The Corporate Relationship Department,
Bombay Stock Exchange Limited,
Floor 25, PJ Towers, Dalal Street, Mumbai – 400001.

Dear Sir,

Sub: Corporate Presentation

Ref: Pursuant to Regulation 30(2) of SEBI (LODR) Regulation 2015

We submit herewith the following Corporate Presentation on the performance of the Company, released to Analysts and Institutional Investors.

The Presentation is also being uploaded on the website of the Company, www.easterntreads.com.

Kindly take the information on your record.

Thanking you,

Yours faithfully,

For Eastern Treads Limited

CS BAIJU T.
Company Secretary

**Eastern Treads Ltd.**

Financial Performance

Q1 FY18 Performance

Q1 FY18 Highlights

- Revenue at ₹ 29.06 Crore, higher by 21.5% YoY
- EBITDA (excluding Other Income) at ₹ (1.15) Crore
- PAT stood at ₹ (1.58) Crore
- Q1FY18 EPS at ₹ (3.03) per share

Chairman's Message

Commenting on Q1 FY18 performance, Mr. Navas M Meeran – Chairman of Eastern Treads Ltd. said:

"In Q1, we delivered 21% revenue growth in a period that was marked by the impact of GST transition, continued weakness in raw material prices and irrational pricing behavior by some key competitors. While de-stocking by trade channels led to lower demand from the traditional distribution network, we augmented capacity utilization by contract manufacturing certain compounds/semi-finished products for some unorganized sector players. Volumes increased by 9% during Q1 in ongoing business – within this, contribution from our branded/value-added franchisee network increased from 16% to 22% but pricing was lower by 20%.

Overall, revenues from our ongoing business declined year-on-year, additional opportunistic sales to the unorganized sector expanded volumes at lower margins. Profitability was also impacted by lower marked-to-market valuation of inventory at the end of the quarter based on substantial reduction in raw material prices.

We currently operate in open market channel, franchisee network, specific export markets and state transport corporation business. Our network of franchisees has now expanded to [88] nationwide – this business allows significant control over pricing and margins, with lower linkage to raw material volatility. We are also exploring strategic overseas opportunities that will allow us to leverage our low cost base to deliver long-term value. We see the business impact of recent changes in the operating framework for Indian businesses create more opportunity for organized and progressive players like Eastern Treads. Our objective is to build presence across the entire retreading value chain to deliver a high-quality retreading solution to our customers."

Six-Year Financial Trend

Six-Year Financial Trend

Company Overview

Eastern Treads Ltd. (ETL)

Pioneers in Manufacturing and Marketing of Tread Rubber used for Retreading Tyres

- Over two decades of growing presence with strong customer focus
- ISO 9001-2015 certified production capacity of 12,000 tons per annum at Oonnukal, Kerala

Building Comprehensive Ecosystem across the Entire Retreading Value Chain

- Manufacturing quality tread rubber, cushion/bonding gum, black vulcanizing cement and tyre repair patches
- Creating access to high quality retreading equipment
- Providing skill enhancement/upgradation facilities within the supply chain

Extensive and Expanding Marketing Network

- Present across 17 states through 86 dealers servicing to 1,500 plus multi branded retreaders, 49 exclusive retreaders and 39 branded Infinity Zones
- 10 Company owned depots and 1 C&F's across the country for effective and aggressive servicing of all the above channels
- Company-operated, retreading experience outlets in Bengaluru and Chennai
- Working with Road Transport Corporations (RTC's) across six states

