---	--

Dear Sir(s),

Sub: Regulation 30 of SEBI (LODR) Regulations, 2015

Ref: Presentation on unaudited financial results for the quarter ended December 31, 2022

We are pleased to enclose herewith our presentation on unaudited financial results for the quarter ended December 31, 2022.

A Copy of the presentation is also being posted on Company's Website i.e. www.polyplex.com.

Thanking you,

Yours faithfully,

For Polyplex Corporation Limited

Company Overview

Polyplex at a Glance

- Integrated and diversified manufacturer of plastic film substrates including BOPET (thin & thick), BOPP, CPP and Blown PP / PE
- Wide offering of specialty, innovative and differentiated products across a variety of packaging, electrical & electronic and other industrial applications
- Unique value proposition of on-shoring, off-shoring and near-shoring for a global customer base, while maintaining cost leadership
- Superior sales & distribution network and strong technical support in key demand centers driving deep customer relationships

Unique Global Business Model...

...With a Diverse Product Profile...

Product Breakdown (YTD Q3 FY23 Revenues)

...Across a Wide Range of Applications

Packaging

- Food & Beverage
- Labels
- Beauty, Personal & Home Care
- Healthcare & Pharma

Industrials

- Electrical & Electronic
- Building & Construction
- Film for Liners, PV and LiB for EV
- Digital

Polyplex Journey so far: Ability to identify & capitalize on opportunities

Trend-Setter With Many 'Firsts' in the Industry

First Indian manufacturer to set up overseas operations

First in the industry to operate 10.6-meter line @ 675 mpm

First in the industry to invest in post-consumer and post-industrial plastic waste recycling

Among the first to introduce chemical recycling based rPET films

Only multinational player integrated with resin at all locations

First in the industry to foray into Digital Printing Films

First Indian producer to undertake Direct Melt Casting for BOPET film manufacturing

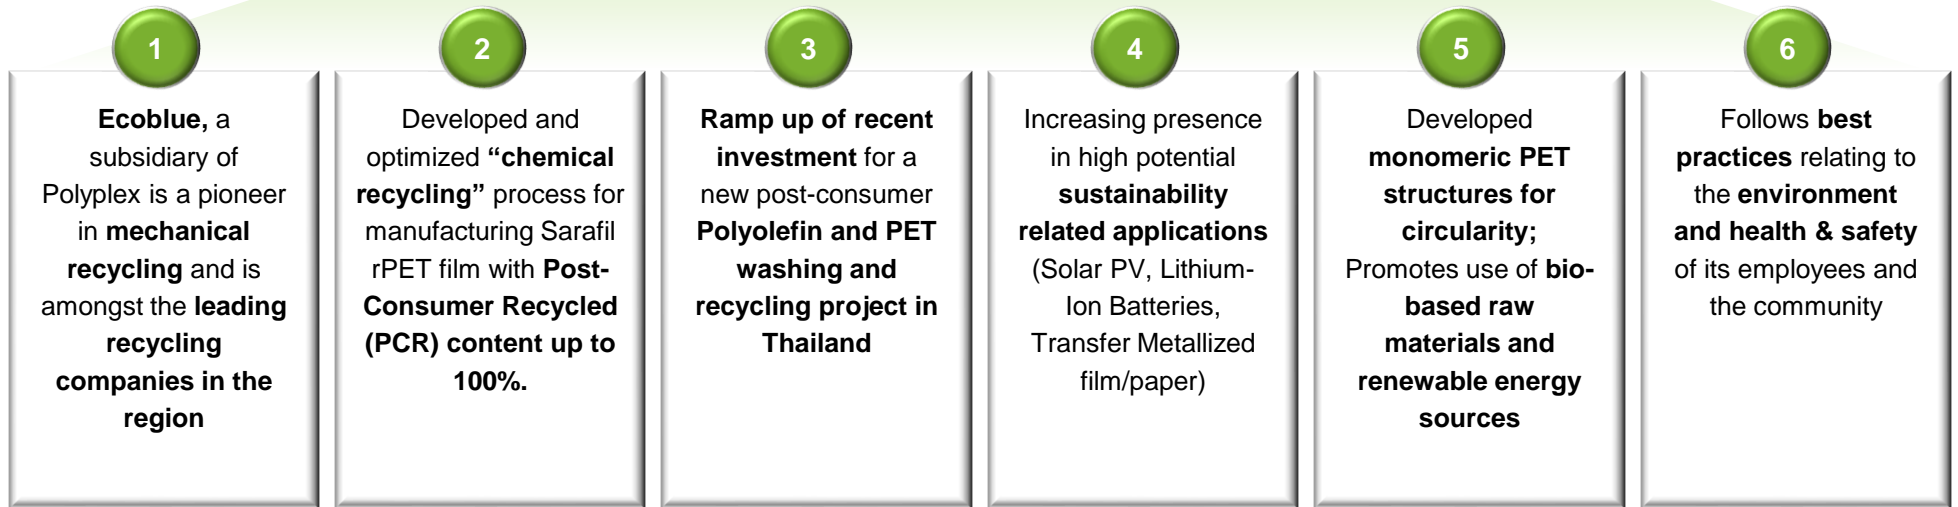

First in the industry to forward integrate into metallizing

Pioneer in Sustainable Products and Processes in the Industry

Strong Commitment Towards Sustainability Focused Innovative Solutions

- Spearheading post-consumer and post-industrial waste (PIW) recycling in the industry towards achieving the goal of circular economy
- Has taken various initiatives to recycle waste, save energy and use clean technology to assert environmental commitment

Partnering with Leading Brands to Develop Sustainable Products

Active Participation in Several Industry Groups

Q3 FY 22-23 Performance Snapshot

QoQ Growth
(Q3 FY 22-23 v/s Q2 FY 22-23) YoY Growth
(Q3 FY 22-23 v/s Q3 FY 21-22)

Sales Volume (All Films) 91,656 MT	-2% ↓	10% ↑
Sales Revenue 1,861 INR Crores (\$ 227 million)	-11% ↓	7% ↑
Normalized EBITDA 259 INR Crores (\$ 32 million)	-10% ↓	-30% ↓
PAT (Before Minority) 84 INR Crores (\$ 10 million)	-58% ↓	-72% ↓
EPS 12.32 INR/Share	-66% ↓	-78% ↓

Factors impacting QoQ:

- Lower sales revenue due to fall in selling prices resulting from decline in raw material cost as well as decline in margins due to softer market conditions
- Higher fixed costs – primarily utilities costs and impact of inflation
- In Q3 22-23, there is an unrealized FX loss of INR 98.61 crores (\$ 12.01 million) as against unrealized FX gain of INR 39.31 crores (\$ 4.93 million) in Q2 22-23 on account of restatement of foreign currency long term loans, thus impacting the PAT and EPS significantly

Factors impacting YoY:

