Q1 FY23 Performance Presentation

August 2022

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of UPL Limited (UPL) and certain of the plans and objectives of UPL with respect to these items. Examples of forwardlooking statements include statements made about our strategy, estimates of sales growth, future EBITDA and future developments in our organic business. Forward-looking statements can be identified generally as those containing words such as "anticipates", "assumes", "believes", "estimates", "expects", "should", "will", "will likely result", "forecast", "outlook", "projects", "may" or similar expressions. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and there are many factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements. These factors include, but are not limited to, domestic and global economic and business conditions, the successful implementation of our strategy and our ability to realize the benefits of this strategy, our ability to develop and market new products, changes in legislation, legal claims, changes in exchange and interest rates, changes in tax rates, raw materials and employee costs, our ability to identify and complete successful acquisitions and to integrate those acquisitions into our business, our ability to successfully exit certain businesses or restructure our operations, the rate of technological changes, political, economic and other developments in countries where UPL operates, industry consolidation and competition. As a result, UPL's actual future results may differ materially from the plans, goals and expectations set forth in such forward-looking statements. For a discussion of factors that could cause future results to differ from such forward-looking statements, see also Risk management, of our Annual Report.

Q1 FY23 Business Highlights – Solid Growth in Revenue and Profitability

- Robust growth led by significant pick-up in realizations and higher volumes in a challenging macro-environment
- Contribution profit rose by 27% YoY. Better pricing, efficient supply chain management helped improve margins both YoY and sequentially
- EBITDA margin is marginally lower due to higher investments in SG&A as the company focused on building teams and capabilities to grow its differentiated and sustainable portfolio, and normalization of overheads post Covid
- Higher EBITDA combined with lower finance costs drove robust growth in net profit

Note: All changes are year-on-year basis i.e., Q1 FY23 vis-à-vis Q1 FY22

Sequential Increase in NWC due to Reduced Factoring, FX Impact & Inventory Build-up

Note: As a risk management measure, the company sells its receivables on non-recourse basis to banks. Receivables sold as of 30 June'22 were INR 9,010 crore (31 March'22: INR 12,099 crore, 30 June'21: INR 7,004 crore, 31 March'21: INR 7,623 crore)

- Working capital higher in Q1 FY23 primarily due to 1) robust growth of 27% in sales, 2) short-term inventory build-up due to strong demand and uncertainties in supply-chain, and 3) increase in receivables on the back of strong growth in LATAM
- However, without reduced factoring and FX impact, the increase in net working capital on a sequential basis would have been lower at INR 1,931 crore
- Working capital days expected to be around 80 days by end of FY23 in-line with the guidance

by Business

Increase in net debt primarily because of significant build-up in working capital sequentially

Opening Cash

- However, notwithstanding the 1) reduced guantum of factoring, and 2) FX impact; the implied increase in net debt on a sequential basis would have been lower at ~INR 3,392 crore vis-à-vis INR 7,574 crore
- Working capital days to normalize to 80 days by end of the year, with the significant release in the second half of FY23, leading to lower debt levels •

Note: ¹INR depreciated from 75.72 as on 31 March 2022 to 78.98 as on 30 June 2022. Cash Generated by Business = Operating cashflow below WC (INR 2,109 crore) less Finance cost, taxes and other cash expenses paid (INR 710 crore)

+28% Revenue Growth vs LY

- Strong Growth in 1) Field Corn in India 2) Canola in Australia, and 3) Field and Fresh corn in Thailand
- Grain Sorghum season in Argentina got delayed which impacted Q1FY23 performance
- Notwithstanding, the decline in Sorghum acres due to drought in USA, the growth in revenue expected to be robust

+28% EBITDA Growth vs LY

- Robust Contribution profit growth (+28% YoY) due to
 - o Better realizations in Corn and Canola
 - Favorable product mix
- Increase in SG&A as % of sales on account of investments in overheads to pursue B2C strategy, partially offsetting contribution profit growth