Positive Business Outlook

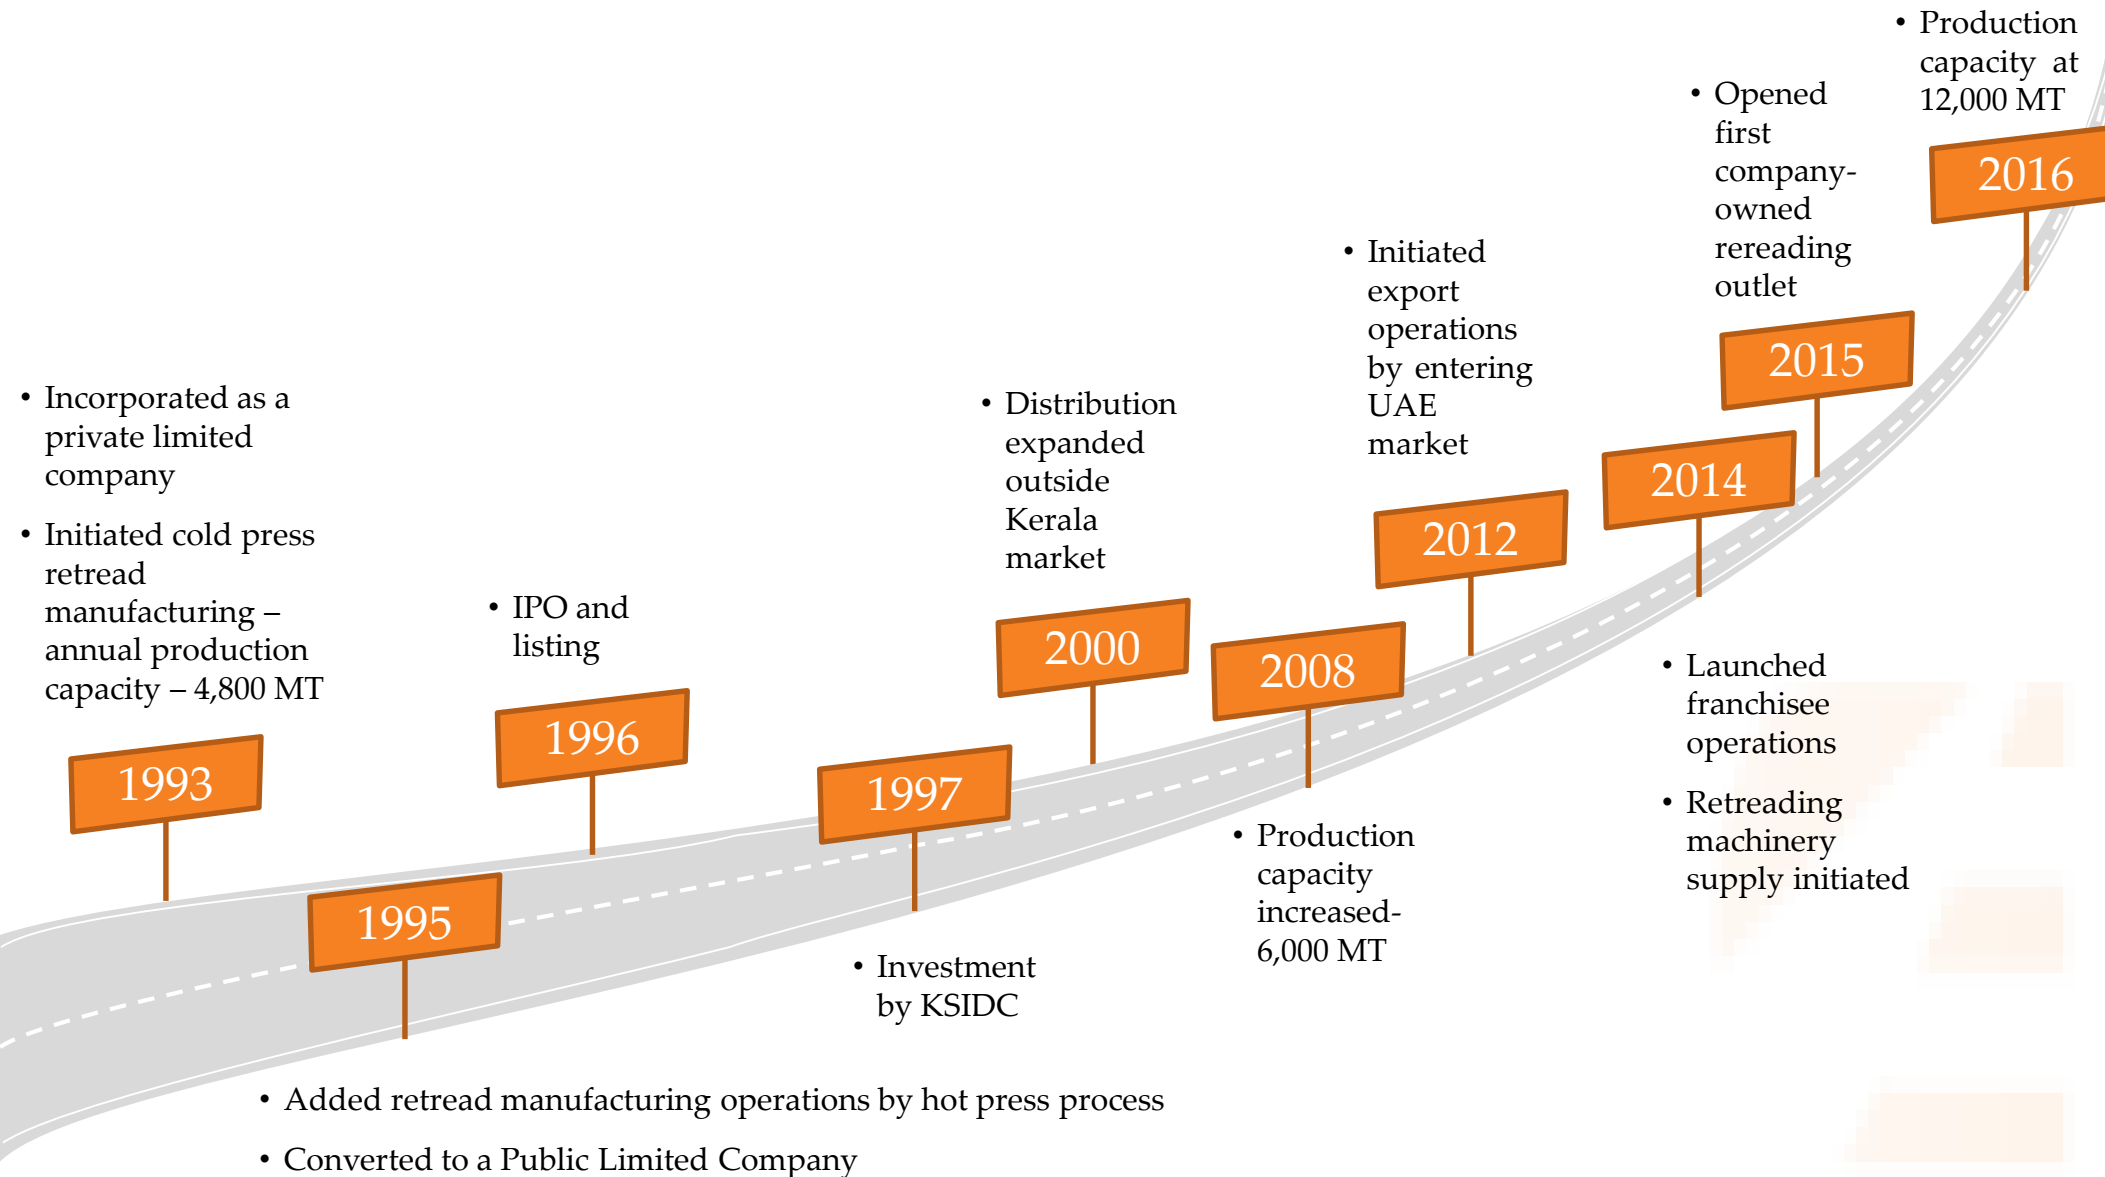

- Retreading is an established option for vehicle operators globally and becoming more mainstream in India
- Volume driven growth and value-enhancement initiatives have led to margin expansion
- Aggressive market development expected to result in medium to long term growth opportunities
- Availability of significant production capacities mean that limited capex is anticipated over next 2-3 years

Creating a Sustainable Ecosystem

- ETL is **transitioning from a tread rubber manufacturer** to a leading enabler of tyre retreading ecosystem in India.
- For retread partners, ETL enables access to **high quality tread rubber supply** and **world-class retreading equipment** with low capital deployment.
- Partner relationships are also supported by **customer/technical services** and **branding and marketing initiatives**.
- ETL is looking to create a structured system for training and **developing a sustainable workforce** for the retreading industry.
- Retreading is an established industry in key global markets. ETL is **creating comprehensive, industry leading capabilities** that would deliver long term opportunities in India and globally.

Milestones

Tyre Retreading Products

Precured Tread Rubber

- Guaranteed high mileage performance aiding reduction in operating cost
- Uniform tread wear providing good directional stability
- Consistency in quality & supply
- Product range from Auto to JCB
- Excellent grip for safety

Black Vulcanising Cement

- Ready to use solution
- Fast drying and excellent tack
- Specially formulated for both precured and conventional process
- Sufficient shelf life

Bonding Gum

- Made from 100% natural rubber
- Soft and superior tack, high bonding strength
- Compatible for 99°C, 125°C & 150°C curing operations
- Sufficient shelf life
- Can be used for splicing & nail hole/injury repair

Hot Rubber Slab & Camel Back Treads

- Both Slab & Camel Back type are available
- Good shelf life
- Available in customized sizes
- Available in different grades according to the application

