Chairman's Speech

Dear shareholders,

Welcome to ABB India's 74th Annual General Meeting at our green certified campus in Peenya, Bengaluru. It has been your longstanding request, and we are happy that we could finally host the meeting and welcome you to an ABB campus. Sanjeev will speak more on the significance of the place where we are. Like every year, I will provide an overall view in alignment with the ABB Group and Sanjeev will share the specifics.

During the last three years, ABB India has grown annually in healthy double digits with the market capitalization increasing almost four-fold. Your Company's performance has perfectly mirrored the growth of the Indian economy with the revival of government-led capital expenditure across multiple sectors.

ABB India has been working with customers and partners to meticulously craft their respective growth journeys in a sustainable and resource-efficient manner.

This has been led by our purpose and the 'ABB Way' operating model. We have made our own processes more robust and efficient, and further deepened our footprint in the country.

With a highly localized portfolio and global technology leadership, ABB India has partnered the nation's development journey over several decades. ABB India's portfolio of digital and energy efficient solutions also partner in strengthening the digital infrastructure backbone of the country, while minimizing the impact of climate change.

Delivering on our commitment

ABB India has consistently delivered a solid performance across all key parameters such as orders, revenue, profitability and cashflow generation. The Company has built a robust pipeline of orders from a diverse set of sectors like data centers, electronics, metros and railways, renewables, automotive, water and wastewater and power distribution. Simultaneously, we have deepened our base in segments like metals, mining, cement, pulp, and paper through our energy efficient and eco-friendly solutions. 2023 is the year of many “firsts” for your Company - from financial milestones to hosting the AGM at an ABB campus.

The year was marked by record high orders of INR 12,319 crore (order backlog up by 30 per cent) and revenue of INR 10,447 crore.

Our profit after tax increased by 22 per cent while our cash position continues to be robust.

This was also the first year when two dividends were declared in a single year. A special one was already paid in August 2023 and a final one is now proposed to be approved by all of you, our shareholders, at this Annual General Meeting.

Creating value now and for the future

Our Indian operations, fully aligned with the ABB Way model of operation, are now yielding greater benefits from the portfolio realignment and productization.

We are actively managing our business portfolio to ensure that our divisions conform to our company purpose and deliver on our commitments to stakeholders.

Our portfolio has expanded significantly, now serving 23 segments comprising core and emerging or lighter ones as compared to seven segments back in the pre-COVID days. The share of the lighter segments (data centers, electronics, water, F&B, pharma, warehouse, and logistics, etc.) to the orders’ basket has doubled in the last five years. This renders

greater flexibility in business model and risk mitigation in response to market dynamics.

ABB India continues to work closely with all its customers, channel partners and system integrators, deeper in the tiers 2 and 3 cities to fulfill their growth ambitions in a sustainable manner. From smaller cities to global markets, your company has also deployed a multi-pronged strategy to cater to evolving customer demands.

To increase market allocation for exports, your Company deployed:

- regional strategies,
- global feeder factories,
- product customizations,
- OEM or channel focus as per geographies
- and local certifications

These in turn have ensured preference for ABB India products in varied geographies.

Partnering the India growth story

India continues to be a beacon of growth in a global landscape, which though uncertain, has been able to avoid some major projected risks in 2023.

ABB India's solutions have been an integral part of this journey in power distribution, smart power, or smart building technology for projects of national importance.

ABB's 'Made in India' global technology solutions such as energy efficient drives, eco-efficient switchgears, automation, and digitalization solutions are catalyzing the country's energy transition with renewables (solar and wind) and hydrogen.

Our automation solutions have been ensuring effective monitoring and tracking of resources - be it water, energy or the last mile delivery and connectivity for natural gas.

ABB has also been effectively partnering the transformation of Indian industries in steel, cement, oil and gas, pulp and paper, and mining for a greener and more sustainable mode of operation. The robotics solutions are also playing a significant role in the nation's rapid strides in self-reliance and localization of value chain in the electronics segment.

ABB's traction technology and electrification solutions are also a part of India's journey of electrifying transport networks with varying levels of high-speed and semi high-speed trains. Metals and railways have been two key areas for our large orders. Our solutions are well entrenched in the automotive sector, in manufacturing and optimizing paint usage, and battery tray assembly of electric vehicles, among other applications. The exponential rise in airports in the country has also provided an opportunity for switching technology, distribution products, electrification panels and building automation solutions.

Sustainability

The company has been working closely with our customers, suppliers, and partners across the country to imbibe sustainability in their activities. We are witnessing a surge in the number of companies joining the Energy Efficiency Movement in India. A multi-city symposium on the topic was held for industry peers and partners to enhance awareness about the available solutions to drive efficiency initiatives in their organizations.

Safety and integrity provide us with the license to operate. In June 2023, the Health, Safety, Environment and Security policy was updated to reinforce ABB's commitment to putting health, safety, the environment, and security at the center of our activities. Last year, ABB Group also updated its Code of Conduct and Supplier Code of Conduct and implemented processes and programs to strengthen its integrity culture and enhance risk monitoring. You can read more it in the ABB India annual report 2023.

The Annual Report will also highlight our achievements and targets in sustainability e.g. GHG emissions of Scope 1 and 2, water conservation and

recycling, and renewable electricity. The updates on community projects, human rights, diversity and inclusion, safety and integrity will also be highlighted in the Business Responsibility and Sustainability Report.

Facing the future with confidence

ABB India has made solid, record progress in 2023. This has been a gradual and positive journey of various initiatives involving people, processes, and products cumulatively over the last few years. Empowered by the guidance of our seasoned Board of Directors, we are poised to sustain this growth trajectory, going forward. ABB India is set to create benchmarks and new growth templates underlined by sustainability and integrity.

On behalf of the Board of Directors, we would like to thank all our stakeholders for their continued trust and support. Together with our customers, employees, partners, suppliers, and investors, we will continue to provide superior value for all our stakeholders by balancing the needs of society, the economy, and the environment.
