Company Overview

Company Overview

Well-established manufacturer of speciality chemical intermediates

- Downstream, value-added derivatives of Nitrobenzene and other intermediates
- Developed diversified range of applications for key products across multiple verticals

Predominant focus on overseas markets

- 80% of revenues from exports with varied revenue contribution from several geographies
- Key markets include Japan, China, Switzerland, Germany and USA

Long-standing/expanding relationships and strong reputation among marquee global customers

- 90% contribution from top 10 customers
- 60% revenue from relationships that extend over more than 10 years

Centralized manufacturing facility with focus on quality, technology and SHE standards

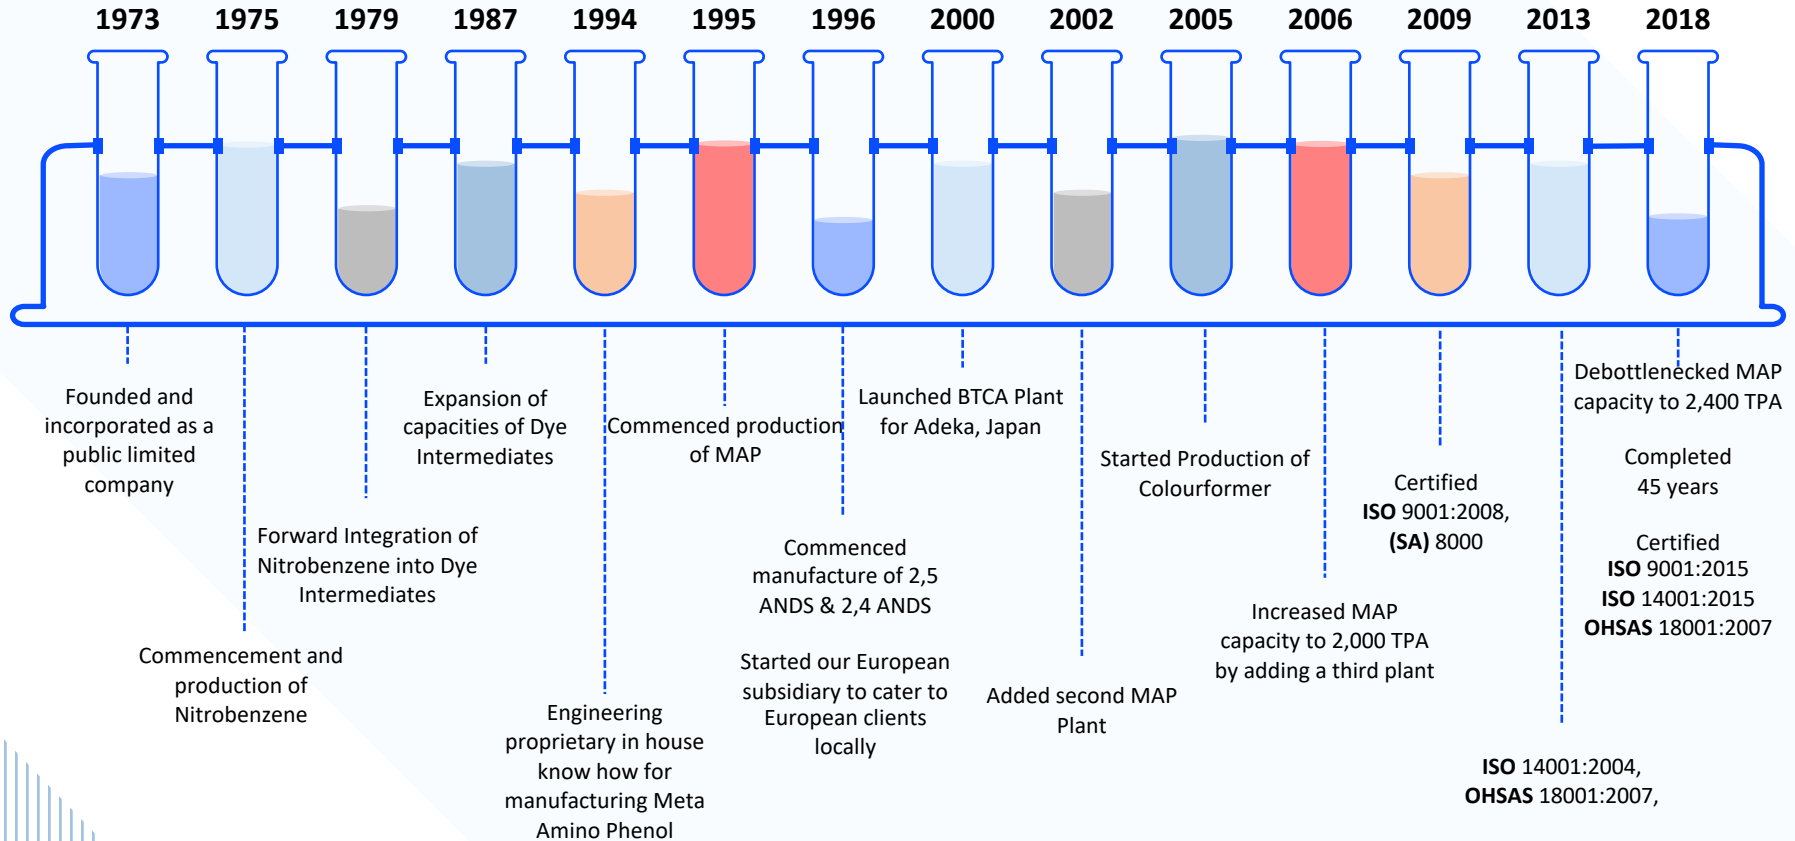

- Integrated facility with several plants located in Roha (Near Mumbai)
- Certified ISO-9001:2015, (SA) 8000; ISO 14001:2015 (environment management), OHSAS 18001:2007 (health and safety management)

Strong financial parameters – profitable growth, capacity expansion from internal accruals

- In H1FY19, Revenue increased by 371% and PAT increased by 3,555%
- Strong cash generation used to achieve debt free status and fund capacity expansion

Company's journey

Products used across several industries

- 🧪 Products have multiple usages across a spectrum of applications
 - Ranging from agro chemicals, aerospace, military applications, pharmaceuticals, hair colors, dyes, specialized resins and several others
 - Enables reasonable disassociation with any slowdown in specific sectors or industries

Built in-house Processes

Transitioned from a Nitrobenzene manufacturer to developing products across the value chain, benefitting from integration across the entire production process

- 🧪 SNCL facilities are fully vertically integrated thereby reducing dependency on sourcing intermediates from other manufacturers
- 🧪 Relatively stable costs of Benzene and other raw materials which are all locally sourced