Repair Patches

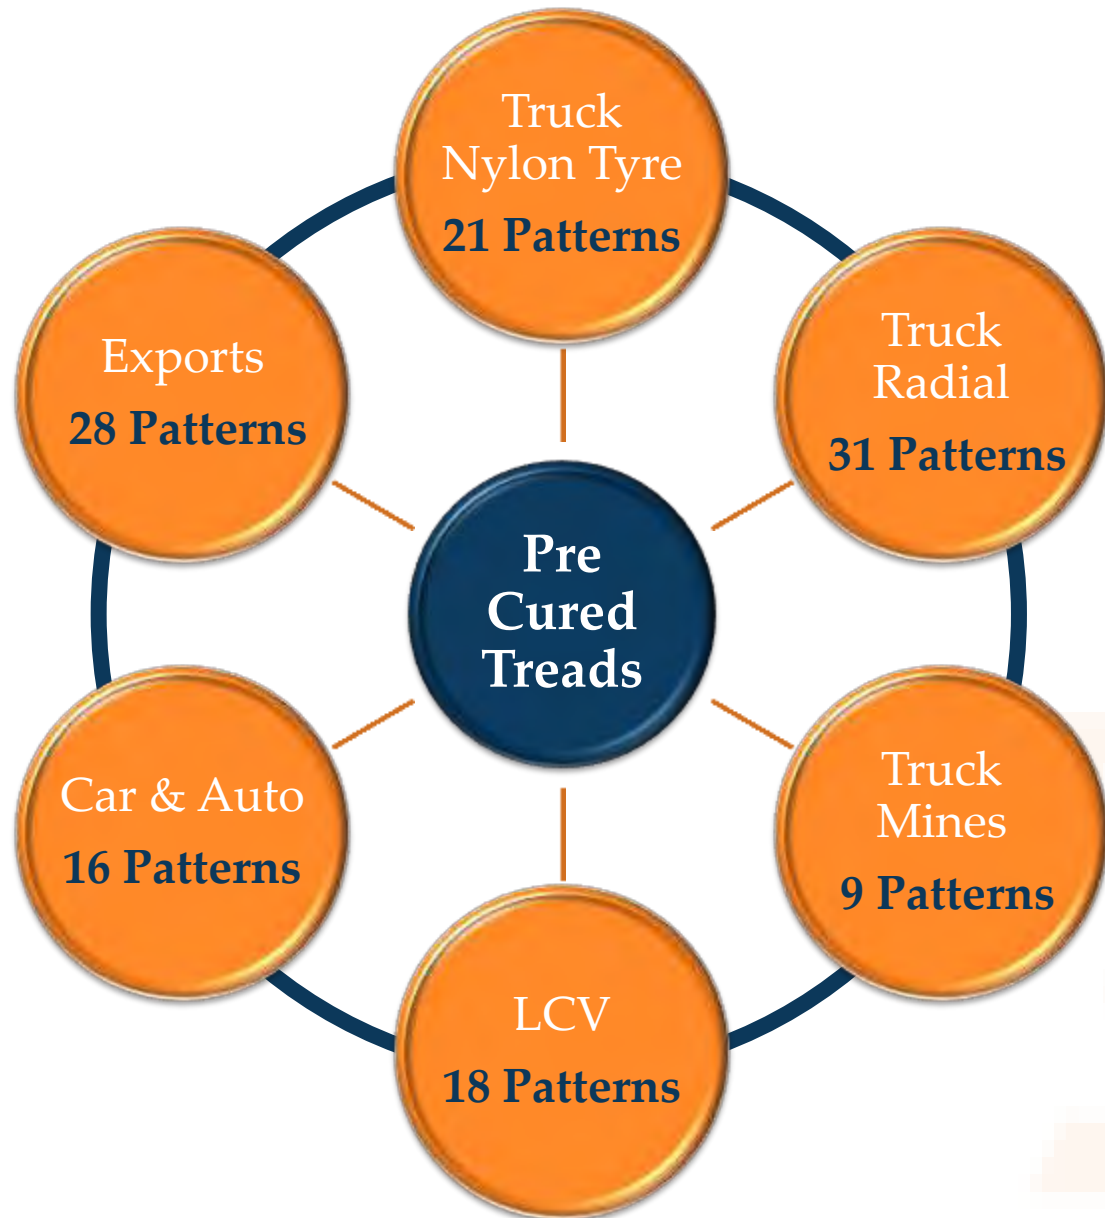

- Made from nylon fabric
- Applications available for nylon and radial tyres
- Wide range of patches for minor to major tyre injury repair
- Economic measure with safety

Production Facility

- Capacity 1,000 tons per month at Oonnukal, Kerala - Tread Rubber- 810 tons, Bonding gum- 78 tons and Black Vulcanizing Cement – 112 KL - Current utilization at ~45%
- Set up optimal manufacturing process driven by a technically proficient workforce and backed by extensive investments in R&D (having 12 member R&D team)
- Facility is on par with world standards having advanced technical hardware equipment

