## ◆ IPO / QIB / Pre IPO ( Equity & Debt listing ) / SME IPO

The Company is planning to focus in a big way on these activities and will be encasing on the opportunities thrown open by Make in India story, especially MSE and SME segment. In any developing country, Small and Medium Enterprises (SMEs) play a large role in enhancing the economy. A bulk of the manufacturing base is made up of SMEs and they contribute significantly to exports too. India too is no exception and the Micro, Small and Medium Enterprises (MSME) sector remains the largest employment generator as well as a significant contributor to industrial activity.

## ◆ Private Equity / Preferential Issue

Public markets are generally tapped by companies that are in mature and growth phase where they are transparent, open to questions, public limelight as well as answerable to Institutional Investors. This implies that companies require access to capital provided by venture capital funds, private equity funds, and private investors especially in its early stages. We assist companies in accessing the pool of capital in the form private placement of equity/debt to raise funds, assist in valuation and negotiation of terms that may be mutually beneficial to both the parties.

Team Galactico has an urbane understanding of entrepreneurial and family run businesses, enjoys strong relationships with investors to ensure optimum distribution and is grounded in research driven tracking of investment environment.

## ◆ Mergers & Acquisitions (M&A) / Takeovers & Open Offer

Mergers and Acquisitions are one of the major aspects of in organic corporate growth. The reasoning behind Mergers and Acquisitions is that two separate companies together create more value and synergy compared to being on an individual stand. More and more corporates have started looking at Inorganic Growth as an alternative to answer of organic muted growth where strategic scenario can increase the profitability as well as market share. With the objective of wealth maximization, companies keep evaluating different opportunities through the route of merger or acquisition.

Takeover is technically known as Substantial Acquisition of Shares. The purpose of a Takeover is to gain management control of the Target Company. Plans of Horizontal Diversification, Elimination of Competition, Backward and Forward Integration are the motives behind any Takeover bid. The Acquiring Company buys the shares of the Target Company by making an offer to the existing shareholders at a specified price via SEBI regulation.

Galactico enables the corporates aspiring to explore Takeovers, Mergers and Acquisitions activities to have a ring side view of the deal flow, opportunities available on both buy as well as sell side. With its exceptional leadership team and its abilities for the accurate due diligence and valuation, Galactico is pioneering its services in this domain as well.

## ◆ Amalgamations/ Demergers/ Corporate Restructuring

Amalgamation, Demergers or Corporate Restructuring is more common in developing countries like India. Amalgamation typically happens between two or more companies engaged in the same line of business or having some similarity in operations, under common management.

Demerger is a disjoining or a separation of one or more units of a company to form a new company independent from the original one and is undertaken by companies in order to promote specialization. Companies have started practicing demerger because of the many benefits it offers. Demerger allows a company to expand its operations in a very systematic manner. It allows a specific division or unit to grow as a separate and a focused entity, thereby increasing its efficiency and effectiveness.

Corporate Restructuring : For clients in crisis, the team develops liquidity forecasts, improves cash flow management, obtains additional financing, negotiates loan covenant waivers and guides complex debt restructuring. We also provide analytical and advisory services to lenders and unsecured creditors of distressed borrowers.

We have a dedicated team to facilitate ongoing interaction with listed as well as unlisted companies across sectors. We have a pan India reach and have concluded amalgamation and restructuring transactions across all geographies in India. With a cultured understanding of family run businesses, we have successfully advised on and implemented numerous family settlements through corporate restructuring.

## ◆ Corporate Valuations / Fairness Opinion

Knowing what business is worth and what determines its value is prerequisite for intelligent decision making. Corporate valuations form the basis of corporate finance activity including M&A, fund raising, sale of businesses and also to meet regulatory and accounting requirements. The rapid globalization of the world economy has created both opportunities and challenges for Organizations leading to uncertainty blowing across global markets and raising the importance of independent valuations all over the world. Justifying the value of businesses has grown more complex and challenging, as its been accepted that valuation of closely held / infrequently traded listed shares is not an exact science and depends upon a number of factors like purpose, minority/ controlling interest, stage, financials, industry, management and promoters strengths etc.

## ◆ Corporate Advisory / Financial Engineering

We understand the dynamic flows that shape the needs and policies of the corporate world in their efforts at optimizing risks and returns of capital investments. We believe that our systems and processes based on industry insights, client centric practices, stakeholders wealth enhancement objectives coupled with market knowledge impart us a unique position to satisfy competing needs.

Day-to-day means of doing business are becoming complex. Government Institutions have become demanding more than ever. An aggressive and dynamic economic environment has compelled companies to re-evaluate their capital structures to maintain financial competitiveness and enhance operating efficiencies. The economy is also faced with the inherent challenge of stressed financial assets, where large funding exposures - both debt and equity need to be recovered or restructured in ways that benefit all stakeholders - lenders, investors and the business. As part of our advisory services, we at Galactico help the corporates to raise funds, simplify reporting and to comply with Government rules and regulations by identifying strategic issues to be addressed, prioritize business targets, and formulate a business strategy that meets the taxation, accounting, regulatory, and financial goals of clients.

## ◆ Debt Syndication

Galactico provides support services such as Structuring and critical evaluation of the short, medium or long term financial requirement, preparation of Financial plans as well as identification of size and type of the debt, arranging sanction of long term loan, facilitating execution of requisite documents and due disbursement of loans, Debentures Placement. Also facilitates Corporates in arranging the working capital limits (Fund based and Non fund based) from Banks, arranging finance by assignment of debt, cash flow financing against escrow receivables, trade credit financing etc. Galactico's debt syndication services span a wide range of offerings, including structured and mezzanine finance, project finance and acquisition finance. We have built a strong franchise in structuring appropriate financing solutions for client-specific situations and identifying appropriate institutional investors. Professionals' advice is supported by a true understanding of the issues involved and challenges faced by our clients, connectivity with the financial markets, deep sector and knowledge and a skilled negotiation process.

## ◆ Rights Issue / Buy-Back / ESOP

The focus of the Company on this activity is more with a view to serve our existing clientele in the listed space. We aim to provide services to all our clients under one roof. Buy-back: Benefits: Increases Financial Ratios. Confidence Level: It can be viewed by the management that you have enough confidence to build yourself again. On top of that, the market investors will see it as a sign of growth in the value of shares in the future. In a statical way, the stock buyback strategy improves company's earnings per share (EPS) and price to earnings ratio (P/E).

Undervaluation of Stock : Stocks can be undervalued for a lot of reasons which lead the issuing company to repurchase the shares at the reduced price and reissues the shares at the new market price after regaining popularity thereby increase in its equity capital of equity market.

ESOP: The recognition of Human Capital as the Prime Resource of business organization, has led to fierce competition for attracting, retaining and motivating talent. ESOPs in different forms are the most effective form of synergizing the interests of the employees and corporate entity they work for. It is this synergy which motivates employees to give that indefinable extra bringing sustained growth and profitability.
