About Us

About Value Growth Industry Quarterly Annual Financials Us Financials Proposition Drivers Overview

Strategically located

A pioneer in introducing Vannamei (white shrimp) breeding and culture in India which was

instrumental in the revival of aquaculture industry in India in 2009.

Business divisions	Capacity (Per year)	Offerings
Hatchery	500 million seedlings	 Produces Vannamei seedlings (First hatchery in the country to have introduced and nativised this species) Long-term association with SIS, Florida Uses only specific pathogen free (SPF) brood-stock to ensure stringent quality and disease resistant seedlings
Farm	2000 tonnes Shrimp	 \$ 500 acre farm located on the coast of the Bay of Bengal \$ Proximity to sea enables the use of sea water for the farming operations. \$ Significant investment in infrastructure to mitigate risk and increase output at farm level.
Feed Mill	22,500 tonnes	 Produces high quality and nutritional shrimp feed marketed under VANNASTAR brand and widely accepted by farmers
Processing Plant	7,500 tonnes frozen Shrimp	 Plant with state-of-the-art infrastructure and ultra modern processing equipment Ensures processed products are antibiotic free and high quality

Our Journey

About
UsQuarterlyValueGrowthAnnualIndustryUsFinancialsPropositionDriversFinancialsOverview

1990-1994

1990: Sharat Sea Foods registered

1991: Land procured and farm operations started (Black Tiger)

1994: Hatchery operations started and IPO issued : 8 times over subscribed. Rs. 22 crores share capital received.

1998-99: WSSV disease threat and industry slump. Share trading stopped Feed plant operations began with International tie-up

2001: Processing Plant operations started

2000-2004: Scampi production and industry revival. Trials for Vannamei in progress.

2004-2020

2004-05: Pilot Project of Vannamei at advanced stage

2007-09: Vannamei a commercial success, previous losses erased. Upward trend in company performance

2009: Govt. permits Vannamei

2011: Commercial feed operations commenced. EU exports stabilization

2020: Despite prevalence of COVID and related factors, company exhibits 25% growth

2021-2023

2021: Company posts steady performance amidst difficult operational conditions in domestic and global markets

2022: Looking to widen product offerings

Sharat Industries Limited. | Investor Presentation | Q1FY24

Top Management

Mr S Prasad Reddy Managing Director

Qualification:

• Post-graduate in Sociology from Jamia Millia Islamia (University in Delhi)

Professional work experience:

• A first-generation entrepreneur with nearly 4 decades of experience, he is considered as a visionary in the seafood sector and was instrumental in conceptualizing and setting up Sharat Industries Ltd as an integrated aquaculture company.

He is widely regarded as a pioneer in the sector owing to his efforts in introducing the Vannamei Species of Shrimp in India, spurring a revolution in the aquaculture industry.

Mr S Sharat Reddy Executive Director

Qualification:

