BHARAT FORGE LTD Q4 & FY24 ANALYST UPDATE

Management Commentary: Q4 FY24 Performance

BHARAT FORGE

BFL 3 Month Report: “The company ended the year on a strong note with topline growing by 16.6% to Rs 2,329 Crores while EBITDA grew by 25.1% to Rs 654 Crores resulting in EBITDA margins of 28.1% in Q4 FY24. For the full year, topline grew by 18.4% to Rs 8,969 Crores and EBITDA grew by 28.0% to Rs 2,469 Crores. A key driver of the strong performance was the fulfilment of defence export orders won by KSSL and the continued strong ramp-up of exports business across all business segments except Oil & Gas. The balance sheet continues to remain robust, with cash (Net of LTL) of Rs 815 Crores and sharp improvement in all key parameters. At a consolidated level, topline grew by 21.5% to Rs 15,682 Crores and EBITDA grew by 44.4% to Rs 2,566 Crores.

In FY24, the Indian operations have secured new orders worth Rs 1,350 Crores across automotive & industrial applications. This includes a healthy mix of existing and new customers across traditional & new products.

BFL group’s defence business recorded revenues of Rs 1,561 Crores, a near 4X jump as compared to FY23. The company secured new orders worth Rs 4,494 Crores across Artillery systems, Armored vehicles and consumables. The executable order book stands at Rs 5,192 Crores as of March 31, 2024.

In FY24, the industrial casting vertical recorded a strong performance with topline growing by 28%, EBITDA growth of 57% and PBT doubling compared to FY23. The company has secured new orders worth Rs 460 Crores in FY 24. Over the past 2 years, the business has made tremendous progress in reducing its customer and sector concentration and has developed a more balanced business mix across Automotive, Construction & Mining, Hydraulics & Wind energy.

We have set up a AI/Digital manufacturing center which will catalyze the engineering/ manufacturing activities and enable improvement in productivity and shorten time to market products.

At a consolidated level, we expect FY25 to be a year of growth driven by Defence business, Industrial casting business and continued improvement in capacity utilization of the overseas business. The turnaround of the overseas business coupled with margin improvement in other business verticals should result in strong growth in profitability in FY25.”

B.N. Kalyani,

Chairman & Managing Director

Q4 FY24

Revenue

EBITDA

PBT before Ex. Gain/ Loss

FY24

Revenue

EBITDA

PBT before Ex. Gain/ Loss

- Revenues at Rs 23,286 million in Q4FY24 grew by 16.6% as compared to Q4 FY23 driven by execution on defence export order and Passenger vehicle exports.

- EBITDA margin at 28.1% in Q4 FY24 represents a 190 bps improvement YoY driven by improved product mix. For FY24, EBBITDA margins have expanded by 200 bps to 27.5%.

- PBT before Exchange gain/ (loss) of Rs 5,210 million in Q4 FY24 as against Rs 3,910 million in Q4 FY23 reflect the operating leverage driven by strong top-line performance.

Industrial

Automotive Business: FY24 was an year of consolidation for the MHCV industry in India after two years of spectacular growth. BFL too saw mild revenue accretion in its CV business. We continue to aim for growth which is in-line with the market. The market is likely to see more activity as the election process concludes and Capex spend accelerates.

The premiumization trend in the PV segment continues, with Utility vehicles now accounting for more than 50% of the sales. Growing disposable income is likely to keep the overall premiumisation trend intact.

Industrials Business: The Industrial segment saw its revenue rise 72% in FY24. The sharp rise was driven by supply of components & products for defence application. Apart from defence, green shoots in private capex around Sugar, Cement and Steel continue to aid demand for the industrials vertical.

Note: Other Revenue stood at Rs 1,242 million in Q4FY24

Commercial Vehicles

Passenger Vehicles

Industrial

Commercial Vehicles

Passenger Vehicles

Industrial

Automotive Business: Export CV business remained steady in FY24 with revenue up 8.5% YoY. Order backlog, inventory and cancellation rates remain at reasonable levels. Going ahead, North America Class 8 production is likely to remain flat with a moderately negative bias in CY24. Though inflationary pressures have abated in Europe, sustainable recovery remains elusive. BFL remains well placed to outperform the overall market.

PV export revenues in FY24 at Rs 12,694 million have grown by 33% YoY. Market share gains, increased geographical foot-print and value-addition continued to drive the stellar performance. BFL continues to deepen its client portfolio and diversify across geographies.

Industrials Business: FY23 industrial revenue at Rs 15,454 million was flat YoY. Our strategy at diversifying the basket to minimize sectoral volatility has yielded the desired benefit. Revenue ex Oil & Gas was up 35% YoY primarily due to strong performance in construction & Mining, Aerospace, Defence and Railways

We continue to focus on building new relationships within the Industrial space targeted at Construction & Mining, Railways, Aerospace etc.
