#### **Management** Remarks

**Mr. Bimal L. Goculdas**MD & CEO

Q2FY23 was a challenging quarter for the business. During the first half of the year, the extreme volatility of raw material prices resulted in subpar financial performance. From historical highs in the previous quarter, sulphur prices dropped by over 65%, resulting in significant inventory losses. Furthermore, the sharp depreciation in the USD-INR, MTM notional loss on term borrowings in foreign currency and sharp increase in the interest rates on borrowings negatively impacted the bottom line.

As a result of ongoing concerns in European markets and high inflation in US markets, end-user spending has declined, affecting varied businesses. The operating environment continues to be extremely uncertain, and customers across industries are destocking inventory. The demand from the dyes and pigment industry specifically continued to suffer both in domestic and export markets.

However, on the bright side, the freight rates have further come down and once the high-rate inventory gets cleared from the channel, the demand visibility will improve. In addition, with a significant drop in sulphur prices, the business's working capital needs are under control.

The sulphuric acid plant is operating at optimal capacity however, with such a sharp drop in realisation, the expected positive impact on the financials is not clear. There is also no significant contribution from the new speciality chemicals plant at Dahej as it got commissioned towards the end of the quarter. With all the planned CAPEX complete and operational, we will now be channelising our energies to ensure a smooth and quick ramp-up of capacities.