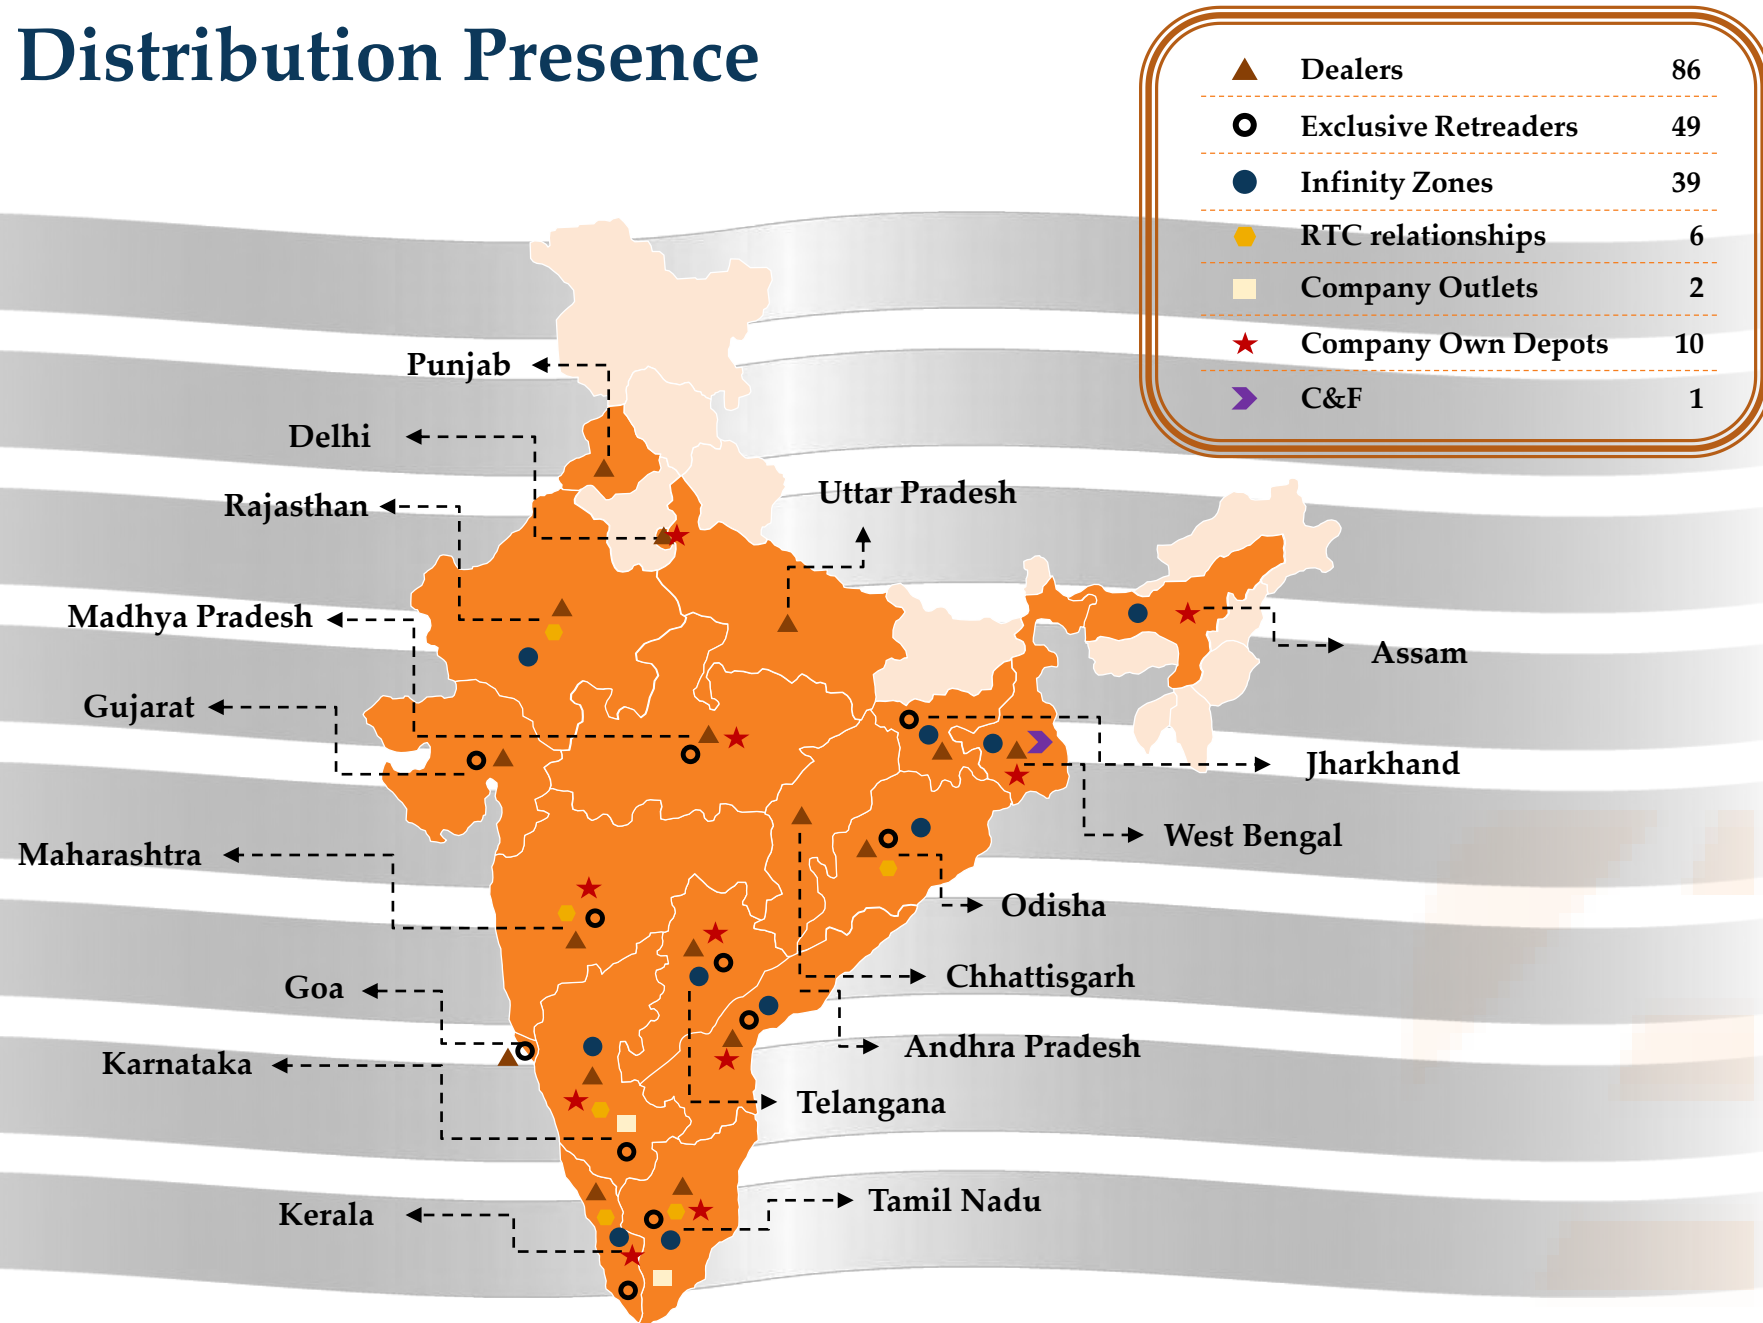

PreCured Treads – Extensive Product Portfolio

Distribution and Support Channels

Dealers	<ul style="list-style-type: none">86 dealers servicing 1,500 plus multi branded retreaders across 17 states – this open market channel constitutes the traditional sales network that uses ETL's products in the retreading process on a non-exclusive basis.
Exclusive Retreaders	<ul style="list-style-type: none">49 Exclusive Retreaders across 11 states – ETL provides a world class ecosystem for its exclusive sales channel based on access to high quality and aesthetic products, improved packaging and reliable channel support resulting in a large number of retreaders aligning with the Eastern Treads brand.
Road Transport Corporations (RTCs)	<ul style="list-style-type: none">ETL has developed strong relationships with Road Transport Corporations (RTC's) across six states namely Kerala, Tamil Nadu, Rajasthan, Karnataka, Odisha, and Maharashtra.
Company Outlets	<ul style="list-style-type: none">ETL has launched two in-house model retreading centers in Bengaluru and Chennai (called Process Evaluation Centers) to demonstrate product application processes and at the same time enhance its brand image in key usage markets.
Infinity Zone	<ul style="list-style-type: none">39 outlets across 10 states – exclusive dealer cum service points focus on providing quality retreading services to truck, bus and other fleets, equipped with sophisticated retreading machines that use high quality material and are operated by well-trained people.
Corporate Sales Team	<ul style="list-style-type: none">Spear headed by persons having rich experience in a similar field with a team size of 46 across India.
Company Depots & C&F	<ul style="list-style-type: none">10 Company owned depots and one C&F across the country for effective and aggressive servicing of all the above channels.
Global Sales Network	<ul style="list-style-type: none">ETL initiated its overseas sales operations with the first consignment of tread rubber shipped to UAE in 2012. Since then, deep relationships have been developed in UAE/Middle East, Saudi Arabia, Kenya, Tanzania, Uganda, South America, Mauritius, Bangladesh, Bhutan, Nepal based on supply world class products. Many of these regions represent a strong, long-term growth opportunity for ETL.

