India, China close in on plan to end months of military standoff

SANJEEV MIGLANI & DEVJYOT GHOSHAL New Delhi. November 13

SEEKING TO END a dangerous military standoff in the western Himalayas, India and China are formulating a plan that involves creating no-patrol zones, pulling back tanks and artillery, and using drones to verify the withdrawal, Indian officials say. After months of fitful

progress, the two sides are discussing a staggered disengagement from the high-altitude desert where temperatures have dipped to 18 degrees below Celsius, three Indian government officials said.

ment on the table, it is being internally discussed on both sides," said one of the officials, speaking on condition of anonymity because of the sensitivity of the situation.

"We have a firm plan for disengage-

Under the plan that was shared during a

meeting of top commanders last Friday, both sides will pull back from the contested Pangong Tso lake area and establish a buffer zone. Chinese soldiers will dismantle defence structures on several hilly spurs overlooking the lake and pull back, the officials briefed on the discussions said.

India, which has occupied heights on the lake's south bank will also withdraw. Both sides will cease patrolling certain sections. The 3,800-km long India-China border is undemarcated, and the two countries went to war in 1962.

While there have been recurrent incidents down the years, troops from both sides have largely abided by a long-stand ing protocol to avoid firing weapons on the high altitude border, although some warning shots were fired in September.

India's defence and foreign ministries declined to comment on the specifics of - REUTERS the latest negotiations.

can be no certainty that any transaction will materialise, nor as to the terms of any such potential transaction. Further announcement will be made in due course," SSAB said in a statement.

If the deal goes through, Tata Steel will be able to stop the cash burn that is currently seen in its European business. Also, it will be a big step in the company's current efforts to deleverage. This move would allow Tata Steel to focus more on India business. Separately, Tata Steel reiterated that it

continues its dialogue with the UK government on potential measures to safeguard the long-term future of Tata Steel UK. "Tata Steel is also reviewing all options to make the business self-sustaining without the need for any funding support from Tata Steel India in the future," it said. Back home, Tata Steel said it was undertaking a reorganisation exercise in its

domestic business, folding its listed and unlisted subsidiaries into four clusters. These business clusters are long products. downstream, mining and utilities and infrastructure. In this step towards consolidation and

corporate simplification, the boards of Tata Steel Long Products, Tata Metaliks and Indian Steel and Wire Products, on Friday, approved the merger of Tata Metaliks and Indian Steel and Wire Products into Tata Steel Long products. "The proposed consolidation will create significant synergies and position the company towards future growth in the long products segment. We expect to complete the process in next 6-9 months, subject to necessary regulatory approvals," the statement said. Meanwhile, with a significant

improvement in product mix towards domestic sales, higher value-added products and a sharp reduction in costs, Tata Steel posted a strong operational performance. The consolidated net sales were up 7% on a year-on-year basis to ₹37,154 crore for the quarter ended September 30, 2020, while the consolidated Ebitda surged a sharp 60% y-o-y to ₹6,217 crore. Consequently, the Ebitda margins were up a good 560 basis points y-o-y to 16.7%.

The net profit, however, registered a decline of 59.5% year-on-year to ₹1,635 crore for the quarter. This is because the company had received a tax credit of nearly ₹4,050 crore in the corresponding quarter last year, which was absent this quarter. Compared with the preceding June 2020 quarter, the company's net profit jumped nearly twofold. Also, profit before tax in the September 2020 quarter stood at ₹2,248.26 crore much higher versus a loss before tax of ₹6.54 crore in the quarter ended September 2019.

Tata Steel's consolidated Ebitda per tonne jumped to ₹8,396 versus ₹5,963 in the corresponding quarter. On a standalone basis too the Ebitda margin crossed 29% with an Ebitda per tonne of ₹13,127. Commenting on the company's performance, TV Narendran, CEO and MD, Tata Steel said, "The resilience of our business

> model and the commitment of our teams has enabled us to ramp up capacity utilisation to normal levels and achieve highest ever sales despite the ongoing challenges due to the Covid-19 pandemic. We are now embarking on reorganising our Indian subsidiaries into four verticals to drive scale, synergies and simplification which we are confident will create value for our stakeholders."

The company reiterated that it is committed to deleveraging of \$1billion annually and has reduced net debt by ₹8,197 crore during the quarter. Koushik Chatterjee, executive director and CFO, Tata Steel, said, "We continue to pivot the business decisions on cash while aggressively managing costs and being highly disciplined on capex to ensure we progress on our deleveraging journey. This quarter we reduced our consolidated net debt by ₹8,197 crore which is now below March 2019 levels. We ended second quarter with a liquidity buffer of ₹24,323 crore with about ₹17,824 crore in cash & cash equivalents which along with robust internal generation gives us enough headroom to further

deleverage going forward."
