| <b>Net Debt / (Cash)</b> | <b>(839)</b>  | <b>(1,022)</b> | <b>(853)</b>  |

## **BUSINESS UPDATE**

### **7. Corporate Tax Rate**

The company has fully utilized its existing tax credits in FY21 and has switched to the new corporate tax rate of 25.17% in FY22 from 34.94% (both including surcharges) in India.

### **8. Dividend**

During Q2 FY22, the company paid a dividend of ~ INR 130 crores. The dividend amount declared per share for FY21 was 100% of FV of Rs. 5.00 per share.

### **9. Business Outlook**

Brent crude touched a seven-year high of \$93.27 due to tight global supplies. Several OPEC members have struggled to meet even current monthly targets and lack spare capacity to boost production any further. Only a handful of states, notably Saudi Arabia, have some spare capacity that could possibly increase output. Even gas prices are at unprecedented high levels driven by strong demand.

Overall, the current level of elevated prices, which we believe would stay, is a big positive for WCL and is expected to drive global spending for Oil & Gas pipeline related infrastructure projects in the medium term.

We are also witnessing marked corrections in Steel Prices and they are now at a more acceptable level across geographies.

### **India**

India's leading state-owned oil and gas giants are expected to spend nearly Rs. 1.11 lakh crore together in the upcoming 2022-2023 financial year as they supplement the government's spending programme to spur economic growth. The massive capital expenditure plans were unveiled during India's recent Union budget and includes Oil & Natural Gas Corporation, Indian Oil Corporation, Gail India, Bharat Petroleum Corporation, Hindustan Petroleum Corporation and Oil India Limited

The capex spending of Rs 1.11 lakh crore in 2022-23 compares with a revised estimate of Rs 1.04 lakh crore for the current fiscal year that ends in March, according to Union budget documents and is almost 7% higher than their combined spending in the current financial year. Notably, Gas utility GAIL will invest Rs 7,500 crore in the expansion of pipeline grid and petrochemical plants.

Petroleum & Natural Gas Regulatory Board (PNGRB) upto the 10<sup>th</sup> CGD bidding round had authorized 228 Geographical Areas (GAs), comprising 407 districts in 27 States/UTs covering 53% of the geographical area and 70% of the population, for the development of CGD networks. PNGRB had launched the 11<sup>th</sup> CGD Bidding Round in September 2021 and has received 439 bids from 26 entities against 61 GAs. The Government plans to raise the share of natural gas in the country's energy basket to 15% from the current 6.3% by 2030 and city gas expansion is part of the roadmap. Despite the increase

## **BUSINESS UPDATE**

in gas prices, cost economics remain favourable for CNG and PNG (domestic) compared to alternate fuels.

The Union Budget 2022-23 has allocated Rs. 60,000 crore to extend tap water coverage to 3.8 crore households in 2022-23. The previous budget had allocated Rs. 50,000 crore for the piped water mission. The finance minister also said the implementation of the Ken-Betwa river link project at an estimated cost of Rs. 44,605 crore would be taken up soon. This is aimed at providing irrigation benefits to 9.08 lakh hectare of farmers' lands, drinking water supply for 62 lakh people, 103 MW of hydro and 27 MW of solar power. To provide greater access to irrigation and drinking water draft project reports of five river links, namely Damanganga-Pinjal, Par-Tapi-Narmada, Godavari-Krishna, Krishna-Pennar and Pennar-Cauvery have been finalized. Once a consensus is reached among the beneficiary states, the Centre will provide support for implementation.

Overall, the government's programmes reflect the continued focus on improving the lives of the people through several schemes to build water infrastructure, to increase the use of natural gas, to build refining capacity etc. We are confident that we will see a steady improvement in demand both for line pipes and DI pipes as these programmes are implemented.