Wide Distribution Presence

Board of Directors & Management Team

Mr. Navas M Meeran - Chairman

Chairman of Eastern Group of Companies with substantial experience in leading businesses across verticals

Previous held positions of Chairman, Southern Region Council, Confederation of Indian Industries (CII)

Received 'Kamal Patra' awarded by the Indian Junior Chamber for being an outstanding young entrepreneur of the year in 1994

Previous held positions of Deputy Chairman, CII, Southern Region Council and Chairman, Kerala Chapter

Mr. M.E Mohamed – Managing Director

Retired from Kerala State Housing Board as Executive Engineer

Vast experience in planning and implementing projects

Under his stewardship, ETL is scaling new heights, expanding operations and embarking on several new initiatives

Mrs. Shereen Navaz - Director

Actively involved in group businesses and occupying directorship in various companies

Mr. M.S Ranganathan - Independent Director

More than three decades of service in public sector banks in various capacities

Specialized in Finance and Accounts with wide expertise in finance and administration

Board of Directors & Management Team

Mr. K.S. Neelacanta Iyer - Independent Director

Vast experience and expertise in finance, accounts and company law matters

Practicing Chartered Accountant, Senior Partner with M/s Iyer and Cherian, Chartered Accountants, Cochin

Mr. Naiju Joseph - Director

Hails from a business family of Vazhakulam engaged primarily in tyre retreading industry

Mr. K.V. Rajagopalan Nair - Nominee Director of KSIDC

Retired in 1996 as a Director General of Police, IPS cadre

Recipient of Indian police medal for meritorious service and President's police medal for distinguished service

During police service, was on deputation at CBI for eight years, also served as Managing Director at Travancore Titanium Products Limited, Kerala State Overseas Employment Promotion Consultants Limited and Kerala State Police Housing Corporation

Mr. Rajesh S - CEO , WKMP

Two decades of multi-functional experience across business operations, finance, planning, brand management, production, TQM, commercial, regulatory and HR.

Lead operational and financial initiatives at ETL for over five years with P&L responsibilities.

CS Baiju T – Company Secretary, WKMP

Fellow Member of Institute of Company Secretaries of India.

Vast experience and expertise in Finance, Accounts, Company Law matters, Listing regulations etc

Mr. Mohamed Sherif Shah – CFO, WKMP

More than 20 years of experience in Tyre retreading industry operations. Expertise in Finance, Accounts, Procurement, Management and Administration.

Strengths - One Stop Solution For All Retreading Needs

Ensure Quality Raw
Material - High Quality
Tread Rubber

Focus on R&D

Experts For Grading Rubber

- Setup for extensive training & monitoring program to improve the skills of the employees
- Providing quality On the job Industrial and training

Invests heavily on employee
development and training

- Experts For Grading Rubber
- Stringent Quality Plan For Incoming, In process & Finished Product Testing
- Testing And Lab Facilities

Strong Network

- Present across 17 States having tie-ups with 86 Dealers, 49 Exclusive Retreaders, 39 Infinity Zones
- 10 Company owned depots and 1 C&F

Shareholding Pattern & Share Price Movement

Retreading Industry

Retreading and its types

Retreading is a safe, efficient and environmentally friendly way to breathe new life into worn tyres: The "worn-out" tread of the tyre is replaced with a brand-new one and this means that the tyre can be used again!

There are two techniques for retreading:

