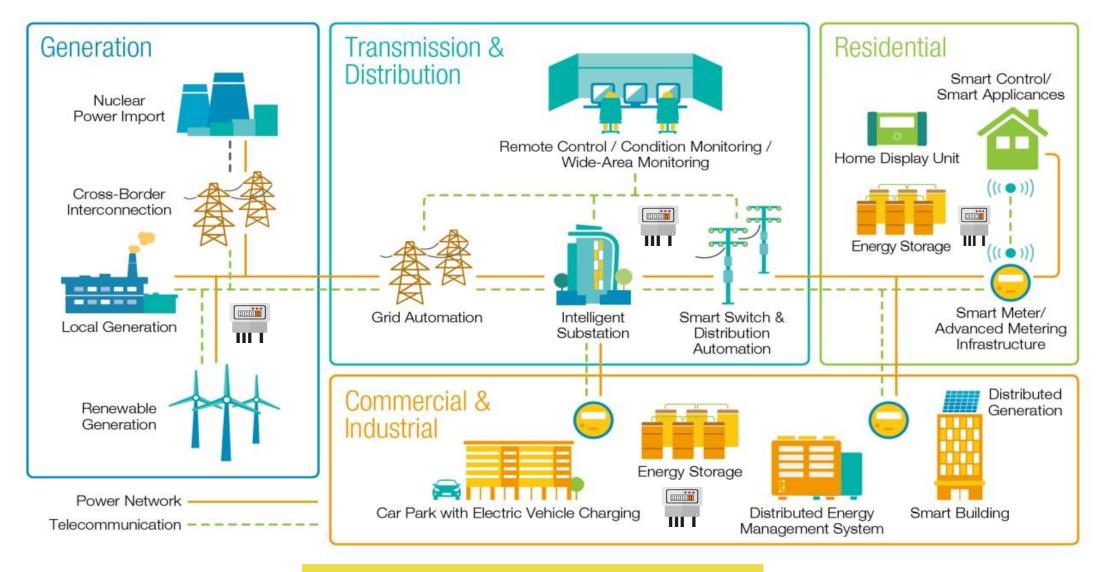

- Customized and turnkey (ECC) solutions to the Power Transmission and Distribution (T&D) sector
- Under the turnkey ECC solutions, Genus offers One Stop Total Solution of Metering, Engineering & Construction from 'Concept to Commissioning' with distinctive specialization in Smart Metering Solution & Advance Metering Infrastructure

End to End Energy Management Solutions

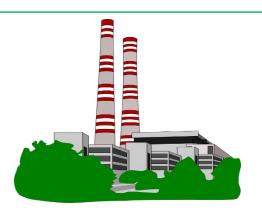

Enus Diversified Product – Market Mix

RESIDENTIAL & COMMERCIAL

- Meters with communication capability
- Single / Three Phase Smart
 Meters
- Net Meters
- Smart Street Light Management System
- Group Metering

INDUSTRIAL

- LT / HT CT Meter with Integrated Communication
- Meters with Automatic Power Factor Controller
- ABT Meter
- Smart High end Meters

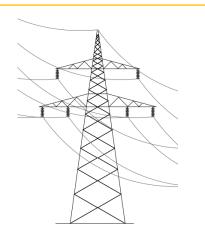

PREPAYMENT SOLUTION

- Single Phase Prepayment Meter
- Three Phase Prepayment Meter
- Dual prepayment Solution
- DIN Rail Prepayment Meter
- Prepaid Vending Software
- On-Line "Pre-paid" Metering Solution

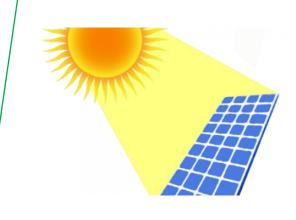

Genus Diversified Product – Market Mix

DISTRIBUTION TRANSFORMER

- **Thread Through Metering** Solution for Distribution Transformer
- Smart DT Meter with **Integrated Communication**