- Higher volumes are on account of startup of BOPP line in Indonesia, thus resulting in higher revenues
- Higher Raw Material cost in Q3 22-23 along with higher fixed costs (mainly utilities cost) and softer market conditions have resulted in lower EBITDA
- In Q3 22-23, there is an unrealized FX loss of INR 98.61 crores (\$ 12.01 million) as against unrealized FX gain of INR 65.39 crores (\$ 8.73 million) in Q3 21-22 on account of restatement of foreign currency long term loans, thus impacting the PAT and EPS significantly

YTD Q3 FY 22-23 Performance Snapshot

YoY Growth
(YTD Q3 FY 22-23 v/s YTD Q3 FY 21-22)

Sales Volume (All Films) 271,888 MT	14% ↑
Sales Revenue 5,976 INR Crores (\$ 750 million)	26% ↑
Normalized EBITDA 952 INR Crores (\$ 119 million)	-2% ↓
PAT (Before Minority) 595 INR Crores (\$ 75 million)	-10% ↓
EPS 108.54 INR/Share	-11% ↓

Factors impacting YoY:

- Higher volumes on account of startup of BOPP line in Indonesia
- Higher Revenue due to:
 - Higher volumes
 - Rise in sales price of BOPET film on account of higher RM cost

The above impact was partially offset by fall in BOPP film prices

- Softer market condition and higher fixed costs have impacted the margins. However higher volumes, improving specialty mix and downstream operations have helped offset some of the impact
- In YTD 22-23, there is an unrealized FX loss of INR 29.10 crores (\$ 3.65 million) as against unrealized FX gain of INR 23.09 crores (\$ 3.11 million) in YTD 21-22 on account of restatement of foreign currency long term loans, thus impacting the PAT and EPS significantly

EBITDA Evolution

Normalized EBITDA Bridge (Q3 22-23 vs Q2 22-23)

- *Value additions have been impacted due to*
 - *Softer market conditions and*
 - *Inventory losses arising from declining RM cost trend (including lower freight rates)*
- *Improving specialty mix and downstream operations have helped offset some of the impact*
- *Higher fixed cost – mainly utilities and impact of Inflation*
- *The above numbers have been derived using simple average of monthly exchange rates for Q3 FY 22-23*
- *Bracket implies negative numbers*

Shareholders' Return

Improving Shareholders' Return

Shareholders' Return (CAGR)	Last 1 year	Last 3 years	Last 5 years	Since IPO (1988)
(A) Total Returns*