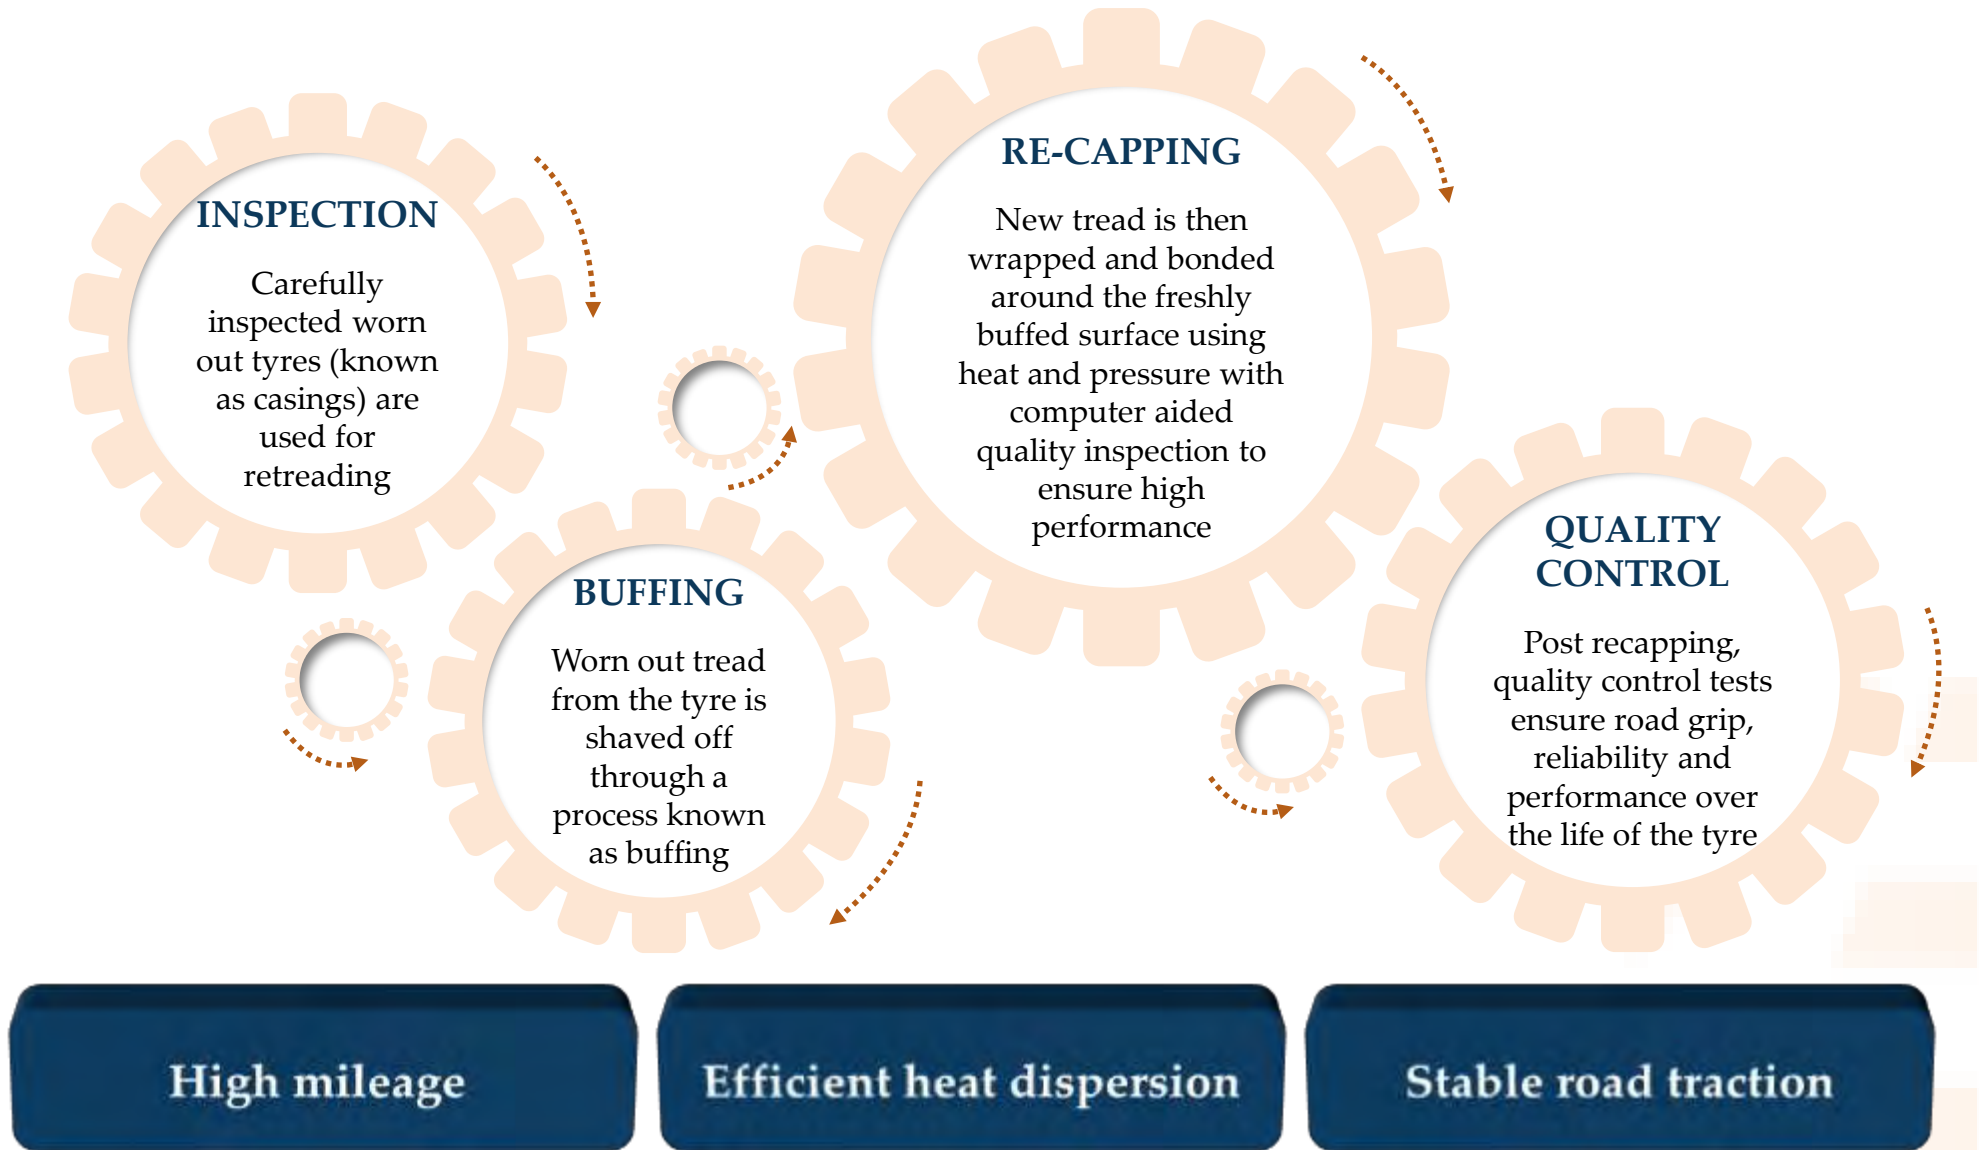

Cold Process Retreading

Precure or "cold" retreading involves vulcanisation **without a mould** at a temperature between 110 °C and 125 °C. The tyre is put together using a pre-vulcanised tread liner (= new tread) and a non-vulcanised bonding gum layer.