OPEN ACCESS / GRID

Grid & Sub-Station Meter (ABT Complaint)

CALIBRATION EQUIPMENT

- Single Phase Portable Reference Meter
- Three Phase Portable Reference Meter

Engineering Construction & Contracts

ECC Division

- Provides total engineering and construction solution from "Concept to Commissioning"
- Offers turnkey solutions of MV, HV & EHV sub-stations & transmission lines and execute turnkey jobs up to 420 KV

Leveraging on Strength

- More than 20 years of experience in Indian Power distribution sector
- Engineered Energy meter solutions backed up with in-house R&D and technological prowess

Complements the Metering Business

- Increased implementation of Smart metering solution
- Higher sales growth under metering division
- Margin expansion
- Gain Market share

Current Projects under implementation

Design, engineering, supply of equipments for Substation, Transmission Line and associated system for construction of 220 KV Substation at Chhatti Bariatu, 33 KV Substation at Kerandari, 33 KV D/C Line from Chhatti Bariatu to Kerendari, 200 KV D/C Line from Pakri Barwadih to Chhatti Bariatu and from Patratu to Pakri Barwadih along with installation of DG Sets (NTPC-Jharkhand)

Genus Power would benefit from the GOI's plan to reduce T&D losses in coming years

Balanced Client Mix

In-house Technology product since inception

Truly "Made in India"

- **Quality Assurance**
- **Innovation & R&D**
- In-House NABL Accredited Electronic **Energy Meter Testing Laboratories** (recognized by Ministry of Science & Technology, Govt. of India)
- **Lean Manufacturing**

Qualified & Capable to service the evergrowing power sector demand by adhering to stringent protocol

Key Awards Received

2004:

Rated among top 100 Electronic companies in India by EFY

2015:

Accorded Excellence in Quality by Golden Peacock National Quality Awards, 2015

2011:

Outstanding performance award by NDPL towards AT&C loss reduction

2013:

The prestigious EFY Reader's choice top 5 brands

2015:

"Silver Certificate of Merit" by Frost & Sullivan's India Manufacturing Excellence Awards 2015

2018:

The Global Center of Excellence at Jaipur for the successful testing & integration of Genus Smart Electricity Meter Solution in the Living Lab in Jaipur

Quality team won 7 Gold & 3 Silvers in 32nd National Convention Quality Circle Awards organised by "Quality Circle Forum of India" at Gwalior & Haridwar

2019-20:

"Best Innovation Award" and "Brand Ambassador 2020 Award" by Alleem Business Congress, UAE

Ranked among "Top 25 Most Trusted Manufacturing Companies in India" by the CEO Magazine

2019-20:

Recognition from CESC for "Active Involvement in Development of Smart Meters"

Our Multiple Team won 17 Awards (11 Gold; 04 Silver; 02 Bronze) in Lucknow Center Convention,

Haridwar Center Convention and Kaizen Competition on Quality Circle Forum of India