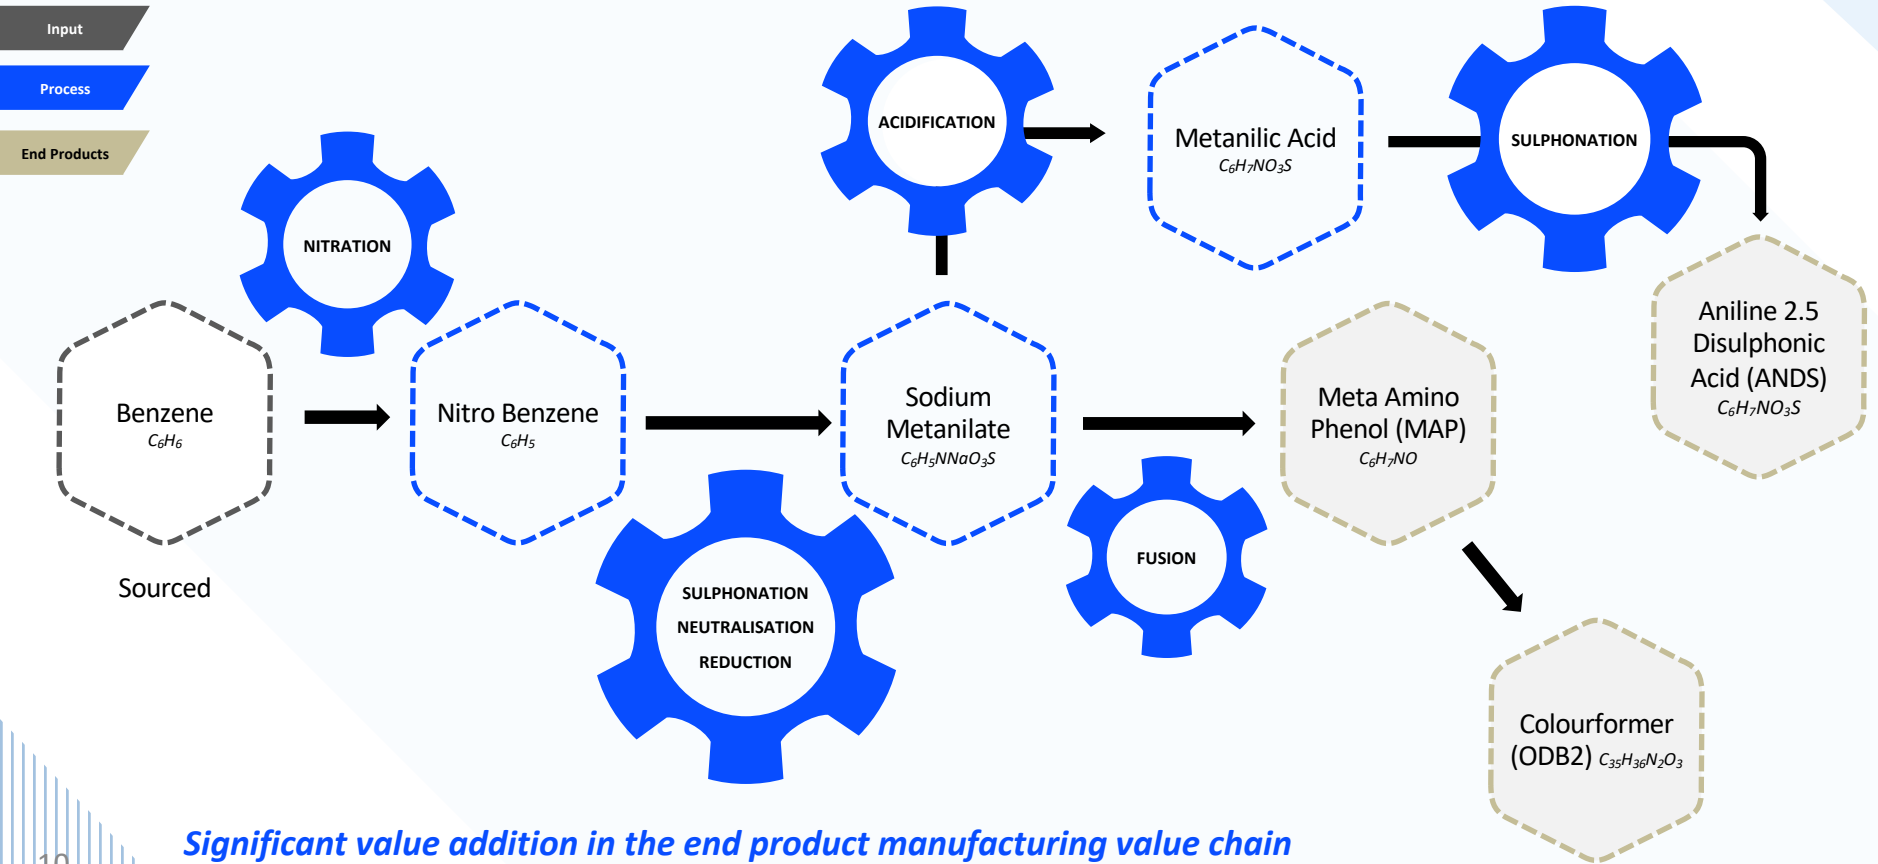

Fully Vertically Integrated Player

-  The Company starts at the base of the value chain by acquiring Benzene and manufacturing it's own Nitrobenzene
-  SNCL has always worked towards strengthening it's product offering through vertical integration
-  From here SNCL, through multiple stages internally manufactures it's own MAP and Aniline 2,5 Disulphonic acid
-  From MAP it manufactures it's own Keto Acid, which is used for captive consumption to manufacture Colourformer (ODB2)

SNCL is not dependent on intermediate manufactures and insulated from stoppages and major price fluctuations created during shortages in the intermediate suppliers space

Key Product Processes

Catering to Global Clientele

- One of the few Indian player to build long-term business relationships with global clients
 - 90% contribution from top 10 customers
 - 60% revenue from relationships that extend over more than 10 years

IHARA CHEMICAL INDUSTRY CO., LTD.

McSIS
TOP 100
CORPORATIONS

Exporting to Major Developed Markets

- 🧪 80% of overall revenues are exported to developed markets
 - Sales are to developed markets such as Japan, China, Europe, and the Americas

Focus on R&D and Pollution Control Measures

Built a notable edge over other manufacturers in terms of stringent quality standards and pollution control measures

- 🧪 Focus on Research & Development, to set up integrated manufacturing competencies which have been leveraged to produce 10 intermediates currently
- 🧪 Received ISO 9001-2015, ISO 14001:20015 and OHSAS B.S. 18001:2007 certifications
- 🧪 Focus on waste management across products
 - Liquid effluent generated in the factory goes through primary secondary and tertiary treatment before discharge. The resultant solid waste from the internal ETP plant is sent to the approved government waste management site
 - All other solid waste is used as raw material to several other nearby industries such as Steel and Cement, Paper and Paver Block manufacturers