Hot Process Retreading

Hot retreading involves the vulcanisation of a tyre in a mould at a temperature of around 150 °C. The tread and the sidewall veneer of the tyre are made up of non-vulcanised rubber compounds. The shape and tread of the tyre are created in the heating press.

Retreading Process

Retreading - Global Usage

United States

- Retreading saves \$ 3 billion annually for the US trucking industry
- In 2013, there were 14.9 million truck tyre retreads vs 15.7 million replacements (almost half the replacement demand was met by retreads)
- Average cost of retread was \$ 250 vs \$ 401 for a replacement

Source: Modern Tire Dealer

Europe

- 4.7 million truck tyres were retreaded in the European Union in 2014
- Truck tyres are designed to be retreaded 3-5 times, aircraft tyres upto 10 times
- 40-45% of truck tyres in the EU market are retreaded tyres

Source: European Tyre and Rubber Manufacturers' Association

India

- 2014 Market Size: Rs. 3,200 crore
- Domestic growth is likely to be robust with double digit CV sales for coming years

Source: Company

Industry Trends

Expanding Road Networks

- Government's targeted construction momentum now 30 kms per day, new project awards of 10,000 kms in FY16 and targeted 12,000 kms in FY17
- Revival of stalled projects and new project momentum has led to completion of 6,300 kms in FY16, 10,000 kms targeted for FY17

Rebounding CV Sales

- Benefits have started accruing from government's focus on developing infrastructure and mining
- Rail freight rates have increased by over 50% from FY12 to FY16, road freight rates remained unchanged
- Tyre replacement demand lags vehicle sales, lag is shorter in case of commercial vehicles

Sales ('000)	FY14	FY15	FY16	FY17E	FY18E
CV	633	615	670	815	920
MHCV	201	233	299	374	402

Industry Trends

More Radialization of Tyres in India

- Improving highway and city road conditions are leading to more radialization of truck tyres
- By 2020, the majority of tyres on Indian roads are expected to be radial tyres, from 40% today
- Radial tyres have 20% longer life and provide better riding comfort
- Retreading a radial tyre consumes 10% more tread rubber and needs more sophisticated capability
- With about 31 radial patterns already in production , ETL is well equipped for future demand for radial tyres
 - More patterns are in R&D and will be introduced with time

Greater Usage of Synthetic Rubber

- Demand from Indian tyre industry currently skewed 65% to natural rubber compared to 45% globally but trend is towards synthetic rubber
- Radial tyres use 70% synthetic rubber compared to 50% in conventional tyres

Industry Trends

GST Implementation

- One-third of the Indian retreading market is currently unorganized and can potentially be consolidated following GST implementation
- Tax avoidance allows unorganized players to offer 20% lower cost – however, quality and safety preferences are already moving customers to industry leaders
- More radial tyres and larger share of market with large fleet owners also leads to consolidation to organized retreaders

Benefits of Retreading

Cost Efficiency

- Retreaded popular truck tyres cost 30%-50% of the price of new tyre
- During a 3 tyre run (1,80,000 km) cycle, about ₹43,000 can be saved by a popular size truck

Environment Friendly

- Conserves natural resources –Rubber and Oil
- Reduces environmental pressure from elongating useful life 30kgs of rubber saved per tyre
- Requires ~7 gallons of crude oil to produce a retread as opposed to 22 gallons of oil to manufacture a new tyre

Quality Performance

- Globally, regulations around tyre retreading process have standardized quality; Studies have inferred that retreaded tyres fitted accordingly perform inline with new tyres

Safety

- Globally commercial airline and jet aircrafts use retreaded tyres. 80% of aircraft tyres in the US are retreaded
- Organised retreaded follows stringent industry practiced backed by quality control and technical expertise

Low Capital Investment

- Capital expenditure in setting up a retreading manufacturing facility is comparatively very low

Going Forward

Outlook

Retreading gaining prominence in the domestic market

- Monetary advantages and environmental considerations are aiding popularity of retreaded tyres
- Improving road network, increased economic activity, higher radialisation and implementation of GST are all positives for long term growth of the sector
- Rebounding CV sales will leading to expanding market size over the next few years translating to robust medium to long term growth opportunities

ETL aims to be the leading retreading player in India and exports to key markets worldwide

- At the forefront of building a comprehensive ecosystem across the entire retreading value chain
- Extensive and expanding marketing network to penetrate further and establish a pan India presence
- Limited capex for expansion over next 2-3 years, as sizeable production capacities available currently
- To tap and further expand presence in key lucrative markets globally

About Eastern Treads Limited (ETL)

ETL, a brand from the bouquet of the Eastern Group, focuses on manufacturing and marketing tyre-retreading materials like pre-cured rubber, bonding gum, vulcanizing solutions and many other accessories. The Company has a national presence across 17 States having tie-ups with 86 Dealers, 49 Exclusive Retreaders, 39 Infinity Zones and 2 own retreading units which being serviced through 10 depots and 1 C&F's across India. The Company has also a presence in overseas markets of UAE/Middle East, Saudi Arabia, Kenya, Tanzania, Uganda, South America, Mauritius, Bangladesh, Bhutan, Nepal to cater to the heightened demand in the world market for tread rubber.