Business Outlook

Enus AT&C Losses in India are Three Times the Deficit

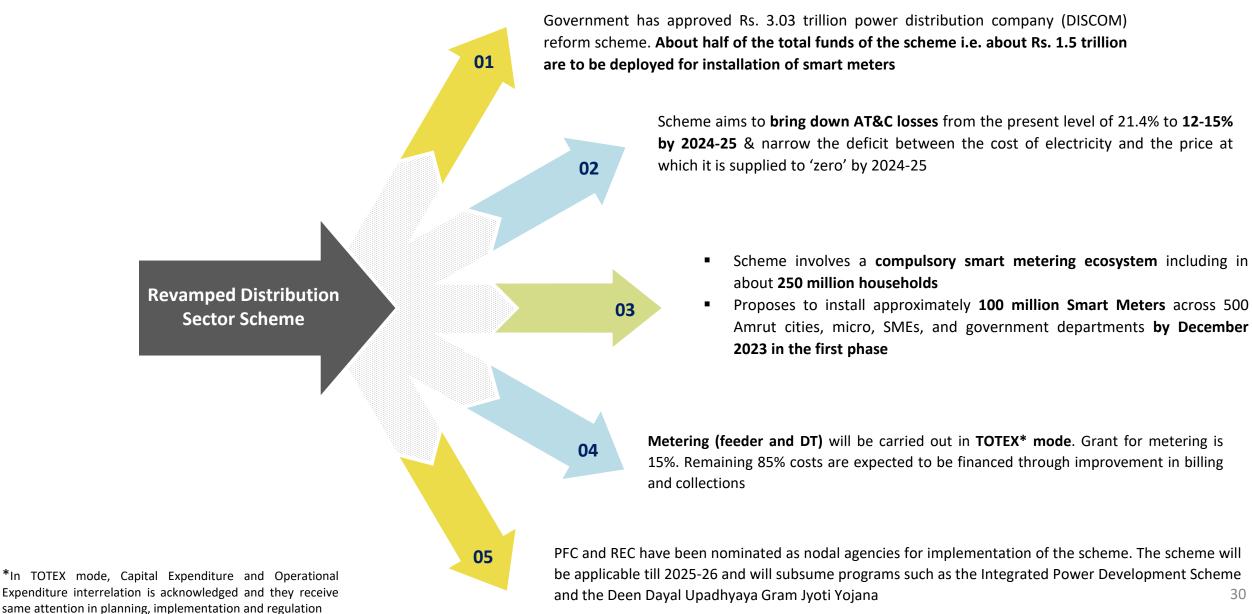

- AT&C Loss = (Energy input Energy billed) * 100 / Energy input
- At present, India loses around 30% of its power generated due to transmission, distribution, billing generation and collection inefficiencies
- Theft is the one of the main causes of the high losses. Theft occurs in several ways, viz: by tapping power lines and tempering / by-passing meter etc
- Meters play a vital role in reduction of AT&C Losses
 - Replacement of defective meters by tamper proof electronic meters / smart meters
 - AMI / Smart metering to the consumer for reduction of commercial losses and billing and collection ease
- Smart meter has the following capabilities:
 - Smart Meters and AMI Meters have communication capability
 - It can register real time or near real time consumption of electricity or export both.
 - Read the meter both locally or remotely
 - Remote connection or disconnection of electricity
 - Remote communication facilities through GSM / GPRS / RF etc
- India can save Rs. 9.5 lakh crore by investing Rs 1.25 lakh crore for replacing 25 crore conventional meters with smart meters

Enus Reforms-Based, Result-Linked Power Distribution Sector Scheme

Stringent Qualification Criteria & State-specific Interventions

Tripartite Agreements

DISCOMs would need approvals from their state cabinets to become part of the scheme

Tripartite agreements between states, DISCOMs and nodal agencies for the scheme will be signed

DISCOMs have been asked to submit their applications with loss reduction plans to the Union Power Ministry by October 31, 2021

Different from **Earlier Schemes**

Implementation of the Scheme would be based on the action plan worked out for each state rather than a "one-size-fits-all" approach

Reforms Based

Union Power Ministry has suggested an indicative list of reforms to be covered by the DISCOMs under the scheme

Qualification Criteria

To qualify for the scheme, DISCOMs will have to:

- publish quarterly unaudited accounts in 60 days of the end of each quarter
- ensure no new regulatory assets have been created
- state governments have paid subsidy in full government bodies have paid bills

State-wise Evaluation

Evaluation framework for the scheme will be formulated based on the agreed action plan for **each individual state**

Base Year for Evaluation

The base year for evaluation will be 2019-20 while trajectories will be set for 2021-22 to 2025-26 across various parameters

Fund Disbursement

Funds under the scheme will be released to DISCOMs on meeting pre-qualifying criteria as well as upon achievement of basic minimum benchmarks evaluated on the basis of agreed evaluation framework tied to financial improvements

DISCOMs will have to score a minimum 60 marks on the evaluation matrix to be eligible for fund release each year

