Note: * PAT & PAT Margin are after NCI

- During the Q1, due to lockdown caused by COVID-19 pandemic and manpower constraints, Meghmani's operations got impacted in all the business segments. However, it gradually improved by the quarter end. The company's operations were carried out under restrictive manufacturing environment with utmost priority to safety of plants and its employees.
- Consolidated Revenues in Q1 is lower by 30% to Rs. 428 Cr, EBITDA lower by 29% to Rs. 96 Cr and PAT lower by 40% to Rs. 47 Cr as compared to corresponding previous year Q1. EBITDA margins stood at 22.5% compared to 22% in Q1 previous year due to reduction in raw material prices and lower administrative costs.
- Standalone Revenues in Q1 is lower by 35% to Rs. 285 Cr, EBITDA lower by 6% to Rs. 55 Cr and PAT is up by 1% to Rs. 29 Cr as compared to corresponding previous year Q1. EBITDA margins significantly improved from 13% to 18.5% compared to Q1 previous year due to softening of raw material prices caused by lower crude prices and lower operational costs.
- Revenue has been impacted due to lower operations due to COVID-19, correction in sales prices of key agro products, ECU realization in Chloro alkali division and higher spill over of sales to Q2 as per Ind AS.
- We are proud of Meghmani's technical team that commissioned the Chloro alkali expansion project, Captive Power Plant (CPP) in June and Hydrogen Peroxide plant in July without in person support from the foreign technology suppliers
