Q4-FY23 :

- During the quarter overall production volume has increased by 8% and sales volume increased by 6% on QoQ basis.
- Most raw materials have seen price stability or are showing signs of price decrease.
- Although EBITDA Margins for Q4-FY23 reduced by 231 bps against Q3-FY23, this was dampened by further pricing pressure in finished goods, which was witnessed in most of the ingredients division products.

FY23:

- During the year, the company witnessed good demand across Flavors & Fragrances but other product categories i.e. Aroma Chemicals and Camphor remained under pressure.
- The production volume increased by 4% and sales volumes has decreased by 7%.
- Sales realisation across all product categories in ingredients division either reduced or remained flat on Y-o-Y basis.
- During the year, there is substantial increase in the price of all utility costs which have impacted the profitability for the year.

Capital Expenditure Update:

- Capital investments program in Baroda, Bareilly and Mahad are on track. However, they faced moderate delays due to combination of factors which include challenges in certain electrical and instrumentation equipment's due to the global shortage of chips.
- We are expecting to complete all the ongoing projects by the end of Financial year 2023-24.
