Global Lighting Business (VLS): EBITDA variation analysis

- Some recently launched, high technology programs have a higher RM component
- Higher logistics, scrap and other costs due to volume ramp-up in Czech plants
- Launch costs during the quarter lower as compared to Q2 FY18

Global Lighting Business: IND AS 115 impact Analysis

Change in accounting for pre-production engineering service activities viz Engineering Design and Development (ED&D)

Earlier:

ED&D revenue was recognized at the time of invoicing as a lumpsum to customer, on receiving approval for the design before start of production (SOP)

Now :

ED&D relates to design development and testing of the lamps before start of the commercial production and hence benefit of these activities is derived over the life of the program. Thus, related revenues and costs are recognized on per piece basis over the estimated life of the programs.

Q2 & H1 Financials	Impact	VLS
Revenue	Increase	3.3
Raw Material	Decrease	0.9
Salary Expenses	Decrease	3.6
Amortisation	Decrease	-6.8
Other Expenses	Decrease	0.6
Tax	Increase	-0.4
Net impact on PAT		1.3
EBITDA impact		8.4

Notes:

1. This system of recognising revenue is in line with industry practice
2. The entire impact for implementation of change on YTD basis is reflected in Q2
3. The impact is positive on Profit After Tax for the period; however, it could be negative as well in future periods

R & D / Business Updates

Global Lighting Business

- **VISION 2019, Paris conference on automotive lighting:** VLS showcased its concept car featuring innovative lighting concepts and ADAS features. VLS also demonstrated a test vehicle equipped with OPTI-MATRIX headlamps, which deliver Advanced Driving Beam (ADB) functionality with low cost and power consumption.
- **ADB in USA:** NHTSA published an NPRM (Notice of Proposed Rulemaking) which would allow vehicles to be equipped with ADB headlighting systems in the United States.

Polymer

- Trials successful with a large 2W customer for paint elimination technology for polymer parts. Potential to market it to 4W customers as well.

Electrical

- Traction motor for 2W EVs under development. Prototypes to be ready by Feb 2019.

Metallic

- Zero Liquid Discharge project, to recycle 75% of the industrial effluents generated by the manufacturing operations, successfully implemented.

Business Outlook

India Business

- Indian 2W/3W market : festival season demand weaker than expected.
- Overall market growth slowing down due to insurance regulations and fuel prices

VLS Business

- Czech: Focus on improving operational efficiencies at Czech plants
- Turkey: Integration making good progress to leverage synergies with TRIOM
- China: Focus on strengthening presence with top OEMs; recent Government incentives likely to support market recovery

Thank You