Total	435,500	43,000	284,000	28,800	95,000	10,000	18,037	102,150	5,520	1,682	83

Total Resin Capacity (incl. upcoming capacities):
478,500 in MTPA

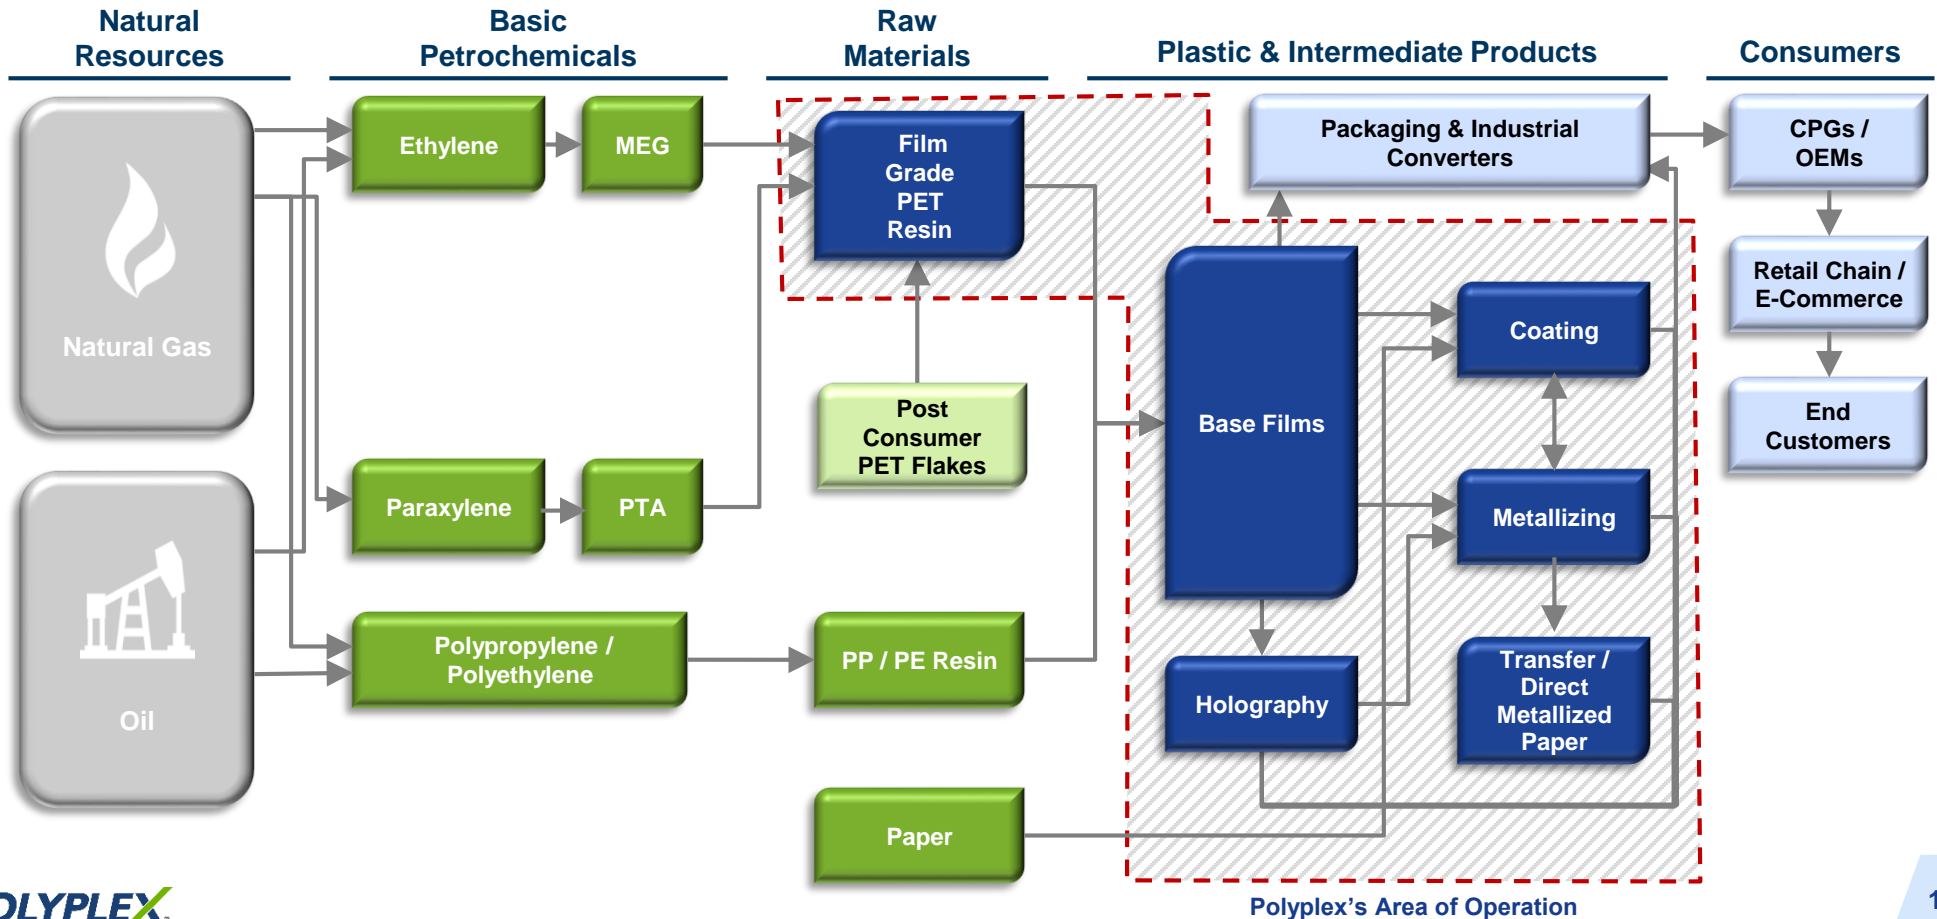

Total Base Films Capacity (incl. upcoming capacities):
435,837 in MTPA

 Upcoming capacity

1 Integrated Manufacturing Has Broadened Product Portfolio

Base Film Lines with Upstream PET Resin Plants and Downstream Capabilities

- The only global player with resin plants at all manufacturing locations
- Forward integration provides ability to undertake one or more downstream processes on the Base film, leading to higher innovation and value addition, while ensuring cost effectiveness and reduced volatility
- Backward integration is vital to developing resins required for specialty products, apart from enhancing cost competitiveness and ensuring supply security
- In-house mechanical and chemical recycling furthers Polyplex's sustainability goals, by replacing virgin PET resins (made from PTA and MEG) with Post consumer PET bales / flakes

Integrated Manufacturing Across Geographies

Ensures Supply Chain Efficiency, Cost Optimization & Lower Time to Access and Market New Products and Applications

Backward integration into captive PET resin production at all film manufacturing locations is **unique to Polyplex in this industry**

Assured and consistent availability of quality raw material

Reduced costs with adequate and secured return on incremental investment

Protects proprietary composition and helps in film product development, especially for D-PAC portfolio

Significant premium saved in buy v/s make for specialty resin

Direct Melt Casting (DMC) ensures better quality and energy management, while being cost competitive

Chemical recycling of post consumer & post-industrial waste

Opens merchandizing opportunities

Forward integration to downstream capabilities results in superior market positioning and higher returns

Wider product and application range

Diversified customer base

Increase customer and market penetration

Increased ability to provide customized and more technical products

Increasing proportion of value-added films with corresponding reduction in standard film sales

Substantial savings including freight, packing costs, wastage, fixed costs and technical development

Provides platform for future growth

2 Polyplex – A Respected Plastic Film Manufacturer

In addition to Sarafil range of standard and specialty base films, Polyplex has diversified into several value-added downstream products under Saracote, Saralam and Saraprint brands over the last 10-15 years

Sarafil®

Sarafil Base Films are suitable for a range of applications with their inherent properties of being clear, transparent, flexible, sealable, chemical inertness, high barrier, superior mechanical properties and high heat resistance

Saracote®

The Saracote range of silicone coated films (PET/PP) is designed to provide an excellent carrier to pressure sensitive material. The typical applications are in labels, tapes, roofing shingles and “peel & stick” underlayment

Saralam

The Saralam range of extrusion coated film products cater to a variety of end uses such as thermal lamination products including documents, identity cards, carton lamination and wide format commercial films

Saraprint Coloring Digitally with Innovation

Saraprint is an innovative non-tearable polyester film designed for digital print media segment for photo album, general printing, promotional & customized digital printing, mini-offset printing and labels

Focus on Highly Differentiated Specialty Film Sales

Differentiated Product, Application or Customer (D-PAC): Drives Polyplex's Right to Win in a Competitive Industry

Unique value proposition of differentiated products, applications and customers has led to a healthy growth in specialty portfolio

2 Increasing Contribution of D-PAC Sales

Continued Increase in D-PAC Volumes...

KMT (films)

...Resulting in Growth of Incremental¹ D-PAC EBITDA

Incremental EBITDA for D-PAC (\$ / kg)

EBITDA (\$ million)

Polyplex's Unique Strategy

Constant addition of new products to the differentiated portfolio, effectively “replacing” older and standard products

Sustained investments in projects in Turkey, US, India and Thailand expected to drive growth in D-PAC sales

Strong relationships and continued engagement with anchor customers for an iterative product development process

¹ The contribution from D-PAC sales to the overall EBITDA represents “incremental” margin over and above standard products net of additional costs (raw materials, differential productivity, wastages and conversion costs). As an illustration, if standard film price is 100, D-PAC product price is 200 and additional cost is 30, then the resulting incremental margin would be 70;

Constantly Innovating to Ensure Sustained Differentiation

Dedicated R&D Ecosystem in India

Demonstrated ability to partner with customers for joint product development and co-innovation due to strong technical capabilities, thereby deepening customer relationships

A separate R&D department registered with the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology (India)

14 dedicated personnel in corporate R&D supplemented by local technical service and R&D team with significant experience in chemicals, coatings, resin, converting process and other relevant fields

Growing IPR portfolio (28 patents and 8 trademarks granted, 14 patents applied for)

Focus on innovation and collaborative application development to become a **preferred supplier/partner of several large multinational customers**

Better technical services and new products are being facilitated by leveraging in-house R&D capabilities and experience

Collaborative research with government labs and educational institutions to **drive innovation and new sustainable products**

Enhanced cross-learning and sharing best practices/benchmarking across various units to **increase efficiency and synergy**

Global and Well-Diversified Customer Base

Deep-Rooted Relationships with Key Customers Spanning Over 15+ Years

- Tier I supplier to leading global and regional converters who cater to global CPGs / OEMs
- Strong manufacturing and distribution capabilities helps capitalize on the increasing preference of customers to source locally

Access to Global Customer Base...

