Commenting on results, R. N. Doshi, Chairman, Rajoo Engineers Limited said: "With recovery in the markets post the pandemic, the last quarter has been better in terms of strong and good order book on hand which also converted to sales in both Domestic and export regions.

During the fourth quarter we registered an year-on-year growth in revenue at Rs.59.93 cr. EBITDA and PAT increased to Rs. 8.36 crore and Rs. 7.10 crore, respectively. While domestic as well as export sales grew this quarter, revenue growth was marginal mainly due to Company's focus on business sustainability considering the uncertainty around. Despite volatility in raw material prices, logistics cost, and after-sales service expenses, we have managed to maintain EBITDA margins and improve PAT margins.

The recent Ukraine war also has some impact on the global economy and commodity prices, availability of materials and led to some inflation. Moreover, recent lockdowns in key manufacturing and trade hubs in China has impacted supplies of our customers and this has also led to a little muted demand in Q4. The prices of major raw material and fuel have been increasing continuously, steel prices are up 23% and aluminum prices are up by 35% compared to March '21. Despite dynamic and challenging environment, the Company performed well.

we are witnessing gradual recovery in the market after the impact of the third wave of the pandemic. Consumer sentiments in India and overseas markets is encouraging.

I would like to thank each member of the Rajoo family, as well as our Clients, Creditors, Banks, Financial Institutions, and all other Stakeholders. Their faith in us and support extended makes it easier for us to strive and excel."