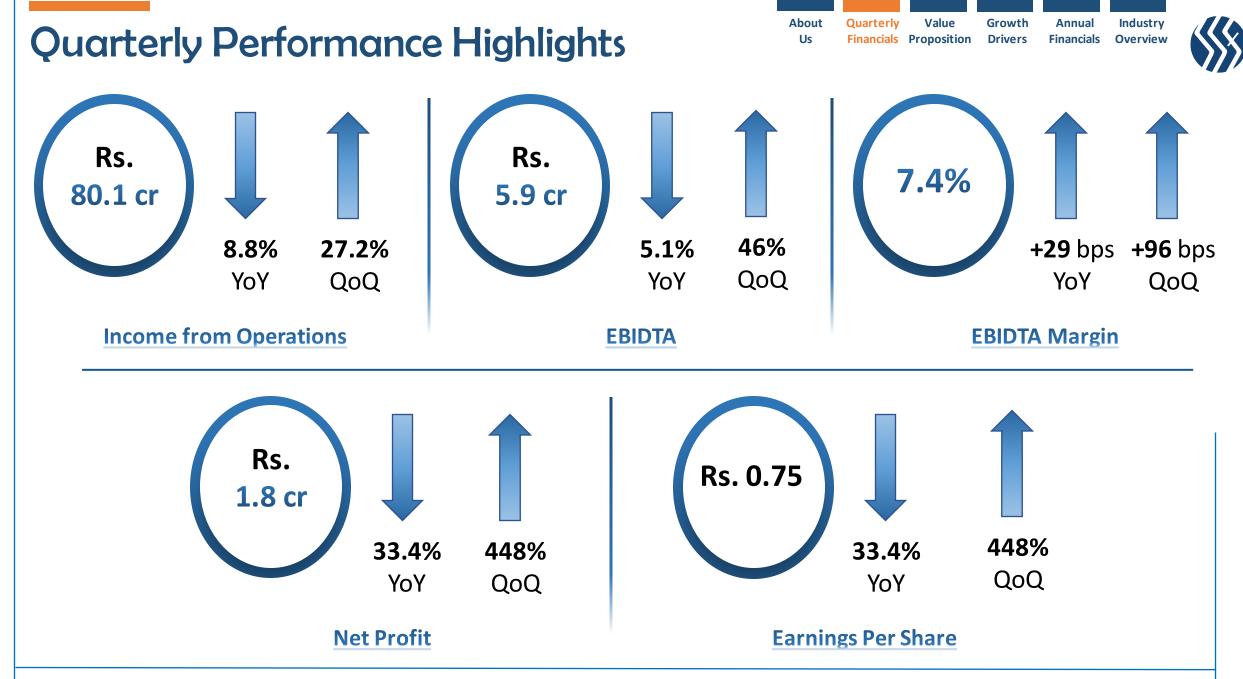

- Bachelor's Degree in Mechanical Engineering from College of Engineering, Guindy
- Master's degree in Industrial Engineering and Operations Research from: Pennsylvania State University (USA)

Professional work experience:

- Sharat has been involved with operations at SIL since the last 10 years.
- He is currently responsible for creating the roadmap for the future of SIL, driving strategy, and implementing operational priorities aligned with the overall organizational growth.
- Sharat has a holistic understanding of finance, management, operations, and sales/marketing and has played a key role in the growth of the company over the last 5 years.
- He is focused on innovation and leveraging technology for higher efficiency in the business.

Sharat Industries Limited. | Investor Presentation | Q1FY24

Value Proposition & Growth Drivers

Sharat Industries Limited. | Investor Presentation

Value Proposition

- Three decades of experience.
- Strong brand recall.
- Strategically located aquaculture farm and processing plant ensuring freshest quality shrimp for processing.
- Well-integrated farmer network to ensure product traceability and the procurement of healthy, antibioticfree shrimp.
- Wertically integrated to ensure quality of the product at every stage.

Operational highlights

- The export division contributes to roughly two thirds of the overall revenue.
- Feed division contributes to approximately 25% of the overall revenue. Farm and hatchery contribute to the rest.
- Exports Sales to grow at 15-20%CAGR over the next 5 years.
- Company constantly focusses on R&D to improve operational efficiency of divisions and overall product quality.

Product portfolio & certifications

- A range of 10 raw and 3 Cooked White-Shrimp products, as per customer's specifications.
- 4 broad varieties of Shrimp feed.
- Unwavering focus on quality with following certifications – EIC, HACCP
 , ISO 22000 : 2005, BRC - A Grade,
 FDA, BSCI, BAP 4 Star, EU approved.
- FSSAI approval for the process plant lays a platform for future sales of frozen shrimp in the domestic market.

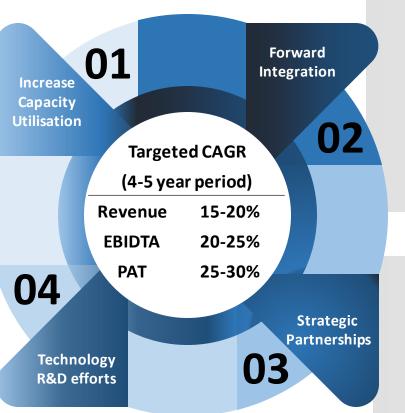

Key Growth Drivers

- ➡ Forward integration and strategic partnerships will help increase capacity utilisation to 90% over the next 3-5 years
- Will create significant operating leverage in the business
- Improve overall margins by 200 bps over the next 3-5 years

Technology; R&D efforts

- Technology based interface for operations
- Improve supply chain & end traceability for products
- Pilot farming with UAL Biotech for improved output despite extreme weather.
- □ Collaborate to setup a RAS farm (Recirculating aquaculture System) which will help cater up to 50% of overall demand at its processing systems.
- □ Taken measures to improve biosecurity thereby reducing risk of disease & shrimp mortality

Forward integration

 Improve overall margins by 200 bps over the next 3-5 years

Growth

Drivers

Annual

Financials

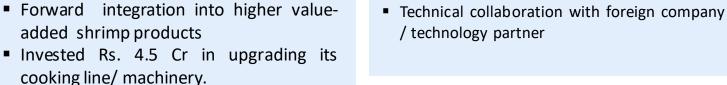

Strategic partnerships

- Technical collaboration with global / international players to increase capacity utilisation of farm operations
- Contract farming
- JV with strategic players / large corporate farmers
 Improve overall margins by 150 bps over the next 3-5 years

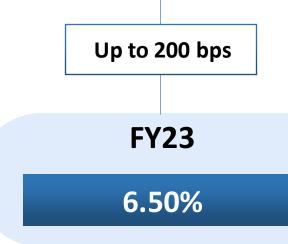

Sharat Industries Limited. | Investor Presentation | Q1FY24

Key factors that will drive EBITDA Margin

- This will play a key role in increasing export revenue and profitability in the coming years.
- Enable SIL to access premium customers (such as retail chains, restaurants, etc.)