Geographic Business Mix (YTD Q3 FY23 Revenue)

■ Americas ■ Other Asia ■ Europe ■ India ■ RoW

...Given Capability of Catering to Customers' Preference for Local Sourcing

- ✓ Domestic availability helps in improving supply chain reliability and optimizing inventory
- ✓ Changing needs of CPGs/ OEMs requiring quick turnaround
- ✓ Flexibility in small order deliveries and responding to unplanned requirements
- ✓ Domestic purchase reduces risk from pricing and foreign exchange movements
- ✓ Limited financial capability of small customers

~2,650 customers in ~75 countries across Europe, Asia (ex-India), India, the Americas and RoW

Packaging and Industrial applications (70% and 30% of YTD FY23 turnover respectively)

Diversified end-use across several industries

Low customer concentration risk with top 10 film customers accounting for 26% of total YTD FY23 turnover

Continued Focus on Operational Efficiencies and Costs

■ Business process continuous improvement and excellence programs

- Undertaking several initiatives to improve business processes and optimize costs through continuous improvement in the areas of productivity, wastage, freight, packing, energy conservation, inventory management and other processes
- Benefits from these programs have been accruing over the last several years and incremental benefits are expected in the future as well

■ Structure new investments to build on leadership in delivered cost

- Near-shore and on-shore manufacturing strategy
- Benefit from logistics and trade duty differentials

■ Capacity utilization

- Ensuring ~100% CUF across all manufacturing plants even in the context of global over-capacity (if any):
 - Swift ramp up in capacity utilization of new BOPET, BOPP and other downstream assets
- Debottlenecking existing assets

■ Asset configuration

- Cost efficiency through large contemporary assets being used for standard products
- Continue to repurpose older lines for producing specialty films efficiently
- Economies of scale through minimum asset base of two base film lines, resin plant and downstream capabilities at each manufacturing location

Superior Utilization Relative to Industry

Polyplex has consistently improved capacity utilization through debottlenecking and outperformed the industry

(Thin BOPET Film utilization)

Key Drivers for Strong Capacity Utilization

- Deep customer access and higher market penetration in key demand centers due to multi location manufacturing
- Higher and increasing proportion of specialty films
- Extensive sales and distribution network with local warehousing
- Ability to move material between different regions depending on local market conditions
- Diversification across packaging and industrial segment and in-house downstream businesses with varying market conditions
- Consistent improvement in productivity and cost competitiveness

Note:
 Polyplex CUF is calculated based on the extant capacity;
 Industry CUF as per CY, Polyplex CUF as per FY; Industry CUF is based on internal estimates;
 Expected Global CUF of the Industry will decline in CY22 as per demand supply estimates
 *CUF for the Industry may be even lower as the apparent demand has been impacted by destocking

A

Commitment Towards Sustainable Environment

- Strive to work on **sustainable products and processes**
- Continue to make multiple and substantial investments in recycling operations to provide **solutions** for post industrial as well as post-consumer plastic waste

B

Meaningful Social Impact

- Focused on the **health and safety** of employees
- Makes **monetary contributions** to NGOs, hospitals and Government relief funds and helped support the infrastructure in hospitals, especially during COVID-19
- Has undertaken **various initiatives** to help communities in areas adjoining its plants

