Commenting on the results and performance, Mr. D.C. Sharma, Group CFO

"With a backdrop of a slow recovery in the Indian automotive industry, I am pleased to announce strong quarterly results for Minda Corporation. A strategic product and geographic mix enabled us to deliver topline growth of 15.2% and EBITDA growth of 13.8%. EBITDA margins of 9.5% represent an unwavering focus on cost optimisation and operational improvements.

Another factor that has underpinned our financial success over the quarter is tight balance sheet management. We brought down the level of Net Debt by approximately 8% during the quarter. As a result of this and better cash flow management, our credit rating was upgraded to CRISIL A/ Stable/ CRISIL A1. This development underscores the integrity of Minda's senior management and serves to reinforce the trust our valued investors have placed in our abilities.

We admit that the automotive industry has been slow to recover. The Indian two wheeler industry has been particularly impacted by the decline in rural incomes. However, we are beginning to see a strong upturn in the international markets, especially in North America and Europe. We are confident that the various reforms initiated by the central government will eventually place more purchasing power in the hand of the average Indian leading to improved consumer confidence and higher automotive demand. Minda Corporation, through its highly strategic product mix, is well placed to cater to this additional demand.

I would like to take this opportunity to thank our extremely valued employees and shareholders for their continued support and confidence in us, as we reach new heights in the quest for excellence in manufacturing and world-class customer service."