Forward integration

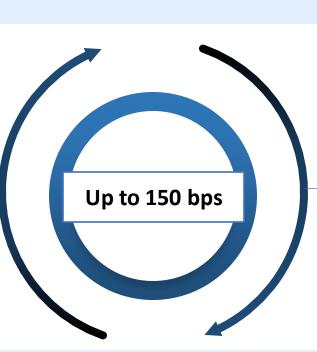

- Currently establishing a joint venture with a technology partner to increase the contribution from farm operations.
- Contract farming, JV association with strategic players, large/corporate farmers

Strategic Partnerships

Up to 200 bps

- Increase Effective capacity utilization
- Indicated strategies and technology will enable SIL to boost its overall capacity utilisation from roughly 45% presently to about 90% over the next 3-5 years.
- This will reduce the impact of high fixed costs on operations and bring about more consistency in operations, leading to better profitability

Industry

Overview

to increase the contribution from farm operations

- ✓ Contract farming
- ✓ Contract manufacturing
- / Partner with large corporate farmers
- ✓ Investments in technology

Technology in Aquaculture

Combining Technology & Innovation

By leveraging technology, SIL aims to improve the operational efficiency across the various divisions of its supply chain.

End to End Traceability

For it's processed products through software & a series of IOT devices. Use of blockchain technology will improve data transparency in both domestic & exports market

Renewable Energy

To run existing operations, thereby taking significant steps towards macro-level sustainability. With sufficient captive consumption capacities / requirement and vast extent of land available, the company is likely to adopt these measures during the next 2 financial years.

Boost in R&D

SIL will collaborate with UAL to setup a RAS project in its premises. This will enable SIL to rapidly expand its shrimp production in the near future to cater to up to 50% of its overall demand at the processing division.

Strengths

- Robust farmer network ensures accurate product traceability and the procurement of healthy, antibiotic-free shrimp.
- Strategically located in Andhra Pradesh.
- □ 500 acres of land with 94% dedicated to farm.
- □ 3 decades of experience.
- □ Strong relationships with supply chain partners.
- Company has one of the largest shrimp farms in India that has the capacity to farm over 2000 tonnes of shrimp annually.

Opportunities

□ Increased export offerings.

- Strategic partnerships for improved operational efficiency in the shrimp farming & seafood processing sectors.
- Enhanced productivity & profitability with the help of technological advances coming through at the farm level.
- Product development at the seafood processing division to delve further into value-added production to augment profitability in the export and domestic markets.

Weaknesses

- Disruptions in supply chains restricts the movement of goods, which, in turn hinders the distribution and manufacturing of various seafood products.
- Lower capacity utilization.
- Scope to improve use of technology to improve productivity.
- Lower margin profile versus peers.

Threats

- Sharp Jump in production from Ecuador, which was lower in production vs India, but is now higher in production in the current year, threatens to keep pricing under pressure thereby impacting overall margins.
- Cyclones or other weather conditions impacting productivity and output from our farms.
- □ An unprecedented increase in international ocean freight, with a dearth of liners, which can adversely affect freight cost
- □ Increase in pricing of certain critical commodities can lead to increase of feed manufacturing costs.

Seafood Industry Assessment

Sharat Industries Limited. | Investor Presentation

Global Seafood Industry

Seafood market to grow at a CAGR of 2.9% during 2022-30

Seafood products are classified as:

- Capture fisheries aquatic species from natural water bodies
- such as the sea, lakes, ponds, etc.
- Aquaculture species cultivated in aquaculture farms under controlled conditions in marine, fresh or brackish water
- □ The global seafood market size was valued at USD 163.1 billion in 2021 and is projected to surpass around USD 210.4 billion by 2030 with a notable CAGR of 2.87% from 2022 to 2030.
- The highest contributor to the market was the fish segment with \$101.5 Billion in 2019, and is projected to reach \$125.9 Billion by 2030, at a CAGR of 2.7% during the forecast period.
- □ It's demand is rising because of rising population and incomes, availability of a variety of fish, rising awareness of health benefit from high protein content, and improving infrastructure of supply channels (cold chain).