Funding for Metering

For metering, DISCOMs will be allowed to claim the grant funds in phased manner for every 5% of meters commissioned against total number of meters awarded

Evident from the scale of tenders that have been floated recently, that various states are eager to implement this Scheme thoroughly

Other Key Condition for Funding

Under the five-year program, if a DISCOM is found ineligible for the reforms-based, results-linked scheme for financial assistance in any year, then the gap in funding to complete its projects will have to be met by the DISCOM or its state government

However, the unmet targets for one year will get added to the targets for the next year

IntelliSmart Infrastructure Private (IntelliSmart)

EESL, along with the National Investment and Infrastructure Fund (NIIF), has formed a JV -IntelliSmart Infrastructure Private (IntelliSmart) - to implement the smart meter roll-out programme of power distribution companies

IntelliSmart operates on OpEx model, which is a typical build-operatetransfer (BOT) model – where in they undertake the capex and install the smart meters without charging any

Once the meters are commissioned the utilities start saving on the AT&C losses to the tune of Rs. IntelliSmart charges anywhere between Rs. 75- 100

money to DISCOMs 225 per meter per month on an average. per meter per month Source: Various Articles

So, these smart meters become an instrument of pay as you save. Under this model the DISCOMs are not investing anything. DISCOMs pay the fees through savings they make

> Currently, DISCOMs are pre-dominantly employing the capex model that is not efficient. As they set up few thousand meters on capex mode, it takes away their valuable funds that can be invested into network correction

IntelliSmart is proactively canvassing 'Pay-asyou-save model' in order to break the inertia of **DISCOMs** who are resisting the adoption of OpEx model. The investment is done by IntelliSmart that is backed by sovereign wealth fund NIIF

Metering Opportunity

As per the, notification by power ministry, dated 8th September 2016 :

- Mandatory rollout of Smart Meters, for consumers with monthly consumption of 500 units and more
- Mandatory rollout of Smart Meters, for consumers with monthly consumption of 200 units and more
- Current Power minister Mr R. K. Singh has extended deadline to end of FY22

METERING OPPORTUNITY

india has 250 million legacy meters

There are plans to install up to 130 million smart meters by 2021

GOVERNMENT INVESTMENT

- The government is planning to invest up to \$21 billion till 2025 in smart grid technologies
- The smart cities initiative is targeting 100+ cities in India, out of which 20 have been declared and work for them will start in the next month or two
- More than 14 smart grid pilots have been launched in cities across India, to push smart solutions in Power Generation & Distribution Industry

Smart Meter is the Future

Latching Switch

Smart meters will have a kill switch which will close off the utility supply. The kill switch will be operated via Internet. This will give power to utility providers to start and stop the supply at the click of a button

Increased customer involvement

As all the data collected will be uploaded on the Internet the customers will be able to access it using their smart phones application. This will give them a clear idea about daily, hourly and even per-minute consumption, and how it is billed

Prepaid Schemes

Customers will be able to recharge their meters to the amount of energy usage and consume only that much. As the meters are smart, they will remind the consumer when the balance is running low, or when a larger than normal chunk is being used. This will help consumers save money, and take the load of billing off the local body

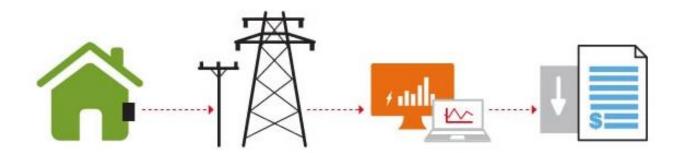

Consumption Patterns

As consumers will be able to access the data on their mobile phones / tablets / PCs, they will be able to cut their expenses using simple strategies. For example not using water heaters or electric irons during peak hour

What are Smart Meters?

Smart meters are remarkably different from electronic meters. While electronic meters only measure the amount of utility used, a smart meter is used to measure the utility and then transmit the reading without any human intervention

- ✓ Allowing utilities to introduce different prices for different consumption during different season
- ✓ Control devices with two-way communication between the meter and the central system