## **USA**

U.S. production of dry natural gas averaged an estimated 93.5 billion cubic feet per day (Bcf/d) in 2021, up 2.0 Bcf/d (2%) from 2020. Natural gas production fell in 2020 as a result of low natural gas and oil prices that reduced drilling activity. Production grew in 2021 as drilling activity came back online, especially in the Permian Basin, where associated gas production in the region contributed to the overall growth in natural gas production. EIA forecasts dry natural gas production will increase by 2.5 Bcf/d (3%) in 2022. Recent increases in oil and domestic natural gas prices will contribute to an overall increase in drilling activity that will lead to production growth from 2Q22 onward.

U.S. crude oil production averaged 11.2 million barrels per day (b/d) in 2021. EIA expects production to average 11.8 million b/d in 2022 and to rise to 12.4 million b/d in 2023, which would be the highest annual average U.S. crude oil production on record. The current record is 12.3 million b/d, set in 2019.

Midstream companies slowed down on investing in new pipelines as there were concerns about regulatory issues and environmental opposition. Nonetheless, at the current level of high oil and gas prices we are confident of a revival in the medium term. Pipelines continue to be the cleanest and safest way to move vast amounts of energy, as opposed to more carbon-emissive methods like rail and truck.

## **BUSINESS UPDATE**

### **Saudi Arabia**

The Middle East is a key area for the welded pipes market due to rapidly growing water and gas consumption, driven by announcement of large and vital projects requiring significant investment in pipelines. The Saudi market is the main driver of the demand volume in the GCC region. Demand for HSAW pipes is driven by growth of the economy and the clear development programs launched by the government under the Kingdom's Vision 2030, the National Transformation Program, the National Industrial Development Program, Logistic Program, the Housing Program, and the Financial Sector Development Program.

Moreover, with a pickup in oil prices, we are confident that further opportunities will arise, both in the Oil & Gas and the Water segment from Saudi Aramco and SWCC.

### **10. IPO update of Joint Venture Company**

The public offering of our Joint Venture company in Kingdom of Saudi Arabia, East Pipes Integrated Company for Industry (EPIC) on the Saudi Exchange's Main Market has been successfully completed in January 2022. The IPO of EPIC was for 6.3 million ordinary shares, representing 30% of the issued share capital of 21 million shares by way of a sale of existing shares of the current shareholders on a pro-rata basis. Post the IPO, WCL will own 35.01% (from earlier 50.01%) through its step-down subsidiary in Mauritius and will continue to be the largest shareholder in EPIC. Trading of EPIC's shares in the exchange is expected to commence soon after fulfillment of all relevant statutory requirements.

The price band of the IPO during the book-building process was in the range between SAR 72 to SAR 80 per share. As per local regulations, 10% of the total offering shares were reserved for retail shareholders and the balance 90% for institutional investors. The final offer price was set at SAR 80 per share with an oversubscription coverage of 71.8x of the total offer shares for the institutional investors tranche and an oversubscription of 16.1x for the retail investors tranche.

### **11. Merger Update - Acquisition of Steel business of Welspun Steel Limited**

There is an NCLT hearing scheduled for 23<sup>rd</sup> February, 2022 and this transaction is expected to be completed by 31<sup>st</sup> March, 2022.

### **12. Business Growth & Diversification**

WCL's growth strategy entails creating a diversified product portfolio, repurposing its business to add new target segments, expanding its offerings to address both the B2B and B2C markets, and making well-considered strategic acquisitions. The Company continues to evaluate suitable opportunities, for both organic and inorganic expansions which have synergies with its existing business. It is important that the Company continues to expand and diversify its product offering for growth, predictability and to enhance earnings. As a prudent practice, detailed due diligence will be exercised with a clear oversight by the Board.

## **BUSINESS UPDATE**

Since the Company has a judicious capital allocation policy, every proposal has to first meet the internal thresholds for ROI and profitability before being considered for acceptance.