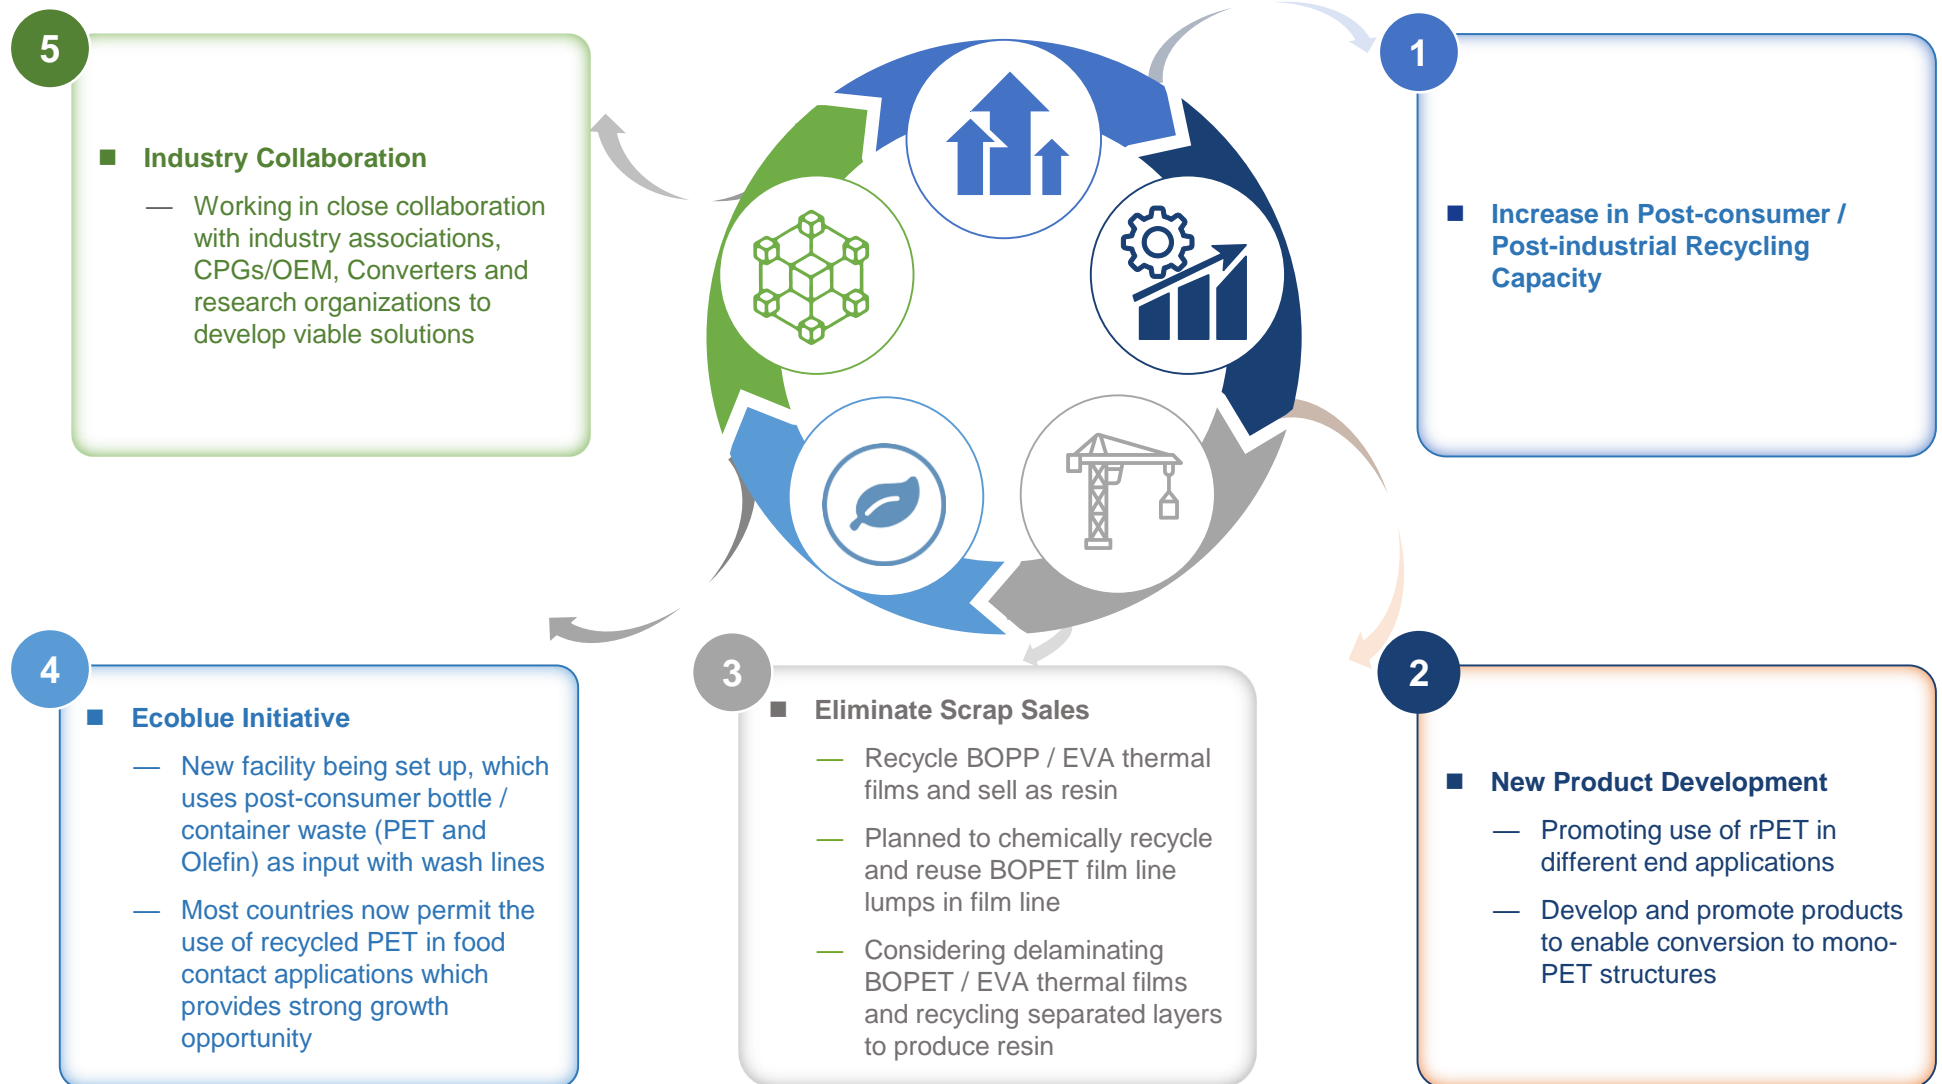

C

Strong Governance And Accountability

- Promoting fundamental values of **honesty, integrity, and ethical conduct** among all stakeholders
- Ensuring **strict adherence to laws and regulations** across all jurisdictions where it functions
- Operates with a **strong governance and accountability framework**

Continued Focus and Thrust on Sustainability

PVDC Replacement
(Transparent Barrier
Chlorine Free)

Source Reduction –
Down Gauging,
Internal Recycling

Ecoblue is helping brands meet their sustainability goals

About Ecoblue

- Starting operations in 2013, Ecoblue provides **sustainable solutions** for film-based process waste as well as post-consumer plastic waste for varied applications
- Only recycler in the region to develop **food grade products across different polymers** including rPET, rHDPE and rPP spanning several applications
- Has been working with **different post-consumer and industrial wastes** (both PET and Polyolefin based) over the years
- Focused on **developing and producing high quality recycled materials** which can replace virgin resin in high end applications such as Bottles, BOPET Film and Filament Yarn
- First in Thailand to **produce food grade rPET resin** for bottle application
- Recycling of Ocean-bound plastics
 - Working with Ocean-bound plastics marketplace platforms – Plastic Bank and Oceanworks
 - Ocean bound plastics certification – under progress

Key Products

rPET resin
rPP resin
rHDPE resin

Certifications

FDA approval & GRS certification
for rPET, rPP, rPE

Current Capacity

rPET – 32,000 TPA
Polyolefin –11,000 TPA
Manufacturing in Thailand

Global Partnerships

Avery, a Fortune 500 company, is a global leader in labeling industry.

On going partnership for recycling for Filmic Liner Waste

UPM Raflatac, a part of the Eur10 billion UPM group, is one of the world's leading producers of self-adhesive label materials.

Ongoing partnership for recycling for Filmic Liner Waste

Empowering the world to stop ocean plastic

Plastic Bank has pioneered in the concept of Social Plastic, where the individual waste collectors are rewarded by preventing marine litter in high risk zones. This has positive social impact along with the environmental *benefits*. *EcoBlue's partnership with Plastic Bank extends to setting up the Waste Collection system in Thailand and processing it into high quality recycled materials*

Promoting Sustainability Through Ecoblue

Engaged in Adopting Innovative Recycling Solutions

Ecoblue is a specialist in recycling a wide spectrum of materials

Recycling Unrecyclable Materials

Ecoblue Strap2Strap Solution

Metallized BOPET Film Recycling (Patented)

Ecoblue CircuLiner Solution

Ecoblue Laminate Solution

rPET for Virgin Replacement

Bottles

US FDA approved

BOPET Film

US FDA approved

High Quality Fiber

Recycled Polyolefin for Virgin Replacement

rHD for Bottles (under development)

rPP COPO with High Impact

rPP Clear HOPO Injection Molding & Filaments

Meaningful Social Impact

Conscientious Approach to Contribute to the Community

Fight Against COVID-19

- Ensured **safety and security of staff members** during COVID-19
 - A robust health monitoring mechanism has been put in place including handling of emergency situations
 - Proactive communication and prevention has been the hallmark of these initiatives
- **Sustained employment** for all employees during COVID-19 pandemic, including payout of additional bonus to recognize the efforts and boost the morale of the employees
- **Monetary contributions** to NGOs, hospitals and Government relief funds across all its locations
 - **Donated** medical equipment, supplies and protective gear for healthcare workers
 - **Supported** various NGOs by **providing necessary food supplies** to the communities around Polyplex's locations
 - Provided **infrastructure facilities** to Government hospitals at the plant locations in India

Job Creation

- Committed to **hiring and promoting local talent** in each of the geographies
- **Equal opportunity employer** across geographies

Education and Culture

- Has been **running a school** at its Khatima plant for the past three decades
 - The school provides over 1,750 students with best-in-class educational facilities
 - Under a PPP model at Bazpur and Khatima, Polyplex has adopted two local schools and provides them with the necessary infrastructure
- Contributed to the **Rekhta Foundation**, which is a non-profit organization established to promote and disseminate literature and culture
- Offers a **slew of sports and educational sponsorships** as well as full scholarships to the school-going children of deceased employees
- Has made **contributions to various other schools/educational institutes** in order to promote education and help contributing to a better society

Focus on SCORE

Core Values Binding the Employees

Seamlessness

- We leverage synergies across hierarchies, functions and locations

Care

- We value our people and are committed to their development
- We are sensitive to and respect diversity
- We take a long-term approach to all our relationships

Ownership and Responsibility

- We display ownership and feel responsible for the organization's performance
- We trust in the capabilities of our people and believe in delegation while adopting a hands-on approach

Excellence

- We exhibit a passion to excel and strive to continuously improve the way we work
- We constantly pursue newer and better ideas, processes, products and practices

