RTUs

In the past 3 months

- We observed a general economic slow down , which has slightly affected our order intake
- Services and Energy Automation Orders have confirmed their rebound in Q3 , while MV orders were still dynamic .
- After the flood in Baroda that affected our Q2 Sales level , Q3 Sales level was very high .
- We observe an overall tension on our customers cash situation , burdening our own finance costs , even though we continue collecting more cash than our Sales ; but also delaying our Sales (projects frozen , cancelled , delayed , ...)
- We have done further progress on our licenses and core component partner programs , with 1 new offer launched in December (PIX MV license offer) , 2 licenses cases validated in Q3 and ready for contract signature (both on FBX RMUs) , and 2 licensed prototypes validated (for packaged substations PSS) .