### **13. Update on Ductile Iron Pipe Project**

As announced in October 2020, given the industry prospects and synergies with our existing business, we are setting up a Greenfield facility at Anjar to enter the Ductile Iron (DI) Pipe business. We are expecting to hit the market with our product offering in Q1 FY23. There is a big focus on creating drinking water supply in the country through Government programs. As previously mentioned, Finance Minister Nirmala Sitharaman in her budget for the financial year earmarked Rs. 60,000 crore for the Jal Jeevan Mission that aims to provide potable water to 3.8 crore households in 2022-23. Overall, the Jal Shakti Ministry was allocated a total of Rs. 86,189 crore, higher from Rs. 69,052 crore allocated in the previous fiscal year.

### **14. ESG Initiatives**

WCL has been ranked 13<sup>th</sup> among the 41 companies included in its industry group (68<sup>th</sup> percentile) in S&P Global's DJSI Corporate Sustainability Assessment (CSA). WCL's Social Dimension percentile is 77 and Governance & Economic Dimension percentile is 78, both in the top quartile for the steel industry. This marks a milestone for the company, which is a part of a growing movement for ESG consciousness and transparency. Over 10,000 companies across the globe were a part of the sustainability assessments this year. Each year S&P Global invites the largest companies to participate in the Corporate Sustainability Assessment (CSA) to gain deeper insights into their ESG performance relative to peer firms while providing the transparency that investors need on their progress towards sustainability.

### **Management Comments**

Commenting on the results, Mr. B. K. Goenka, Chairman, Welspun Group said, *"I am delighted by the successful IPO completion of EPIC, our JV Company in the Kingdom of Saudi Arabia. The oversubscription numbers reflect EPIC's strong track record in exceeding customer expectations and opportunities for further growth. With the recent budgetary allocation for Oil & Gas, Water and CGD, I am also extremely hopeful of a significant growth in our India Business. Moreover, I am pleased to see that our endeavor to embed ESG into all aspects of our business has been recognized in S&P Global's DJSI Corporate Sustainability Assessment with a 68<sup>th</sup> percentile in the peer group. Overall, we have built a strong foundation and are confident of executing on our Business Growth and Diversification plans."*

- Primary Access: +91 22 6280 1325 / +91 22 7115 8226
- International Toll-Free numbers
  - Hong Kong: 800 964 448
  - Singapore: 800 1012 045
  - UK: 0808 101 1573
  - USA: 1866 746 2133

### **About Welspun Corp Ltd. (WCL)**

Welspun Corp Ltd. a flagship company of global conglomerate 'Welspun Group', one of India's fastest-growing multinationals with a leadership position in line pipes, home textiles, infrastructure, warehousing, retail, advanced textiles, and flooring solutions.

Welspun Corp Ltd. (WCL) is a one-stop service provider offering end-to-end pipe solutions ranging from 1½ inches to 140 inches. The business also offers specialized coating, double jointing, and bending as some of its core strengths. With a current capacity of over 2.5 million MTPA in Dahej, Anjar, Mandya, and Bhopal in India, Little Rock in the USA, and Dammam in Saudi Arabia; WCL takes pride in being a preferred supplier to most of the Fortune 100 Oil & Gas companies, globally.

As a part of its Business Growth & Diversification strategy, WCL is setting up a state-of-the-art Greenfield facility at Anjar to enter the Ductile Iron Pipe business. It also intends to acquire the steel business of Welspun Steel Limited (WSL) through a scheme of arrangement. Through the proposed acquisition, the company looks to add stakeholder value by manufacturing of BIS Certified Steel Billets, Direct Reduced Iron, TMT bars, Stainless & Alloy Steel and Stainless Steel Tubes & Pipes.

With 360-degree abilities in pipe products, operational excellence, and technological innovation, WCL has undertaken some of the most challenging projects around the world viz. world's deepest pipeline, world's heaviest pipeline, and others. Supported by its state-of-the-art facilities and global-scale operations, WCL caters to energy and water resource management for the safe and environmentally-friendly transportation of oil, gas, petro-products, and water.