Creating Impact Through Strong Governance

Continuously Strives to Follow Best Practices

- ✓ Committed to **promoting fundamental values of honesty, integrity, and ethical conduct** among all stakeholders

- ✓ **Strong compliance orientation**

- Adheres to all applicable laws, regulations and guidelines across all jurisdictions
- Undertakes a wide variety of steps to keep employees informed about current and proposed laws, regulations, and guidelines

- ✓ **Strong governance and accountability framework**

- Accomplished and experienced **Board of Directors in India and Thailand**
- Board of Directors have **constituted various committees in India**
 - Audit Committee, Nomination and Remuneration Committee, Stakeholder's Relationship Committee, Corporate Social Responsibility Committee and Risk Management Committee

- ✓ **Unwavering commitment towards occupational health and safety performance**

- Best practices relating to the health and safety standards by continuously improving working conditions, minimizing workplace hazards and raising awareness through involvement, participation and continuous training of the shop floor workforce
 - Focus is on ensuring that the health and safety standards are adhered to as per the local legislations and standards
 - The approach is reflected in the Environmental, Health and Safety (EHS) policy that emphasizes continuous improvement
- All the manufacturing facilities are certified on occupational health and safety management system

Recipient of Prestigious Awards and Accolades Globally

Polyplex has been a recipient of some of the most prestigious awards in the industry, demonstrating its commitment towards becoming a global leader in the industry

**Best Public Company
of 2020 – Industrial
Group at Money &
Banking Awards**

**Green Innovation
Award 2021 at ACES**

**Prime Minister's
Award for Innovation
2021 – Chemical
Recycling in Thailand**

**Best Public Company
of 2021 – Industrial
Group at Money &
Banking Awards**

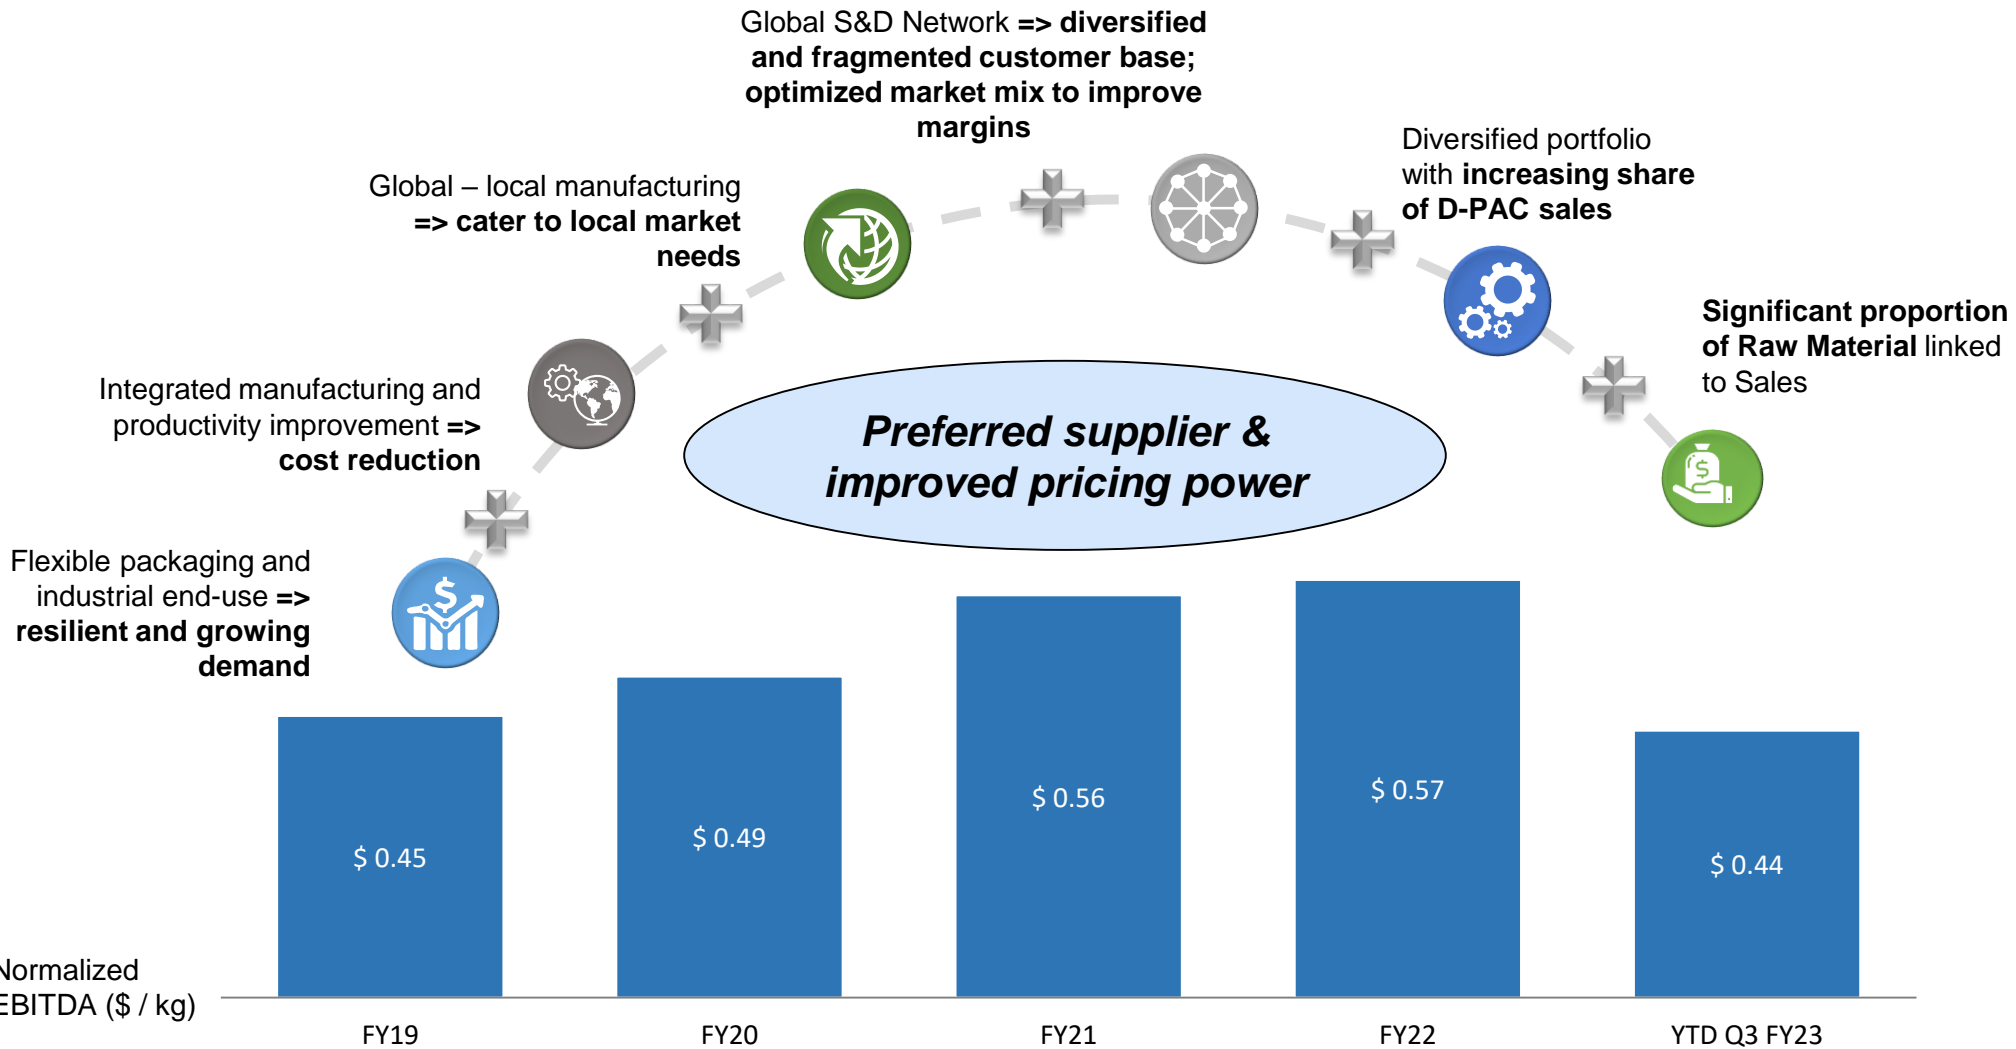

**Prime Minister's
Industry Award 2022
for Quality
Management**

Stability in Earnings

Key Attributes of the Business Model Creates a Natural Hedge Against Industry Volatility

Polyplex Has Consistently Generated Superior and Stable Gross Margins Relative to the Industry

VA Stability

Polyplex's strength as a diversified and specialty - focused business enables it to achieve steadier gross margins

- Raw Material (PTA/MEG melt cost) tracks crude oil
- Raw material movements tend to be 'pass through' in film prices
- Value Addition (VA/material margin) is dependent on industry CUF

- The gap between Polyplex and Chinese players' gross margin increases significantly during the trough of industry cycle
- Chinese players achieved a higher margin for a short period in second half of 2021 owing to supply constraints resulting from logistic disruption / energy crisis

Industry Outlook

Thin BOPET Demand

Thin BOPET Film Demand Expected to Stay Resilient and Accounts for 80% of Global BOPET Film Demand

Thin BOPET Films Expected to Be the Fastest Growing Segment in the Global BOPET Films Market

Global Thin BOPET Film Demand (KMT)

Key Trends - Demand

Global thin film growth expected to remain at **5-6%**. Due to recessionary pressures across the globe, there may be some short term impact on demand for industrial segments

Ageing population, evolving retail formats and penetration of **e-commerce**, together with **focus on safety and hygiene** has led to rise in per capita packaging material consumption. There is a **continued shift from rigid to flexible packaging**, and from loose to **packaged products**

Growth drivers include **population growth, increasing urbanization, changing demographics, trend towards nuclear families and increase in purchasing power** in developing countries

Demand driven by **higher disposable income**. Technological developments are leading to accelerated demand in **electrical, electronics and other industrial applications**, along with **new applications like LiB for EVs**, which is expected to further increase demand

Thin BOPET Industry Outlook

Upcoming Capacity Additions

- **Majority of the new capacity is being installed in low-cost developing countries - China and India**, China accounting for ~78% and India ~12% of the total upcoming capacity
- Based on the latest information, **several of the recently announced lines (primarily in China) are expected to be in non-packaging segment** with focus on optical applications, release liners etc.
- **The impact of capacity additions may be significant in China with moderate influence in other regions**, as Chinese players have typically focused only on the domestic market and select SEA markets with standard products due to variety of reasons
- **Excluding impact of China, the capacity utilization (CUF) rates are steadier with lower variance in peaks and troughs**
- **Deferment / delay in new capacity additions and the expected closure / underutilization of older lines** due to changing cost dynamics are expected to positively impact the outlook on utilization rates
- **Incremental demand over the next 5 years would exceed the new capacity** added for most of the key demand centers excluding China
- **Trend towards Deglobalization, Protectionism and preference for local and regional supplies**

Expected Capacity Additions - Thin PET Film

Polyplex Strengths

- **Players with global footprint can better withstand the regional imbalances and industry volatility**
- **With its global manufacturing presence in key demand centers, Polyplex can cater to all geographies, thereby maintaining ~100% CUF levels and superior margin profile over the years**
- **Focus on speciality and high value added products thus making earnings more predictable**
- **Competitive cost structure (on DDP basis) helps sustain competitive advantage**
- **Pricing is a function of demand/supply - effect of crude is limited as RM prices are passed through to customers with a varying lag**
- **Tax Efficient Structure**
- **Recent and ongoing capex on various line upgrades to enable optimal utilization of assets**

Growth Capex

Investment Under Implementation

Key Investment Rationale

Base Film Capacity Expansion (i.e., Second BOPET Film and Debottlenecking Resin plant) in USA

Investment in Offline Coater in USA

Total Capex: \$125 mm

■ New investment rationale:

- High level of confidence owing to established sales and distribution network
- Market growth of 10-12 KT p.a.
- Availability of captive resin
- Successful strategy deployed at all locations – 2 film lines, resin plant and downstream assets

■ Expected Start-up – Q1 FY 2024-25

■ Post this investment, Polyplex will be the most cost competitive producer of Thin BOPET films in the US

Guidance

Fourth Quarter 22-23 Guidance

Normalised EBITDA (USD million)

Key Factors impacting Q3 performance

- Slowdown in apparent demand as customers look to reduce inventory levels
- Inventory losses arising from declining RM cost trend (including lower freight rates)
- Softer market condition have impacted the margins. However, improving specialty mix and downstream operations have helped offset some of the impact
- Higher fixed cost mainly due to increase in utilities costs

Short term outlook

- RM cost expected to stabilize due to stable crude oil prices limiting the impact of inventory gains/losses movements
- Demand for industrial film is impacted by global macro economic indicators
- Our global presence, strong and improving speciality portfolio and sales & distribution network to help continuously outperform the Industry

The forward-looking statements reflect Polyplex's expectations of its next quarter earnings. These are based on certain assumptions as on date and are subject to significant risks and uncertainties, as they could be substantially influenced by several factors which are beyond Company's control including, but not limited to, fluctuations in foreign exchange rates, changes in key raw material prices, changes in market dynamics, impact of consolidation of subsidiaries and any unexpected production down times due to machinery breakdown, unforeseen delays in project start up etc. The Company does not make any representation, warranty or prediction that the results anticipated by such forward-looking statements will actually be achieved.

Annexures

Shareholder Pattern

- Polyplex Corporation Limited (PCL) is the Group Holding Company
- PCL's economic interest in the overseas businesses is 51%
- PCL listed on BSE/NSE in India and the Thai subsidiary (PTL) on the Stock Exchange of Thailand (SET)
- Shareholding of the Company (as on 31st Dec'22) is as below:

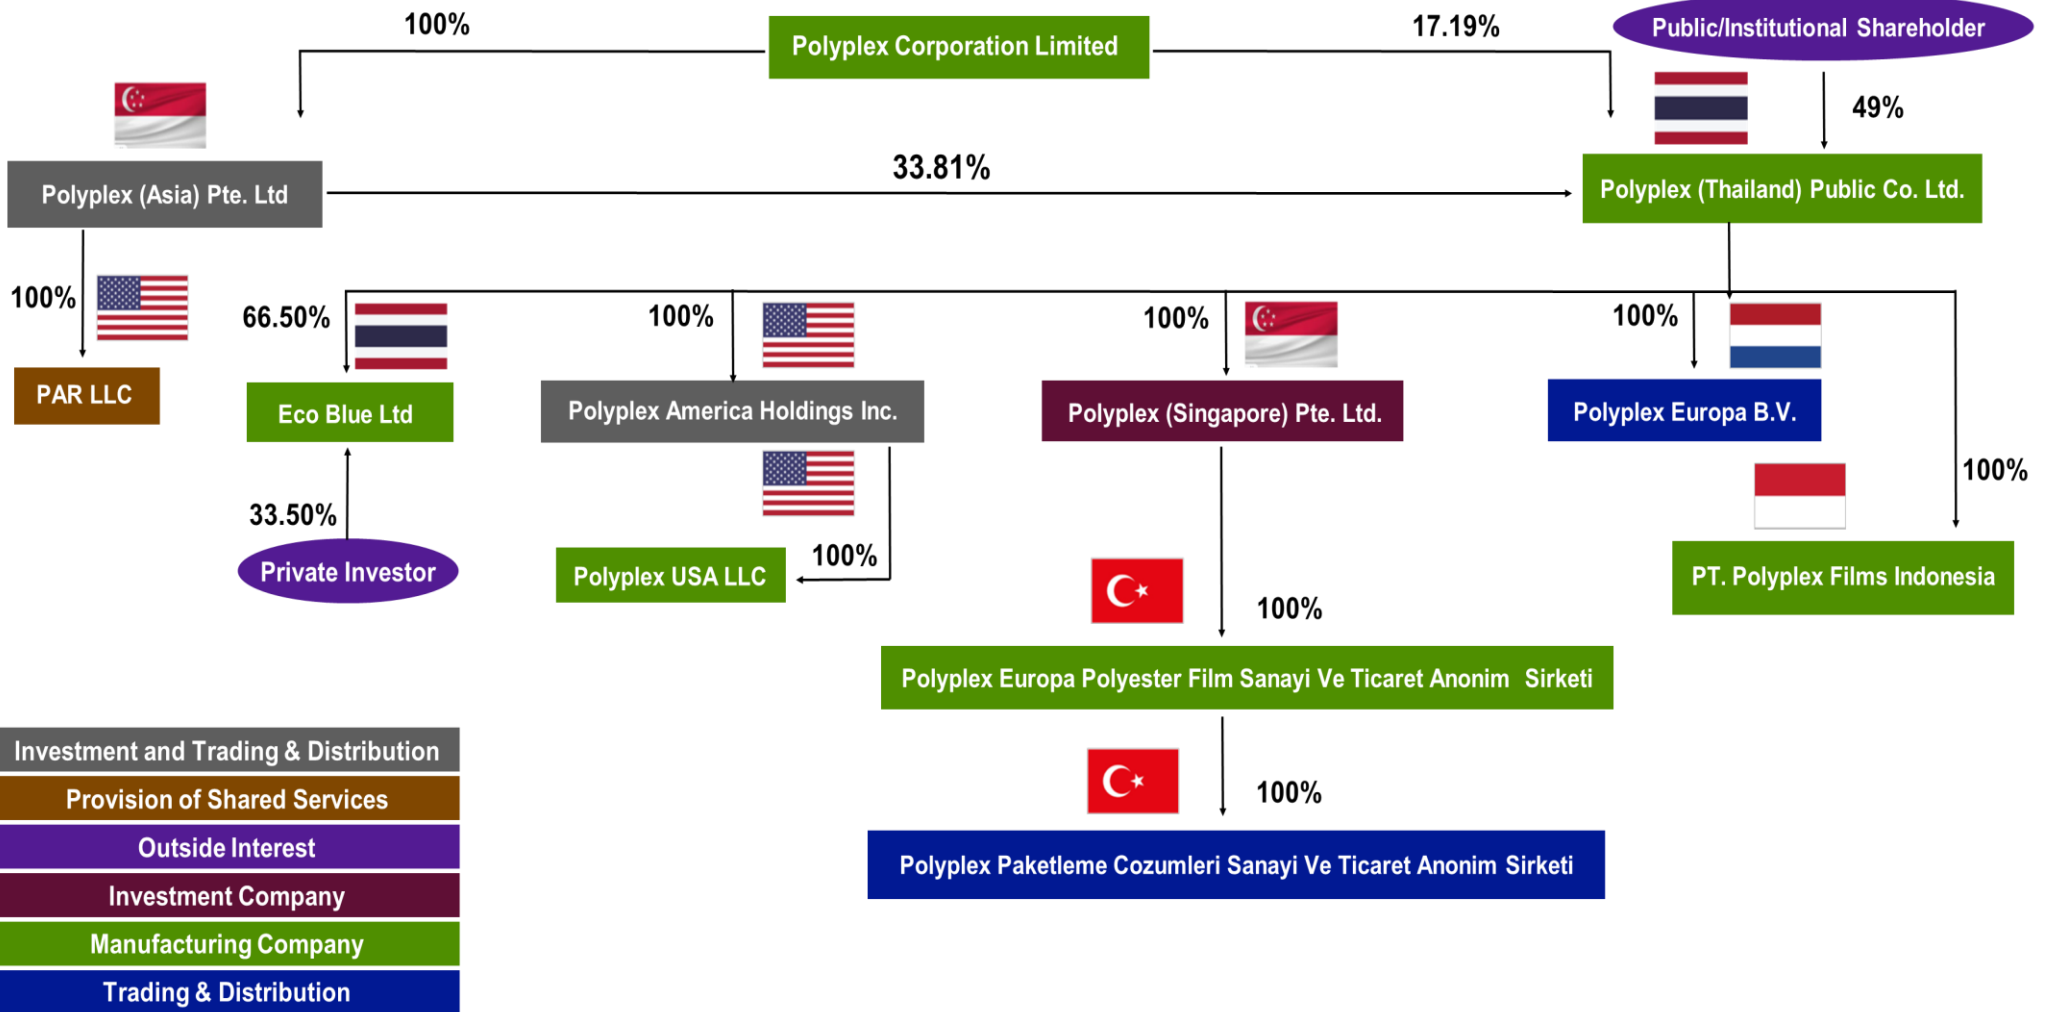

PCL Shareholding

PTL Shareholding

Group Structure
